BOARD OF ESTIMATE AND APPORTIONMENT.

Minutes of Meeting of Board of Estimate and Apportionment, Held in Room 16, City Hall, Thursday, July 6, 1911.

FINANCIAL AND FRANCHISE MATTERS.

The Board met in pursuance of an adjournment.

Present—William J. Gaynor, Mayor; William A. Prendergast, Comptroller; John Purroy Mitchel, President, Board of Aldermen; George McAneny, President, Borough of Manhattan; Alfred E. Steers, President, Borough of Brooklyn; Cyrus C. Miller, President, Borough of The Bronx; Lawrence Gresser, President, Borough of Queens, and George Cromwell, President, Borough of Richmond.

The Mayor, Hon. William J. Gaynor, presided.

After disposing of the Public Improvements Calendar, the following Financial and Franchise Matters were considered:

The minutes (Financial and Franchise Matters) of the meeting held June 29, 1911, and of special meeting (Franchise Matters) held June 29, 1911, as printed in the City Record July 6, 1911, were approved.

FRANCHISE MATTERS.

Southern Boulevard Railroad Company.

The public hearing was opened on the form of contract for the grant of a franchise to the Southern Boulevard Railroad Company to construct, maintain and operate a railway from the existing tracks of the company at the intersection of Southern boulevard and Boston road upon and along Southern boulevard to, and connecting with, the existing tracks of the Union Railway Company of New York City, in Pelham avenue, Borough of The Bronx.

The hearing was fixed for this day by resolution adopted May 25, 1911.

Affidavits of publication were received from the "Sun," the "Evening Mail" and the City Record.

No one appeared in opposition to or in favor of the proposed grant, and the Chair declared the hearing closed.

The following was offered:

Resolved, That the Board of Estimate and Apportionment hereby grants to the Southern Boulevard Railroad Company the franchise or right fully set out and described in the following form of proposed contract for the grant thereof, embodying all the terms and conditions, including the provisions as to rates, fares and charges, upon and subject to the terms and conditions in said proposed form of contract contained and that the Mayor of The City of New York be and he hereby is authorized to execute and deliver such contract, in the name and on behalf of The City of New York, as follows, to wit:

This contract made this day of , 1911, by and between The City of New York (hereinafter called the City), party of the first part, by the Mayor of said City, acting for and in the name of said City, under and in pursuance of the authority of the Board of Estimate and Apportionment of said City (hereinafter called the Board), and the Southern Boulevard Railroad Company (hereinafter called the Company), party of the second part, witnesseth:

In consideration of the mutual covenants and agreements herein contained, the parties hereto do hereby covenant and agree as follows:

Section 1. The City hereby grants to the Company, subject to the conditions and provisions hereinafter set forth, the right and privilege to construct, maintain and operate a double track street surface railway as an extension to its existing railway, with the necessary wires and equipment, for the purpose of conveying passengers only, in the Borough of The Bronx, in The City of New York, upon the following route, to wit:

Beginning at and connecting with the existing tracks of the Company in Southern boulevard at its intersection with Boston road; thence in a general northerly direction in and upon said Southern boulevard to and connecting with the existing tracks of the Union Railway Company of New York City in Pelham avenue, and to cross such other streets and avenues, named and unnamed, as may be encountered in said route. Provided, however, that nothing in this contract shall be construed as permitting more than a double track street surface railway in any portion of Southern boulevard.

The said route, with turnouts, switches and crossovers hereby authorized, is shown upon a map entitled:

"Map showing proposed extension of the Southern Boulevard Railroad Co. in the Borough of The Bronx, City of New York, to accompany petition dated October 27, 1910, to the Board of Estimate and Apportionment,"

—and signed by Edward A. Maher, President, and T. F. Mullaney, Chief Engineer, a copy of which is attached hereto, is to be deemed a part of this contract, is to be construed with the text thereof, and is to be substantially followed, provided that deviations therefrom and additional turnouts, switches and crossovers which are consistent with the foregoing description and the other provisions of this contract may be permitted by resolution of the Board.

Sec. 2. The grant of this privilege is subject to the following conditions, which shall be complied with by the Company:

First—The consent in writing of the owners of half in value of the property bounded on said streets and avenues to the construction and operation of said railway, shall be obtained by the Company within three (3) months from the signing of this contract by the Mayor, and a copy of such consents shall be filed with the Board within such time, or in the event that such consents cannot be obtained within such time, the Company shall within said three (3) months or within one (1) month thereafter, make application to the Appellate Division of the Supreme Court for the appointment of Commissioners in the manner provided by the Railroad Law to determine if said railway ought to be constructed; otherwise this grant shall cease and determine.

Second—The said right to construct, maintain and operate said railway shall be held and enjoyed by the Company from the date upon which this contract is signed by the Mayor until March 1, 1924, with the privilege of renewal of said contract for the further period of twenty-five (25) years, upon a fair revaluation of such right and privilege.

If the Company shall determine to exercise its privilege of renewal it shall make application to the Board, or any authority which shall be authorized by law to act for the City in place of the Board. Such application shall be made at any time not earlier than two (2) years and not later than one (1) year before the expiration of the original term of this contract. The determination of the revaluation shall be sufficient if agreed to in writing by the Company and the Board, but in no case shall the annual rate of compensation to the City be fixed at a less amount than the sum required to be paid during the last year prior to the termination of the original term of this contract.

If the Company and the Board shall not reach such agreement on or before the day one (1) year before the expiration of the original term of this contract, then the annual rate of compensation for such succeeding twenty-five (25) years shall be reasonable, and either the City (by the Board) or the Company shall be bound upon request of the other to enter into a written agreement with each other fixing the rate of such compensation at such amount as shall be reasonable, but in no case shall the annual rate so fixed be less than the sum required to be paid for the last year prior to the termination of the original term of this contract, and if the parties shall not forthwith agree upon what is reasonable, then the parties shall enter into a written agreement fixing such annual rate and at such amount as shall be determined by three disinterested freeholders selected in the following manner:

One disinterested freeholder shall be chosen by the Board; one disinterested freeholder shall be chosen by the Company; these two shall choose a third disinterested freeholder, and the three so chosen shall act as appraisers and shall make the revaluation aforesaid. Such appraisers shall be chosen at least six (6) months prior to the expiration of this original contract, and their report shall be filed with the Board within three (3) months after they are chosen. They shall act as appraisers and not as arbitrators. They may base their judgment upon their own experience and upon such information as they may obtain by inquiries and investigations, without the presence of either party. They shall have the right to examine any of the books of the Company and its officers under oath. The valuations so ascertained, fixed and determined shall be conclusive upon both parties, but no annual sum shall, in any event, be less than the sum required to be paid for the last year of the original term of this contract. If in any case the annual rate shall not be fixed prior to the termination of the original term of this contract, then the Company shall pay the annual rate theretofore prevailing until the new rate shall be determined, and shall then make up to the City any amount of any excess of the annual rate then determined over the previous annual rate. The compensation and expenses of the said appraisers shall be borne jointly by the City and the Company, each paying one-half thereof.

Third—The Company shall pay to the City for the privilege hereby granted, the following sums of money:

(a) The sum of one thousand dollars ($1,000) in cash within three (3) months after the date on which this contract is signed by the Mayor, and before anything is done in exercise of the privilege hereby granted.

(b) During the first term of five (5) years an annual sum which shall in no case be less than six hundred dollars ($600), and which shall be equal to three (3) per cent. of its gross annual receipts if such percentage shall exceed the sum of six hundred dollars ($600).

During the second term of five (5) years an annual sum which shall in no case be less than eleven hundred dollars ($1,100), and which shall be equal to five (5) per cent. of its gross annual receipts, if such percentage shall exceed the sum of eleven hundred dollars ($1,100).

During the remaining term, expiring March 1, 1924, an annual sum which shall in no case be less than twelve hundred dollars ($1,200), and which shall be equal to five (5) per cent. of its gross annual receipts if such percentage shall exceed the sum of twelve hundred dollars ($1,200).

The gross annual receipts mentioned above shall be that portion of the gross receipts of the Company as shall bear the same proportion to its whole gross receipts as the length of the extension hereby authorized shall bear to the entire length of the railway of the Company in operation within the limits of the City.

The annual charges shall commence from the date upon which this contract is signed by the Mayor.

All annual charges as above shall be paid into the treasury of the City on November 1 of each year, and shall be for the amount due to September 30 next preceding. Provided that the first annual payment shall be only for that proportion of the first annual charge as the time between the date upon which this contract is signed by the Mayor and September 30 following shall bear to the whole of one year.

Whenever the percentage required to be paid shall exceed the minimum amount as above, then such sum over and above such minimum shall be paid on or before November 1 in each year for the year ending September 30 next preceding.

The annual charges herein provided are intended to include the percentages of gross receipts now required to be paid by railway companies to the City pursuant to the Railroad Law as amended.

Any and all payments to be made by the terms of this contract to the City by the Company shall not be considered in any manner in the nature of a tax, but such payments shall be made in addition to any and all taxes of whatsoever kind or description, now or hereafter required to be paid by any ordinance of the City, or resolution of the Board, or any law of the State of New York.

Fourth—The annual charges or payments shall continue throughout the whole term of this contract (whether original or renewal), notwithstanding any clause in any statute or in the charter of any other railway or railroad company providing for payment for railway or railroad rights or franchises at a different rate, and no assignment, lease or sublease of the rights or privileges hereby granted (whether original or renewal), or of any part thereof, or of any of the routes mentioned herein, or of any part thereof, shall be valid or effectual for any purpose unless the said assignment, lease or sublease shall contain a covenant on the part of the assignee or lessee that the same is subject to all the conditions of this contract; and that the assignee or lessee assumes and will be bound by all of said conditions, and especially said conditions as to payments, anything in any statute or in the charter of such assignee or lessee to the contrary notwithstanding, and that the said assignee or lessee waives any more favorable conditions created by such statute or its charter, and that it will not claim by reason thereof or otherwise exemption from liability to perform each and all of the conditions of this contract.

Fifth—Nothing in this contract shall be deemed to affect in any way the right of the City to grant to any individual or other corporation a similar right or privilege upon the same or other terms and conditions, over the route hereinbefore described.

The use of the railway constructed by the Company under this contract, including the tracks, wires and other equipment or any structures used in connection therewith, in streets and avenues hereinbefore described shall be permitted by the Company to any individual or corporation to which the City may have granted, or may hereafter grant, the right or privilege to use such streets and avenues for street railway purposes, upon payment of an annual sum by such individual or corporation to the Company, which shall equal the legal interest on such proportion of the actual cost of the construction of such railway and structures and additions and betterments thereto, as the number of cars operated by such individual or corporation shall bear to the number of cars operated by the companies then using the same; and also such proportion of the cost of keeping the tracks and electrical equipment in repair, and the cost of additions and betterments thereto, such proportion of laying and repairing of pavement and removal of snow and ice and all other duties imposed upon the Company by the terms of this contract in connection with the maintenance or the operation of said railway so used, as the number of cars operated by such individual or corporation shall bear to the number of cars operated by the companies then using the same, together with the actual cost of the power necessary for the operation of the cars thereon of such individual or corporation. Provided, however, that if, in the opinion of the Company, the legal rate of interest upon the cost of such railway shall be an insufficient sum to be paid for the use of such tracks, it may appeal to the Board and the Board may fix a percentage upon the cost to be paid to the Company, at a sum in excess of the legal rate of interest, if, in its opinion, such action is justified.

The Company shall not at any time oppose, but shall, upon the request of the Board, consent to the construction or operation of any street surface railway which may necessitate the use of any portion of the railway which shall be constructed by the Company pursuant to this contract.

Sixth—The rights and privileges hereby granted shall not be assigned, either in whole or in part, or leased or sublet in any manner, nor shall the title thereto, or right, interest or property therein, pass to or vest in any other person or corporation whatsoever, either by the act of the Company or by operation of law, whether under the provisions of the statutes relating to the consolidation or merger of corporations or otherwise, without the consent of the City, acting by the Board, evidenced by an instrument under seal, anything herein contained to the contrary thereof in anywise notwithstanding, and the granting, giving or waiving of any one or more of such consents shall not render unnecessary any subsequent consent or consents.

Seventh—Upon the termination of this original contract, or if the same be renewed, then at the termination of the said renewal term, or upon the termination of the rights hereby granted for any cause, or upon the dissolution of the Company before such termination, the tracks and equipments of the Company constructed pursuant to this contract within the streets and avenues shall become the property of the City without cost, and the same may be used or disposed of by the City for any purpose whatsoever, or the same may be leased to any company or individual.

If, however, at the termination of this contract as above, the Board shall so order by resolution, the Company shall, upon thirty (30) days' notice from the Board, remove any and all of its tracks and other equipment constructed pursuant to this contract, and the said streets and avenues shall be restored to their original condition at the sole cost and expense of the Company.

Eighth—The Company shall commence construction of the railway herein authorized within three (3) months from the date upon which the consents of the property owners are filed with the Board, or from the date of the order of the Appellate Division of the Supreme Court made pursuant to section 174 of the Railroad Law confirming the determination of the Commissioners appointed thereunder that such railway ought to be constructed, and shall complete the construction and place the same in full operation within six (6) months from the date of filing such consents or the date of such order, otherwise this right shall cease and determine, and all sums paid or which may be deposited with the Comptroller of the City, as hereinafter provided, shall thereupon be forfeited to the City; provided that the period for commencement and the period for completion and placing the railway in full operation may be extended by the Board, but the total extension of time for either of such periods shall not exceed in the aggregate six (6) months; and provided, further, that when the commencement or completion of said construction shall be prevented by legal proceedings in any court or by works of public improvement, or from other causes not within the control of the Company, the time for the commencement or completion of such construction may be extended for the period of such prevention, but no delay shall be allowed for unless the court proceedings shall be diligently prosecuted by the Company, and provided, further, that in no case shall such delay be deemed to begin until the Company shall have given written notice to the Board of any such court proceedings or other occasion of delay, and deliver to the Board copies of any injunction or other orders, and the papers upon which the same shall have been granted, and unless upon the request of the Board, the Company shall, in writing, consent that the Board either in its own name as a party, or in the name of the City as a party, may intervene in any such proceedings.

Ninth—Said railway shall be constructed and operated in the latest approved manner of street railway construction and operation, and it is hereby agreed that the Board may require the Company to improve or add to the railway equipment, including rolling stock and railway appurtenances, from time to time, as such additions and improvements are necessary, in the opinion of the Board. Upon failure on the part of the Company to comply with the direction of the Board within a reasonable time, the rights hereby granted shall cease and determine.

Tenth—Said railway shall be constructed, maintained and operated subject to the supervision and control of all the authorities of the City who have juridiction in such matters, as provided by the Charter of the City.

No construction upon said railway shall be commenced until written permits have been obtained from the proper City officials.

In any permits so issued such officials may also impose such conditions, as a condition of the granting of the same, as are necessary for the purpose of protecting any structures in the streets and avenues, over which such officials have jurisdiction, and the Company shall comply with such conditions.

The electrical equipment to be installed by the Company for the operation of the railway within the limits of the City, whether the same be upon streets and avenues or upon private property, shall be constructed and maintained under the supervision and control of the Commissioner of Water Supply, Gas and Electricity.

Eleventh—Said railway may be operated by overhead electric power substantially similar to the overhead electric system now in use by street surface railways in the Borough of The Bronx, or by any other motive power, except locomotive steam power or horse power, which may be approved by the Board and consented to by the abutting property owners, in accordance with the provisions of law, and by the Public Service Commission for the First District of the State of New York.

Twelfth—Upon six (6) months' notice by the Board to the Company, all wires for the transmission of power, except trolley wires, for the operation of the railway, upon all or any portion of the route hereby authorized, shall be placed in conduits beneath or alongside of the railway. The Company shall provide in such conduits two (2) ducts not less than three (3) inches in diameter for the exclusive use of the City. Such ducts shall be used only by the Company for the operation of its railway and by the City, as above.

Thirteenth—The rate of fare for any passenger upon said railway shall not exceed five (5) cents, and the Company shall not charge any passenger more than five (5) cents for one continuous ride from any point on its road or on any road, line or branch operated by it or under its control to any other point thereof, or any connecting branch thereof within the limits of the City.

The Company shall carry free upon the railway hereby authorized during the term of this contract all members of the Police and Fire Departments of the City, when such employees are in full uniform.

Fourteenth—No cars shall be operated upon the railway hereby authorized other than passenger cars and cars necessary for the repair or maintenance of the railway, and no freight cars shall be operated upon the tracks of said railway.

Fifteenth—The Company shall attach to each car run over the said railway proper fenders and wheel guards, in conformity with such laws and ordinances as are now in force, or may hereafter, during the term of this contract, be enacted or adopted by the State or City authorities, or as may be required by resolution of the Board.

Sixteenth—All cars which are operated on said railway shall be heated during the cold weather in conformity with such laws and ordinances as are now in force, or may hereafter, during the term of this contract, be enacted or adopted by the State or City authorities, or as may be required by resolution of the Board.

Seventeenth—All cars operated on said railway shall be well lighted by electricity, or by some lighting system equally efficient, or as may be required by resolution of the Board.

Eighteenth—Cars on the said railway shall run at intervals of not more than thirty (30) minutes, both day and night, and as much oftener as reasonable convenience of the public may require, or as may be directed by the Board.

Nineteenth—The Company, so long as it shall continue to use any of the tracks upon the streets and avenues in which said railway shall be constructed, shall cause to be watered at least three (3) times every twenty-four (24) hours when the temperature is above thirty-five (35) degrees Fahrenheit, the entire width of the streets and avenues, except when the width of such streets and avenues shall exceed sixty (60) feet between curblines, in which case the Company shall cause to be watered only sixty (60) feet in width of such roadway, and the Company shall provide for such purpose at least one tank car, the capacity of which shall be sufficient to water such streets and avenues in a satisfactory manner.

Twentieth—The Company shall at all times keep the streets and avenues upon which the said railway is constructed, between its tracks, the rails of its tracks and for a distance of two (2) feet beyond the rails, on either side thereof, free and clear from ice and snow; provided, however, that the Company shall, at the option of the Commissioner of Street Cleaning, enter into an agreement for each winter season, or part thereof, to clean an equivalent amount of street surface from house line to house line.

Twenty-first—As long as said railway, or any portion thereof, remains in any street or avenue, the Company shall pave and keep in permanent repair that portion of the surface of the street or avenue in which the said railway is constructed, between its tracks, the rails of its tracks and for a distance of two (2) feet beyond the rails on either side thereof, under the supervision of the local authorities, whenever required by them to do so, and in such manner as they may prescribe. In case of the neglect of the Company to make pavement or repairs after the expiration of thirty (30) days' notice to do so from the President of the Borough of The Bronx, said President may make the same at the expense of the Company. And the City shall have the right to change the material or character of the pavement of any street or avenue, and in that event the Company shall be bound to replace such pavement in the manner directed by the proper City official, at its own expense, and the provisions as to repairs herein contained shall apply to such renewed or altered pavement.

Twenty-second—Any alteration to the sewerage or drainage systems, or to any other subsurface or to any surface structures in the streets, required on account of the construction or operation of the railway, shall be made at the sole cost of the Company and in such manner as the proper City officials may prescribe.

Twenty-third—It is agreed that the right hereby granted to operate a street surface railway shall not be in preference or in hindrance to public work of the City, and should the said railway in any way interfere with the construction of public works in the streets and avenues, whether the same is done by the City directly or by a contractor for the City, the Company shall, at its own expense, protect or move the tracks and appurtenances in the manner directed by the City officials having jurisdiction over such public work.

Twenty-fourth—Should the grades or lines of the streets and avenues in which the railway is hereby authorized be changed at any time after the railway has been constructed and during the term of this contract, the Company shall, at its own expense, change its tracks and appurtenances to conform with such new grades and lines, and during the construction of any public improvement upon said streets and avenues, the Company shall take care of and protect the tracks and appurtenances at its own expense, all to be done subject to the direction of the City official having jurisdiction over the construction of such change.

Twenty-fifth—The Company shall submit to the Board a report not later than November 1 of each year for the year ending September 30 next preceding, and at any other time upon request of the Board, which shall state:

1. The amount of stock issued, for cash, for property.
2. The amount paid in as by last report.
3. The total amount of capital stock paid in.
4. The funded debt by last report.
5. The total amount of funded debt.
6. The floating debt as by last report.
7. The total amount of floating debt.
8. The total amount of funded and floating debt.
9. The average rate per annum of interest on funded debt.
10. Statement of dividends paid during the year.
11. The total amount expended for same.
12. The names of the directors elected at the last meeting of the corporation held for such purpose.
13. Location, value and amount paid for real estate owned by the Company as by last report.
14. Location, value and amount paid for real estate now owned by the Company.
15. Number of passengers carried during the year.
16. Total receipts of Company for each class of business.
17. Amounts paid by the Company for damages to persons or property on account of construction and operation.

18. Total expenses for operation, including salaries.

—and such other information in regard to the business of the Company as may be required by the Board.

Twenty-sixth—The Company shall at all times keep accurate books of account of the gross receipts from all sources within the limits of the City, and shall, on or before November 1 of each year, make a verified report to the Comptroller of the City of the business done by the Company for the year ending September 30 next preceding, in such form as he may prescribe. Such report shall contain a statement of such gross receipts, the total miles in operation within the limits of the City and the miles of railway constructed and operated under this contract, and such other information as the Comptroller may require. The Comptroller shall have access to all books of the Company for the purpose of ascertaining the correctness of its report, and may examine its officers under oath.

Twenty-seventh—In case of any violation or breach or failure to comply with any of the provisions herein contained, or with any orders of the Board acting under the powers herein reserved, the franchise or consent herein granted may be forfeited by a suit brought by the Corporation Counsel, on notice of ten (10) days to the Company, or at the option of the Board, by resolution of said Board, which said resolution may contain a provision to the effect that the railway constructed and in use by virtue of this contract shall thereupon become the property of the City without proceedings at law or in equity. Provided, however, that such action by the Board shall not be taken until the Board shall give notice to the Company to appear before it on a certain day not less than ten (10) days after the date of such notice, to show cause why such resolution declaring the contract forfeited should not be adopted. In case the Company fails to appear, action may be taken by the Board forthwith.

Twenty-eighth—If the Company shall fail to give efficient public service at the rates herein fixed, or fail to maintain its structures and equipment as herein provided in good condition throughout the whole term of this contract, the Board may give notice to the Company, specifying any default on the part of the Company, and requiring the Company to remedy the same within a reasonable time; and upon failure of the Company to remedy such default within a reasonable time, the Company shall for each day thereafter during which the default or defect remains, pay to the City the sum of two hundred and fifty dollars ($250) as fixed or liquidated damages, or the Board, in case such structures or equipment which may affect the surface of the streets shall not be put in good condition within a reasonable time after notice by the Board as aforesaid shall have the right to make all needed repairs at the expense of the Company, in which case the Company shall pay to the City the amount of the cost of such repairs, with legal interest thereon, all of which sums may be deducted from the fund hereinafter provided for.

Twenty-ninth—The Company shall assume all liability to persons or property by reason of the construction or operation of the railway authorized by this contract, and it is a condition of this contract that the City shall assume no liability whatsoever to either persons or property on account of the same, and the Company hereby agrees to repay to the City any damage which the City shall be compelled to pay by reason of any acts or default of the Company.

Thirtieth—This grant is upon the express condition that the Company, within thirty (30) days after the signing of this contract by the Mayor, and before anything is done in exercise of the rights conferred hereby, shall deposit with the Comptroller of the City the sum of three thousand dollars ($3,000), either in money or securities to be approved by him, which fund shall be security for the performance by the Company of all of the terms and conditions of this contract and compliance with all orders of the Board acting under the powers herein reserved, especially those which relate to the payment of the annual charges for the privilege hereby granted, the rendering of efficient public service at the rates herein fixed, the repairs of the street pavement, the removal of snow and ice, and the quality of construction of the railway and the maintenance of the property in good condition throughout the whole term of this contract, and in case of default in the performance by the Company of such terms and conditions or compliance with such orders or either or any of them, the City shall have the right to cause the work to be done and the materials to be furnished for the performance thereof after due notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings; or after default in the payment of the annual charges, shall collect the same, with interest, from the said fund after ten (10) days' notice to the Company; or in case of failure to observe the said terms and conditions of this contract and orders of the Board acting hereunder, relating to the headway, heating and lighting of cars, fenders, wheel-guards and watering of street pavements, the Company shall pay a penalty of fifty dollars ($50) per day for each day of violation, and the further sum of ten dollars ($10) per day for each car that shall not be properly heated, lighted or supplied with fenders or wheel-guards, in case of a violation of the provisions relating to those matters, all of which sums may be deducted from the said fund.

The procedure for the imposition and collection of the penalties in this contract shall be as follows:

The Board, on complaint made, shall give notice to the Company, directing its President, or other officer, to appear before the Board on a certain day not less than ten (10) days after the date of such notice, to show cause why the Company should not be penalized in accordance with the foregoing provisions. If the Company fails to make an appearance, or, after a hearing appears in the judgment of the Board to be in fault, said Board shall forthwith impose the prescribed penalty, or where the amount of the penalty is not prescribed herein, such amount as appears to the Board to be just, and without legal procedure direct the Comptroller to withdraw the amount of such penalty from the security fund deposited with him. In case of any drafts made upon the security fund the Company shall, upon ten (10) days' notice, pay to the City a sum sufficient to restore said security fund to the original amount of three thousand dollars ($3,000), and in default thereof this contract shall be cancelled and annulled at the option of the Board, acting in behalf of the City. No action or proceeding or right under the provisions of this contract shall affect any other legal rights, remedies or causes of action belonging to the City.

Thirty-first—The words "notice" or "direction," wherever used in this contract, shall be deemed to mean a written notice or direction. Every such notice or direction to be served upon the Company shall be delivered at such office in the City as shall have been designated by the Company, or if no such office shall have been designated, or if such designation shall have for any reason become inoperative, shall be mailed in the City, postage prepaid, addressed to the Company at the City. Delivery or mailing of such notice or direction as and when above provided shall be equivalent to direct personal notice or direction, and shall be deemed to have been given at the time of delivery or mailing.

Thirty-second—The words "streets or avenues" and "streets and avenues," wherever used in this contract, shall be deemed to mean "streets, avenues, highways, parkways, driveways, concourses, boulevards, bridges, viaducts, tunnels, public places or any other property to which the City has title or over which the public has an easement," encountered in the route hereinabove described, and upon or in which authority is hereby given to the Company to construct a railway.

Thirty-third—If at any time the powers of the Board or any other of the authorities herein mentioned or intended to be mentioned, shall be transferred by law to any other board, authority, officer or officers, then and in such case such other board, authority, officer or officers, shall have all the powers, rights and duties herein reserved to or prescribed for the Board or other authorities, officer or officers.

Sec. 3. Nothing in this contract shall be construed as in any way limiting the present or future jurisdiction of the Public Service Commission under the laws of the State of New York.

Sec. 4. This grant is also upon the further and express condition that the provisions of article 5, and the other provisions of the Railroad Law pertinent hereto shall be strictly complied with by the Company.

Sec. 5. The Company promises, covenants and agrees on its part and behalf to conform to and abide by and perform all the terms and conditions and requirements in this contract fixed and contained.

In witness whereof the party of the first part, by its Mayor, thereunto duly authorized by the Board of Estimate and Apportionment of said City, has caused the corporate name of said City to be hereunto signed and the corporate seal of said City to be hereunto affixed; and the party of the second part, by its officers, thereunto duly authorized, has caused its corporate name to be hereunto signed and its corporate seal to be hereunto affixed, the day and year first above written.

THE CITY OF NEW YORK,

[CORPORATE SEAL.] By.............................., Mayor.

THE SOUTHERN BOULEVARD RAILROAD COMPANY,

[SEAL.] By.............................., President.

Attest: ...., Secretary.

(Here add acknowledgments.)

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

Nassau Electric Railroad Company.

The public hearing was opened on the form of agreement proposed to be entered into with the Nassau Electric Railroad Company and others, defining the intent and meaning of the agreement accompanying the contract authorized to be entered into with this Company and others for the use of a certain piece of track on Flatbush avenue, between Atlantic and 4th avenues, Borough of Brooklyn.

The hearing was fixed for this day by resolution adopted June 8, 1911.

Affidavits of publication were received from the New York "Herald," the "Sun" and the CITY RECORD.

No one appeared in opposition to or in favor of the proposed agreement and the Chair declared the hearing closed.

The following was offered:

Whereas, This Board did by resolution adopted March 2, 1911, and approved by the Mayor March 7, 1911, authorize the Mayor to execute and deliver a contract for the grant of a franchise to The Nassau Electric Railroad Company for the construction, maintenance and operation of a street surface railway extension upon and along Flatbush, 4th and Atlantic avenues, Borough of Brooklyn; and

Whereas, Said contract contained the following provision, being section 3 thereof

"This contract shall not become operative until The Nassau Company shall procure to be executed and approved in proper form for record, and duly delivered to the Board of Estimate and Apportionment an agreement with The Brooklyn City Railroad Company and The Brooklyn Heights Railroad Company, its lessee, wherein they shall agree to permit the use of such portions of their track in Atlantic and Flatbush avenues as may be necessary for the convenient operation of the tracks herein authorized by The Nassau Electric Railroad Company, its successors or assigns, The City of New York and any other company to which the City may hereafter grant or lease rights."

Whereas, The Nassau Electric Railroad Company has advised the Board the proposed agreement accompanying the aforementioned contract is not acceptable to The Brooklyn City Railroad Company as in its opinion said agreement does not correctly and clearly set forth the intent and meaning of the parties thereto, and has submitted a supplementary agreement which cures this defect, which all companies interested are willing to execute in addition to the agreement accompanying the contract, and such supplementary agreement has been approved by the Corporation Counsel

Resolved, That the Board of Estimate and Apportionment hereby adopts and accepts the form of agreement to be executed by.the several companies parties thereto and The City of New York in addition to and as a supplement to the contract and agreement authorized by resolution adopted by the Board March 2, 1911, and approved by the Mayor March 7, 1911, and the Mayor of The City of New York be and he hereby is authorized to execute and deliver such supplementary agreement simultaneously with the execution of the contract granting a franchise to The Nassau Electric Railroad Company, to construct, maintain, and operate a street surface railway upon and along Flatbush, Fourth and Atlantic avenues, Borough of Brooklyn, as follows, to wit:

Agreement made this .... day of .... 1911, between The Brooklyn City Railroad Company (herinafter called the Brooklyn Company), party of the first part, The Brooklyn Heights Railroad Company (hereinafter called the Brooklyn Heights Company), party of the second part, The Nassau Electric Railroad Company (hereinafter called the Nassau Company), party of the third part, and The City of New York (hereinafter called the City), party of the fourth part.

Whereas, The execution and delivery of an instrument of agreement between the parties hereto, the same bearing even date herewith, has been duly authorized by the parties hereto upon the understanding that the true intent and meaning of the words thereof hereinafter quoted is as hereinafter set forth and provided; and

Whereas, Doubts on the part of the Brooklyn Company have arisen as to whether such true intent and meaning of such portion of such instrument be correctly and clearly represented by the language thereof, and the parties hereto have agreed that at the time of the delivery thereof any existing ambiguity therein shall be made clear and such doubts shall be set at rest by this instrument, the execution of which shall have been duly authorized for all the parties hereto in like manner as was the said agreement bearing even date herewith; and

Whereas, Such portion of said agreement so bearing even date herewith is in the following words, to wit:

"Now, therefore, in consideration of the premises and of the sum of one dollar ($1) by each of the parties of the first, second and third parts to the other paid, the receipt whereof is hereby acknowledged, the parties of the first, second and third parts do hereby covenant and agree with each other and with the party of the fourth part that the Nassau Company may connect its tracks with those of the Brooklyn Company in Flatbush avenue, the Nassau Company enjoying with the Brooklyn Company and the Brooklyn Heights Company, a right in common to the use of the tracks and appurtenances of the Brooklyn Company in said street and the Brooklyn Company and the Brooklyn Heights Company further covenant and agree to allow such joint use of their tracks and appurtenances by the Nassau Company, its successors and assigns, or by the City or by any other company to which the City may hereafter grant or lease any rights on said street, to wit: Flatbush avenue, between Atlantic avenue and the point of intersection of said extension with the easterly bound track of the Brooklyn Company in Flatbush avenue."

Now, therefore, in consideration of the premises and of the sum of one dollar ($1) by each of the parties hereto to the other paid, the receipt whereof is hereby acknowledged, the parties do hereby mutually covenant and agree that the true meaning of the said words hereinbefore quoted from the said agreement bearing even date herewith was intended to be and is the same as if the said words, instead of reading as they do in the said agreement bearing even date herewith, read as follows, to wit:

Now, therefore, in consideration of the premises and of the sum of one dollar ($1) by each of the parties of the first, second and third parts to the other paid, the receipt whereof is hereby acknowledged, the parties of the first, second and third parts do hereby covenant and agree with each other and with the party of the fourth part that the Nassau Company may connect its tracks with those of the Brooklyn Company in Flatbush avenue *as hereinbefore recited,* the Nassau Company enjoying with the Brooklyn Company and the Brooklyn Heights Company, a right in common to the use of the tracks and appurtenances of the Brooklyn Company in *that portion of Flatbush avenue lying between Atlantic avenue and the point of intersection of said extension with the easterly bound track of the Brooklyn Company in Flatbush avenue* and the Brooklyn Company and the Brooklyn Heights Company further covenant and agree to allow such joint use of their tracks and appurtenances *in the portion of Flatbush avenue hereinbefore specified,* by the Nassau Company, its successors and assigns, or by the City or by any other company to which the City may hereinafter grant or lease any rights in said *portion* of Flatbush avenue."

And it is further agreed that the said agreement bearing even date herewith is delivered upon the express understanding that the meaning of the said portion thereof is and shall be as hereinbefore set forth, and not otherwise.

In witness whereof the Brooklyn Company, the Brooklyn Heights Company and the Nassau Company have caused these presents to be executed on their behalf by their Presidents, and their corporate seals to be hereunto affixed and attested by their secretaries, and The City of New York by its Mayor thereunto duly authorized by the Board of Estimate and Apportionment of the said City caused the corporate name of said City to be hereunto signed and the corporate seal of said City to be hereunto affixed, all the day and year first above written.

Which was adopted by the following vote

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan Brooklyn, The Bronx, Queens and Richmond—16.

New York, Westchester and Boston Railway Company.

The public hearing was opened on the form of contract for certain modifications and amendments of the ordinance of August 2, 1904, granting a franchise to the New York, Westchester and Boston Railway Company as amended by resolution approved by the Mayor July 21, 1905, and contract dated January 29, 1909.

The hearing was fixed for this day by resolution adopted May 25 1911.

Affidavits of publication were received from the "New York Press," the "Morning Telegraph" and the City Record.

James H. Goggin appeared in opposition to the proposed bridge over 180th street. Allen W. Wardwell of counsel for the Company appeared in favor. No one else desiring to be heard the Chair declared the hearing closed.

The following was offered:

Resolved, That the Board of Estimate and Apportionment hereby consents to certain changes, alterations and amendments in the route of the New York, Westchester and Boston Railway Company as granted by an ordinance of the Board of Aldermen approved by the Mayor August 2, 1904, as amended by resolution of the Board of Estimate and Apportionment approved July 21, 1905, and by contract dated January 29, 1909, and the right to cross certain streets, avenues, highways and public places and to construct, maintain and operate a railroad in, upon and across the streets, avenues, highways and public places on such amended route of said railroad and that the said Board also consents to certain modifications in the terms and conditions of the said ordinance as heretofore amended, such changed, altered or amended route and such modified terms and conditions being fully set forth and described in the following form of proposed contract for the grant thereof, embodying such terms and conditions as modify or alter said ordinance of the Board of Aldermen as heretofore amended, which said ordinance as heretofore amended otherwise remains unchanged as to all the other terms and conditions expressed therein, and that the Mayor of The City of New York be and he hereby is authorized to execute and deliver such contract in the name and on behalf of The City of New York, as follows, to wit:

This contract, made this day of , 1911, by and between The City of New York (hereinafter called the City), party of the first part, by the Mayor of said City, acting for and in the name of said City, under and in pursuance of the authority of the Board of Estimate and Apportionment of said City (hereinafter called the Board), and the New York, Westchester and Boston Railway Company (hereinafter called the Company), party of the second part, witnesseth:

Whereas, The City did by ordinance approved by the Mayor August 2, 1904, grant to the Company the right to cross certain streets and highways and the privilege to construct and operate a four-track railroad upon certain routes particularly set forth in section 1 of said ordinance, and as shown on certain maps and profiles therein referred to and filed in the office of the County Clerk of the City and County of New York. on the 23d day of June, 1904; and

Whereas, The Board did on July 14, 1905, adopt a resolution which was approved by the Mayor July 21, 1905, consenting to a change in the route of the Company; and

Whereas, The Board did on November 20, 1908, adopt a resolution which was approved by the Mayor November 30, 1908, authorizing the execution and delivery of a contract modifying and altering certain of the terms and conditions of the said ordinance of the Board of Aldermen approved by the Mayor August 2, 1904, as amended by the said resolution of the Board of Estimate and Apportionment approved by the Mayor July 21, 1905, and said contract so authorized was executed by the President and Secretary of the Company on January 29, 1909, and by the Mayor and City Clerk February 8, 1909, and bears the former date; and

Whereas, In and by said ordinance as amended by said resolution and said contract, the consent of the City was granted to the Company for the construction, maintenance and operation of the said railroad across certain enumerated streets, avenues or highways, either above or below the grade thereof within said City upon certain conditions therein fully set forth; and

Whereas, The Company has applied to the Board as the local authority of the City by a petition verified March 6, 1911, for the consent of such local authority to certain modifications and amendments in the ordinance approved by the Mayor August 2, 1904, as amended by resolution approved by the Mayor July 21, 1905, and by contract dated January 29, 1909, to wit:

1. By extending the time for the completion of a four-track railroad from the northerly line of the City south to East 174th street, one year, by amending section 5, paragraph 1 of said ordinance of August 2, 1904, as amended by said contract dated January 29, 1909, by changing the figures "1911" to "1912."

2. By permitting the temporary use of steam locomotive power by inserting in section 2, subdivision 15 of said ordinance of August 2, 1904, as amended by said contract dated January 29, 1909, after the words "except locomotive steam power," the following:

"Said New York, Westchester and Boston Railway Company may also operate the said railroad by steam locomotive power for a period of one year from September 1, 1911, and for such further periods as may be permitted by the Board of Estimate and Apportionment not exceeding in all a total period of two years"; and

Whereas, On the 10th day of December, 1910, the Board of Directors of said Company at a meeting of said Board of Directors duly held on said date, and by a vote of two-thirds of all the Directors of said Company, adopted a resolution altering and amending the route of the said Company as amended by the said resolution of July 21, 1905, and the said contract dated January 29, 1909, and which alterations and amendments are shown upon a certain map dated December 10, 1910, entitled:

"Map and profile of New York, Westchester and Boston Railway for New York county, New York, part of sections 1, 2 and 3 being map and profile of that part of the route of the main line of said Railway Company within said county extending from a point between Ludlow avenue and Westchester avenue east of Whitlock avenue in the Borough of The Bronx, City of New York, to a point in White Plains road near its intersection with Sagamore street in said Borough and City, and

"Map and profile of that part of the route of the branch line of said Railway Company within said county extending from a point in 177th street between Van Nest avenue and Berrian street in said Borough and City to a point in Bronx Park avenue between Chanute avenue and Craighill avenue in said Borough and City.

"All as altered, changed, amended and adopted by affirmative vote of two-thirds of all the Directors of the said Company on the 10th day of December, 1910," and signed by the Chief Engineer, President, Secretary and ten Directors, which map was filed in the office of the County Clerk of New York county on May 1, 1911; and

Whereas, The Company has applied to the Board as the local authority of the City by a second petition verified May 2, 1911, for the consent of such local authority for such change, alterations and amendments to the route of said railroad and for the right to construct, maintain and operate a railroad in, upon and across the streets, avenues, highways and public places on said amended route and for the modification of the said ordinance, resolution and contract in accordance therewith and for the further consent of such local authority to certain other modifications and amendments in the ordinance approved by the Mayor August 2, 1904, as amended by resolution approved by the Mayor July 21, 1905, and by contract dated January 29, 1909, to wit:

1. That the description of the main line of the Company as contained in section 1 of the contract of January 29, 1909, be altered and amended between a point at or near 174th street and a point at or near Adams street.

2. That the description of the branch line of the Company as contained in section 1 of the contract of January 29, 1909, be altered and amended between its point of divergence from the main line and a point at or near Bronx River avenue, between Chanute and Craighill avenues.

3. By striking out in section 2, subdivision 1 of the contract of January 29, 1909, the whole of the paragraph entitled: "Connection with the Present Subway-Elevated Route at West Farms road," and substituting therefor the following:

"In Connection with the President Subway-Elevated Route (Interborough Rapid Transit Company).

"Beginning at a point on the main line of the New York, Westchester and Boston Railway Company at or near Adams street; thence running southwesterly, crossing 180th street between Morris Park avenue and Berrian street (or Bronx Park avenue); thence crossing Berrian street and Lebanon street at or near their intersection; thence crossing 179th street and Devoe avenue at or near their intersection; thence crossing Bronx street between Clover street and Walker avenue and thence to a connection with the Interborough Rapid Transit Railroad on Boston road, between Clover street and Walker avenue."

4. By adding to section 2, subdivision 9 of the ordinance of August 2, 1904, a clause permitting superstructures of a greater width than sixty (60) feet at certain designated points and the construction of platforms and a station across certain designated streets within the width of the increased superstructures; and

Whereas, After due publication, public hearings were held by the Board upon the modifications and amendments contained in the first of the above petitions on the

27th day of April, 1911, and upon the modifications and amendments contained in the second of said petitions on the 25th day of May, 1911; and

Whereas, The Board has made inquiry as to the proposed modifications and amendments of said ordinance of 1904, resolution of 1905, and contract of 1909; and

Whereas, On the day of , 1911, the Board, as the local authority of the City, adopted a resolution granting to the Company the right to make such changes, alterations and amendments to the route of said railroad and the right to cross certain streets, avenues, highways and public places, and to construct, maintain and operate a railroad in, upon and across the streets, avenues, highways and public places on such amended route of said railroad, and gave its consent to the other modifications in the ordinance approved by the Mayor August 2, 1904, as amended by resolution approved by the Mayor July 21, 1905, and by contract dated January 29, 1909, and authorized the Mayor to execute and deliver a contract granting such rights in the name and on behalf of the City, which resolution was approved by the Mayor on the day of , 1911.

Now, therefore, in consideration of the mutual covenants and agreements herein contained, the parties hereto do hereby covenant and agree, as follows:

Section 1. The City hereby grants to the Company, subject to the conditions and provisions hereinafter set forth, the right to make such changes, alterations and amendments to the route of said railroad and the right to cross certain streets, avenues, highways and public places and to construct, maintain and operate a railroad in, upon and across the streets, avenues, highways and public places on such amended route of said railroad, which amended route is shown upon the map heretofore referred to and is more particularly described as follows:

1. The description of the main line of the Company as contained in section 1 of the contract of January 29, 1909, is hereby amended by striking therefrom that portion of said description reading as follows:

"Thence crossing 174th street and Van Nest avenue, between Devoe avenue and the Harlem River and Port Chester Railroad; thence running northerly substantially parallel to Devoe avenue and crossing 177th street, Wyatt street and Walker avenue (West Farms road), between Devoe avenue and Berrian street; thence crossing 179th street and Lebanon street, between Devoe avenue and Berrian street; thence crossing 180th street and Berrian street at or near their intersection; thence crossing Adams street, between Morris Park avenue and the easterly line of Bronx Park," and substituting therefor the following: "Thence crossing 174th street and Van Nest avenue, between Devoe avenue and the Harlem river and Port Chester Railroad; thence running northeasterly and crossing an unnamed street between Devoe avenue and Van Nest avenue; thence crossing 177th street at its junction with Berrian street (or Bronx Park avenue) and thence crossing Wyatt street, 178th street, Walker avenue (or West Farms road), Lebanon street, 180th street and Adams street, between Morris Park avenue and Berrian street (or Bronx Park avenue)."

2. The description of the branch line of the Company as contained in section 1 of the contract of January 29, 1909, is hereby amended by striking therefrom that portion of said description reading as follows:

"Beginning at a point on the main line near the junction of Walker avenue (West Farms road) and Devoe avenue; thence running southerly crossing Wyatt street and Tremont avenue, between Devoe avenue and Berrian street," and substituting therefor the following:

"Beginning at a point on the main line near its intersection with Tremont avenue (East 177th street); thence running southerly crossing an unnamed street between Devoe avenue and Van Nest avenue."

3. Section 2, subdivision 1 of the said contract of January 29, 1909, is hereby amended by striking out therefrom the whole of the paragraph entitled:

"Connection with the Present Subway-Elevated Route at West Farms Road," and substituting therefor the following:

"Connection with the present subway-elevated route of the Interborough Rapid Transit Company at West Farms.

"Beginning at a point on the main line of the Company at or near Adams street; thence running southwesterly and westerly and crossing 180th street, between Morris Park avenue and Berrian street; thence crossing Berrian street and Lebanon street at or near their intersection; thence crossing 179th street and Devoe avenue at or near their intersection; thence crossing Bronx street, between Clover street and Walker avenue, and thence to a connection with the Interborough Rapid Transit Railroad on Boston road, between Clover street and Walker avenue."

The amended routes hereby authorized are more particularly shown upon a map entitled:

"N. Y. W. & B. Ry. Map showing proposed change of route between 174th street and Unionport Rd. and proposed change in connection with Interborough Rapid Transit Co., to accompany petitions dated March 6, 1911, and May 2, 1911, to the Board of Estimate and Apportionment," and signed by L. S. Miller, President, and J. L. Crider, Chief Engineer; a copy of which is attached hereto, is to be deemed a part of this contract, is to be construed with the text thereof, and is to be substantially followed, provided that deviations therefrom which are consistent with the foregoing descriptions and the other provisions of this contract may be permitted by resolution of the Board.

Section 2. The grant of this privilege is subject to the following conditions:

First—All the terms, provisions and conditions contained in the said ordinance approved by the Mayor August 2, 1904, the said resolution of the Board, approved by the Mayor July 21, 1905, and the said contract. dated January 29, 1909, shall remain unchanged and shall apply to the routes described in said ordinance as amended, as hereby further amended, with the same force and effect as when they applied to the routes described in said ordinance as amended, and as though the changes in route herein authorized had been specifically described in said ordinance as amended, except as follows:

1. Section 5, paragraph 1, of said ordinance of August 2, 1904, as amended by said contract dated January 29, 1909, is hereby amended to read as follows:

"Said Railroad Company shall commence actual construction within one year from the date of the signing of this ordinance by the Mayor and shall complete a four-track railroad upon the main line from the northerly line of the City as far south as East 174th street by the 2d day of February, 1912, otherwise this grant shall cease and determine."

2. Section 5 of said ordinance of August 2, 1904, is hereby further amended so the last paragraph of said section shall read as follows:

"The Board of Estimate and Apportionment shall have power to extend the time provided for in this section for the completion of the railway and for the work to be performed and expenditure to be made as above for a period or periods not exceeding in the aggregate three (3) months, but such extension shall not be made unless the reasons given by the grantee for non-fulfillment are, in the opinion of the Board of Estimate and Apportionment, for causes over which the grantee had no control and was in no wise responsible."

3. Section 2, subdivision 9th of said ordinance of August 2, 1904, is hereby amended by adding at the end thereof the following:

"Except that the width of such superstructures at the following streets may be as herein designated: (1) Unnamed street (between 174th and 177th streets), 70 feet; (2) 177th street, 70 feet; (3) Lebanon street (between Berrian street and Morris Park avenue), 100 feet; (4) 180th street, 281 feet; (5) Adams street, 277 feet; (6) Berrian street, between Bronx Park and Morris Park avenues, 250 feet; (7) Berrian street (between 180th street and Lebanon street), 215 feet; (8) Lebanon street (between Berrian street and Devoe avenue), 195 feet; (9) Unionport road, 140 feet.

"And provided further that at 180th street, Adams street and Berrian street, platforms and a station may be constructed across the said streets within the width of the superstructure above designated."

Second—The Company hereby agrees to assume all liability to any person or corporation by reason of the execution of this contract, the change of route herein authorized and the abandonment of the route herein described, and it is a condition of this contract that the City shall assume no liability whatsoever either to any person or corporation on account of the same, and the Company hereby agrees to repay to the City any damage which the City may be compelled to pay by reason of this contract, and by the said change of route and abandonment.

Section 3. The Company covenants and agrees to abandon and relinquish, and does hereby abandon, surrender and relinquish to the City all of its rights and franchises to construct, maintain and operate a railroad in, upon or across the streets on those portions of the route described in the said ordinance approved by the Mayor August 2, 1904, as amended by resolution approved by the Mayor July 21, 1905, and by contract dated January 29, 1909, to wit: (a) Main line between 174th street and Unionport road; (b) branch line from its junction with the main line to Van Nest avenue; (c) connection with the Interborough Rapid Transit Company; which are not covered by the description of the new and amended routes as herein described, and which are not shown on the map of the amended route hereinabove referred to as having been filed in the office of the County Clerk of New York County on the 1st day of May, 1911, and which are not shown upon the map accompanying the said petitions of March 6 and May 2, 1911, a copy of which is attached hereto and forms a part of this contract.

Section 4. The Company promises, covenants and agrees on its part and behalf to conform to and abide by and perform all of the terms, conditions and requirements in this contract fixed and contained.

In witness whereof, the party of the first part, by its Mayor, thereunto duly authorized by the Board of Estimate and Apportionment of said City, has caused the corporate name of said City to be hereunto signed and the corporate seal of said City to be hereunto affixed; and the party of the second part, by its officers thereunto duly authorized, has caused its corporate name to be hereunto signed and its corporate seal to be hereunto affixed, the day and year first above written.

THE CITY OF NEW YORK,
By........................., Mayor.
[CORPORATE SEAL.]
Attest:
........................, City Clerk.

NEW YORK, WESTCHESTER AND BOSTON, RAILWAY COMPANY,
By......................., President.
[SEAL.]
Attest:
........................., Secretary.

(Here add acknowledgments.)

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Riverside Light and Power Company.

The public hearing was opened on the petition of the Riverside Light and Power Company for a franchise to construct, maintain and operate certain conduits and conductors for supplying electricity for light and power within the district bordering on the Hudson River, between 129th and 134th streets, Borough of Manhattan.

The hearing was fixed for this day by resolution adopted June 8, 1911.

Affadivits of publication were received from the New York "Herald," the New York "Press" and the City Record.

George Tirman appeared on behalf of Beardsley, Hemmens & Taylor, counsel for the Consolidated Telegraph and Electrical Subway Company and requested the matter be referred to the Corporation Counsel. No one appeared in favor. No one else desiring to be heard, the Chair declared the hearing closed.

The Secretary presented the following:

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, June 27, 1911.

Hon. William J, Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—At the meeting of the Board of Estimate and Apportionment held May 25, 1911, the petition of the Riverside Light & Power Company for permission to construct, maintain and operate certain conduits and conductors for supplying electricity for light and power in a limited district of the Borough of Manhattan, bordering on the Hudson River, between 129th street and 134th street, was presented. This application is made for the purpose of validating the existence in the public streets of certain conduits and conductors laid without authority by the Conron Brothers Company, in connection with certain refrigerating pipes also laid by them and for the maintenance of which that Company has recently received the consent of the Board. The method of construction of these conduits has already been described in a report of this Bureau on the application of Conron Bros. Company, which report was submitted at the meeting held December 9, 1910, and from which the following is quoted:

"* * * It was found that Conron Bros., the predecessors of the present Company, had constructed a 12-inch wooden conduit containing three pipes under and across Manhattan, West 131st and West 132d streets. One of these pipes contained the electrical conductors——, which were being used to distribute electric current for lighting purposes to the buildings * * * on the west side of 12th avenue, from West 129th street to West 133d street. The other two pipes in the same conduit were being used to distribute brine for refrigerating purposes to these same concerns."

It was also found that the above constituted portions of a continuous electric and refrigerating conduit laid within the right-of-way of the New York Central and Hudson River Railroad Company, except for the street crossings mentioned, from below West 129th street to above West 132d street. The additional right to construct in 133d street west of 12th avenue and in 131st street for 125 feet east of 12th avenue is also asked for, and the privilege of constructing refrigerating conduits in these streets has already been granted to Conron Brothers Company. The right in 133d street is asked for in order to allow of the extension of the present electrical business to the block north thereof in the future, and the right in 131st street for the purpose of allowing a connection at a later date with the plant which Conron Bros. Company proposes to construct on certain land owned by it in this street when the lease of their present quarters on the west side of 12th avenue expires. This lease, I am informed, will expire in about six years from the present date.

Subsequent to the presentation of this petition to the Board a protest was received from the Consolidated Telegraph and Electrical Subway Company against the granting of that portion of the petition requesting the privilege of constructing and maintaining conduits, claiming:

1. That the right to construct, maintain and operate conduits or subways for electrical conductors is regulated by the subway acts.

2. That the rights asked for infringe upon the privileges of the Consolidated Telegraph and Electrical Subway Company, because that Company "has the exclusive right * * * to build, maintain and operate subways for the reception of high tension electrical conductors * * * in the Boroughs of Manhattan and The Bronx * * *"

3. That the Board of Estimate and Apportionment has no power to give permission to the applicant to construct, operate or maintain conduits in the neighborhood specified, or in any other part of the Boroughs of Manhattan and The Bronx.

In maintenance of its first proposition, the Company in its brief cites the subway acts, and its contracts under the same, hereinafter to be referred to; the statement of counsel in relation to the first contract contained in the Third Report of the Board of Electrical Control, pages 47-51; People ex rel. Consolidated Telegraph and Electrical Subway Company vs. Monroe, 85 App. Div., 542; People ex rel. New York Electric Lines Company vs. Squire, 107 N. Y., 594; Brush Elec. Ill. Co. vs. Subway Co., Special Term, May, 1891, affirmed 60 Hun, 446; American Rapid Telegraph Co. vs. Hess, 65 Hun, 610; U. S. Illg. Co. vs. Hess, 19 N. Y. St. Rep., 883; Western Union Telegraph Co. vs. Mayor, U. S. Circuit Court, April 12, 1889.

On its second proposition reference is made to U. S. Illg. Co. vs. Mayor, N. Y. Supreme Court, Special Term, 1889; Armstrong vs. Mayor, Supreme Court, Special Term, March, 1890; Brush Co. vs. Subway Co., cited above.

The third proposition is held to be maintained by the following case, as cited, "Henry vs. Mayor, Supr. Ct., 91, Truax, J., Special Term."

The first Subway Act was Chapter 534 of the Laws of 1884. This act required the owners or controllers of telegraph, telephone, electric or other wires and cables and the poles thereof, to have the same removed, before the first day of November, 1885, from the surface of all streets or avenues in every city of the State having a population of 500,000 or over. This act contained the following provision:

"No city in this State shall grant any exclusive privilege or franchise under this act to any corporation or individual by which a monopoly may be created or competition prevented on equal terms."

This statute having proved ineffective for the purpose for which it was passed, the Legislature at the next session passed another act known as chapter 499 of the Laws of 1885. By the provisions of this law there was created a board to be known as the Board of Commissioners of Electrical Subways, who in all cities having a population exceeding 1,000,000 were to be appointed by the Mayor, Comptroller and Commissioner of Public Works. This Board was charged with the responsibility of enforcing the provisions of chapter 534 of the Laws of 1884, and contained a provision that if "no suitable plan is proposed or in use within sixty days after the passage of this act, it shall be the duty of such board to cause to be devised and made ready for use such a general plan as will meet the requirements of said act and of this act, and the Board shall have full authority to compel all companies operating electric wires to use such subway so prepared in accordance with the provisions of this act."

Chapter 503 of the Laws of 1886 amended the statute of 1885, in relation to the salary of the Commissioners, and the method of raising the moneys to pay the same. It appearing that no suitable plan had been proposed by the companies operating electrical conductors in The City of New York within the sixty days prescribed in the Act of 1885, the Board in the then City of New York proceeded to lay out a general plan of underground conduits, and in furtherance of said plan entered into a contract with a company known as the Consolidated Telegraph and Electrical Subway Company, which contract is dated July 22, 1886, and was acknowledged by the parties executing the same July 27, 1886 (the form of this contract is set forth in the minutes of the Commissioners of Electrical Subways, Vol. 1, pages 71, 72 and 106). This contract recited that the Consolidated Company was willing and desirous to act as the servant of the Commissioners of Electrical Subways and The City of New York, and contained a provision that the parties of the first part, viz., the Commissioners of Electrical Subways, agree to use all lawful means in their power to compel all authorized companies or persons using electric conductors to comply with the subway acts and to place their conductors in the subways to be built by the Consolidated Company and pay a fair rental for the space occupied therein.

Mr. Daniel J. L. Gibbons, the counsel of the Commissioners, at the meeting held July 22, 1886, made a certain statement intended as an interpretation of the relations which would exist between the Commission and the Company under the contract, in which statement the following appears:

"To my mind the Commission will stand precisely in the position of one who is obligated to do a certain work and who engages with somebody else to do such portion of that work as he may direct that somebody else to do for a consideration—not at any time to be above a certain amount—such as he may deem fair. The Company, to my mind, will stand in the position of one accepting a subordinate place under the first named,"

—and

"* * * It is the intent of this contract that after these subways are completed, the Commission shall use all lawful means in their power to compel all companies using electrical conductors to use the subways and to pay for such use a rental which shall be fair to the contracting company, as well as to the electrical companies if there is a margin for such a fair rental within the stated limit."

(Cited by Consolidated Telegraph Company in its brief.)

This statement of Mr. Gibbons is set forth in full in the Third Report of the Board of Electrical Control at pages 50-55, and is stated to have been accepted by the Consolidated Company. It is to be noted, however, that the agreement of April 7, 1887, modified the contract of July 27, in several important particulars, among which is the provision in the latter contract that the Consolidated Company was not to be the servant or agent of the parties of the first part or of The City of New York, but was intended to be dealt with as an independent party having and acquiring such rights for itself as the contract secured to it. (Paragraph VIII.). This contract also modified the provision under which the Commissioners of Electrical Subways agreed to use all lawful means to compel the use of the subways to be built by the Consolidated Company by providing that the Mayor, Aldermen and Commonalty of The City of New York should not be liable for any neglect, failure or refusal in the premises of the party of the first part or their successors (Paragraph XIII.), and also provided that nothing in the contract should be construed as granting to the Consolidated Company any exclusive privileges, immunity or franchise whatsoever (Paragraph XVI.). This contract is set forth in the minutes of the Board of Commissioners of Electrical Subways, Vol. 1, pages 112 and 117.

Chapter 716 of the Laws of 1887 created the Board of Electrical Control in The City of New York and ratified the agreements entered into with the Consolidated Telegraph and Electrical Subway Company, above referred to, "subject, however, to all the provisions of this act." Section 7 of this act provided that upon failure by the Board of Electrical Control or its successors or by the Consolidated Telegraph and Electrical Subway Company to observe and perform all the provisions of that act and the previous acts or of the said agreements, then upon application the courts might by proper proceedings in the nature of a writ of mandamus enforce the provisions of the same or grant such relief as might be proper in the premises.

The two subsequent laws, chapter 550 of the Laws of 1890, and chapter 383 of the Laws of 1891, were passed for the purpose of extending the term of the Board of Electrical Control, but chapter 231 of the Laws of 1891, authorized the Board of Electrical Control to enter into new contracts with the Consolidated Telegraph and Electrical Subway Company and with the Empire City Subway Company, Limited, providing for a division of the work of constructing, maintaining and operating subways, such new contracts to be in accordance with the resolutions of said Board adopted December 15, 1890. The resolution of December 15, 1890, will be found in the minutes of the Board of Electrical Control, Vol. 1, page 1018, and the contracts in relation to the division of the work are set forth in the same minutes, Vol. 2, page 1120.

The contract with the Consolidated Company which was dated May 15, 1891, provided that the previous agreements were to remain in full force and effect, except as modified by this contract which relieved the Company from its obligations in relation to the building, owning, maintaining and operating subways or telegraph and telephone conductors or for low-tension electric light conductors of the Edison Electric Illuminating Company.

Chapter 263 of the Laws of 1892, chapter 396 of the Laws of 1893, and chapter 207 of the Laws of 1894, were all passed for the purpose of extending the term of office of the Board, but the act of 1892, in section 2 thereof, provided that no corporation or individual should take up the pavements of the streets for the purpose of laying any electrical conductors or constructing any conduit or subway underground without the consent of the Board, thus in effect modifying section 4 of chapter 716 of the Laws of 1887, which only provided for the placing underground of electrical conductors.

The present statutory rule relating to the removal of overhead conductors is contained in sections 525 to 529 of the Greater New York Charter.

Section 525, which relates to the removal of these conductors in the Boroughs of Manhattan and The Bronx, and provides that all overhead conductors required to be placed underground shall be placed underground under and in accordance with the provisions of chapter 716 of the Laws of 1887; chapter 231 of the Laws of 1891; chapter 263 of the Laws of 1892 and the laws amendatory thereof, and supplemental thereto, and that no permission shall be granted by the Commissioner of Water Supply, Gas and Electricity to lay underground conductors except in accordance with the provisions of said laws.

Section 528 provides that after the passage of the act, it shall be unlawful for any person or corporation *to construct subways* without having first obtained permission from the Commissioner of Water Supply, Gas and Electricity with the written approval of the proper Borough President. These provisions are similar to those contained in sections 581 to 585 of the previous charter, chapter 378 of the Laws of 1897.

The above are the various laws and contracts which it is claimed by the Consolidated Telegraph and Electrical Subway Company in its brief are binding upon the present City of New York in the authorization of the laying of underground electrical conductors and conduits within the Boroughs of Manhattan and The Bronx. The Company's assertion, however, that it has the exclusive privilege of laying these subways within the Boroughs appears to have been decided adversely by the Corporation Counsel in the following opinions:

Opinion dated October, 1889, to Hon. Hugh J. Grant, Mayor, and set forth in full in the minutes of the Board of Electrical Control, Vol. 1, pages 818 to 820.

Opinion dated June 5, 1909, to the Board of Estimate and Apportionment, and set forth in the minutes of that Board for the year 1909, at pages 3188 to 3193. This opinion cites the case of the Empire City Subway Company against the Broadway and Seventh Avenue Railroad Company, 87 Hun, 279, which, I am informed. was affirmed in 159 N. Y., 555, where it is stated that the courts squarely held that the contract of that Company, which is similar in form to that of the Consolidated Company, gave no exclusive right to maintain subways and conduits for electrical conductors in the streets of the City. One other opinion has been found, dated February 17, 1890, given to the Board of Electrical Control, wherein the Corporation Counsel refused to consider the validity of the claim of the Consolidated Telegraph Company to an exclusive right, because of the circumstances which arose requiring the rendering of that opinion.

The Company cites cases which appear to validate its claim to an exclusive privilege. Among others, I find cited the opinion of Justice Andrews in United States Illuminating Company vs. Mayor, referred to above, a copy of which opinion is contained in the Third Report of the Board of Electrical Control, pages 142 to 161. This was given in an action to restrain the removal of the Company's poles and overhead wires under a resolution of the Board of Electrical Control, and while the said opinion does state that the Consolidated Company had the sole and exclusive right to construct subways, it is probable that this question was considered in connection with the rights of the United States Illuminating Company which had been deprived of the privilege of constructing said subways by the subway acts. However, the rulings of the Corporation Counsel on this point appear to be clear and undisputed, with the possible exception of those opinions referred to in the brief of the Consolidated Company.

The other point made by the Consolidated Company is that the Board of Estimate and Apportionment has no authority to authorize any person or corporation to build subways or dig a tunnel for the reception of high-tension electrical conductors until under its contracts with the Board of Commissioners of Electrical Subways the Consolidated Company shall have become unable or fail in any respect to carry into effect or perform those contracts. This state of affairs the Company asserts has never existed.

The opinion of the Corporation Counsel, dated June 5, 1909, above referred to, calls attention to the clause of these contracts requiring that the Board of Commissioners of Electrical Subways should use all lawful means within its power to compel all authorized companies or persons using electrical conductors to place their conductors in the subways of the said Company, and in considering this clause in connection with certain revocable privileges which the City had been asked to grant allowing the laying of conduits for electric wires across a street connecting properties of the petitioner, it is stated:

"In my opinion, therefore, the laying of conduits across a City street is of too trivial a nature to interfere in any way with any rights enjoyed by the Company under said contracts. But should the City decide to issue a license to connect buildings not directly opposite each other, good faith upon the part of the City might indicate that in such case the grantee should be compelled to use the conduits of the Subway Company, if such were available."

The Consolidated Telegraph and Electrical Subway Company having raised the issue as to the exclusiveness of its grant and the power of the Board with respect to the application of the Riverside Light and Power Company, it would seem necessary and desirable to obtain an opinion from the Corporation Counsel which would definitely settle these questions. The present application requires neither the removal of existing overhead wires nor the construction of additional electrical conduits except in the two streets to which attention has been called, but circumstances might tend to change the aspect of the questions involved, and it would certainly appear desirable that any opinion asked for contain as much authoritative information as possible for the present and future guidance of the Board.

It would seem true, in view of the ruling in a recent case, that those companies which were in existence and operating under franchises previous to the enactment of the subway acts were deprived of all authority to lay underground conduits for their conductors, and that with respect to those companies the Consolidated Telegraph Company has the exclusive privilege of laying such conduits. It may be that this was what was intended to be conveyed in the opinions cited in the various actions referred to in the brief of the Company.

Previous protests by the Consolidated Company against the granting of revocable privileges authorizing the construction of conduits for electrical conductors have called forth the opinion of June 5, 1909, referred to above, and a previous opinion of December 21, 1905, which was presented to the Board of Estimate and Apportionment January 12, 1906. None of these protests required a ruling by the Law Department as to the rights and powers of the City and the Board in connection with applications for the grant of franchises involving the construction or use of underground conduits for conductors to supply light, heat and power.

Before concluding, attention is called to the fact that at an informal hearing held before Commissioner Maltbie of the Public Service Commission for the First District in connection with the Conron Bros. Company electric plant, on April 13, 1911, the New York Edison Company submitted a map showing its connections in the territory involved. This map shows some conduits of the Consolidated Company on 12th avenue between 129th and 133d streets, and in the streets crossing the same between these points, but a large portion of this subway is what is designated as Consolidated Subway-Edison Main. The conduit of the Riverside Company is on the right-of-way of the New York Central and Hudson River Railroad Company west of 12th avenue, as before stated, and I have no information on which to determine whether the Consolidated Company has at the present time sufficient conduits in its subways in this neighborhood to furnish accommodations to the Riverside Company, were the said Riverside Company given a franchise requiring it to use those subways.

Subsequent to the submission of the brief of the Consolidated Company, above noted, attorneys for that Company transmitted to this office an opinion of the Board of Gas and Electric Light Commissioners of the Commonwealth of Massachusetts dated May 17, 1911, overruling the Board of Aldermen of The City of Worcester in granting the privilege to an individual to lay conduits and mains to supply heat, light and power from one building owned by him to another building diagonally across the street, which is owned by a corporation of which he had control. This, however, I do not believe has any effect on the question at present in issue, as the consent there given appears to be in the nature of a revocable privilege, the validity of which in this City has already been discussed in the opinions of the Corporation Counsel above noted.

There was also transmitted an opinion of the Board of Utility Commissioners of the State of New Jersey dated November 17, 1910, in the matter of the application of the Atlantic Highlands Gas Company for the approval of an ordinance authorizing it to use the streets of the township of Shrewsbury, wherein the question of competition by a new company, with an already established public service company apparently attempting in good faith to give proper service, was considered, and the application of the new company denied. This opinion, however, does not appear to be strictly applicable to the present case and would seem to me more strictly parallel were it a question raised by the New York Edison Company which is supplying electricity in the Borough of Manhattan, to the granting of a privilege in territory where it was already operating.

Information asked from the Riverside Company has been furnished the Bureau stating that its plant was furnishing electricity to eight individuals and companies within the territory for which it has asked the privilege, and that none of these individuals or companies is being furnished current by any other company, although the New York Edison Company and the United Electric Light and Power Company operate in the vicinity.

A public hearing having been set on this petition for Thursday, July 6, 1911, and the question raised by the Consolidated Company preventing the preparation of a form of contract granting the privilege applied for, for the consideration of the Board, it would seem necessary that this matter be now submitted to the Corporation Counsel in order to allow of the proper progress of the Company's application in the fall.

It is therefore recommended that copies of the brief of the Consolidated Company and the application of the Riverside Company be referred to the Corporation Counsel and that he be requested to advise the Board,

1. If the claim of the Consolidated Telegraph and Electrical Subway Company to an exclusive franchise for the construction and maintenance of electrical conduits in subways within the Boroughs of Manhattan and The Bronx is valid?

2. Whether the Board has power and authority to grant the application of the Riverside Light and Power Company or any other electrical company similarly situated,

(a) For the purpose of legalizing the existence and the future operation of the present existing conduit and conductors of this Company.

(b) For the purpose of authorizing the construction of extensions to the said conduit and conductors. Respectfully,

HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, The Riverside Light and Power Company has, by a petition duly presented to this Board at its meeting held May 25, 1911, applied for the right to construct, maintain and operate conduits and conductors for supplying electricity for light and power in a limited district of the Borough of Manhattan, bordering on the Hudson River, between 129th street and 134th street, and

Whereas, The Consolidated Telegraph and Electrical Subway Company, a corporation operating subways and conduits for electrical conductors in the Boroughs of Manhattan and The Bronx, has protested against the granting to the Riverside Light and Power Company of the privilege of constructing subways and conduits as applied for; now, therefore, be it

Resolved, That the Corporation Counsel be and he is hereby requested to advise this Board as to its power to grant the application of the Riverside Light and Power Company and as to the issues raised by the Consolidated Telegraph and Electrical Subway Company in the protest before mentioned, which are discussed in the report of the Bureau of Franchises submitted to the Board this day.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

Lakeville Holding and Development Company.

The public hearing was opened on the applications (three) of the Lakeville Holding and Development Company for permission to erect, maintain and use single span bridges over and across (a) Alley road; (b) Little Neck road; (c) Clinton avenue, Borough of Queens.

The hearing was fixed for this day by resolution adopted June 22, 1911.

An affidavit of publication was received from the City Record.

No one appeared in opposition to or in favor of the proposed grants and the Chair declared the hearing closed.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, June 27, 1911.

Hon. William J. Gaynor, *Mayor, Chairman Board of Estimate and Apportionment:*

Sir—The Lakeville Holding and Development Company has presented three petitions dated June 1, 1911, to the Board of Estimate and Apportionment for permission to erect, maintain and use single span bridges over and across Alley road, Little Neck road and Clinton avenue, in the Borough of Queens.

The petitions recite that the Company has acquired a strip of land extending from Lake Success, in Nassau County, near the City line, westerly to Rocky Hill road in the Borough of Queens, upon which land it proposes to construct a motor parkway to connect with the existing motor parkway of the Long Island Motor Parkway, Inc., running easterly from Lake Success through Nassau and Suffolk Counties to Lake Ronkonkoma. The parkway is to be used exclusively by motor vehicles upon payment of a fee, and the proposed bridges are desired in order to carry the parkway over the said roads and avenues and thus avoid grade crossings.

At the meeting of the Board held June 8, 1911, the petitions were referred to the Bureau of Franchises for investigation and report.

In accordance with the usual custom, copies of the petitions with accompanying plans were forwarded to the President of the Borough of Queens, with a request that examinations of the project be made with a view to ascertaining if there are any objections to the proposed bridges or any particular conditions which should be incorporated in the form of revocable consents used for private bridges over the City streets, in case the Board should decide to grant the requested permission in the form of a revocable privilege.

In a reply dated June 14, 1911, the Secretary of the Borough of Queens transmitted a copy of a report from the Engineer in Charge of the Topographical Bureau, raising the question of policy of permitting such a project within the City limits. The communication stated that the Borough President desired a public hearing to be held on the matter, and at the meeting of the Board held June 22 a public hearing was fixed for July 6, 1911.

I made a personal examination of the existing parkway from Lake Success easterly. It is about forty miles in length with a paved roadway twenty-one feet in width. The grade crossings on the westerly twenty miles have been entirely eliminated by carrying the parkway over or under the highways under authority obtained from the various State, county and town officials having jurisdiction. Grade crossings on the easterly twenty miles of the parkway have been made as safe as possible by regrading the intersecting highways and removing obstructions so as to afford approaching vehicles a clear view of the crossing. This work has also been done under permission obtained from the authorities having jurisdiction over said highways. Copies of the above-mentioned authorizations have been submitted for my examination, and I find that in some cases the consents extend for a term of fifty years and in others no limit has been placed upon the duration of the permission, the consents being revocable should the grantee fail to comply with the terms and conditions imposed.

Access to the parkway has been provided at frequent intervals along its entire length and so-called lodges have been erected at those points for the collection of the fee for the use of the parkway. So far as I know, this project of maintaining a roadway on private property for the sole use of motor vehicles on the payment of a fee, is unique. Upon examination, it appears to be a natural development due to the conditions arising from the increased use of vehicles operated by mechanical power, both for business and pleasure. The petitioner is incorporated as a business corporation under the laws of the State of New York. The company appears to differ from a toll road company in the fact that the use of the parkway is restricted to a certain class of vehicles, and it has acquired all of its property at private sale, not being able to enjoy, as a toll road, the statutory provision for condemnation of the property necessary for its roadway.

In the absence of bridges carrying the motor parkway over the said roads and avenues, vehicles would be obliged to cross the highways at grade, and there would be more or less danger at the points of crossing. The proposed bridges will obviate this danger, and I cannot see any serious objections to granting revocable consents to their erection and maintenance.

If in the future it be found that conditions developed by use of the parkway render it advisable to require its operation to be conducted under the authority of a franchise, the consents for the bridges can readily be revoked, and the company will then be obliged to accept the necessary right to continue operating within the City limits under such terms and conditions as experience may indicate.

Should the Board see fit to grant the requested consent in the form of revocable privileges, I would suggest that consent be granted only during the pleasure of the Board, but in no case to extend beyond a term of ten (10) years from the date of the approval of the consent by the Mayor and revocable upon sixty days' notice, and that it be made a condition of the consent that security deposits in the sum of $1,000 be required for each bridge, said deposits to be in the form of either money or securities to be approved by and deposited with the Comptroller for the faithful performance of the terms and conditions of the consent.

At the rate of charge for private bridges over the City streets, the compensation for each of the three bridges would be less than the minimum of $100 per annum heretofore fixed by the Board. With the customary increase of five per cent. for the second term of five years, the compensation for the privileges requested should therefore be for each bridge: During the first term of five years the annual sum of $100, and during the second term of five years the annual sum of $105. Such sums should be paid into the City Treasury in advance on November 1 of each year.

In view of the fact that the street system of this portion of the Borough of Queens has not been fully developed, it has been made a condition of the consents that the grantee shall cede to the City free and clear title to those portions of its property within the continued lines of the bridges which the City may at any time require for the widening of the highways in question. It has been particularly provided in the resolutions herewith submitted for adoption that the grantee shall pay all costs of altering or removing the bridges and abutments made necessary by any future widening or change of grade of the said highways.

Separate resolutions are herewith submitted for adoption granting consent for each of the three bridges and containing the hereinabove suggested conditions.

Respectfully, HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, The Lakeville Holding and Development Company has presented a petition dated June 1, 1911, to the Board of Estimate and Apportionment for its consent to the construction, maintenance and use of a bridge over and across Alley road, in the Borough of Queens, at a point about 1,950 feet southerly along said road from Marvin road; now therefore be it

Resolved, That the consent of the Corporation of The City of New York be and the same is hereby given to the Lakeville Holding and Development Company, a domestic corporation, and the owner of certain properties on the easterly and westerly sides of Alley road in the Borough of Queens, City of New York, to construct, maintain and use a single span bridge about thirty feet in width outside dimensions and fourteen feet above the roadway over and across Alley road at a point 1,950 feet southerly measured along said Alley road from Marvin road, the said bridge connecting properties of the petitioner on said Alley road, for the purpose of carrying its parkway over and across said road, all as shown on the plan accompanying the application and entitled:

"Plan showing location of proposed bridge to be constructed over Alley road, Borough of Queens, to accompany application dated June 1, 1911, of the Lakeville Holding and Development Company to the Board of Estimate and Apportionment, City of New York."

—and signed Lakeville Holding and Development Company, William B. Anderson, Vice-president, and E. G. Williams, Chief Engineer.

1. Said consent shall continue only during the pleasure of the Board of Estimate and Apportionment, and shall be revocable upon sixty (60) days' notice in writing to the grantee, but in no case shall it extend beyond a term of ten (10) years from the date of its approval by the Mayor, and thereupon all rights of the grantee in said street by virtue of this consent shall cease and determine.

2. The grantee shall pay into the Treasury of The City of New York, as compensation for the privilege hereby granted, during the first term of five years the annual sum of one hundred dollars ($100), during the second term of five years the annual sum of one hundred and five dollars ($105). Such payments shall be made in advance on November 1 of each year, provided, however, that the first payment shall be made within sixty (60) days of the approval of this consent by the Mayor, and shall be only such proportion of the annual charge as the time between the approval of this consent by the Mayor and November 1 following bears to a whole year.

Such payments shall not be considered in any manner in the nature of a tax, but shall be in addition to any and all taxes of whatsoever kind or description now or hereafter required to be paid under any ordinance of The City of New York, or by any law of the State of New York.

Lakeville Holding and Development Co.

BUREAU OF FRANCHISES

3. Upon the removal of the grantee from either of the premises to be connected by the structure, or upon the revocation or termination by limitation of this consent, the grantee shall cause the structure hereby authorized to be removed and all of said street affected by this permission to be restored to its proper and original condition, if required so to do by The City of New York or its duly authorized representatives, and the entire cost of such work shall be borne by the said grantee. If the structure hereby authorized shall not be required to be removed, it is agreed that it shall become the property of The City of New York.

4. This consent is for the exclusive use of the grantee and shall not be assigned either in whole or in part, or leased or sublet in any manner, nor shall title thereto, or right, interest or property therein pass to or vest in any other person, firm or corporation whatsoever, either by the acts of the grantee or by operation of law, without the consent in writing of The City of New York, acting by the Board of Estimate and Apportionment.

5. The grantee shall pay the entire cost of all work, labor and material in connection with the structure hereby authorized, and particularly—

(a) Its construction, maintenance and removal.

(b) The protection of all structures which shall in any way be disturbed by its construction or removal.

(c) All changes in sewers or other subsurface structures necessitated by its construction or removal, including the laying or relaying of pipes, conduits, sewers or other structures.

(d) The replacing or restoring of the pavement in said street which may be disturbed during its construction or removal.

(e) Each and every item of the increased cost of the installation of any future structures or repairs or alterations to any existing or future structures caused by its presence in the street.

(f) The inspection of all work during its construction or removal as herein provided, which may be required by the President of the Borough and the Commissioner of Water Supply, Gas and Electricity.

6. Before the construction or removal shall be begun, the grantee shall obtain permits to do the work from the President of the Borough and from the Commissioner of Water Supply, Gas and Electricity. The grantee shall perform all the duties which may be imposed by those officials as conditions of such permits, provided such conditions are not inconsistent with the provisions of this consent. The grantee shall submit to those officials working plans which shall include and show in detail the method of construction of the structure hereby authorized and the mode of protection or changes in all structures required by the construction or removal of the same.

Upon the completion of the work, the grantee shall furnish to the President of the Borough a plan of such character as he may direct, showing accurately and distinctly the location, size and type of construction and complete dimensions of the structure erected or installed under this consent; also the location and dimensions of all substructures, encountered during the progress of the work. The depth below the street surface of the new structure and of the substructures encountered must be shown; also their location with reference to the nearest curb line and the nearest curbline intersection.

It is made a particular condition of this consent that in case The City of New York should at any time during the term of this consent decide to widen Alley road, the grantee shall cede to the City, free and clear, title to all those pieces or parcels of land lying within the continued lines of the bridge and between the existing lines of Alley road and the lines of said road as so widened, and also that the grantee shall pay all costs of altering the bridge and removing the abutments made necessary by any future widening or change of grade of the said Alley road.

The grantee shall obtain the approval of the Municipal Art Commission to the plans for the proposed bridge as to its artistic design before the commencement of the construction of the bridge, provided action be taken by the said Commission within thirty days from the date of submission of the designs to it and a copy of such approval shall be filed with the Board of Estimate and Apportionment.

7. The grantee shall allow to The City of New York a right of way through, under or above any part of the structure hereby authorized for any and all structures which are now or may be hereafter placed by The City of New York in said street.

If at any time it shall become necessary to replace or alter any structure in said street, the City shall have the right to break through or remove all or any portion of the structure hereby authorized and the grantee shall pay to the City the expense incurred by such removal.

8. The structure hereby authorized and any fixtures laid therein shall be constructed, maintained and operated subject to the supervision and control of the proper

authorities of The City of New York. It shall be open at all times to the inspection of all the authorities who have jurisdiction in such matters under the Charter of The City of New York.

9. This consent is subject to whatever right, title or interest the owners of abutting property or others may have in and to said street.

10. Said grantee shall be liable for all damages to persons or property, including the street and structures therein and thereunder, by reason of the construction and operation or maintenance of the structure hereby authorized, and it is a condition of this consent that The City of New York assumes no liability to either person or property on account of this consent.

11. This consent is granted on the further and express condition that all laws or ordinances now in force, or which may hereafter be adopted, shall be strictly complied with.

12. This consent is upon the express condition that within sixty (60) days after its approval by the Mayor, and before anything is done in exercise of the rights conferred hereby, the grantee shall deposit with the Comptroller of The City of New York the sum of one thousand dollars ($1,000), either in money or in securities to be approved by him, which fund shall be security for the performance of the terms and conditions of this consent, especially those which relate to the payment of the annual charge, the repairs of the street pavement and the removal of the structure hereby authorized. In case of default in the performance by said grantee of any of such terms and conditions, The City of New York shall have the right to cause the work to be done and the materials to be furnished for making the necessary changes or repairs, after ten (10) days' notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings, or in case of default in the payment of the annual charge, shall collect the same, with interest, from such fund after ten (10) days' notice in writing to the said grantee.

In case of any drafts so made upon the security fund the said grantee shall, upon thirty (30) days' notice in writing, pay to the Comptroller of The City of New York a sum of money sufficient to restore the said fund to the original amount of one thousand dollars ($1,000), and in default of the payment thereof, the consent hereby given may be cancelled and annulled, at the option of the Board of Estimate and Apportionment of The City of New York, acting on behalf of said City. No action or proceeding or rights under the provisions of this section shall affect any other legal rights, remedies or causes of action belonging to The City of New York.

13. Said grantee shall give notice, in writing, to the President of the Borough and to the Commissioner of Water Supply, Gas and Electricity of its intention to begin the work hereby authorized at least forty-eight hours before such work commences. The grantee shall also give to the Board of Estimate and Apportionment notice, in writing, of the date on which the work is commenced and also the date on which the same is completed, not later than ten (10) days after such dates.

14. Said grantee shall commence the construction of the structure hereby authorized and complete the same on or before July 1, 1912, otherwise this consent shall be forfeited forthwith, and without any proceedings, either at law or otherwise, for that purpose; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

15. This consent shall be null and void unless said grantee shall duly execute an instrument in writing, wherein said grantee shall accept this consent and shall promise, covenant and agree to conform to, abide by and perform all the terms, conditions and requirements in this consent fixed and contained and file said instrument with the Board of Estimate and Apportionment of The City of New York within thirty (30) days after the approval of this consent by the Mayor; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

And said grantee shall promise, covenant and agree in said instrument to hold The City of New York harmless from all damages to persons or property which may result from the construction, use, maintenance or operation of the structure hereby authorized.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following was offered:

Whereas, The Lakeville Holding and Development Company presented a petition dated June 1, 1911, to the Board of Estimate and Apportionment for its consent to the construction, maintenance and use of a bridge over and across Clinton avenue, in the Borough of Queens at a point about 1,200 feet northerly, measured along Clinton avenue from Marvin road; now therefore be it

Resolved, That the Consent of the Corporation of The City of New York be and the same is hereby given to the Lakeville Holding and Development Company, a domestic corporation, and the owner of certain properties on the easterly and westerly sides of Clinton avenue in the Borough of Queens, City of New York, to construct, maintain and use a single span bridge about thirty feet in width, outside dimension, and fourteen feet above the roadway, over and across Clinton avenue, at a point 1,200 feet northerly from Marvin road, measured along said Clinton avenue; the said bridge to connect properties of the petitioner on Clinton avenue for the purpose of carrying its parkway over and across said avenue; all as shown on the plan accompanying the application, and entitled:

"Plan showing location of proposed bridge to be constructed over Clinton avenue, Borough of Queens, to accompany application dated June 1, 1911, of the Lakeville Holding and Development Company to the Board of Estimate and Apportionment, City of New York."
—and signed Lakeville Holding and Development Company, William B. Anderson, Vice-President, and E. G. Williams, Chief Engineer.

1. Said consent shall continue only during the pleasure of the Board of Estimate and Apportionment, and shall be revocable upon sixty (60) days' notice in writing to the grantee, but in no case shall it extend beyond a term of ten (10) years from the date of its approval by the Mayor, and thereupon all rights of the grantee in said street by virtue of this consent shall cease and determine.

2. The grantee shall pay into the Treasury of The City of New York, as compensation for the privilege hereby granted: During the first term of five years an annual sum of one hundred dollars ($100), and during the second term of five years an annual sum of one hundred and five dollars ($105). Such payments shall be made in advance on November 1 of each year, provided, however, that the first payment shall be made within sixty (60) days of the approval of this consent by the Mayor, and shall be only such proportion of the annual charge as the time between the approval of this consent by the Mayor and November 1 following bears to a whole year.

Such payments shall not be considered in any manner in the nature of a tax, but shall be in addition to any and all taxes of whatsoever kind or description now or hereafter required to be paid under any ordinance of The City of New York, or by any law of the State of New York.

If the structure hereby authorized shall not be required to be removed, it is agreed that it shall become the property of The City of New York.

4. This consent is for the exclusive use of the grantee and shall not be assigned either in whole or in part, or leased or sublet in any manner, nor shall title thereto, or right, interest or property therein pass to or vest in any other person, firm or corporation whatsoever, either by the acts of the grantee or by operation of law, without the consent in writing of The City of New York, acting by the Board of Estimate and Apportionment.

5. The grantee shall pay the entire cost of all work, labor and material in connection with the structure hereby authorized, and particularly—

(a) Its construction, maintenance and removal.

(b) The protection of all structures which shall in any way be disturbed by its construction or removal.

(c) All changes in sewers or other subsurface structures necessitated by its construction or removal, including the laying or relaying of pipes, conduits, sewers or other structures.

(d) The replacing or restoring of the pavement in said street which may be disturbed during its construction or removal.

(e) Each and every item of the increased cost of the installation of any future structures or repairs or alterations to any existing or future structures caused by its presence in the street.

(f) The inspection of all work during its construction or removal as herein provided, which may be required by the President of the Borough and the Commissioner of Water Supply, Gas and Electricity.

6. Before the construction or removal shall be begun, the grantee shall obtain permits to do the work from the President of the Borough and from the Commissioner of Water Supply, Gas and Electricity. The grantee shall perform all the duties which may be imposed by those officials as conditions of such permits, provided such conditions are not inconsistent with the provisions of this consent. The grantee shall submit to those officials working plans which shall include and show in detail the method of construction of the structure hereby authorized and the mode of protection or changes in all structures required by the construction or removal of the same.

Upon the completion of the work, the grantee shall furnish to the President of the Borough a plan of such character as he may direct, showing accurately and distinctly the location, size and type of construction and complete dimensions of the structure erected or installed under this consent; also the location and dimensions of all substructures, encountered during the progress of the work. The depth below the street surface of the new structure and of the substructures encountered must be shown; also their location with reference to the nearest curb line and the nearest curb-line intersection.

It is made a particular condition of this consent that in case The City of New York should at any time during the term of this consent decide to widen Clinton avenue, the grantee shall cede to the City, free and clear, title to all those pieces or parcels of land lying within the continued lines of the bridge and between the existing lines of Clinton avenue and the lines of said road as so widened, and also that the grantee shall pay all costs of altering the bridge and removing the abutments made necessary by any future widening or change of grade of the said Clinton avenue.

The grantee shall obtain the approval of the Municipal Art Commission to the plans for the proposed bridge as to its artistic design before the commencement of the construction of the bridge, provided action be taken by the said Commission within thirty days from the date of submission of the designs to it and a copy of such approval shall be filed with the Board of Estimate and Apportionment.

7. The grantee shall allow to The City of New York a right of way through, under or above any part of the structure hereby authorized for any and all structures which are now or may be hereafter placed by The City of New York in said street.

If at any time it shall become necessary to replace or alter any structure in said street, the City shall have the right to break through or remove all or any portion of the structure hereby authorized and the grantee shall pay to the City the expense incurred by such removal.

8. The structure hereby authorized and any fixtures laid therein shall be constructed, maintained and operated subject to the supervision and control of the proper authorities of The City of New York. It shall be open at all times to the inspection of all the authorities who have jurisdiction in such matters under the Charter of The City of New York.

9. This consent is subject to whatever right, title or interest the owners of abutting property or others may have in and to said street.

10. Said grantee shall be liable for all damages to persons or property, including the street and structures therein and thereunder, by reason of the construction and operation or maintenance of the structure hereby authorized, and it is a condition of this consent that The City of New York assumes no liability to either person or property on account of this consent.

11. This consent is granted on the further and express condition that all laws or ordinances now in force, or which may hereafter be adopted, shall be strictly complied with.

12. This consent is upon the express condition that within sixty (60) days after its approval by the Mayor, and before anything is done in exercise of the rights conferred hereby, the grantee shall deposit with the Comptroller of The City of New York the sum of one thousand dollars ($1,000), either in money or in securities to be approved by him, which fund shall be security for the performance of the terms and conditions of this consent, especially those which relate to the payment of the annual charge, the repairs of the street pavement and the removal of the structure hereby authorized. In case of default in the performance by said grantee of any of such terms and conditions, The City of New York shall have the right to cause the work to be done and the materials to be furnished for making the necessary changes or repairs, after ten (10) days' notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings, or in case of default in the payment of the annual charge, shall collect the same, with interest, from such fund after ten (10) days' notice in writing to the said grantee.

In case of any drafts so made upon the security fund the said grantee shall, upon thirty (30) days' notice in writing, pay to the Comptroller of The City of New York a sum of money sufficient to restore the said fund to the original amount of one thousand dollars ($1,000), and in default of the payment thereof, the consent hereby given may be cancelled and annulled, at the option of the Board of Estimate and Apportionment of The City of New York, acting on behalf of said City. No action or proceeding or rights under the provisions of this section shall affect any other legal rights, remedies or causes of action belonging to The City of New York.

13. Said grantee shall give notice, in writing, to the President of the Borough and to the Commissioner of Water Supply, Gas and Electricity of its intention to begin the work hereby authorized at least forty-eight hours before such work commences. The grantee shall also give to the Board of Estimate and Apportionment notice, in writing, of the date on which the work is commenced and also the date on which the same is completed, not later than ten (10) days after such dates.

14. Said grantee shall commence the construction of the structure hereby authorized and complete the same on or before July 1, 1912, otherwise this consent shall be forfeited forthwith, and without any proceedings, either at law or otherwise, for that purpose; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

15. This consent shall be null and void unless said grantee shall duly execute an instrument in writing, wherein said grantee shall accept this consent and shall promise, covenant and agree to conform to, abide by and perform all the terms, conditions and requirements in this consent fixed and contained and file said instrument with the Board of Estimate and Apportionment of The City of New York within thirty (30) days after the approval of this consent by the Mayor; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

And said grantee shall promise, covenant and agree in said instrument to hold The City of New York harmless from all damages to persons or property which may result from the construction, use, maintenance or operation of the structure hereby authorized.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following was offered:

Whereas, The Lakeville Holding and Development Company presented a petition dated June 1, 1911, to the Board of Estimate and Apportionment for its consent to the construction, maintenance and use of a bridge over and across Little Neck road, in the Borough of Queens, at a point about 1,330 feet northerly, measured along Little Neck road from Marvin road; now therefore be it

Resolved, That the consent of the Corporation of The City of New York be and the same is hereby given to the Lakeville Holding and Development Company, a domestic corporation, and the owner of certain properties on the easterly and westerly sides of Little Neck road in the Borough of Queens, City of New York, to construct, maintain and use a single span bridge about thirty feet in width, outside dimension, and fourteen feet above the roadway over and across Little Neck road, at a point 1,330 feet northerly from Marvin road, measured along said Little Neck road; the said bridge to connect properties of the petitioner on Little Neck road for the purpose of carrying its parkway over and across said road; all as shown on the plan accompanying the application, and entitled:

"Plan showing location of proposed bridge to be constructed over Little Neck road, Borough of Queens, to accompany application dated June 1, 1911, of the Lakeville Holding and Development Company to the Board of Estimate and Apportionment, City of New York."

—and signed Lakeville Holding and Development Company, William B. Anderson, Vice-President, and E. G. Williams, Chief Engineer.

1. Said consent shall continue only during the pleasure of the Board of Estimate and Apportionment, and shall be revocable upon sixty (60) days' notice in writing to the grantee, but in no case shall it extend beyond a term of ten (10) years from the date of its approval by the Mayor, and thereupon all rights of the grantee in said street by virtue of this consent shall cease and determine.

2. The grantee shall pay into the Treasury of The City of New York, as compensation for the privilege hereby granted, during the first term of five years an annual sum of one hundred dollars ($100), and during the second term of five years an annual sum of one hundred and five dollars ($105). Such payments shall be made in advance on November 1 of each year, provided, however, that the first payment shall be made within sixty (60) days of the approval of this consent by the Mayor, and shall be only such proportion of the annual charge as the time between the approval of this consent by the Mayor and November 1 following bears to a whole year.

Such payments shall not be considered in any manner in the nature of a tax, but shall be in addition to any and all taxes of whatsoever kind or description now or hereafter required to be paid under any ordinance of The City of New York, or by any law of the State of New York.

3. Upon the removal of the grantee from either of the premises to be connected by the structure, or upon the revocation or termination by limitation of this consent, the grantee shall cause the structure hereby authorized to be removed and all of said street affected by this permission to be restored to its proper and original condition, if required so to do by The City of New York or its duly authorized representatives, and the entire cost of such work shall be borne by the said grantee. If the structure hereby authorized shall not be required to be removed, it is agreed that it shall become the property of The City of New York.

4. This consent is for the exclusive use of the grantee and shall not be assigned either in whole or in part, or leased or sublet in any manner, nor shall title thereto, or right, interest or property therein pass to or vest in any other person, firm or corporation whatsoever, either by the acts of the grantee or by operation of law, without the consent in writing of The City of New York, acting by the Board of Estimate and Apportionment.

5. The grantee shall pay the entire cost of all work, labor and material in connection with the structure hereby authorized, and particularly—

(a) Its construction, maintenance and removal.

(b) The protection of all structures which shall in any way be disturbed by its construction or removal.

(c) All changes in sewers or other subsurface structures necessitated by its construction or removal, including the laying or relaying of pipes, conduits, sewers or other structures.

(d) The replacing or restoring of the pavement in said street which may be disturbed during its construction or removal.

(e) Each and every item of the increased cost of the installation of any future structures or repairs or alterations to any existing or future structures caused by its presence in the street.

(f) The inspection of all work during its construction or removal as herein provided, which may be required by the President of the Borough and the Commissioner of Water Supply, Gas and Electricity.

6. Before the construction or removal shall be begun, the grantee shall obtain permits to do the work from the President of the Borough and from the Commissioner of Water Supply, Gas and Electricity. The grantee shall perform all the duties which may be imposed by those officials as conditions of such permits, provided such conditions are not inconsistent with the provisions of this consent. The grantee shall submit to those officials working plans which shall include and show in detail the method of construction of the structure hereby authorized and the mode of protection or changes in all structures required by the construction or removal of the same.

Upon the completion of the work, the grantee shall furnish to the President of the Borough a plan of such character as he may direct, showing accurately and distinctly the location, size and type of construction and complete dimensions of the structure erected or installed under this consent; also the location and dimensions of all substructures, encountered during the progress of the work. The depth below the street surface of the new structure and of the substructures encountered must be shown; also their location with reference to the nearest curb line and the nearest curb-line intersection.

It is made a particular condition of this consent that in case The City of New York should at any time during the term of this consent decide to widen Little Neck road, the grantee shall cede to the City, free and clear, title to all those pieces or parcels of land lying within the continued lines of the bridge and between the existing lines of Little Neck road and the lines of said road as so widened, and also that the grantee shall pay all costs of altering the bridge and removing the abutments made necessary by any future widening or change of grade of the said Little Neck road.

The grantee shall obtain the approval of the Municipal Art Commission to the plans for the proposed bridge as to its artistic design before the commencement of the construction of the bridge, provided action be taken by the said Commission within thirty days from the date of submission of the design to it and a copy of such approval shall be filed with the Board of Estimate and Apportionment.

7. The grantee shall allow to The City of New York a right of way through, under or above any part of the structure hereby authorized for any and all structures which are now or may be hereafter placed by The City of New York in said street.

If at any time it shall become necessary to replace or alter any structure in said street, the City shall have the right to break through or remove all or any portion of the structure hereby authorized and the grantee shall pay to the City the expense incurred by such removal.

8. The structure hereby authorized and any fixtures laid therein shall be constructed, maintained and operated subject to the supervision and control of the proper authorities of The City of New York. It shall be open at all times to the inspection of all the authorities who have jurisdiction in such matters under the Charter of The City of New York.

9. This consent is subject to whatever right, title or interest the owners of abutting property or others may have in and to said street.

10. Said grantee shall be liable for all damages to persons or property, including the street and structures therein and thereunder, by reason of the construction and operation or maintenance of the structure hereby authorized, and it is a condition of this consent that The City of New York assumes no liability to either person or property on account of this consent.

11. This consent is granted on the further and express condition that all laws or ordinances now in force, or which may hereafter be adopted, shall be strictly complied with.

12. This consent is upon the express condition that within sixty (60) days after its approval by the Mayor, and before anything is done in exercise of the rights conferred hereby, the grantee shall deposit with the Comptroller of The City of New York the sum of one thousand dollars ($1,000), either in money or in securities to be approved by him, which fund shall be security for the performance of the terms and conditions of this consent, especially those which relate to the payment of the annual charge, the repairs of the street pavement and the removal of the structure hereby authorized. In case of default in the performance by said grantee of any of such terms and conditions, The City of New York shall have the right to cause the work to be done and the materials to be furnished for making the necessary changes or repairs, after ten (10) days' notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings, or in case of default in the payment of the annual charge, shall collect the same, with interest, from such fund after ten (10) days' notice in writing to the said grantee.

In case of any drafts so made upon the security fund the said grantee shall, upon thirty (30) days' notice in writing, pay to the Comptroller of The City of New York a sum of money sufficient to restore the said fund to the original amount of one thousand dollars ($1,000), and in default of the payment thereof, the consent hereby given may be cancelled and annulled, at the option of the Board of Estimate and Apportionment of The City of New York, acting on behalf of said City. No action or proceeding or rights under the provisions of this section shall affect any other legal rights, remedies or causes of action belonging to The City of New York.

13. Said grantee shall give notice, in writing, to the President of the Borough and to the Commissioner of Water Supply, Gas and Electricity of its intention to begin the work hereby authorized at least forty-eight hours before such work commences. The grantee shall also give to the Board of Estimate and Apportionment notice, in writing, of the date on which the work is commenced and also the date on which the same is completed, not later than ten (10) days after such dates.

14. Said grantee shall commence the construction of the structure hereby authorized and complete the same on or before July 1, 1912, otherwise this consent shall be forfeited forthwith, and without any proceedings, either at law or otherwise, for that purpose; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

15. This consent shall be null and void unless said grantee shall duly execute an instrument in writing, wherein said grantee shall accept this consent and shall promise, covenant and agree to conform to, abide by and perform all the terms, conditions and requirements in this consent fixed and contained and file said instrument with the Board of Estimate and Apportionment of The City of New York within thirty (30) days after the approval of this consent by the Mayor; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

And said grantee shall promise, covenant and agree in said instrument to hold The City of New York harmless from all damages to persons or property which may result from the construction, use, maintenance or operation of the structure hereby authorized.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

Kirkman & Son.

A communication was received from the agent for Kirkman & Son, stating the tunnel under and across Bridge street, north of Water street, Borough of Brooklyn, connecting premises of Kirkman & Son, on opposite sides of said street, has been completed.

This consent was granted by resolution adopted by this Board November 23, 1910, approved by the Mayor on the same day, and the notice is given in conformity with section 14 of the consent.

The communication was ordered filed.

New York City Interborough Railway Company.

In the matter of the petition of the New York City Interborough Railway Company for the right to construct, maintain and operate three extensions to its existing system in the Boroughs of Manhattan and The Bronx, as follows:

(a) Upon and along Lenox avenue to West 145th street to Broadway.

[illegible] om the intersection of St. Anns avenue and 149th street, upon and along 149th street and Southern boulevard to Leggett avenue, Borough of The Bronx.

(c) From the intersection of Intervale avenue and Dongan street, upon and along Dongan street to Stebbins avenue to East 163d street, to Elton avenue, to East 161st street, Borough of The Bronx.

At the meeting of June 8, 1911, a report was received from the Bureau of Franchises, submitting three forms of contracts to govern the proposed grants, together with two agreements providing for a single fare of five cents upon the street surface railways in the Borough of The Bronx and the use of the tracks of the Southern Boulevard Railroad Company on Southern boulevard.

The matter was referred to the Corporation Counsel to prepare a clause to overcome the objections of the Company, or approve the contracts and agreements as to form.

The Secretary presented the following:

Law Department, Office of the Corporation Counsel, City of New York, New York, June 26, 1911.

Board of Estimate and Apportionment:

Sirs—I have received from you the following communication, dated June 8, 1911, signed by Joseph Haag, Secretary:

"I transmit herewith certified copy of resolution this day adopted by the Board of Estimate and Apportionment, requesting the Corporation Counsel to approve certain proposed contracts and agreements governing the grant of a franchise to the New York City Interborough Railway Company, should same meet with your approval; or draft a provision to be inserted in said contracts to carry into effect the recommendations contained in the report relative to the interchange of transfers and a single fare of five cents upon the railways in the Borough of The Bronx.

"Enclosed herewith is a copy of the report from the Bureau of Franchises with the accompanying contracts and agreements.

"The New York City Interborough Railway Company has been furnished with a certified copy of the resolution."

I have no suggestions to make in regard to the proposed form of contract for the West 145th street line, and such contract, therefore, has my approval as to form.

In the other two franchise contracts, however, there are clauses contained therein which, as stated in the said report of the Bureau of Franchises, are unacceptable to the applicant Company. The chief point of difference arises from the inclusion of the clause which provides that the grant shall not become operative until the Company shall procure and cause to be executed and delivered to your Board an agreement that the Union Railway Company of New York City, the Southern Railroad Company and the applicant Company will agree between themselves and the City not to charge any passenger more than five cents fare for one continuous ride over the three lines operated by them or under their control.

A form of the proposed contract to be executed by all these parties was also sent to me. In the said report of the Bureau of Franchises, it is stated that it is preferable, if possible, to compel an exchange of passengers, or the furnishing of a continuous ride for one fare, by separate agreements rather than by the inclusion in the grant itself of a forfeiture penalty for non-compliance with such condition, because such a forfeiture would result in a cessation of operation over important connecting links of the Interborough system. The force of this reasoning is at once apparent, but if the said Company holds firm in its refusal to accept a grant on any such condition, it is for your Board to decide whether to grant any franchise whatsoever in view of such refusal or whether a forfeiture clause may not be substituted.

If the latter course be adopted I recommend that section 3 in the two other forms of franchise grant be amended to read as follows:

"Section 3. This grant is upon the express condition that throughout the term of this grant or any renewal or renewals thereof no passenger shall be charged more than five cents for one continuous ride over the routes or any part of the routes of the Company, the Union Railroad Company of New York City and the Southern Boulevard Railroad Company, and upon the failure of the said three companies or any of them to furnish such a continuous ride over their routes or over any part of their routes, at any time during the term of this grant or any renewal or renewals thereof, the rights hereby granted shall thereupon cease and determine."

As so amended, the 163d street contract will have my approval as to form.

In the 149th street contract, there is a further clause inserted which when renumbered will read as follows:

"Section 4. This contract shall not become operative until the Company shall procure and cause to be executed and approved in proper form for record and duly delivered to the Board of Estimate and Apportionment, an agreement with the Southern Boulevard Railroad Company, wherein said Company shall agree to permit the use of its tracks on Southern boulevard, between East 149th street and Leggett avenue, by the Interborough Company, its successors or assigns, the City, and any other company to which the City may hereafter grant or lease rights, and the compensation for such use shall not exceed the terms provided by section 2, fifth of this contract."

The Company is willing to accept such a clause, but I would advise that a forfeiture clause should be added thereto, reading as follows:

"And upon the failure of the said Southern Boulevard Railroad Company for any reason at any time hereafter to permit the use of its tracks on Southern boulevard, between East 149th street and Leggett avenue, by the Interborough Company, its successors or assigns, the City, and any other company to which the City may hereafter grant or lease rights, the rights hereby granted shall cease and determine."

With the above two amendments, the said 149th street contract will then have my approval as to form.

The proposed agreement between the Company and the Southern Boulevard Railroad Company has my approval as to form. Respectfully,

GEORGE L. STERLING, Acting Corporation Counsel.

Law Department, Office of the Corporation Counsel, City of New York, New York, June 28, 1911.

Board of Estimate and Apportionment:

Sirs—I have received from you the following communication, dated June 23, 1911, signed by Henry P. Nichols, Engineer Chief of the Bureau of Franchises:

"On June 8, 1911, there were sent you by the Secretary of the Board of Estimate and Apportionment three forms of Contract for franchises to the New York City Interborough Railway Company, in the Borough of The Bronx, together with a copy of a resolution adopted on that date, requesting you to draft a provision requiring the interchange of transfers for a single fare of five cents upon the railways in the Borough of The Bronx which would eliminate certain objections raised by the New York City Interborough Railway Company to the forms of contracts submitted to you, or if you did not believe that any such provision could be inserted in the contracts to accomplish such interchange of transfers on a single fare of five cents other than that proposed in said contracts, that you approve the contracts as to form.

The attorneys for the Company have called at this office today and have submitted an amendment to the contracts which the Company is willing to accept. This amendment is as follows:

"Page 25, section 3, the second paragraph to read as follows:

"'This contract shall not become operative until the Company shall procure and cause to be executed and approved in proper form for record and duly delivered to the Board, an agreement wherein the Union Railway Company of New York City, the Southern Boulevard Railroad Company and the Company shall each agree between themselves and with the City that a passenger paying a single fare upon a car on the east or west lines of any of said companies shall receive without further payment a ride north or south on any line of the other companies, and a passenger paying a single fare upon a car on a north and south line of any of said companies shall receive a ride east or west on any line of the other companies without further payment at points of intersection, and that a passenger may continue in the direction in which his fare was first paid on any other line without further payments.'

"This amendment also applies to section 3, second, on page 34, and also to the next to the last paragraph in the supplementary agreement on page 37.

"If this amendment provides for the interchange of transfers on a single fare of five cents, as set forth in the report of this office, a copy of which was transmitted to you, it is satisfactory as far as this office is concerned. If the same is satisfactory to you, will you please approve the contracts thus amended as to form. As it is desirable that this matter proceed as rapidly as possible, in order that the Company may complete its construction the coming fall, will you not submit your opinion in regard to the matter prior to the making up of the calendar for the meeting of July 6, so that action may be taken at that time?"

I have already passed upon the three proposed forms of franchise grant to the New York City Interborough Railroad Company in an opinion to your Board dated June 26, 1911. I now see a compromise has been effected as to the exchange of passengers on the lines affected.

In view of the fact that there is a possibility that some of the companies affected may in the future go into the hands of the receivers and so come under the jurisdiction of the courts, and that the courts, under such circumstances, might terminate these transfer agreements, I think it would be wise to insert a forfeiture penalty at the end of the paragraph in question reading as follows:

"And upon the failure of the said three companies or any of them to furnish such a continuous ride for one fare over their routes or over any part of their routes as herein provided at any time during the term of this grant or any renewal or renewals thereof the rights hereby granted shall thereupon cease and determine."

A smilar forfeiture clause should be added to section 3, subdivision second of the 149th street contract. The contracts in question as so amended, together with the amendment suggested by me in my said opinion to your Board of June 26 as to the form of section 4 of the 149th street contract will have my approval as to form.

Respectfully, C. D. OLENDORF, Acting Corporation Counsel.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, June 30, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—At the meeting of the Board held on June 8, 1911, there was presented a report upon an application of the New York City Interborough Railway Company for the right to construct, maintain and operate three extensions in the Boroughs of Manhattan and The Bronx. Three draft forms of contracts for the franchises—one contract for each extension—were submitted with the report, also two supplementary contracts which are required by the proposed terms for the franchises. At that time the Company stated that it was willing to accept the contracts with the exception of the provision with reference to the interchange of transfers between the existing railway companies in the Borough of The Bronx. It stated that it was the intention of these companies to exchange transfers, but it would not agree to the insertion of a clause in the contracts, requiring such exchange; the objection being principally to the form in which this condition was inserted in the contract. It offered as a substitute a clause by which the Interborough Company would agree not to charge more than five cents for a continuous ride over the lines of its railway and the railways of the Union Railway Company of New York City and The Southern Boulevard Railroad Company, and that if at any time during the contract a fare of a greater amount is charged for such a ride or the Company should fail to exchange its transfers, then the rights should cease and determine. It was pointed out in the report that should the forfeiture of such right occur, the operation upon what is believed will be an important crosstown line in the Borough of The Bronx would be destroyed, which would not be to the best interests of the traveling public.

Accordingly it was recommended that the matter be referred to the Corporation Counsel and that he be requested to draft a provision requiring the interchange of transfers and a single fare of five cents upon the railways in the Borough of The Bronx, which would eliminate the objection made by the applicant Company. A resolution to that effect was adopted on June 8, 1911, and the Corporation Counsel in reply thereto under date of June 26, 1911, makes certain suggestions as amendments to the proposed contract in case the City decides to accept the forfeiture clause.

While the matter was pending before the Corporation Counsel, representatives of the Company submitted a clause which it is willing to have inserted, which apparently requires the interchange of transfers as sought. The clause submitted by the Company is as follows:

"This contract shall not become operative until the Company shall procure and cause to be executed and approved in proper form for record and duly delivered to the Board, an agreement wherein the Union Railway Company, of New York City, The Southern Boulevard Railroad Company and the Company shall each agree between themselves and with the City that a passenger paying a single fare upon a car on the east or west lines of any of said companies as shall receive without further payment a ride north or south on any line of the other companies and a passenger paying a single fare upon a car on a north or south line of any of said companies shall receive a ride east or west on any line of the other companies without further payment at points of intersection, and that a passenger may continue in the direction in which his fare was first paid on any other line without further payments."

This was submitted to the Corporation Counsel under date of June 23, 1911, and in reply thereto under date of June 28, 1911, he suggests that there also be added a forfeiture provision, as follows:

"And upon the failure of the said three companies or any of them to furnish such a continuous ride for one fare over their routes or over any part of their routes as herein provided at any time during the term of this grant or any renewal or renewals thereof the rights hereby granted shall thereupon cease and determine."

These amendments are with reference to contracts for two of the extensions applied for, namely:

Upon East 149th street and Southern boulevard from St. Anns avenue to Leggett avenue and upon East 163d street and other streets from the intersection of Elton avenue with East 163d street to the intersection of Dongan street and Intervale avenue.

The attorney for the Company states that the Company is willing to accept the proposed amendment. This amendment will also apply to the supplementary agreements which are required by the terms of the contracts. The Corporation Counsel states that the contracts in question if so amended will receive his approval as to form and the proposed contracts and agreements as amended are submitted herewith.

If the Board sees fit to grant the franchises, it should adopt a resolution fixing a date for a final public hearing and request the Mayor to designate the newspapers in which the notice of such hearing must be published according to law. After such hearing is held and the matter has been on the minutes for thirty days, final action may be taken. Respectfully,

HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, The New York City Interborough Railway Company has. under date of March 31, 1911, made application to this Board for the grant of the right, privilege and franchise to construct, maintain and operate a double track street surface railway as an extension to its existing system upon and along West 145th street from Lenox avenue to Broadway, Borough of Manhattan; and

Whereas, Section 172 of the Railroad Law and sections 72, 73 and 74 of the Greater New York Charter, as amended by chapters 629 and 630 of the Laws of 1905, provide for the manner and procedure of making such grants; and

Whereas, In pursuance to such laws this Board adopted a resolution on April 6, 1911, fixing the date for public hearing thereon, as April 27, 1911, at which citizens were entitled to appear and be heard, and publication was had for at least fourteen (14) days in the "Morning Telegraph" and New York 'Sun," newspapers designated by the Mayor, and in the City Record for ten (10) days immediately prior to the date of hearing, and the public hearing was duly had on such day, and

Whereas, This Board has made inquiry as to the money value of the franchise or right applied for and proposed to be granted to the New York City Interborough Railway Company, and the adequacy of the compensation proposed to be paid therefor; now, therefore, it is

Resolved, That the following form of the resolution for the grant of the franchise or right applied for by the New York City Interborough Railway Company, containing the form of proposed contract for the grant of such franchise or right, be hereby introduced, and entered in the minutes of this Board, as follows, to wit:

"Resolved, That the Board of Estimate and Apportionment hereby grants to the New York City Interborough Railway Company the franchise or right fully set out and described in the following form of proposed contract for the grant thereof. embodying all of the terms and conditions, including the provisions as to rates, fares and charges, upon and subject to the terms and conditions in said proposed form of contract contained, and that the Mayor of the City of New York be and he hereby is authorized to execute and deliver such contract in the name and on behalf of The City of New York, as follows," to wit:

Proposed Form of Contract.

This Contract, made this day of 1911, by and between The City of New York (hereinafter called the City), party of the first part, by the Mayor of said City, acting for and in the name of said City, under and in pursuance of the authority of the Board of Estimate and Apportionment of said City (hereinafter called the Board), and the New York City Interborough Railway Company (hereinafter called the Company), party of the second part, witnesseth:

In consideration of the mutual covenants and agreements herein contained, the parties hereto do hereby covenant and agree as follows:

Section 1. The City hereby grants to the Company, subject to the conditions and provisions hereinafter set forth, the right and privilege to construct, maintain and operate a double track extension to its street surface railway, with the necessary wires and equipment for the purpose of conveying passengers only in the Borough of Manhattan, in The City of New York, upon the following route, to wit:

Beginning on West 145th street at its intersection with the westerly side of Lenox avenue, and there connecting with the road for which the Company has a franchise in West 145th street, thence westerly in and upon West 145th street to the easterly side of Broadway. And to cross such other streets and avenues, named and unnamed, as may be encountered in said route. Provided, however, that nothing in this contract shall be construed as permitting more than a double track in any portion of West 145th street.

The said route with turnouts switches and crossovers hereby authorized is shown upon a map entitled:

"Map showing proposed extension of the New York City Interborough Railway Company in the Boroughs of Manhattan and The Bronx, City of New York, to accompany petition dated March 31, 1911, to the Board of Estimate and Apportionment"

—and signed by Edward A. Maher, President, and A. E. Kalbach, Engineer, a copy of which is attached hereto, is to be deemed a part of this contract, is to be construed with the text thereof, and is to be substantially followed, provided that deviations therefrom and additional turnouts, switches and crossovers which are consistent with the foregoing description, and the other provisions of this contract may be permitted by resolution of the Board.

Sec. 2. The grant of this privilege is subject to the following conditions, which shall be complied with by the Company:

First—The consent in writing of the owners of half in value of the property bounded on said streets and avenues to the construction and operation of said railway shall be obtained by the Company within three (3) months from the signing of this contract by the Mayor, and a copy of such consents shall be filed with the Board within such time, or, in the event that such consents cannot be obtained within such time, the Company shall within said three (3) months, or within one (1) month thereafter, make application to the Appellate Division of the Supreme Court for the appointment of Commissioners in the manner provided by the Railroad Law to determine if said railway ought to be constructed; otherwise this grant shall cease and determine.

Second—The said right to construct, maintain and operate said railway shall be held and enjoyed by the Company from the date upon which this contract is signed by the Mayor until March 31, 1928, with the privilege of renewal of said contract for the further period of twenty-five (25) years, upon a fair revaluation of such right and privilege.

If the Company shall determine to exercise its privilege of renewal it shall make application to the Board, or any authority which shall be authorized by law to act for the City in place of the Board. Such application shall be made at any time not earlier than two (2) years and not later than one (1) year before the expiration of the original term of this contract. The determination of the revaluation shall be sufficient if agreed to in writing by the Company and the Board, but in no case shall the annual rate of compensation to the City be fixed at a less amount than the sum required to be paid during the last year prior to the termination of the original term of this contract.

If the Company and the Board shall not reach such agreement on or before the day one (1) year before the expiration of the original term of this contract, then the annual rate of compensation for such succeeding twenty-five (25) years shall be reasonable, and either the City (by the Board) or the Company shall be bound upon request of the other to enter into a written agreement with each other fixing the rate of such compensation at such amount as shall be reasonable, but in no case shall the annual rate so fixed be less than the sum required to be paid for the last year prior to the termination of the original term of this contract, and if the parties shall not forthwith agree upon what is reasonable, then the parties shall enter into a written agreement fixing such annual rate and at such amount as shall be determined by three disinterested freeholders selected in the following manner:

One disinterested freeholder shall be chosen by the Board; one disinterested freeholder shall be chosen by the Company; these two shall choose a third disinterested freeholder, and the three so chosen shall act as appraisers and shall make the revaluation aforesaid. Such appraisers shall be chosen at least six (6) months prior to the expiration of this original contract, and their report shall be filed with the Board within three (3) months after they are chosen. They shall act as appraisers and not as arbitrators. They may base their judgment upon their own experience and upon such information as they may obtain by inquiries and investigations, without the presence of either party. They shall have the right to examine any of the books of the Company and its officers under oath. The valuations so ascertained, fixed and determined shall be conclusive upon both parties, but no annual sum shall, in any event, be less than the sum required to be paid for the last year of the original term of this contract. If in any case the annual rate shall not be fixed prior to the termination of the original term of this contract, then the Company shall pay the annual rate theretofore prevailing until the new rate shall be determined, and shall then make up to the City the amount of any excess of the annual rate then determined over the previous annual rate. The compensation and expenses of the said appraisers shall be borne jointly by the City and the Company, each paying one-half thereof.

Third—The Company shall pay to the City for the privilege hereby granted the following sums of money:

(a) The sum of two thousand five hundred dollars ($2,500), in cash, within three (3) months after the date on which this contract is signed by the Mayor, and before anything is done in exercise of the privilege hereby granted.

(b) During the first term of five (5) years an annual sum which shall in no case be less than six hundred dollars ($600), and which shall be equal to three (3) per cent. of its gross annual receipts if such percentage shall exceed the sum of six hundred dollars ($600).

During the second term of five (5) years an annual sum which shall in no case be less than one thousand one hundred dollars ($1,100), and which shall be equal to five (5) per cent. of its gross annual receipts, if such percentage shall exceed the sum of one thousand one hundred dollars ($1,100).

During the third term of five (5) years an annual sum which shall in no case be less than one thousand two hundred dollars ($1,200), and which shall be equal to five (5) per cent. of its gross annual receipts if such percentage shall exceed the sum of one thousand two hundred dollars ($1,200).

During the remaining term expiring March 31, 1928, an annual sum which shall in no case be less than one thousand three hundred dollars ($1,300), and which shall be equal to five (5) per cent. of its gross annual receipts, if such percentage shall exceed the sum of one thousand three hundred dollars ($1,300).

The gross annual receipts mentioned above shall be that portion of the gross receipts of the Company as shall bear the same proportion to its whole gross receipts as the length of the extension hereby authorized shall bear to the entire length of the railway of the Company in operation within the limits of the City.

The annual charges shall commence from the date upon which this contract is signed by the Mayor.

All annual charges as above shall be paid into the treasury of the City on November 1 of each year and shall be for the amount due to September 30 next preceding. Provided that the first annual payment shall be only for that proportion of the first annual charge as the time between the date upon which this contract is signed by the Mayor and September 30 following shall bear to the whole of one year.

Whenever the percentage required to be paid shall exceed the minimum amount as above, then such sum over and above such minimum shall be paid on or before November 1 in each year for the year ending September 30 next preceding.

The annual charges herein provided are intended to include the percentages of gross receipts now required to be paid by railway companies to the City, pursuant to the Railroad Law, as amended.

Any and all payments to be made by the terms of this contract to the City by the Company shall not be considered in any manner in the nature of a tax, but such payments shall be made in addition to any and all taxes of whatsoever kind or description, now or hereafter required to be paid by any ordinance of the City or resolution of the Board or any law of the State of New York.

Fourth—The annual charges or payments shall continue throughout the whole term of this contract (whether original or renewal), notwithstanding any clause in any statute or in the charter of any other railway or railroad company providing for payment for railway or railroad rights or franchises at a different rate, and no assignment, lease or sublease of the rights or privileges hereby granted (whether original or renewal), or of any part thereof, or of any of the routes mentioned herein, or of any part thereof, shall be valid or effectual for any purpose unless the said assignment, lease or sublease shall contain a covenant on the part of the assignee or lessee that the same is subject to all the conditions of this contract; and that the assignee or lessee assumes and will be bound by all of said conditions; and especially said conditions as to payments, anything in any statute or in the charter of such assignee or lessee to the contrary notwithstanding, and that the said assignee or lessee waives any more favorable conditions created by such statute or its charter, and that it will not claim by reason thereof or otherwise exemption from liability to perform each and all of the conditions of this contract.

Fifth—Nothing in this contract shall be deemed to affect in any way the right of the City to grant to any individual or other corporation a similar right or privilege upon the same or other terms and conditions, over the route hereinbefore described.

The use of the railway constructed by the Company under this contract, including the tracks, wires and other equipment or any structures used in connection therewith, in streets and avenues hereinbefore described, shall be permitted by the Company, to any individual or corporation to which the City may have granted, or may hereafter grant, the right or privilege to use such streets and avenues for street railway purposes, upon payment of an annual sum by such individual or corporation to the Company, which shall equal the legal interest on such proportion of the actual cost of the construction of such railway and structures, and additions and betterments thereto, as the number of cars operated by such individual or corporation shall bear to the number of cars operated by the companies then using the same; and also such proportion of the cost of keeping the tracks and electrical equipment in repair, and the cost of additions and betterments thereto, such proportion of laying and repairing of pavement and removal of snow and ice and all other duties imposed upon the Company by the terms of this contract in connection with the maintenance or the operation of said railway so used, as the number of cars operated by such individual or corporation shall bear to the number of cars operated by the companies then using the same, together with the actual cost of the power necessary for the operation of the cars thereon of such individual or corporation. Provided, however, that if, in the opinion of the Company, the legal rate of interest upon the cost of such railway shall be an insufficient sum to be paid for the use of such tracks, it may appeal to the Board, and the Board may fix a percentage upon the cost to be paid to the Company, at a sum in excess of the legal rate of interest if, in its opinion, such action is justified.

The Company shall not at any time oppose, but shall, upon the request of the Board, consent to the construction or operation of any street surface railway which may necessitate the use of any portion of the railway which shall be constructed by the Company pursuant to this contract.

Sixth—The rights and privileges hereby granted shall not be assigned, either in whole or in part, or leased or sublet in any manner, nor shall the title thereto, or right, interest or property therein, pass to or vest in any other person or corporation whatsoever, either by the act of the Company, or by operation of law, whether under the provisions of the statutes relating to the consolidation or merger of corporations or otherwise, without the consent of the City acting by the Board, evidenced by an instrument under seal, anything herein contained to the contrary thereof in any wise notwithstanding, and the granting, giving or waiving of any one or more of such consents shall not render unnecessary any subsequent consent or consents.

Seventh—Upon the termination of this original contract, or if the same be renewed, then at the termination of the said renewal term, or upon the termination of the rights hereby granted for any cause, or upon the dissolution of the Company before such termination, the tracks and equipments of the Company constructed pursuant to this contract within the streets and avenues shall become the property of the City without cost, and the same may be used or disposed of by the City for any purpose whatsoever, or the same may be leased to any company or individual.

If, however, at the termination of this contract as above, the Board shall so order by resolution, the Company shall, upon thirty (30) days' notice from the Board, remove any and all of its tracks and other equipment constructed pursuant to this contract and the said streets and avenues shall be restored to their original condition at the sole cost and expense of the Company.

Eighth—The Company shall commence construction of the railway herein authorized within six (6) months from the date upon which the consents of the property owners are filed with the Board or from the date of the order of the Appellate Division of the Supreme Court, made pursuant to section 174 of the Railroad Law, confirming the determination of the Commissioners appointed thereunder, that such railway ought to be constructed and shall complete the construction and place the same in full operation within twelve (12) months from the date of filing such consents or the date of such order; otherwise this right shall cease and determine, and all sums paid, or which may be deposited with the Comptroller of the City, as hereinafter provided, shall thereupon be forfeited to the City; provided that the period for commencement and the period for completion and placing the railway in full operation may be extended by the Board, but the total extension of time for either of such periods shall not exceed in the aggregate six (6) months; and provided, further, that when the commencement or completion of said construction shall be prevented by legal proceedings in any court or by works of public improvement, or from other causes not within control of the Company, the time for the commencement or completion of such construction may be extended for the period of such prevention, but no delay shall be allowed for unless the court proceedings shall be diligenty prosecuted by the Company, and provided further, that in no case shall such delay be deemed to begin until the Company shall have given written notice to the Board of any such court proceedings or other occasion of delay, and deliver to the Board copies of any injunction or other orders, and the papers upon which the same shall have been granted, and unless upon the request of the Board the Company shall, in writing, consent that the Board, either in its own name as a party, or in the name of the City as a party, may intervene in any such proceedings.

Ninth—Said railway shall be constructed and operated in the latest approved manner of street railway construction and operation, and it is hereby agreed that the Board may require the Company to improve or add to the railway equipment, including rolling stock and railway appurtenances, from time to time, as such additions and improvements are necessary, in the opinion of the Board. Upon failure on the part of the Company to comply with the direction of the Board within a reasonable time, the rights hereby granted shall cease and determine.

Tenth—Said railway shall be constructed, maintained and operated subject to the supervision and control of all the authorities of the City who have jurisdiction in such matters, as provided by the Charter of the City.

No construction upon said railway shall be commenced until written permits have been obtained from the proper City officials.

In any permits so issued such officials may also impose such conditions, as a condition of the granting of the same, as are necessary for the purpose of protecting any structures, in the streets and avenues, over which such officials have jurisdiction and the Company shall comply with such conditions.

The electrical equipment to be installed by the Company for the operation of the railway within the limits of the City, whether the same be upon streets and avenues or upon private property, shall be constructed and maintained under the supervision and control of the Commissioner of Water Supply, Gas and Electricity.

Eleventh—Said railway shall be operated by underground electric power, substantially similar to the system of underground electric power now used by the street surface railways in the Borough of Manhattan, provided that any other power may be used, except locomotive steam power, horse power or overhead electric power, which may be lawfully used, approved by the Board and consented to by the abutting property owners in accordance with the provisions of law and by the Public Service Commission for the First District of the State of New York.

Twelfth—No wires for the transmission of power shall be permitted unless they be placed in conduits underneath or along the side of the railway. When such conduits are constructed the Company shall provide two (2) ducts not less than three (3) inches in diameter each for the exclusive use of the City. The Company hereby agrees that such ducts shall be used only by the Company and the City, as above.

Thirteenth—The rate of fare for any passenger upon said railway shall not exceed five (5) cents and the Company shall not charge any passenger more than five (5) cents for one continuous ride from any point on its road or on any road, line or branch operated by it or under its control to any other point thereof, or any connecting branch thereof within the limits of the City.

The Company shall carry free upon the railway hereby authorized during the term of this contract all members of the Police and Fire Departments of the City, when such employees are in full uniform.

Fourteenth—No cars shall be operated upon the railway hereby authorized other than passenger cars and cars necessary for the repair or maintenance of the railway, [illegible] cars shall be operated upon the tracks of said railway.

Fifteenth—The Company shall attach to each car run over the said railway proper fenders and wheel guards, in conformity with such laws and ordinances as are now in force, or may hereafter, during the terms of this contract, be enacted or adopted by the State or City authorities, or as may be required by resolution of the Board.

Sixteenth—All cars which are operated on said railway shall be heated during the cold weather, in conformity with such laws and ordinances as are now in force, or may hereafter, during the term of this contract, be enacted or adopted by the State or City authorities, or as may be required by resolution of the Board.

Seventeenth—All cars operated on said railway shall be well lighted by electricity, or by some lighting system equally efficient, or as may be required by resolution of the Board.

Eighteenth—Cars on the said railway shall run at intervals of not more than thirty (30) minutes both day and night, and as much oftener as reasonable convenience of the public may require, or as may be directed by the Board.

Nineteenth—The Company, so long as it shall continue to use any of the tracks upon the streets and avenues in which said railway shall be constructed, shall cause to be watered at least three (3) times every twenty-four (24) hours when the temperature is above thirty-five (35) degrees Fahrenheit, the entire width of the streets and avenues, except when the width of such streets and avenues shall exceed sixty (60) feet between curb lines, in which case the Company shall cause to be watered only sixty (60) feet in width of such roadway, and the Company shall provide for such purpose at least one tank car, the capacity of which shall be sufficient to water such streets and avenues in a satisfactory manner.

Twentieth—The Company shall at all times keep the streets and avenues upon which the said railway is constructed, betweeen its tracks, the rails of its tracks, and for a distance of two (2) feet beyond the rails, on either side thereof, free and clear from ice and snow; provided, however, that the Company shall, at the option of the Commissioner of Street Cleaning, enter into an agreement for each winter season, or part thereof, to clean an equivalent amount of street surface from house line to house line.

Twenty-first—As long as said railway, or any portion thereof, remains in any street or avenue, the Company shall pave and keep in permanent repair that portion of the surface of the street or avenue in which the said railway is constructed, between its tracks, the rails of its tracks and for a distance of two (2) feet beyond the rails on either side thereof, under the supervision of the local authorities, whenever required by them to do so, and in such manner as they may prescribe. In case of the neglect of the Company to make pavement or repairs after the expiration of thirty (30) days' notice to do so from the President of the Borough of Manhattan, said President may make the same at the expense of the Company. And the City shall have the right to change the material or character of the pavement of any street or avenue, and in that event the Company shall be bound to replace such pavement in the manner directed by the proper City officials, at its own expense, and the provisions as to repairs herein contained shall apply to such renewed or altered pavement.

Twenty-second—Any alteration to the sewerage or drainage systems or to any other subsurface or to any surface structures in the streets, required on account of the construction or operation of the railway, shall be made at the sole cost of the Company, and in such manner as the proper City officials may prescribe.

Twenty-third—It is agreed that the right hereby granted to operate a street surface railway shall not be in preference or in hindrance to public work of the City, and should the said railway in any way interfere with the construction of public works in the streets and avenues, whether the same is done by the City directly or by a contractor for the City, the Company shall, at its own expense, protect or move the tracks and appurtenances in the manner directed by the City officials having jurisdiction over such public work.

Twenty-fourth—Should the grades or lines of the streets and avenues in which the railway is hereby authorized be changed at any time after the railway has been constructed and during the term of this contract, the Company shall, at its own expense, change its tracks and appurtenances to conform with such new grades and lines, and during the construction of any public improvement upon said streets and avenues, the Company shall take care of and protect the tracks and appurtenances at its own expense, all to be done subject to the direction of the City official having jurisdiction over the construction of such change.

Twenty-fifth—The Company shall submit to the Board a report not later than November 1 of each year for the year ending September 30 next preceding, and at any other time, upon request of the Board, which shall state:

1. The amount of stock issued, for cash, for property.
2. The amount paid in as by last report.
3. The total amount of capital stock paid in.
4. The funded debt by last report.
5. The total amount of funded debt.
6. The floating debt as by last report.
7. The total amount of floating debt.
8. The total amount of funded and floating debt.
9. The average rate per annum of interest on funded debt.
10. Statement of dividends paid during the year.
11. The total amount expended for same.
12. The names of the directors elected at the last meeting of the corporation held for such purpose.
13. Location, value and amount paid for real estate owned by the Company as by last report.
14. Location, value and amount paid for real estate now owned by the Company.
15. Number of passengers carried during the year.
16. Total receipts of Company for each class of business.
17. Amount paid by the Company for damages to persons or property on account of construction and operation.
18. Total expenses for operation, including salaries.

—and such other information in regard to the business of the Company as may be required by the Board.

Twenty-sixth—The Company shall at all times keep accurate books of account of the gross receipts from all sources within the limits of the City, and shall, on or before November 1 of each year, make a verified report to the Comptroller of the City of the business done by the Company for the year ending September 30 next preceding, in such form as he may prescribe. Such report shall contain a statement of such gross receipts, the total miles in operation within the limits of the City, and the miles of railway constructed and operated under this contract, and such other information as the Comptroller may require. The Comptroller shall have access to all books of the Company for the purpose of ascertaining the correctness of its report, and may examine its officers under oath.

Twenty-seventh—In case of any violation or breach or failure to comply with any of the provisions herein contained, or with any orders of the Board acting under the powers herein reserved, the franchise or consent herein granted may be forfeited by a suit brought by the Corporation Counsel, on notice of ten (10) days to the Company, or at the option of the Board by resolution of said Board, which said resolution may contain a provision to the effect that the railway constructed and in use by virtue of this contract shall thereupon become the property of the City without proceedings at law or in equity. Provided, however, that such action by the Board shall not be taken until the Board shall give notice to the Company to appear before it on a certain day not less than ten (10) days after the date of such notice, to show cause why such resolution declaring the contract forfeited should not be adopted. In case the Company fails to appear, action may be taken by the Board forthwith.

Twenty-eighth—If the Company shall fail to give efficient public service at the rates herein fixed, or fail to maintain its structures and equipment as herein provided in good condition throughout the whole term of this contract, the Board may give notice to the Company, specifying any default on the part of the Company, and requiring the Company to remedy the same within a reasonable time; and upon failure of the Company to remedy such default within a reasonable time, the Company shall, for each day thereafter during which the default or defect remains, pay to the City the sum of two hundred and fifty dollars ($250) as fixed or liquidated damages, or the Board, in case such structures or equipment which may affect the surface of the streets shall not be put in good condition within a reasonable time after notice by the Board as aforesaid, shall have the right to make all needed repairs at the expense of the Company, in which case the Company shall pay to the City the amount of the cost of such repairs, with legal interest thereon, all of which sums may be deducted from the fund hereinafter provided for.

Twenty-ninth—The Company shall assume all liability to persons or property by reason of the construction or operation of the railway authorized by this contract, and it is a condition of this contract that the City shall assume no liability whatsoever to either persons or property on account of the same, and the Company hereby agrees to repay to the City any damage which the City shall be compelled to pay by reason of any acts or default of the Company.

Thirtieth—This grant is upon the express condition that any and all sums of money or any and all securities heretofore deposited with the Comptroller by the Company under and pursuant to franchises heretofore granted to it by the City as a fund for the security for the performance by the Company of the terms and conditions of the franchises so granted, shall likewise be a fund for the security for the performance by the Company of all the terms and conditions of this contract and compliance with all orders of the Board acting under the powers herein reserved, especially those which relate to the payment of the annual charges for the privilege hereby granted, the rendering of efficient public service at the rates herein fixed, the repairs of the street pavement, the removal of snow and ice, the quality of construction of the railway and the maintenance of the property in good condition throughout the whole term of this contract, and in case of default in the performance by the Company of such terms and conditions, or compliance with such orders, or either or any of them, the City shall have the right to cause the work to be done and the materials to be furnished for the performance thereof, after due notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings; or, after default in the payment of the annual charges, shall collect the same, with interest, from the said fund, after ten (10) days' notice to the Company; or, in case of failure to observe the said terms and conditions of this contract and orders of the Board acting hereunder, relating to the headway, heating and lighting of cars, fenders, wheelguards and watering of street pavements, the Company shall pay a penalty of fifty dollars ($50) per day for each day of violation and the further sum of ten dollars ($10) per day for each car that shall not be properly heated, lighted or supplied with fenders or wheelguards, in case of a violation of the provisions relating to those matters, all of which sums may be deducted from said fund.

The procedure for the imposition and collection of the penalties in this contract shall be as follows:

The Board, on complaint made, shall give notice to the Company, directing its President, or other officer to appear before the Board on a certain day not less than ten (10) days after the date of such notice, to show cause why the Company should not be penalized in accordance with the foregoing provisions. If the Company fails to make an appearance, or, after a hearing appears in the judgment of the Board to be in fault, said Board shall forthwith impose the prescribed penalty, or where the amount of the penalty is not prescribed herein, such amount as appears to the Board to be just, and without legal procedure direct the Comptroller to withdraw the amount of such penalty from the security fund deposited with him. In case of any drafts made upon the security fund the Company shall, upon ten (10) days' notice, pay to the City a sum sufficient to restore said security fund to the original amount, and in default thereof, this contract shall be canceled and annulled at the option of the Board, acting in behalf of the City. No action or proceeding or right under the provisions of this contract shall affect any other legal rights, remedies or causes of action belonging to the City.

Thirty-first—The words "notice" or "direction," wherever used in this contract, shall be deemed to mean a written notice or direction. Every such notice or direction to be served upon the Company shall be delivered at such office in the City as shall have been designated by the Company, or if no such office shall have been designated, or if such designation shall have for any reason become inoperative, shall be mailed in the City, postage prepaid, addressed to the Company at the City. Delivery or mailing of such notice or direction as and when above provided shall be equivalent to direct personal notice or direction, and shall be deemed to have been given at the time of delivery or mailing.

Thirty-second—The words "streets or avenues" and "streets and avenues," wherever used in this contract shall be deemeed to mean "streets, avenues, highways, parkways, driveways, concourses, boulevards, bridges, viaducts, tunnels, public places or any other property to which the City has title, or over which the public has an easement," encountered in the route hereinabove described, and upon or in which authority is hereby given to the Company to construct a railway.

Thirty-third—If at any time the powers of the Board or any other of the authorities herein mentioned or intended to be mentioned, shall be transferred by law to any other Board, authority, officer or officers, then and in such case such other Board, authority, officer or officers shall have all the powers, rights and duties herein reserved to or prescribed for the Board or other authorities, officer or officers.

Sec. 3. Nothing in this contract shall be construed as in any way limiting the present or future jurisdiction of the Public Service Commission under the Laws of the State of New York.

Sec. 4. This grant is also upon the further and express condition that the provisions of article 5 and other provisions of the Railroad Law, pertinent thereto, shall be strictly complied with by the Company.

Sec. 5. The Company promises, covenants and agrees on its part and behalf to conform to and abide by and perform all the terms and conditions and requirements in this contract fixed and contained.

In witness whereof, the party of the first part, by its Mayor, thereunto duly authorized by the Board of Estimate and Apportionment of said City, has caused the corporate name of said City to be hereunto signed and the corporate seal of said City to be hereunto affixed; and the party of the second part, by its officers, thereunto duly authorized, has caused its corporate name to be hereunto signed and its corporate seal to be hereunto affixed the day and year first above written.

THE CITY OF NEW YORK,

[CORPORATE SEAL.] By......................................, Mayor.

Attest: ...., City Clerk.

NEW YORK CITY INTERBOROUGH RAILWAY COMPANY,

[SEAL.] By......................................, President.

Attest: ...., Secretary.

(Here add acknowledgments.)

Resolved, That the results of the inquiry made by this Board as to the money value of the franchise or right proposed to be granted and the adequacy of the compensation proposed to be paid therefor, and of the terms and conditions, including the provisions as to rates, fares and charges, are as hereinbefore specified and fully set forth in and by the foregoing form of proposed contract for the grant of such franchise or right.

Resolved, That these preambles and resolutions, including the said resolution for the grant of a franchise or right applied for by the New York City Interborough Railway Company, and the said form of proposed contract for the grant of such franchise or right containing said results of such inquiry, after the same shall be entered in the minutes of this Board, shall be published for at least twenty (20) days immediately prior to Thursday, September 21, 1911, in the CITY RECORD, and at least twice during the ten (10) days immediately prior to Thursday, September 21, 1911, in two (2) daily newspapers to be designated by the Mayor therefor, and published in The City of New York, at the expense of the New York City Interborough Railway Company, together with the following notice, to wit:

Notice is hereby given that the Board of Estimate and Apportionment, before authorizing any contract for the grant of the franchise or right applied for by the New York City Interborough Railway Company, and fully set forth and described in the foregoing form of proposed contract for the grant of such franchise or right and before adopting any resolution authorizing any such contract, will, at a meeting of said Board, to be held in the Old Council Chamber, City Hall, Borough of Manhattan, City of New York, on Thursday, September 21, 1911, at 10.30 o'clock a. m., hold a public hearing thereon, at which citizens shall be entitled to appear and be heard.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

The following was offered

Whereas, The New York City Interborough Railway Company has, under date of March 31, 1911, made application to this Board for the grant of the right, privilege and franchise to construct, maintain and operate a double track street surface railway as an extension to its existing system upon and along East 149th street, from St. Anns avenue to the Southern boulevard, and upon and along the Southern boulevard, from East 149th street to Leggett avenue, Borough of The Bronx: and

Whereas, Section 172 of the Railroad Law and sections 72, 73 and 74 of the Greater New York Charter, as amended by chapters 629 and 630 of the Laws of 1905, provide for the manner and procedure of making such grants; and

Whereas, In pursuance of such laws, this Board adopted a resolution on April 6, 1911, fixing the date for public hearing thereon as April 27, 1911, at which citizens were entitled to appear and be heard, and publication was had for at least fourteen (14) days in the "Morning Telegraph" and "New York Sun" newspapers designated by the Mayor, and in the City Record for ten (10) days immediately prior to the date of hearing, and the public hearing was duly had on such day; and

Whereas, This Board has made inquiry as to the money value of the franchise or right applied for, and proposed to be granted to The New York City Interborough Railway Company and the adequacy of the compensation proposed to be paid therefor; now, therefore, it is

Resolved, That the following form of resolution for the grant of the franchise or right applied for by the New York City Interborough Railway Company, containing the form of proposed contract for the grant of such franchise or right, be hereby introduced and entered in the minutes of this Board as follows, to wit:

Resolved, That the Board of Estimate and Apportionment hereby grants to the New York City Interborough Railway Company the franchise or right fully set out and described in the following form of proposed contract for the grant thereof, embodying all of the terms and conditions, including the provisions as to rates, fares and charges, upon and subject to the terms and conditions in said proposed form of contract contained, and that the Mayor of The City of New York be and he hereby is authorized to execute and deliver such contract, in the name and on behalf of The City of New York, as follows, to wit:

Proposed Form of Contract.

This contract, made this .... day of .... 1911, by and between The City of New York (hereinafter called the City), party of the first part, by the Mayor of said City, acting for and in the name of said City, under and in pursuance of the authority of the Board of Estimate and Apportionment of said City (hereinafter called the Board), and the New York City Interborough Railway Company (hereinafter called the Company), party of the second part, witnesseth:

In consideration of the mutual covenants and agreements herein contained, the parties hereto do hereby covenant and agree as follows:

Section 1. The City hereby grants to the Company, subject to the conditions and provisions hereinafter set forth, the right and privilege to construct, maintain and operate a double track extension to its street surface railway, with the necessary wires and equipment for the purpose of conveying passengers only, in the Borough of The Bronx, in The City of New York, upon the following route, to wit:

Beginning on East 149th street at its intersection with St. Anns avenue and there connecting with the road for which the Company has a franchise in East 149th street; thence easterly in and upon East 149th street to the Southern boulevard; thence northeasterly in and upon the Southern boulevard to Leggett avenue and there connecting with the road for which the Company has a franchise in Leggett avenue; and to cross such other streets and avenues, named and unnamed, as may be encountered in said route. Provided, however, that nothing in this contract shall be construed as permitting more than a double track in any portion of Southern boulevard.

The said route with turnouts, switches and crossovers hereby authorized is shown upon a map entitled:

> "Map showing proposed extensions of the New York City Interborough Railway Company in the Boroughs of Manhattan and The Bronx, City of New York, to accompany petition dated March 31, 1911, to the Board of Estimate and Apportionment,"

—and signed by Edward A. Maher, President, and A. E. Kalbach, Engineer, a copy of which is attached hereto, is to be deemed a part of this contract, is to be construed with the text thereof, and is to be substantially followed, provided that deviations therefrom and additional turnouts, switches and crossovers which are consistent with the foregoing description, and the other provisions of this contract may be permitted by resolution of the Board.

Section 2. The grant of this privilege is subject to the following conditions, which shall be complied with by the Company:

First—The consent in writing of the owners of half in value of the property bounded on said streets and avenues to the construction and operation of said railway shall be obtained by the Company within three (3) months from the signing of this contract by the Mayor, and a copy of such consents shall be filed with the Board within such time, or in the event that such consents cannot be obtained within such time, the

Company shall, within said three (3) months, or within one (1) month thereafter make application to the Appellate Division of the Supreme Court for the appointment of Commissioners in the manner provided by the Railroad Law to determine if said railway ought to be constructed; otherwise this grant shall cease and determine.

Second—The said right to construct, maintain and operate said railway shall be held and enjoyed by the Company from the date upon which this contract is signed by the Mayor until March 31, 1928, with the privilege of renewal of said contract for the further period of twenty-five (25) years, upon a fair revaluation of such right and privilege.

If the Company shall determine to exercise its privilege of renewal it shall make application to the Board, or any authority which shall be authorized by law to act for the City in place of the Board. Such application shall be made at any time not earlier than two (2) years and not later than one (1) year before the expiration of the original term of this contract. The determination of the revaluation shall be sufficient if agreed to in writing by the Company and the Board, but in no case shall the annual rate of compensation to the City be fixed at a less amount than the sum required to be paid during the last year prior to the termination of the original term of this contract.

If the Company and the Board shall not reach such agreement on or before the day one (1) year before the expiration of the original term of this contract, then the annual rate of compensation for such succeeding twenty-five (25) years shall be reasonable, and either the City (by the Board) or the Company shall be bound upon request of the other to enter into a written agreement with each other fixing the rate of such compensation at such amount as shall be reasonable, but in no case shall the annual rate so fixed be less than the sum required to be paid for the last year prior to the termination of the original term of this contract, and if the parties shall not forthwith agree upon what is reasonable, then the parties shall enter into a written agreement fixing such annual rate and at such amount as shall be determined by three disinterested freeholders selected in the following manner

One disinterested freeholder shall be chosen by the Board; one disinterested freeholder shall be chosen by the Company; these two shall choose a third disinterested freeholder, and the three so chosen shall act as appraisers and shall make the revaluation aforesaid. Such appraisers shall be chosen at least six (6) months prior to the expiration of this original contract, and their report shall be filed with the Board within three (3) months after they are chosen. They shall act as appraisers and not as arbitrators. They may base their judgment upon their own experience and upon such information as they may obtain by inquiries and investigations, without the presence of either party. They shall have the right to examine any of the books of the Company and its officers under oath. The valuations so ascertained, fixed and determined shall be conclusive upon both parties, but no annual sum shall, in any event, be less than the sum required to be paid for the last year of the original term of this contract. If in any case the annual rate shall not be fixed prior to the termination of the original term of this contract, then the Company shall pay the annual rate therefore prevailing until the new rate shall be determined, and shall then make up to the City the amount of any excess of the annual rate then determined over the previous annual rate. The compensation and expenses of the said appraisers shall be borne jointly by the City and the Company, each paying one-half thereof.

Third—The Company shall pay to the City for the privilege hereby granted, the following sums of money

(a) The sum of one thousand dollars ($1,000) in cash within three (3) months after the date on which this contract is signed by the Mayor, and before anything is done in exercise of the privilege hereby granted.

(b) During the first term of five (5) years an annual sum which shall in no case be less than five hundred and fifty dollars ($550), and which shall be equal to three (3) per cent. of its gross annual receipts if such percentage shall exceed the sum of five hundred and fifty dollars $550).

During the second term of five (5) years an annual sum which shall in no case be less than one thousand dollars ($1,000), and which shall be equal to five (5) per cent. of its gross annual receipts, if such percentage shall exceed the sum of one thousand dollars ($1,000.)

During the third term of five (5) years an annual sum which shall in no case be less than one thousand one hundred dollars ($1,100), and which shall be equal to five (5) per cent. of its gross annual receipts, if such percentage shall exceed the sum of one thousand one hundred dollars ($1,100).

During the remaining term expiring March 31, 1928, an annual sum which shall in no case be less than one thousand two hundred dollars ($1,200), and which shall be equal to five (5) per cent. of its gross annual receipts, if such percentage shall exceed the sum of one thousand two hundred dollars ($1,200.)

The gross annual receipts mentioned above shall be that portion of the gross receipts of the Company as shall bear the same proportion to its whole gross receipts as the length of the extension hereby authorized shall bear to the entire length of the railway of the Company in operation within the limits of the City.

The annual charges shall commence from the date upon which this contract is signed by the Mayor.

All annual charges as above shall be paid into the Treasury of the City on November 1 of each year, and shall be for the amount due to September 30 next preceeding. Provided that the first annual payment shall be only for that proportion of the first annual charge as the time between the date upon which this contract is signed by the Mayor and September 30 following shall bear to the whole of one year.

Whenever the percentage required to be paid shall exceed the minimum amount as above, then such sum over and above such minimum shall be paid on or before November 1 in each year for the year ending September 30 next preceding.

The annual charges herein provided are intended to include the percentages of gross receipts now required to be paid by railway companies to the City, pursuant to the Railroad Law, as amended.

Any and all payments to be made by the terms of this contract to the City by the Company shall not be considered in any manner in the nature of a tax, but such payments shall be made in addition to any and all taxes of whatsoever kind or description, now or hereafter required to be paid by any ordinance of the City or resolution of the Board or any law of the State of New York.

Fourth—The annual charges or payments shall continue throughout the whole term of this contract (whether original or renewal), notwithstanding any clause in any statute or in the charter of any other railway or railroad company providing for payment for railway or railroad rights or franchises at a different rate, and no assignment, lease or sublease of the rights or privileges hereby granted (whether original or renewal), or of any part thereof, or of any of the routes mentioned herein, or of any part thereof, shall be valid or effectual for any purpose unless the said assignment, lease or sublease shall contain a covenant on the part of the assignee or lessee that the same is subject to all the conditions of this contract, and that the assignee or lessee assumes and will be bound by all of said conditions, and especially said conditions as to payments, anything in any statute or in the charter of such assignee or lessee to the contrary notwithstanding, and that the said assignee or lessee waives any more favorable conditions created by such statute or its charter, and that it will not claim by reason thereof or otherwise exemptions from liability to perform each and all of the conditions of this contract.

Fifth—Nothing in this contract shall be deemed to affect in any way the right of the City to grant to any individual or other corporation a similar right or privilege upon the same or other terms and conditions, over the route hereinbefore described.

The use of the railway constructed by the Company under this contract, including the tracks, wires and other equipment or any structures used in connection therewith, in streets and avenues hereinbefore described shall be permitted by the Company, to any individual or corporation to which the City may have granted, or may hereafter grant, the right or privilege to use such streets and avenues for street railway purposes, upon payment of an annual sum by such individual or corporation to the Company, which shall equal the legal interest on such proportion of the actual cost of the construction of such railway and structures, and additions and betterments thereto, as the number of cars operated by such individual or corporation shall bear to the number of cars operated by the companies then using the same; and also such proportion of the cost of keeping the tracks and electrical equipment in repair, and the cost of additions and betterments thereto, such proportion of laying and repairing of pavement and removal of snow and ice and all other duties imposed upon the Company by the terms of this contract in connection with the maintenance or the operation of said railway so used, as the number of cars operated by such individual or corporation shall bear to the number of cars operated by the companies then using the same, together with the actual cost of the power necessary for the operation of the cars thereon of such individual or corporation. Provided, however, that if, in the opinion of the Company, the legal rate of interest upon the cost of such railway shall be an insufficient sum to be paid for the use of such tracks, it may appeal to the Board and the Board may fix a percentage upon the cost to be paid to the Company, at a sum in excess of the legal rate of interest, if, in its opinion, such action is justified.

The Company shall not at any time oppose, but shall, upon the request of the Board, consent to the construction or operation of any street surface railway which may necessitate the use of any portion of the railway which shall be constructed by the Company, pursuant to this contract.

Sixth—The Company covenants and agrees to abandon and relinquish and does hereby abandon and relinquish to the City all its rights and franchises to construct, maintain and operate a street surface railway upon the route beginning at the intersection of East 149th street with St. Anns avenue; thence northerly on and along St. Anns avenue to East 156th street; thence easterly on and along said East 156th street to its intersection with Leggett avenue or Craven street; thence southerly and easterly on and along Leggett avenue or Craven street to its intersection with Southern boulvard, all in the Borough of The Bronx, and the Company shall, within one year from the date on which this contract is signed by the Mayor, comply with the provisions of law in regard to the abandonment of said route so abandoned and relinquished, and shall remove therefrom any and all existing tracks of the Company within such time, and restore the pavement in the manner prescribed by the President of the Borough of The Bronx, otherwise this contract shall be void and of no effect. Provided, however, the Board may extend said period for a period or periods not exceeding in the aggregate six months.

Seventh—The rights and privileges hereby granted shall not be assigned, either in whole or in part, or leased or sublet in any manner, nor shall the title thereto, or right, interest or property therein, pass to or vest in any other person or corporation whatsoever, either by the act of the Company, or by operation of law, whether under the provisions of the statutes relating to the consolidation or merger of corporations or otherwise, without the consent of the City, acting by the Board, evidenced by an instrument under seal, anything herein contained to the contrary thereof in any wise notwithstanding, and the granting, giving or waiving of any one or more of such consents shall not render unnecessary any subsequent consent or consents.

Eighth—Upon the termination of this original contract, or if the same be renewed, then at the termination of the said renewal term, or upon the termination of the rights hereby granted for any cause, or upon the dissolution of the Company before such termination, the tracks and equipments of the Company constructed, pursuant to this contract, within the streets and avenues shall become the property of the City without cost, and the same may be used or disposed of by the City for any purpose whatsoever, or the same may be leased to any company or individual.

If, however, at the termination of this contract as above, the Board shall so order by resolution, the Company shall, upon thirty (30) days' notice from the Board, remove any and all of its tracks and other equipment constructed pursuant to this contract and the said streets and avenues shall be restored to their original condition at the sole cost and expense of the Company.

Ninth—The Company shall commence construction of the railway herein authorized within six (6) months from the date upon which the consents of the property owners are filed with the Board, or from the date of the order of the Appellate Division of the Supreme Court made pursuant to section 174 of the Railroad Law confirming the determination of the Commissioners appointed thereunder, that such railway ought to be constructed and shall complete the construction and place the same in full operation within twelve (12) months from the date of filing such consents or the date of such order, otherwise this right shall cease and determine, and all sums paid, or which may be deposited with the Comptroller of the City, as hereinafter provided, shall thereupon be forfeited to the City, provided that the period for commencement and the period for completion and placing the railway in full operation may be extended by the Board, but the total extension of time for either of such periods shall not exceed in the aggregate six (6) months; and provided, further, that when the commencement or completion of said construction shall be prevented by legal proceedings in any court or by works of public improvement, or from other causes not within control of the Company, the time for the commencement or completion of such construction may be extended for the period of such prevention, but no delay shall be allowed for unless the court proceedings shall be diligently prosecuted by the Company, and provided further that in no case shall such delay be deemed to begin until the Company shall have given written notice to the Board of any such court proceedings or other occasion of delay, and deliver to the Board copies of any injunction or other orders, and the papers upon which the same shall have been granted, and unless upon the request of the Board the Company shall, in writing, consent that the Board either in its own name as a party, or in the name of the City as a party, may intervene in any such proceedings.

Tenth—Said railway shall be constructed and operated in the latest approved manner of street railway construction and operation, and it is hereby agreed that the Board may require the Company to improve or add to the railway equipment, including rolling stock and railway appurtenances, from time to time, as such additions and improvements are necessary, in opinion of the Board. Upon failure on the part of the Company to comply with the direction of the Board within a reasonable time, the rights hereby granted shall cease and determine.

Eleventh—Said railway shall be constructed, maintained and operated subject to the supervision and control of all the authorities of the City who have jurisdiction in such matters, as provided by the Charter of the City.

No construction upon said railway shall be commenced until written permits have been obtained from the proper City officials.

In any permits so issued such officials may also impose such conditions, as a condition of the granting of the same, as are necessary for the purpose of protecting any structures, in the streets and avenues, over which such officials have jurisdiction, and the Company shall comply with such conditions.

The electrical equipment to be installed by the Company for the operation of the railway within the limits of the City, whether the same be upon streets and avenues or upon private property, shall be constructed and maintained under the supervision and control of the Commissioner of Water Supply, Gas and Electricity.

Twelfth—Said railway may be operated by overhead electric power substantially similar to the overhead electric system now in use by street surface railways in the Borough of The Bronx, or by any other motive power, except locomotive steam power or horse power, which may be approved by the Board, and consented to by the abutting property owners, in accordance with the provisions of law, and by the Public Service Commission for the First District of the State of New York.

Provided, however, that the Board, upon giving to the Company one (1) year's notice, may require the Company to operate its railway upon the whole or upon any portion of its route, by underground electric power substantially similar to the system now in use on the street surface railways in the Borough of Manhattan, or by any other practical motive power then in use which does not require the use of poles and overhead wires in the streets and avenues, and thereupon to discontinue the use of the overhead trolley system, and to remove its poles, wires and other structures used by it for that purpose from the streets and avenues of the City.

Thirteenth—Upon six (6) months' notice by the Board to the Company, all wires for the transmission of power, except trolley wires, for the operation of the railway, upon all or any portion of the route hereby authorized, shall be placed in conduits beneath or alongside of the railway. The Company shall provide in such conduits two (2) ducts not less than three (3) inches in diameter for the exclusive use of the City. Such ducts shall be used only by the Company for the operation of its railway and by the City as above.

Fourteenth—The rate of fare for any passenger upon said railway shall not exceed five (5) cents, and the Company shall not charge any passenger more than five (5) cents for one continuous ride from any point on its road or on any road, line or branch operated by it or under its control to any other point thereof, or any connecting branch thereof within the limits of the City.

The Company shall carry free upon the railway hereby authorized during the term of this contract all members of the Police and Fire Departments of the City, when such employees are in full uniform.

Fifteenth—No cars shall be operated upon the railway hereby authorized, other than passenger cars and cars necessary for the repair or maintenance of the railway, and no freight cars shall be operated upon the tracks of said railway.

Sixteenth—The Company shall attach to each car run over the said railway proper fenders and wheel guards, in conformity with such laws and ordinances as are now in force, or may hereafter, during the term of this contract, be enacted or adopted by the State or City authorities, or as may be required by resolution of the Board.

Seventeenth—All cars which are operated on said railway shall be heated during the cold weather, in conformity with such laws and ordinances as are now in force, or may hereafter, during the term of this contract, be enacted or adopted by the State or City authorities, or as may be required by resolution of the Board.

Eighteenth—All cars operated on said railway shall be well lighted by electricity, or by some lighting system equally efficient, or as may be required by resolution of the Board.

Nineteenth—Cars on the said railway shall run at intervals of not more than thirty (30) minutes both day and night, and as much oftener as reasonable convenience of the public may require, or as may be directed by the Board.

Twentieth—The Company, so long as it shall continue to use any of the tracks upon the streets and avenues in which said railway shall be constructed, shall cause to be watered at least three (3) times every twenty-four (24) hours when the temperature is above thirty-five (35) degrees Fahrenheit, the entire width of the streets and avenues, except when the width of such streets and avenues shall exceed sixty (60) feet between curblines, in which case the Company shall cause to be watered only sixty (60) feet in width of such roadway, and the Company shall provide for such purpose at least one tank car, the capacity of which shall be sufficient to water such streets and avenues in a satisfactory manner.

Twenty-first—The Company shall at all times keep the streets and avenues upon which the said railway is constructed, between its tracks, the rails of its tracks and for a distance of two (2) feet beyond the rails, on either side thereof, free and clear from ice and snow; provided, however, that the Company shall, at the option of the Commissioner of Street Cleaning, enter into an agreement for each winter season, or part thereof, to clean an equivalent amount of street surface from house line to house line.

Twenty-second—As long as said railway, or any portion thereof, remains in any street or avenue, the Company shall pave and keep in permanent repair that portion of the surface of the street or avenue in which the said railway is constructed, between its tracks, the rails of its tracks and for a distance of two (2) feet beyond the rails on either side thereof, under the supervision of the local authorities, whenever required by them to do so, and in such manner as they may prescribe. In case of the neglect of the Company to make pavement or repairs after the expiration of thirty (30) days' notice to do so from the President of the Borough of The Bronx, said President may make the same at the expense of the Company. And the City shall have the right to change the material or character of the pavement of any street or avenue, and in that event the Company shall be bound to replace such pavement in the manner directed by the proper City officials, at its own expense, and the provisions as to repairs herein contained shall apply to such renewed or altered pavement.

Twenty-third—Any alteration to the sewerage or drainage systems or to any other subsurface or to any surface structures in the streets, required on account of the construction or operation of the railway, shall be made at the sole cost of the Company, and in such manner as the proper City officials may prescribe.

Twenty-fourth—It is agreed that the right hereby granted to operate a street surface railway shall not be in preference or in hindrance of public work of the City, and should the said railway in any way interfere with the construction of public works in the streets and avenues, whether the same is done by the City directly or by a contractor for the City, the Company shall, at its own expense, protect or move the tracks and appurtenances in the manner directed by the City officials having jurisdiction over such public work.

Twenty-fifth—Should the grades or lines of the streets and avenues in which the railway is hereby authorized be changed at any time after the railway has been constructed and during the term of this contract, the Company shall, at its own expense, change its tracks and appurtenances to conform with such new grades and lines, and during the construction of any public improvement upon said streets and avenues, the Company shall take care of and protect the tracks and appurtenances at its own expense, all to be done subject to the direction of the City official having jurisdiction over the construction of such change.

Twenty-sixth—The Company shall submit to the Board a report not later than November 1 of each year for the year ending September 30 next preceding, and at any other time, upon request of the Board, which shall state:

1. The amount of stock issued, for cash, for property.
2. The amount paid in as by last report.
3. The total amount of capital stock paid in.
4. The funded debt by last report.
5. The total amount of funded debt.
6. The floating debt as by last report.
7. The total amount of floating debt.
8. The total amount of funded and floating debt.
9. The average rate per annum of interest on funded debt.
10. Statement of dividends paid during the year.
11. The total amount expended for same.
12. The names of the directors elected at the last meeting of the corporation held for such purpose.
13. Location, value and amount paid for real estate owned by the Company as by last report.
14. Location, value and amount paid for real estate now owned by the Company.
15. Number of passengers carried during the year.
16. Total receipts of Company for each class of business.
17. Amounts paid by the Company for damage to persons or property on account of construction and operation.

18. Total expenses for operation, including salaries.
—and such other information in regard to the business of the Company as may be required by the Board.

Twenty-seventh—The Company shall at all times keep accurate books of account of the gross receipts from all sources within the limits of the City, and shall, on or before November 1, of each year, make a verified report to the Comptroller of the City of the business done by the Company for the year ending September 30 next preceding, in such form as he may prescribe. Such report shall contain a statement of such gross receipts, the total miles in operation within the limits of the City and the miles of railway constructed and operated under this contract, and such other information as the Comptroller may require. The Comptroller shall have access to all books of the Company for the purpose of ascertaining the correctness of its report, and may examine its officers under oath.

Twenty-eighth—In case of any violation or breach or failure to comply with any of the provisions herein contained, or with any orders of the Board acting under the powers herein reserved, the franchise or consent herein granted may be forfeited by a suit brought by the Corporation Counsel, on notice of ten (10) days to the Company, or at the option of the Board by resolution of said Board, which said resolution may contain a provision to the effect that the railway constructed and in use by virtue of this contract shall thereupon become the property of the City without proceedings at law or in equity. Provided, however, that such action by the Board shall not be taken until the Board shall give notice to the Company to appear before it on a certain day not less than ten (10) days after the date of such notice, to show cause why such resolution declaring the contract forfeited should not be adopted. In case the Company fails to appear, action may be taken by the Board forthwith.

Twenty-ninth—If the Company shall fail to give efficient public service at the rates herein fixed, or fail to maintain its structures and equipment as herein provided in good condition throughout the whole term of this contract, the Board may give notice to the Company specifying any default on the part of the Company, and requiring the Company to remedy the same within a reasonable time; and upon failure of the Company to remedy such default within a reasonable time, the Company shall for each day thereafter during which the default or defect remains, pay to the City the sum of two hundred and fifty dollars ($250) as fixed or liquidated damages, or the Board, in case such structures or equipment which may affect the surface of the streets shall not be put in good condition within a reasonable time after notice the Board as aforesaid shall have the right to make all needed repairs at the expense of the Company, in which case the Company shall pay to the City the amount of the cost of such repairs. with legal interest thereon, all of which sums may be deducted from the fund hereinafter provided for.

Thirtieth—The Company shall assume all liability to persons or property by reason of the construction or operation of the railway authorized by this contract, and it is a condition of this contract that the City shall assume no liability whatsoever to either persons or property on account of the same, and the Company hereby agrees to repay to the City any damage which the City shall be compelled to pay by reason of any acts or default of the Company.

Thirty-first—This grant is upon the express condition that any and all sums of money or any and all securities heretofore deposited with the Comptroller by the Company under and pursuant to franchises heretofore granted to it by the City as a fund for the security for the performance by the Company of the terms and conditions of the franchise so granted, shall likewise be a fund for the security for the faithful performance by the Company of all the terms and conditions of this contract and compliance with all orders of the Board acting under the powers herein reserved, especially those which relate to the payment of the annual charges for the privilege hereby granted, the rendering of efficient public service at the rates herein fixed, the repairs of the street pavement, the removal of snow and ice, the quality of construction of the railway and the maintenance of the property in good condition throughout the whole term of this contract, and in case of default in the performance by the Company of such terms and conditions, or compliance with such orders, or either or any of them, the City shall have the right to cause the work to be done and the materials to be furnished for the performance thereof, after due notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings; or after default in the payment of the annual charges, shall collect the same, with interest, from the said fund after ten (10) days' notice to the Company, or, in case of failure to observe the said terms and conditions of this contract and orders of the Board acting hereunder, relating to the headway, heating and lighting of cars, fenders, wheel guards and watering of street pavements, the Company shall pay a penalty of fifty dollars ($50) per day for each day of violation. and the further sum of ten dollars ($10) per day for each car that shall not be properly heated, lighted or supplied with fenders or wheel guards, in case of a violation of the provisions relating to these matters, all of which sums may be deducted from such fund.

The procedure for the imposition and collection of the penalties in this contract shall be as follows:

The Board, on complaint made, shall give notice to the Company, directing its President or other officer to appear before the Board on a certain day not less than ten (10) days after the date of such notice, to show cause why the Company should not be penalized in accordance with the foregoing provisions. If the Company fails to make an appearance, or, after a hearing appears in the judgment of the Board to be in fault, said Board shall forthwith impose the prescribed penalty, or where the amount of the penalty is not prescribed herein, such amount as appears to the Board to be just, and without legal procedure direct the Comptroller to withdraw the amount of such penalty from the security fund deposited with him. In case of any drafts made upon the security fund the Company shall, upon ten (10) days' notice, pay to the City a sum sufficient to restore said security fund to the original amount, and in default thereof this contract shall be canceled and annulled at the option of the Board, acting in behalf of the City. No action or proceeding or right under the provisions of this contract shall affect any other legal rights, remedies or causes of action belonging to the City.

Thirty-second—The words "notice" or "direction," wherever used in this contract, shall be deemed to mean a written notice or direction. Every such notice or direction to be served upon the Company shall be delivered at such office in the City as shall have been designated by the Company, or if no such office shall have been designated, or if such designation shall have for any reason become inoperative, shall be mailed in the City, postage prepaid, addressed to the Company at the City. Delivery or mailing of such notice or direction as and when above provided shall be equivalent to direct personal notice or direction, and shall be deemed to have been given at the time of delivery or mailing.

Thirty-third—The words "streets or avenues" and "streets and avenues" wherever used in this contract shall be deemed to mean "streets, avenues, highways, parkways, driveways, concourses, boulevards, bridges, viaducts, tunnels, public places or any other property to which the City has title, or over which the public has an easement," encountered in the route hereinabove described, and upon or in which authority is hereby given to the Company to construct a railway.

Thirty-fourth—If at any time the powers of the Board or any other of the authorities herein mentioned or intended to be mentioned shall be transferred by law to any other board, authority, officer or officers, then and in such case such other board, authority, officer or officers, shall have all the powers, rights and duties herein reserved to or prescribed for the Board or other authorities, officer or officers.

Section 3. The grant of this privilege to the Company is likewise subject to the following conditions:

This contract shall not become operative until the Company shall procure and cause to be executed and approved in proper form for record and duly delivered to the Board of Estimate and Apportionment:

First—An agreement with The Southern Boulevard Railroad Company, wherein said Company shall agree to permit the use of its tracks on Southern boulevard, between East 149th street and Leggett avenue, by the Company, its successors or assigns, the City, or any other company to which the City may, after the termination of this contract, grant or lease rights, and the compensation for such use shall not exceed the terms provided by section 2, Fifth, of this contract;

Upon the failure of the said Southern Boulevard Railroad Company for any reason at any time hereafter to permit the use of its tracks on Southern boulevard, between East 149th street and Leggett avenue, by the Company, its successors or assigns, the City, or any other company to which the City may, after the termination of this contract, grant or lease rights, the rights hereby granted shall cease and determine.

Second—An agreement wherein the Union Railway Company of New York City, The Southern Boulevard Railroad Company and the Company shall each agree between themselves and with the City that a passenger paying a single fare upon a car on the east or west lines of any of said companies shall receive, without further payment, a ride north or south on any line of the other companies, and a passenger paying a single fare upon a car on a north or south line of any of said companies shall receive a ride east or west on any line of the other companies without further payment at points of intersection, and that a passenger may continue in the direction in which his fare was first paid on any other line, without further payments. Upon the failure of the said three companies or any of them to furnish such a continuous ride for one fare over their routes, or over any part of their routes, as herein provided, at any time during the term of this grant or any renewal or renewals thereof, the rights hereby granted shall thereupon cease and determine.

Section 4. Nothing in this contract shall be construed as in any way limiting the present or future jurisdiction of the Public Service Commission under the Laws of the State of New York.

Section 5. This grant is also upon the further and express condition that the provisions of article 5 and other provisions of the Railroad Law, pertinent hereto, shall be strictly complied with by the Company.

Section 6. The Company promises, covenants and agrees on its part and behalf to conform to and abide by and perform all the terms, conditions and requirements in this contract fixed and contained.

In witness whereof, the party of the first part, by its Mayor, thereunto duly authorized by the Board of Estimate and Apportionment of said City, has caused the corporate name of said City to be hereunto signed and the corporate seal of said City to be hereunto affixed; and the party of the second part, by its officers thereunto duly authorized, has caused its corporate name to be hereunto signed and its corporate seal to be hereunto affixed, the day and year first above written.

THE CITY OF NEW YORK,

By ...., Mayor.

[CORPORATE SEAL.]

Attest: ...., City Clerk.

NEW YORK CITY INTERBOROUGH RAILWAY COMPANY,

By ...., President.

[SEAL.]

Attest: ...., Secretary.

(Here add acknowledgments.)

Agreement, made this .... day of ...., 1911, between The Southern Boulevard Railroad Company (hereinafter called Boulevard Company), party of the first part, New York City Interborough Railroad Company (hereinafter called Interborough Company), party of the second part, and The City of New York (hereinafter called the City), party of the third part.

Whereas, The Interborough Company on March 31, 1911, applied to the Board of Estimate and Apportionment as the local authority of said City for the right to construct, maintain and operate four extensions to its street surface railway in the Boroughs of Manhattan and The Bronx; and

Whereas, On ...., 1911, a resolution granting the right to construct, maintain and operate one of such extensions, to wit: On East 149th street, from St. Anns avenue to Southern boulevard; thence on Southern boulevard to Leggett avenue, in the Borough of The Bronx, and authorizing the Mayor to deliver the contract for said right in the name and on behalf of The City of New York, was approved by the Mayor; and

Whereas, Said contract provides that the Interborough Company shall procure and cause to be executed an agreement wherein said Boulevard Company shall agree to permt the use of its tracks on the route beginning at the intersection of Southern boulevard with East 149th street; thence northeasterly in and upon Southern boulevard to the intersection of Southern boulevard with Leggett avenue in the Borough of The Bronx by the Interborough Company, its successors or assigns, the City or any other company to which the City may after the termination of this grant, grant or lease rights, and the compensation for such use shall not exceed that provided in section 2, subdivision Fifth, of the said contract.

Now, therefore, in consideration of the premises and of the sum of one dollar by each of the parties of the first and second parts to the other paid, the receipt whereof is hereby acknowledged, the parties of the first and second parts do hereby covenant and agree with each other and with the party of the third part that the Interborugh Company may construct and operate its railroad upon Southern boulevard on the route beginning at the intersection of Southern boulevard with East 149th street; thence northeasterly in and upon Southern boulevard to the intersection of Southern boulevard with Leggett avenue, in the Borough of The Bronx, and enjoy with the said Boulevard Company a right in common to the use of the route and tracks of said Boulevard Company upon the said route, and the Boulevard Company further covenants and agrees to permit the use of its tracks by the Interborough Company, its successors or assigns, the City or any other company to which the City may after the termination of this grant, grant or lease any rights on said route, and that the compensation for such use shall not exceed that provided in section 2, subdivision Fifth, of the said contract.

In witness whereof, the Boulevard Company and the Interborough Company, by their officers thereunto duly authorized, have caused their corporate names to be hereunto signed and their corporate seals to be hereunto affixed the day and year first above written.

THE SOUTHERN BOULEVARD RAILROAD COMPANY,

By ...., President.

[SEAL.]

Attest: ...., Secretary.

NEW YORK CITY INTERBOROUGH COMPANY,

By ...., President.

[SEAL.]

Attest: ...., Secretary.

(Here add acknowledgments.)

Agreement, made this .... day of ...., 1911, between The Union Railway Company of New York City (hereinafter called Union Company), party of the first part, The Southern Boulevard Railroad Company (hereinafter called Boulevard Company), party of the second part, New York City Interborough Railway Company (hereinafter called Interborough Company), party of the third part, and The City of New York (hereinafter called the City), party of the fourth part.

Whereas, The Interborough Company, on March 31, 1911, applied to the Board of Estimate and Apportionment as the local authority of said City for the right to construct, maintain and operate four extensions to its street surface railway, in the Boroughs of Manhattan and The Bronx; and

Whereas, On ...., 1911, resolutions granting the right to construct, maintain and operate two of such extensions and authorizing the Mayor to execute and deliver the contracts for said rights in the name and on behalf of The City of New York, were approved by the Mayor; and

Whereas, Said contracts each provide that the same shall not become operative until the Interborough Company shall procure and cause to be executed and approved in proper form for record and duly delivered to the Board, an agreement wherein the Union Railway Company of New York City, The Southern Boulevard Railroad Company and the Company shall each agree between themselves and with the City that a passenger paying a single fare upon a car on the east or west lines of any of said companies shall receive, without further payment, a ride north or south on any line of the other companies, and a passenger paying a single fare upon a car on a north or south line of any of said companies shall receive a ride east or west on any line of the other companies without further payment at points of intersection, and that a passenger may continue in the direction in which his fare was first paid on any other line without further payments.

Now, therefore, in consideration of the premises and of the sum of one dollar by each of the parties of the first, second and third parts to the others paid, the receipt whereof is hereby acknowledged, the parties of the first, second and third parts do each hereby covenant and agree with each other and with the party of the fourth part that a passenger paying a single fare upon a car on the east or west lines of any of said companies shall receive, without further payment, a ride north or south on any line of the other companies, and a passenger paying a single fare upon a car on a north and south line of any of said companies shall receive a ride east or west on any line of the other companies, without further payment at points of intersection, and that a passenger may continue in the direction in which his fare was first paid on any other line without further payments.

In witness whereof, The Union Company, Boulevard Company and Interborough Company, by their officers thereunto duly authorized, have caused their corporate names to be hereunto signed and their corporate seals to be hereunto affixed the day and year first above written.

(Here add acknowledgments.)

Resolved, That the results of the inquiry made by this Board as to the money value of the franchise or right proposed to be granted and the adequacy of the compensation proposed to be paid therefor, and of the terms and conditions, including the provisions as to rates, fares and charges, are as hereinbefore specified and fully set forth in and by the foregoing form of proposed contract for the grant of such franchise or right.

Resolved, That these preambles and resolutions, including the said resolution for the grant of a franchise or right applied for by The New York City Interborough Railway Company, and the said form of proposed contract for the grant of such franchise or right, containing said results of such inquiry, after the same shall be entered in the minutes of this Board, shall be published for at least twenty (20) days immediately prior to Thursday, September 21, 1911, in the CITY RECORD, and at least twice during the ten (10) days immediately prior to Thursday, September 21, 1911, in two (2) daily newspapers to be designated by the Mayor therefor and published in the City of New York, at the expense of The New York City Interborough Railway Company, together with the following notice, to wit:

Notice is hereby given that the Board of Estimate and Apportionment before authorizing any contract for the grant of the franchise or right applied for by The New York City Interborough Railway Company, and fully set forth and described in the foregoing form of proposed contract for the grant of such franchise or right, and before adopting any resolution authorizing any such contract, will, at a meeting of said Board, to be held in the Old Council Chamber, City Hall, Borough of Manhattan, City of New York, on Thursday, September 21, 1911, at 10.30 o'clock a. m., hold a public hearing thereon, at which citizens shall be entitled to appear and be heard.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following was offered:

Whereas, The New York City Interborough Railway Company has under date of March 31, 1911, made application to this Board for the grant of the right, privilege and franchise to construct, maintain and operate a double track street surface railway as an extension to its existing system upon and along Dongan street, Stebbins avenue, East 163d street, Washington avenue and Elton avenue, from Intervale avenue to East 161st street, Borough of The Bronx; and

Whereas, Section 172 of the Railroad Law and Sections 72, 73 and 74 of the Greater New York Charter, as amended by chapters 629 and 630 of the Laws of 1905, provide for the manner and procedure of making such grants; and

Whereas, In pursuance of such laws, this Board adopted a resolution on April 6, 1911, fixing the date for public hearing thereon as April 27, 1911, at which citizens were entitled to appear and be heard, and publication was had for at least fourteen (14) days in the "Morning Telegraph" and "New York Sun," newspapers designated by the Mayor, and in the CITY RECORD, for ten (10) days immediately prior to the date of hearing, and the public hearing was duly had on such day; and

Whereas, This Board has made inquiry as to the money value of the franchise or right applied for, and proposed to be granted to the New York City Interborough Railway Company and the adequacy of the compensation proposed to be paid therefor; now, therefore, it is

Resolved, That the following form of the resolution for the grant of the franchise or right applied for by the New York City Interborough Railway Company, containing the form of proposed contract for the grant of such franchise or right, be hereby introduced, and entered in the minutes of this Board, as follows, to wit:

"Resolved, That the Board of Estimate and Apportionment hereby grants to the New York City Interborough Railway Company the franchise or right fully set out and described in the following form of proposed contract for the grant thereof, embodying all of the terms and conditions, including the provisions as to rates, fares and charges upon and subject to the terms and conditions in said proposed form of contract contained, and that the Mayor of the City of New York be and he hereby is authorized to execute and deliver such contract in the name and on behalf of the City of New York, as follows, to wit:

Proposed Form of Contract.

This contract, made this day of , 1911, by and between The City of New York (hereinafter called the City), party of the first part, by the Mayor of said City, acting for and in the name of said City, under and in pursuance of the authority of the Board of Estimate and Apportionment of said City (hereinafter called the Board), and the New York City Interborough Railway Company (hereinafter called the Company), party of the second part, witnesseth:

In consideration of the mutual covenants and agreements herein contained, the parties hereto do hereby covenant and agree as follows:

Section 1. The City hereby grants to the Company, subject to the conditions and provisions hereinafter set forth, the right and privilege to construct, maintain and operate a double track extension to its street surface railway, with the necessary wires and equipment, for the purpose of conveying passengers only, in the Borough of The Bronx, in The City of New York, upon the following route, to wit:

Beginning on Dongan street at its intersection with Intervale avenue, and there connecting with the road for which the Company has a franchise; thence westerly in and upon Dongan street to Stebbins avenue; thence northerly in and upon Stebbins avenue to East 163d street; thence westerly in and upon East 163d street to Washington avenue; thence southwesterly in and upon Washington avenue to Elton avenue; thence southwesterly in and upon Elton avenue to East 163d street, and there connecting with the existing tracks of the Union Railway Company of New York City in East 161st street.

And to cross such other streets and avenues, named and unnamed, as may be encountered in said route.

The said route with turnouts, switches and crossovers hereby authorized is shown upon a map entitled:

> "Map showing proposed extensions of The New York City Interborough Railway Company in the Boroughs of Manhattan and The Bronx, City of New York, to accompany petition dated March 31, 1911, to the Board of Estimate and Apportionment,"

—and signed by Edward A. Maher, President, and A. E. Kalbach, Engineer; a copy of which is attached hereto, is to be deemed a part of this contract, is to be construed with the text thereof and is to be substantially followed, provided that deviations therefrom and additional turnouts, switches and crossovers which are consistent with the foregoing description, and the other provisions of this contract, may be permitted by resolution of the Board.

Section 2. The grant of this privilege is subject to the following conditions, which shall be complied with by the Company:

First—The consent in writing of the owners of half in value of the property bounded on said streets and avenues to the construction and operation of said railway shall be obtained by the Company within three (3) months from the signing of this contract by the Mayor, and a copy of such consents shall be filed with the Board within such time, or in the event that such consents cannot be obtained within such time, the Company shall, within said three (3) months, or within one (1) month thereafter, make application to the Appellate Division of the Supreme Court for the appointment of Commissioners in the manner provided by the Railroad Law to determine if said railway ought to be constructed; otherwise this grant shall cease and determine.

Second—The said right to construct, maintain and operate said railway shall be held and enjoyed by the Company from the date upon which this contract is signed by the Mayor until March 31, 1928, with the privilege of renewal of said contract for a further period of twenty-five (25) years, upon a fair revaluation of such right and privilege.

If the Company shall determine to exercise its privilege of renewal, it shall make application to the Board, or any authority which shall be authorized by law to act for the City in place of the Board. Such application shall be made at any time not earlier than two (2) years and not later than one (1) year before the expiration of the original term of this contract. The determination of the revaluation shall be sufficient if agreed to in writing by the Company and the Board, but in no case shall the annual rate of compensation to the City be fixed at a less amount than the sum required to be paid during the last year prior to the termination of the original term of this contract.

If the Company and the Board shall not reach such agreement on or before the day one (1) year before the expiration of the original term of this contract, then the annual rate of compensation for such succeeding twenty-five (25) years shall be reasonable, and either the City (by the Board) or the Company shall be bound upon request of the other to enter into a written agreement with each other fixing the rate of such compensation at such amount as shall be reasonable, but in no case shall the annual rate so fixed be less than the sum required to be paid for the last year prior to the termination of the original term of this contract, and if the parties shall not forthwith agree upon what is reasonable, then the parties shall enter into a written agreement fixing such annual rate and at such amount as shall be determined by three disinterested freeholders selected in the following manner:

One disinterested freeholder shall be chosen by the Board; one disinterested freeholder shall be chosen by the Company; these two shall choose a third disinterested freeholder, and the three so chosen shall act as appraisers and shall make the revaluation aforesaid. Such appraisers shall be chosen at least six (6) months prior to the expiration of this original contract and their report shall be filed with the Board within three (3) months after they are chosen. They shall act as appraisers and not as arbitrators. They may base their judgment upon their own experience and upon such information as they may obtain by inquiries and investigations, without the presence of either party. They shall have the right to examine any of the books of the Company and its officers under oath. The valuations so ascertained, fixed and determined shall be conclusive upon both parties, but no annual sum shall, in any event, be less than the sum required to be paid for the last year of the original term of this contract. If in any case the annual rate shall not be fixed prior to the termination of the original term of this contract, then the Company shall pay the annual rate theretofore prevailing until the new rate shall be determined, and shall then make up to the City the amount of any excess of the annual rate then determined over the previous annual rate. The compensation and expenses of the said appraisers shall be borne jointly by the City and the Company, each paying one-half thereof.

Third—The Company shall pay to the City for the privilege hereby granted, the following sums of money:

(a) The sum of one thousaund five hundred dollars ($1,500) in cash within three (3) months after the date on which this contract is signed by the Mayor, and before anything is done in exercise of the privilege hereby granted.

(b) During the first term of five (5) years an annual sum which shall in no case be less than six hundred and fifty dollars ($650), and which shall be equal to three (3) per cent. of its gross annual receipts if such percentage shall exceed the sum of six hundred and fifty dollars ($650).

During the third term of five (5) years an annual sum which shall in no case be less than one thousanud two hundred dollars ($1,200), and which shall be equal to five (5) per cent. of its gross annual receipts, if such percentage shall exceed the sum of one thousand two hundred dollars ($1,200).

During the third term of five (5) years an annual sum which shall in no case be less than one thousand three hundred dollars ($1,300), and which shall be equal to five (5) per cent. of its gross annual receipts, if such percentage shall exceed the sum of one thousand three hundred dollars ($1,300).

During the remaining term, expiring March 31, 1928, an annual sum which shall in no case be less than one thousand four hundred dollars ($1,400), and which shall be equal to five (5) per cent. of its gross annual receipts, if such percentage shall exceed the sum of one thousand four hundred dollars ($1,400).

The gross annual receipts mentioned above shall be that portion of the gross receipts of the Company as shall bear the same proportion to its whole gross receipts as the length of the extension hereby authorized shall bear to the entire length of the railway of the Company in operation within the limits of the City.

The annual charges shall commence from the date upon which this contract is signed by the Mayor.

All annual charges as above shall be paid into the Treasury of the City on November 1 of each year and shall be for the amount due to September 30 next preceding. Provided that the first annual payment shall be only for that proportion of the first annual charge as the time between the date upon which this contract is signed by the Mayor and September 30 following shall bear to the whole of one year.

Whenever the percentage required to be paid shall exceed the minimum amount as above, then such sum over and above such minimum shall be paid on or before November 1 in each year for the year ending September 30 next preceding.

The annual charges herein provided are intended to include the percentages of gross receipts now required to be paid by railway companies to the City, pursuant to the Railroad Law, as amended.

Any and all payments to be made by the terms of this contract to the City by the Company, shall not be considered in any manner in the nature of a tax, but such payments shall be made in addition to any and all taxes of whatsoever kind or description, now or hereafter required to be paid by any ordinance of the City, or resolution of the Board, or any law of the State of New York.

Fourth—The annual charges or payments shall continue throughout the whole term of this contract (whether original or renewal), notwithstanding any clause in any statute or in the charter of any other railway or railroad company providing for payment for railway or railroad rights or franchises at a different rate, and no assignment, lease or sublease of the rights or privileges hereby granted (whether original or renewal), or of any part thereof, or of any of the routes mentioned herein, or of any part thereof, shall be valid or effectual for any purpose unless the said assignment, lease or sublease shall contain a covenant on the part of the assignee or lessee that the same is subject to all the conditions of this contract; and that the assignee or lessee assumes and will be bound by all of said conditions, and especially said conditions as to payments, anything in any statute or in the charter of such assignee or lessee to the contrary notwithstanding, and that the said assignee or lessee waives any more favorable conditions created by such statute or its charter, and that it will not claim by reason thereof or otherwise exemption from liability to perform each and all of the conditions of this contract.

Fifth—Nothing in this contract shall be deemed to affect in any way the right of the City to grant to any individual or other corporation a similar right or privilege upon the same or other terms and conditions, over the route hereinbefore described.

The use of the railway constructed by the Company under this contract, including the tracks, wires and other equipment or any structures used in connection therewith, in streets and avenues hereinbefore described, shall be permitted by the Company, to any individual or corporation to which the City may have granted, or may hereafter grant, the right or privilege to use such streets and avenues for street railway purposes, upon payment of an annual sum by such individual or corporation to the Company, which shall equal the legal interest on such proportion of the actual cost of the construction of such railway and structures, and additions and betterments thereto, as the number of cars operated by such individual or corporation shall bear to the number of cars operated by the companies then using the same; and also such proportion of the cost of keeping the tracks and electrical equipment in repair, and the cost of additions and betterments thereto, such proportion of laying and repairing of pavement and removal of snow and ice and all other duties imposed upon the Company by the terms of this contract in connection with the maintenance or the operation of said railway so used, as the number of cars operated by such individual or corporation shall bear the number of cars operated by the companies then using the same, together with the actual cost of the power necessary for the operation of the cars thereon of such individual or corporation. Provided, however, that if, in the opinion of the Company, the legal rate of interest upon the cost of such railway shall be an insufficient sum to be paid for the use of such tracks, it may appeal to the Board and the Board may fix a percentage upon the cost to be paid to the Company, at a sum in excess of the legal rate of interest, if, in its opinion, such action is justified.

The Company shall not at any time oppose, but shall, upon the request of the Board, consent to the construction or operation of any street surface railway which may necessitate the use of any portion of the railway which shall be constructed by the Company pursuant to this contract.

Sixth—The rights and privileges hereby granted shall not be assigned, either in whole or in part, or leased or sublet in any manner, nor shall the title thereto, or right, interest or property therein, pass to or vest in any other person or corporation whatsoever, either by the act of the Company or by operation of law, whether under the provisions of the statutes relating to the consolidation or merger of corporations or otherwise, without the consent of the City, acting by the Board, evidenced by an instrument under seal, anything herein contained to the contrary thereof in anywise notwithstanding, and the granting, giving or waiving of any one or more of such consents shall not render unnecessary any subsequent consent or consents.

Seventh—Upon the termination of this original contract, or if the same be renewed, then at the termination of the said renewal term, or upon the termination of the rights hereby granted for any cause, or upon the dissolution of the Company before such termination, the tracks and equipments of the Company constructed pursuant to this contract within the streets and avenues shall become the property of the City without cost, and the same may be used or disposed of by the City for any purpose whatsoever, or the same may be leased to any company or individual.

If, however, at the termination of this contract as above, the Board shall so order by resolution, the Company shall, upon thirty (30) days' notice from the Board, remove any and all of its tracks and other equipment constructed pursuant to this contract and the said streets and avenues shall be restored to their original condition at the sole cost and expense of the Company.

Eighth—The Company shall commence construction of the railway herein authorized within six (6) months from the date upon which the consents of the property owners are filed with the Board, or from the date of the order of the Appellate Division of the Supreme Court, made pursuant to section 174 of the Railroad Law, confirming the determination of the Commissioners appointed thereunder that such railway ought to be constructed, and shall complete the construction and place the same in full operation within twelve (12) months from the date of filing such consents or the date of such order; otherwise this right shall cease and determine, and all sums paid, or which may be deposited with the Comptroller of the City, as hereinafter provided, shall thereupon be forfeited to the City, provided that the period for commencement and the period for completion and placing the railway in full operation may be extended by the Board, but the total extension of time for either of such periods shall not exceed in the aggregate six (6) months; and provided, further, that when the commencement or completion of said construction shall be prevented by legal proceedings in any court or by works of public improvement, or from other causes not within control of the Company, the time for the commencement or completion of such construction may be extended for the period of such prevention, but no delay shall be allowed for unless the court proceedings shall be diligently prosecuted by the Company, and provided, further, that in no case shall such delay be deemed to begin until the Company shall have given written notice to the Board of any such court proceedings or other occasion of delay, and deliver to the Board copies of any injunction or other orders, and the papers upon which the same shall have been granted, and unless upon the request of the Board, the Company shall, in writing, consent that the Board either in its own name as a party or in the name of the City as a party may intervene in any such proceedings.

Ninth—Said railway shall be constructed and operated in the latest approved manner of street railway construction and operation, and it is hereby agreed that the Board may require the Company to improve or add to the railway equipment, including rolling stock and railway appurtenances, from time to time, as such additions and improvements are necessary, in the opinion of the Board. Upon failure on the part of the Company to comply with the direction of the Board within a reasonable time, the rights hereby granted shall cease and determine.

Tenth—Said railway shall be constructed, maintained and operated subject to the supervision and control of all the authorities of the City who have jurisdiction in such matters, as provided by the Charter of the City.

No construction upon said railway shall be commenced until written permits have been obtained from the proper City officials.

In any permits so issued, such officials may also impose such conditions, as a condition of the granting of the same, as are necessary for the purpose of protecting any structures in the streets and avenues over which such officials have jurisdiction, and the Company shall comply with such conditions.

The electrical equipment to be installed by the Company for the operation of the railway within the limits of the City, whether the same be upon streets and avenues or upon private property, shall be constructed and maintained under the supervision and control of the Commissioner of Water Supply, Gas and Electricity.

Eleventh—Said railway may be operated by overhead electric power, substantially similar to the overhead electric system now in use by street surface railways in the Borough of The Bronx, or by any other motive power, except locomotive steam power or horse power, which may be approved by the Board, and consented to by the abutting property owners, in accordance with the provisions of law, and by the Public Service Commission for the First District of the State of New York. Provided, however, that the Board, upon giving to the Company one (1) year's notice, may require the Company to operate such railway upon the whole or upon any portion of its route, by underground electric power, substantially similar to the system now in use on the street surface railways in the Borough of Manhattan, or by any other practical motive power, then in use which does not require the use of poles and overhead wires in the streets and avenues. and thereupon to discontinue the use of the overhead trolley system, and to remove its poles, wires and other structures used by it for that purpose from the streets and avenues of the City.

Twelfth—Upon six (6) months' notice by the Board to the Company, all wires for the transmission of power, except trolley wires, for the operation of the railway, upon all or any portion of the route hereby authorized, shall be placed in conduits beneath or alongside of the railway. The Company shall provide in such conduits two (2) ducts not less than three (3) inches in diameter for the exclusive use of the City. Such ducts shall be used only by the Company for the operation of its railway and by the City, as above.

Thirteenth—The rate of fare for any passenger upon said railway shall not exceed five (5) cents and the Company shall not charge any passenger more than five (5) cents for one continuous ride from any point on its road or on any road, line or branch operated by it or under its control, to any other point thereof, or any connecting branch thereof within the limits of the City.

The Company shall carry free upon the railway hereby authorized, during the term of this contract, all members of the Police and Fire Departments of the City, when such employees are in full uniform.

Fourteenth—No cars shall be operated upon the railway hereby authorized, other than passenger cars and cars necessary for the repair or maintenance of the railway, and no freight cars shall be operated upon the tracks of said railway.

Fifteenth—The Company shall attach to each car run over the said railroad, proper fenders and wheelguards, in conformity with such laws and ordinances as are now in force, or may hereafter during the term of this contract, be enacted or adopted by the State or City authorities, or as may be required by resolution of the Board.

Sixteenth—All cars which are operated on said railway shall be heated during the cold weather, in conformity with such laws and ordinances as are now in force, or may hereafter, during the term of this contract, be enacted or adopted by the State or City authorities, or as may be required by resolution of the Board.

Seventeenth—All cars operated on said railway shall be well lighted by electricity, or by some lighting system equally efficient, or as may be required by resolution of the Board.

Eighteenth—Cars on said railway shall run at intervals of not more than thirty (30) minutes both day and night, and as much oftener as reasonable convenience of the public may require, or as may be directed by the Board. Provided, however, that the Company shall not be required to operate its cars between the hours of 1 o'clock a. m. and 5 o'clock a. m., each day, unless the Board shall determine after a hearing had thereon that public convenience requires the operation of cars during said hours.

Nineteenth—The Company, so long as it shall continue to use any of the tracks upon the streets and avenues in which said railway shall be constructed, shall cause to be watered at least three (3) times every twenty-four (24) hours when the temperature is above thirty-five (35) degrees Fahrenheit, the entire width of the streets and avenues, except when the width of such streets aund avenues shall exceed sixty (60) feet between curblines, in which case the Company shall cause to be watered only sixty (60) feet in width of such roadway, and the Company shall provide for such purpose at least one tank car, the capacity of which shall be sufficient to water such streets and avenues in a satisfactory manner.

Twentieth—The Company shall at all times keep the streets and avenues upon which the said railway is constructed, between its tracks, the rails of its tracks and for a distance of two (2) feet beyond the rails, on either side thereof, free and clear from ice and snow; provided, however, that the Company shall, at the option of the Commissioner of Street Cleaning, enter into an agreement for each winter season, or part thereof, to clean an equivalent amount of street surface from house line to house line.

Twenty-first—As long as said railway, or any portion thereof, remains in any street or avenue, the Company shall pave and keep in permanent repair that portion of the surface of the street or avenue in which the said railway is constructed, between its tracks, the rails of its tracks and for a distance of two (2) feet beyond the rails on either side thereof, under the supervision of the local authorities, whenever required by them to do so, and in such manner as they may prescribe. In case of the neglect of the Company to make pavement or repairs after the expiration of thirty (30) days' notice to do so from the President of the Borough of The Bronx, said President may make the same at the expense of the Company. And the City shall have the right to change the material or character of the pavement of any street or avenue, and in that event the Company shall be bound to replace such pavement in the manner directed by the proper City official, at its own expense, and the provisions as to repairs herein contained shall apply to such renewed or altered pavement.

Twenty-second—Any alteration to the sewerage or drainage systems, or to any other subsurface or to any surface structures in the streets, required on account of the construction or operation of the railway, shall be made at the sole cost of the Company, and in such manner as the proper City officials may prescribe.

Twenty-third—It is agreed that the right hereby granted to operate a street surface railway shall not be in preference or in hindrance to public work of the City, and should the said railway in any way interfere with the construction of public works in the streets and avenues, whether the same is done by the City directly or by a contractor for the City, the Company shall, at its own expense, protect or move the tracks and appurtenances in the manner directed by the City officials having jurisdiction over such public work.

Twenty-fourth—Should the grades or lines of the streets and avenues in which the railway is hereby authorized be changed at any time after the railway has been constructed and during the term of this contract, the Company shall, at its own expense, change its tracks and appurtenances to conform with such new grades and lines, and during the construction of any public improvement upon said streets and avenues, the Company shall take care of and protect the tracks and appurtenances at its own expense, all to be done subject to the direction of the City official having jurisdiction over the construction of such change.

Twenty-fifth—The Company shall submit to the Board a report not later than November 1 of each year for the year ending September 30 next preceding, and at any other time, upon request of the Board, which shall state:

1. The amount of stock issued, for cash, for property.
2. The amount paid in as by last report.
3. The total amount of capital stock paid in.
4. The funded debt by last report.
5. The total amount of funded debt.
6. The floating debt as by last report.
7. The total amount of floating debt.
8. The total amount of funded and floating debt.
9. The average rate per annum of interest on funded debt.
10. Statement of dividends paid during the year.
11. The total amount expended for same.
12. The names of the directors elected at the last meeting of the corporation held for such purpose.
13. Location, value and amount paid for real estate owned by the company by last report.
14. Location, value and amount paid for real estate now owned by the company.
15. Number of passengers carried during the year.
16. Total receipts of company for each class of business.
17. Amounts paid by the company for damage to persons or property on account of construction and operation.
18. Total expense for operation, including salaries.

—and such other information in regard to the business of the Company as may be required by the Board.

Twenty-sixth—The Company shall at all times keep accurate books of account of the gross receipts from all sources within the limits of the City, and shall, on or before November 1 of each year, make a verified report to the Comptroller of the City of the business done by the Company, for the year ending September 30 next preceding, in such form as he may prescribe. Such report shall contain a statement of such gross receipts, the total miles in operation within the limits of the City and the miles of railway constructed and operated under this contract, and such other information as the Comptroller may require. The Comptroller shall have access to all books of the Company for the purpose of ascertaining the correctness of its report, and may examine its officers under oath.

Twenty-seventh—In case of any violation or breach or failure to comply with any of the provisions herein contained, or with any orders of the Board acting under the powers herein reserved, the franchise or consent herein granted may be forfeited by a suit brought by the Corporation Counsel on notice of ten (10) days to the Company, or at the option of the Board by resolution of said Board, which said resolution may contain a provision to the effect that the railway constructed and in use by virtue of this contract shall thereupon become the property of the City without proceedings at law or in equity. Provided, however, that such action by the Board shall not be taken until the Board shall give notice to the Company to appear before it on a certain day not less than ten (10) days after the date of such notice, to show cause why such resolution declaring the contract forfeited should not be adopted. In case the Company fails to appear, action may be taken by the Board forthwith.

Twenty-eighth—If the Company shall fail to give efficient public service at the rates herein fixed, or fail to maintain its structures and equipment as herein provided in good condition throughout the whole term of this contract, the Board may give notice to the Company, specifying any default on the part of the Company, and requiring the Company to remedy the same within a reasonable time; and upon failure of the Company to remedy such default within a reasonable time, the Company shall, for each day thereafter during which the default or defect remains, pay to the City the sum of two hundred and fifty dollars ($250) as fixed or liquidated damages, or the Board, in case such structures or equipment which may affect the surface of the streets shall not be put in good condition within a reasonable time after notice by the Board as aforesaid shall have the right to make all needed repairs at the expense of the Company, in which case the Company shall pay to the City the amount of the cost of such repairs, with legal interest thereon, all of which sums may be deducted from the fund hereinafter provided for.

Twenty-ninth—The Company shall assume all liability to persons or property by reason of the construction or operation of the railway authorized by this contract, and it is a condition of this contract that the City shall assume no liability whatsoever to either persons or property on account of the same, and the Company hereby agrees to repay to the City any damage which the City shall be compelled to pay by reason of any acts or default of the Company.

Thirtieth—This grant is upon the express condition that any and all sums of money or any and all securities heretofore deposited with the Comptroller by the Company under and pursuant to franchises heretofore granted to it by the City as a fund for the security for the performance by the Company of the terms and conditions of the franchise so granted, shall likewise be a fund for the security for the faithful performance by the Company of all the terms and conditions of this contract and compliance with all orders of the Board acting under the powers herein reserved, especially those which relate to the payment of the annual charges for the privilege hereby granted, the rendering of efficient public service at the rates herein fixed, the repairs of the street pavement, the removal of snow and ice, the quality of construction of the railway and the maintenance of the property in good condition throughout the whole term of this contract, and in case of default in the performance by the Company of such terms and conditions, or compliance with such orders, or either or any of them, the City shall have the right to cause the work to be done and the materials to be furnished for the performance thereof, after due notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings; or, after default in the payment of the annual charges, shall collect the same, with interest, from the said fund after ten (10) days' notice to the Company, or, in case of failure to observe the said terms and conditions of this contract and orders of the Board acting hereunder, relating to the headway, heating and lighting of cars, fenders, wheelguards and watering of street pavements, the Company shall pay a penalty of fifty dollars ($50) per day for each day of violation, and the further sum of ten dollars ($10) per day for each car that shall not be properly heated, lighted or supplied with fenders or wheelguards, in case of a violation of the provisions relating to those matters, all of which sums may be deducted from such fund.

The procedure for the imposition and collection of the penalties in this contract shall be as follows:

The Board, on complaint made, shall give notice to the Company, directing its President, or other officer, to appear before the Board on a certain day not less than ten (10) days after the date of such notice, to show cause why the Company should not be penalized in accordance with the foregoing provisions. If the Company fails to make an appearance, or after a hearing, appears in the judgment of the Board to be in fault, said Board shall forthwith impose the prescribed penalty, or where the amount of the penalty is not prescribed herein, such amount as appears to the Board to be just, and without legal procedure direct the Comptroller to withdraw the amount of such penalty from the security fund deposited with him. In case of any drafts made upon the security fund the Company shall, upon ten (10) days' notice, pay to the City a sum sufficient to restore said security fund to the original amount, and in default thereof this contract shall be cancelled and annulled at the option of the Board, acting in behalf of the City. No action or proceeding or right under the provisions of this contract shall affect any other legal rights, remedies or causes of action belonging to the City.

Thirty-first—The words "notice" or "direction," wherever used in this contract, shall be deemed to mean a written notice or direction. Every such notice or direction to be served upon the Company shall be delivered at such office in the City as shall have been designated by the Company, or if no such office shall have been designated, or if such designation shall have for any reason become inoperative, shall be mailed in the City, postage prepaid, addressed to the Company at the City. Delivery or mailing of such notice or direction as and when above provided shall be equivalent to direct personal notice or direction, and shall be deemed to have been given at the time of delivery or mailing.

Thirty-second—The words "streets or avenues" and "streets and avenues," wherever used in this contract, shall be deemed to mean "streets, avenues, highways, parkways, driveways, concourses, boulevards, bridges, viaducts, tunnels, public places or any other property to which the City has title or over which the public has an easement" encountered in the route hereinabove described, and upon or in which authority is hereby given to the Company to construct a railway.

Thirty-third—If at any time the powers of the Board or any other of the authorities herein mentioned, or intended to be mentioned, shall be transferred by law to any other board, authority, officer or officers, then and in such case such other board, authority, officer or officers, shall have all the powers, rights and duties herein reserved to or prescribed for the Board or other authorities, officer or officers.

Section 3. The grant of this privilege to the Company is likewise subject to the following condition:

This contract shall not become operative until the Company shall procure and cause to be executed and approved in proper form for record and duly delivered to the Board, an agreement wherein the Union Railway Company of New York City, The Southern Boulevard Railroad Company and the Company shall each agree between themselves and with the City that a passenger paying a single fare upon a car on the east or west lines of any of said companies shall receive, without further payment, a ride north or south on any line of the other companies, and a passenger paying a single fare upon a car on a north or south line of any of said companies shall receive a ride east or west on any line of the other companies without further payment at points of intersection, and that a passenger may continue in the direction in which his fare was first paid on any other line, without further payments. Upon the failure of the said three companies or any of them to furnish such a continuous ride for one fare over their routes, or over any part of their routes, as herein provided, at any time during the term of this grant or any renewal or renewals thereof, the rights hereby granted shall thereupon cease and determine.

Section 4. Nothing in this contract shall be construed as in any way limiting the present or future jurisdiction of the Public Service Commission under the laws of the State of New York.

Section 5. This grant is also upon the further and express condition that the provisions of article 5, and other provisions of the Railroad Law pertinent hereto, shall be strictly complied with by the Company.

Section 6. The Company promises, covenants and agrees on its part and behalf to conform to and abide by and perform all the terms, conditions and requirements in this contract fixed aund contained.

In witness whereof, the party of the first part, by its Mayor, thereunto duly authorized by the Board of Estimate and Apportionment of said City, has caused the corporate name of said City to be hereunto signed and the corporate seal of said City to be hereunto affixed; and the party of the second part, by its officers, thereunto duly authorized, has caused its corporate name to be hereunto signed and its corporate seal to be hereunto affixed, the day and year first above written.

THE CITY OF NEW YORK.

By .... Mayor.

[CORPORATE SEAL.]

Attest: ...., City Clerk.

NEW YORK CITY INTERBOROUGH RAILWAY COMPANY,

By .... President.

[SEAL.]

Attest: .... Secretary.

(Here add acknowledgments.)

Agreement, made this day of , 1911, between the Union Railway Company of New York City (hereinafter called Union Company), party of the first part, The Southern Boulevard Railroad Company (hereinafter called Boulevard Company), party of the second part, New York City Interborough Railway Company (hereinafter called Interborough Company), party of the third part, and The City of New York (hereinafter called the City), party of the fourth part.

Whereas, The Interborough Company, on March 31, 1911, applied to the Board of Estimate and Apportionment as the local authority of said City for the right to construct, maintain and operate four extensions to its street surface railway, in the Boroughs of Manhattan and The Bronx; and

Whereas, On , 1911, resolutions granting the right to construct, maintain and operate two of such extensions and authorizing the Mayor to execute and deliver the contracts for said rights in the name and on behalf of the City of New York, were approved by the Mayor; and

Whereas, Said contracts each provide that the same shall not become operative until the Interborough Company shall procure and cause to be executed and approved in proper form for record and duly delivered to the Board, an agreement wherein the Union Railway Company of New York City, the Southern Boulevard Railroad Company and the Company shall each agree between themselves and with the City that a passenger paying a single fare upon a car on the east or west lines of any of said companies shall receive, without further payment, a ride north or south on any line of the other companies, and a passenger paying a single fare upon a car on a north or south line of any of said companies shall receive a ride east or west on any line of the other companies without further payment at points of intersection, and that a passenger may continue in the direction in which his fare was first paid on any other line without further payments.

Now, therefore, in consideration of the premises and of the sum of one dollar by each of the parties of the first, second and third parts to the others paid, the receipt whereof is hereby acknowledged, the parties of the first, second and third parts do each hereby covenant and agree with each other and with the party of the fourth part that a passenger paying a single fare upon a car on the east or west lines of any of said companies shall receive, without further payment, a ride north or south on any line of the other companies, and a passenger paying a single fare upon a car on a north and south line of any of said companies shall receive a ride east or west on any line of the other companies, without further payment at points of intersection, and that a passenger may continue in the direction in which his fare was first paid on any other line without further payments.

In witness whereof, The Union Company, Boulevard Company and Interborough Company, by their officers thereunto duly authorized, have caused their corporate names to be hereunto signed and their corporate seals to be hereunto affixed the day and year first above written.

UNION RAILWAY COMPANY OF NEW YORK CITY,

By .... President.

Attest: .... Secretary.

NEW YORK CITY INTERBOROUGH RAILWAY COMPANY,

By .... President.

[SEAL.]

Attest: .... Secretary.

(Here add acknowledgments.)

Resolved, That the results of the inquiry made by this Board as to the money value of the franchise or right proposed to be granted and the adequacy of the compensation proposed to be paid therefor, and of the terms and conditions, including the provisions as to rates, fares and charges, are as hereinbefore specified and fully set forth in and by the foregoing form of proposed contract for the grant of such franchise or right.

Resolved, That these preambles and resolutions, including the said resolution for the grant of a franchise or right applied for by the New York City Interborough Railway Company, and the said form of a proposed contract for the grant of such franchise or right containing said results of such inquiry, after the same shall be entered in the minutes of this Board, shall be published for at least twenty (20) days immediately prior to Thursday, September 21, 1911, in the City Record, and at least twice during the ten (10) days immediately prior to Thursday, September 21, 1911, in two (2) daily newspapers to be designated by the Mayor therefor, and published in The City of New York at the expense of the New York City Interborough Railway Company, together with the following notice, to wit:

"Notice is hereby given that the Board of Estimate and Apportionment, before authorizing any contract for the grant of the franchise or right applied for by the New York City Interborough Railway Company, and fully set forth and described in the foregoing form of proposed contract for the grant of such franchise or right, and before adopting any resolution authorizing any such contract, will, at a meeting of said Board, to be held in the Old Council Chamber, City Hall, Borough of Manhattan, City of New York, on Thursday, September 21, 1911, at 10.30 o'clock a. m., hold a public hearing thereon, at which citizens shall be entitled to appear and be heard."

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmound—16.

Jay Street Connecting Railroad.

In the matter of the franchise granted to the Jay Street Connecting Railroad to construct, maintain and operate railroad tracks in the vicinity of Jay, John, Pearl and Plymouth streets, Borough of Brooklyn.

A communication was received from the Mayor's office returning the contract duly executed by his Honor the Mayor and the City Clerk.

The Secretary presented the following:

Board of Estimate and Apportionment, The City of New York, June 30, 1911.

Hon. William J. Gaynor, *Mayor, Chairman of the Board of Estimate and Apportionment:*

Sir—By resolution adopted by the Board of Estimate and Apportionment June 8, 1911, approved by the Mayor June 9, 1911, the Jay Street Connecting Railroad was granted a franchise to construct, maintain and operate certain railroad tracks in the vicinity of Jay, John, Pearl and Plymouth streets, Borough of Brooklyn.

The contract as authorized by such resolution was executed by the President and Secretary of the Railroad Company, June 21, 1911, and by the Mayor and City Clerk June 29, 1911, and bears the latter date.

The Departments interested have been advised of the execution of the contract; the original has been filed in this office, and the duplicate original delivered to the company.

The grant is now in full force and effect. Respectfully,

HARRY P. NICHOLS, Engineer, Chief of Bureau.

Which was ordered filed.

New York Magnaphone and Music Company.

The Secretary presented the following:

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, June 29, 1911.

Hon. William J. Gaynor, *Mayor, Chairman of the Board of Estimate and Apportionment:*

Sir—Under date of June 29, 1911, the New York Magnaphone and Music Company by its Vice-President, Mr. Charles A. Benton, petitioned the Board for the authority to lay, construct, maintain and operate electric wires with the necessary branches and connections thereto, under and along the streets, avenues and public places within the territory of New York, for the purpose of distributing music and matters of general interest and amusement electrically by means of a magnaphone.

This Company was incorporated pursuant to Article IX of the Transportation Corporations Law by filing its certificate with the Secretary of State on June 20, 1911.

In a letter from the attorneys of the Company accompanying the petition and of even date therewith, it is requested that the Board set a date for a public hearing upon the application in accordance with the provisions of the Charter.

It is, therefore, suggested that the Board adopt a resolution fixing September 21, 1911, as the date for such public hearing and requesting the Mayor to designate the newspapers in which to publish the notice of such hearing pursuant to law.

Respectfully, HARRY P. NICHOLS, Engineer, Chief of Bureau.

110 West 34th Street, New York City, June 29, 1911.

Board of Estimate and Apportionment of The City of New York:

Gentlemen—The New York Magnaphone and Music Company hereby makes application for the authority to lay, construct, maintain and operate electric wires with the necessary branches in connection thereto under and along the streets, avenues and public places within the territory of The City of New York, according to the terms and conditions which your Honorable Body may determine, such wires to be laid and maintained for the purpose of distributing music and matters of general interest and amusement electrically by means of a magnaphone.

The Company, therefore, respectfully applies for the consent of your Honorable Board to lay, construct, maintain and operate such wires for the purposes aforesaid and requests that such consent or franchise be embodied in a contract in accordance with the provisions of the Greater New York Charter.

Respectfully submitted,

THE NEW YORK MAGNAPHONE AND MUSIC COMPANY,
[Corporate Seal.] By Charles A. Benton, Vice-President.

State of New York, County of New York, ss.:

On the 29th day of June, in the year one thousand nine hundred and eleven, before me personally came Charles A. Benton, to me known, who, being duly sworn, did depose and say that he resided in the Borough of Manhattan, City of New York; that he is the vice-president of the New York Magnaphone and Music Company, the corporation described in and which executed the foregoing instrument; that he knew the seal of said corporation; that the seal affixed to said instrument was such corporate seal; that it was so affixed by order of the board of directors of said corporation and that he signed his name thereto by like order.

KATHRYN A. FOX, Notary Public, New York County.

The following was offered:

Whereas, The foregoing petition from New York Magnaphone and Music Company, dated June 29, 1911, was presented to the Board of Estimate and Apportionment at a meeting held July 6, 1911,

Resolved, That in pursuance of law this Board sets Thursday, the 21st day of September, 1911, at 10.30 o'clock in the forenoon, and Room 16, in the City Hall, Borough of Manhattan, as the time and place when and where such petition shall be first considered, and a public hearing be had thereon, at which citizens shall be entitled to appear and be heard, and be it further

Resolved, That the Secretary is directed to cause such petition and these resolution to be published for at least two (2) days in two daily newspapers in The City of New York, to be designated by the Mayor, and for at least ten (10) days in the City Record immediately prior to such date of public hearing. The expense of such publication to be borne by the petitioner.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The petition was then referred to the Bureau of Franchises.

New York and North Shore Traction Company.

In the matter of the modification and amendment of the contract dated February 1, 1909, granting the New York and North Shore Traction Company a franchise to construct, maintain and operate a street surface railway upon and along various streets and avenues in the Borough of Queens.

A communication was received from the Mayor's office returning the contract duly executed by his Honor the Mayor and the City Clerk.

The Secretary presented the following:

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, June 30, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—By resolution adopted by the Board of Estimate and Apportionment April 27, 1911, approved by the Mayor April 28, 1911, the Mayor of The City of New York was authorized to execute and deliver a certain contract between the City and the New York and North Shore Traction Company, modifying contract dated February 1, 1909, granting a franchise to said company to construct, maintain and operate a street surface railway on various streets and avenues in the Borough of Queens, by eliminating from said contract a portion of the route as originally granted.

The contract as authorized by such resolution was executed by the president and secretary of the company June 16, 1911, and by the Mayor and City Clerk June 27, 1911, and bears the latter date.

The Departments interested have been advised of the execution of the contract; the original has been filed in this office, and the duplicate original delivered to the company.

The grant is now in full force and effect.

Respectfully, HARRY P. NICHOLS, Chief of Bureau.

Which was ordered filed.

Bronx Traction Company.

In the matter of the petition of the Bronx Traction Company for a franchise to construct, maintain and operate an extension to its existing street surface railway upon and along Eastern boulevard and the Shore road to Fort Schuyler road to the northerly boundary line of the City, Borough of The Bronx.

At the meeting of June 8, 1911, a report was received from the Bureau of Franchises stating the President of the Borough of The Bronx, and the Commissioner of Parks from said borough, both opposed the granting of the petition. It was therefore recommended the petition be denied, when action was deferrred until this day.

The matter was referred to the President of the Borough of The Bronx, at his request.

Union Railway Company of New York City.

A communication was received from the Mayor's office returning duly approved by his Honor the Mayor on June 27, 1911, resolution adopted by this Board June 22, 1911, authorizing the execution and delivery of a certain agreement, defining the intent and meaning of the compensation clauses as contained in contracts authorized by this Board granting franchises to said company for certain extensions to its existing system in the Boroughs of Manhattan and The Bronx.

Which was ordered filed.

Staten Island Rapid Transit Railway Company.

In the matter of the petition of the Staten Island Rapid Transit Railway Company for an extension of time of three years from October 29, 1911, within which to commence and complete construction of a railroad track upon and across Richmond terrace in the Third Ward, Borough of Richmond.

This petition was presented to the Board at the meeting of June 22, 1911, and referred to the Bureau of Franchises.

The Secretary presented the following:

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, June 29, 1911.

Hon. William J. Gaynor, *Mayor, Chairman of the Board of Estimate and Apportionment:*

Sir—The Staten Island Rapid Transit Railway Company by a petition verified June 13, 1911, has applied to the Board of Estimate and Apportionment for an extension of time of three years from October 29, 1911, within which to commence and complete the construction of a railroad track across and upon Richmond Terrace in the Third Ward of the Borough of Richmond. The petition was presented to the Board at its meeting of June 22, 1911, and referred to the Bureau of Franchises.

By contract dated October 29, 1909, the Company was granted permission to construct two tracks each across four designated streets and a single track across Richmond Terrace or Shore Road at a point approximately 550 feet east of the intersection of Richmond Terrace with Western avenue. All of these tracks have been constructed with the exception of the one crossing Richmond Terrace. The time for the completion of the construction of this track will expire October 29, 1911.

The contract further gave the Company permission to construct two tracks under South street near Jay street in the First Ward of the Borough of Richmond and provided that this construction should be commenced within three years and completed within five years from October 29, 1909.

The petition now before the Board requests that the date for the completion of construction of the track across Richmond Terrace be made co-terminous with those under South street.

It is recommended that the Board adopt a resolution fixing September 21, 1911, as the date for the preliminary public hearing upon the petition, and requesting the Mayor to designate newspapers in which the petition and notice of hearing shall be published pursuant to law.

A resolution to this effect is herewith transmitted.

Respectfully, HARRY P. NICHOLS, Engineer, Chief of Bureau.

The Staten Island Rapid Transit Railway Company, Office of the Vice-President, 17 State Street, New York, June 13, 1911.

To the Board of Estimate and Apportionment of The City of New York:

The undersigned, the Staten Island Rapid Transit Railway Company, hereby petitions The City of New York for an extension of time from October 29, 1911, to October 29, 1914, within which to commence and complete the construction of one standard railroad track across and upon Richmond terrace, formerly known as the Shore road, in the Third Ward, Borough of Richmond, City of New York, at the point, in the manner and upon the terms and conditions specified in the contract between The City of New York and the Staten Island Rapid Transit Railway Company, dated October 29th, 1909, whereby, among other things, the right and privilege was granted to the undersigned to construct, maintain and operate such track, provided the construction thereof was commenced and completed within two years from the date thereof.

THE STATEN ISLAND RAPID TRANSIT RAILWAY COMPANY, by C. C. F. Bent, Vice-President.

State of New York, County of New York, ss.:

On this 13th day of June, 1911, before me personally came C. C. F. Bent, to me known and known to me to be the person described in and who signed the foregoing, and thereupon acknowledged to me that he signed the same for the purposes therein set forth.

R. N. STEVENS, Notary Public, Rockland County, N. Y. Certificate filed in New York County.

The following was offered:

Whereas, The foregoing petition from Staten Island Rapid Transit Railway Company, dated June 13, 1911, was presented to the Board of Estimate and Apportionment at a meeting held June 22, 1911,

Resolved, That in pursuance of law this Board sets Thursday, the 21st day of September, 1911, at 10.30 o'clock in the forenoon, and Room 16 in the City Hall, Borough of Manhattan, as the time and place when and where such petition shall be first considered, and a public hearing be had thereon, at which citizens shall be entitled to appear and be heard, and be it further

Resolved, That the Secretary is directed to cause such petition and these resolutions to be published for at least two (2) days in two daily newspapers in The City of New York, to be designated by the Mayor, and for at least ten (10) days in the CITY RECORD immediately prior to such date of public hearing. The expense of such publication to be borne by the petitioner.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

Manhattan Bridge Service Company.

In the matter of the petition of the Manhattan Bridge Service Company for a franchise to construct, maintain and operate a street surface railway from the intersection of the Bowery and Canal street, Borough of Manhattan, upon and along Canal street to the Manhattan Bridge and upon and along and over said bridge and its approaches to Flatbush avenue and Fulton street, Borough of Brooklyn.

This application was presented to the Board at the meeting of May 25, 1911.

The Secretary presented the following:

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, June 29, 1911.

HON. WILLIAM J. GAYNOR, *Mayor, Chairman of the Board of Estimate and Apportionment:*

Sir—The Manhattan Bridge Service Company by a petition dated May 19, 1911, has applied to the Board of Estimate and Apportionment for the right or franchise to construct, maintain and operate a single or double track street surface railway from the intersection of the Bowery and Canal street, Borough of Manhattan, upon and along Canal street to the Manhattan Bridge, and upon, along and over said bridge and its approaches to the intersection of Flatbush avenue and Fulton street, Borough of Brooklyn. The petition was presented to the Board at its meeting of May 25, 1911, and referred to the Chief Engineer and Bureau of Franchises. Accompanying the petition is a communication from the President of the Company, suggesting certain terms and conditions to govern the grant.

The Company filed its certificate of incorporation in the office of the Secretary of State on May 15, 1911, and under date of June 12, 1911, applied to the Public Service Commission for the First District for a certificate of public convenience and a necessity under Section 9 of the Railroad Law.

It is recommended that the preliminary public hearing upon the petition of the Company be fixed for Thursday, September 21, 1911, and that the Mayor be requested to designate newspapers in which the petition and notice of hearing shall be published according to law.

A resolution for adoption in accordance with the foregoing recommendation is herewith transmitted. Respectfully,

HARRY P. NICHOLS, Engineer, Chief of Bureau.

To the Honorable Board of Estimate and Apportionment of The City of New York:

The petition of the Manhattan Bridge Service Company respectfully shows:

First—That your petitioner is a street surface railroad corporation, duly organized and existing under the Laws of the State of New York, and proposes to construct and operate a line of street surface railroad in the Counties of New York and Kings, and across the Manhattan Bridge, connecting the Boroughs of Manhattan and Brooklyn, in the City of New York, State of New York.

Second—Your petitioner now desires to obtain from your Honorable Board, and hereby respectfully applies for, the necessary franchise or privilege to operate its cars over, upon and along the tracks now or hereafter constructed by the City of New York upon the Manhattan Bridge, the approaches thereto and the plazas thereof; and also to construct, maintain and operate a single or double track street surface railroad for public use in the conveyance of persons and property for compensation in, upon and along Flatbush avenue extension in the County of Kings between the Brooklyn plaza of the Manhattan Bridge and the intersection of said Flatbush avenue extension with Fulton street in the said County of Kings, crossing all avenues and streets intersecting said route; and also for the franchise or privilege to construct and maintain the necessary poles for the stringing of wires and other appurtenances necessary for the operation of said road.

Third—That said corporation proposes to operate said proposed railroad by such motive power as may be lawfully employed.

Wherefore, your petitioner prays that public notice hereof and of the time and place when and where this application will be first considered be given as required by law, and that the desired consent be granted in accordance with the provisions of the Greater New York Charter and the Railroad Law of the State of New York.

Dated, New York, May 19, 1911.

MANHATTAN BRIDGE SERVICE COMPANY, by HARLAN W. WHIPPLE, President.

Attest: [SEAL] HAROLD B. WEAVER, Secretary.

State of New York, County of New York, ss.:

Harlan W. Whipple, being duly sworn, deposes and says, that he is the President of the Manhattan Bridge Service Company, the petitioner named in the foregoing petition; that he has read the foregoing petition and knows the contents thereof; that the same is true of his knowledge, except as to the matters therein stated to be alleged on information and belief and that as to those matters he believes it to be true.

Sworn to before me this 19th day of May, 1911.

HARLAN W. WHIPPLE.

[SEAL] Edw. D. Hulman, Notary Public Westchester Co.

Certificate filed New York County. My commission expires March 30, 1912.

The following was offered:

Whereas, The foregoing petition from Manhattan Bridge Service Company dated May 19, 1911, was presented to the Board of Estimate and Apporionment at a meeting held July 6, 1911.

Resolved, That in pursuance of law this Board sets Thursday, the 21st day of September, 1911, at 10.30 o'clock in the forenoon, and Room 16 in the City Hall, Borough of Manhattan, as the time and place when and where such petition shall be first considered, and a public hearing be had thereon, at which citizens shall be entitled to appear and be heard, and be it further

Resolved, That the Secretary is directed to cause such petition and these resolutions to be published for at least fourteen (14) days in two daily newspapers in The City of New York, to be designated by the Mayor, and for at least ten (10) days in the CITY RECORD immediately prior to such date of public hearing. The expense of such publication to be borne by the petitioner.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen, and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

Manhattan Bridge Three-cent Line.

In the matter of the petition of the Manhattan Bridge Three-cent Line for a franchise to construct, maintain and operate a street surface railway from the Flatbush avenue station of the Long Island Railroad Company, in the Borough of Brooklyn, upon and along various streets and avenues; upon, along and over the Manhattan Bridge and its approaches thereto to the Desbrosses street ferry, on the North river, Borough of Manhattan.

At the meeting of March 4, 1910, a report was received from the Franchise Committee recommending the Chief Engineer prepare a form of grant for this Company and submit same to the Board for its approval, which report was adopted.

At the meeting of September 30, 1910, a report was received from the Bureau of Franchises stating the Company had not as yet received its certificate of convenience and necessity from the Public Service Commission, and the matter was laid over pending the decision of said Commission.

The Secretary presented the following:

Board of Estimate and Apportionment, City of New York, Bureau of Franchises, 277 Broadway, June 27, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—On March 4, 1910, a report was presented to the Board by the Franchise Committee, with reference to the Manhattan Bridge Three Cent Line, which recommended that a franchise be granted to that Company, provided that terms favorable to the City, including fare and equitable compensation for the privilege granted, be agreed upon between the Company and the City, and it was further recommended that the Chief Engineer be directed to prepare a form of contract and submit the same to the Board for its approval. This recommendation was adopted by the Board and the petition was referred to the Chief Engineer for preparation of the contract.

The Manhattan Bridge Three Cent Line was incorporated by filing a certificate of incorporation in the office of the Secretary of State on December 30, 1909, the purpose being to construct a railway beginning at the Desbrosses Street Ferry on the North River, Borough of Manhattan; thence across West street and along Desbrosses street, Washington street, Greenwich street, Vestry street and Canal street to the Manhattan bridge; thence across the Manhattan Bridge and its approaches to the Borough of Brooklyn; thence along Flatbush Avenue Extension, Fulton street, Rockwell place, Flatbush avenue to the Long Island Railroad station at the intersection of Fourth avenue and Flatbush avenue; thence returning to form a loop upon the following streets: Atlantic avenue, Third avenue, Flatbush avenue, Livingston street, Hoyt street, Bridge street to the Flatbush Avenue Extension.

On the same date a petition was addressed to the Board, applying for the consent of the Board to the construction, maintenance and operation of the railway described in the certificate of incorporation. Accompanying the petition was a letter signed by the President of the Company, in which it was stated that the Company was willing to accept a franchise which would provide that other railroads desiring to use the tracks of the Company may do so upon reasonable terms and that not more than a fare of three cents be charged for a single ride upon any part of the railway.

The petition was presented to the Board on December 7, 1910, and referred to the Chief Engineer.

On February 4, 1910, the preliminary public hearing was duly held, after which the matter was referred to the Franchise Committee which reported upon March 4, 1910, as hereinbefore stated. After the Company had presented its petition to the Board, it applied to the Public Service Commission for the First District for a certificate of convenience and necessity, as required by the Railroad Law. After holding sixteen hearings upon the petition, at which considerable opposition was presented by some of the street surface railways operating in the Borough of Brooklyn, the Commission, on July 12, 1910, granted the certificate. Subsequently, the companies which opposed the granting of the certificate applied to the Commission for a rehearing. This was denied on January 31, 1911, and I understand that an appeal from the decision of the Public Service Commission will be taken by the Brooklyn companies.

Upon receiving instructions from the Franchise Committee, the matter was taken up with the Counsel for the Company and a contract prepared which appeared to this Bureau to be one which the City could safely accept. For a considerable time after sending the contract to Counsel there was no negotiation carried on by the Company, and it was finally deemed necessary by this Bureau to report to the Board the cause of the delay. This was done on September 30, 1910. Recently Counsel has taken the matter up and negotiations have been in progress for some weeks.

Prior to the filing of this petition with the Board, several other petitions had been presented by existing street surface railways, for the use of the Manhattan Bridge and the Flatbush Avenue Extension. These petitions were presented by subsidiary companies of the Brooklyn Rapid Transit Company for the right to operate to the Manhattan end of the Bridge from the Borough of Brooklyn, a similar petition from the Coney Island and Brooklyn Railroad Company, and petitions from the Metropolitan Street Railway Company and the Third Avenue Railroad Company to extend their lines to the Brooklyn end of the Manhattan Bridge. These petitions were referred to the Franchise Committee on February 4, 1910, and no final action has yet been taken.

Subsequent to the filing of the petition of the Manhattan Bridge Three Cent Line, a petition was received from the Triborough Railroad Company, which proposed to operate from the intersection of Flatbush avenue with Fulton street, in the Borough of Brooklyn; thence along the Flatbush Avenue Extension, upon the Manhattan Bridge and along Canal street, in the Borough of Manhattan, to the intersection of Canal, Walker and Baxter streets. This petition was referred to the Franchise Committee, which reported to the Board on June 17, 1910, and acting upon the recommendation of the Franchise Committee, the Board denied the application on that date.

That is the only application for the right to operate cars on the Manhattan Bridge upon which the Board has taken final action.

Proposed Route.

The route as laid out by the Company is in some respects similar to that proposed in a report by this Bureau presented to the Board under date of November 4, 1908. It was suggested in that report that the operation of cars from a point in the Borough of Brooklyn to a point in the Borough of Manhattan would be of more benefit to the traveling public than the operation of local cars on the bridge, from terminal to terminal, and would tend to prevent congestion at the terminals of the Bridge. It was suggested that Canal street in the Borough of Manhattan, and Flatbush Avenue Extension, in the Borough of Brooklyn, in conjunction with the tracks upon the Bridge and its approaches, might possibly be used in forming such a route, and it was believed that this could be worked out by the existing companies in the Boroughs of Manhattan and Brooklyn; that is, that either those companies themselves (upon receiving franchises upon the Manhattan Bridge and the Flatbush Avenue Extension) could put in use some of the existing tracks in the two Boroughs in order to accomplish this mode of operation; or, they could form a company to apply for and obtain the necessary franchises, and use the existing tracks of those companies. Neither the companies operating in the Borough of Manhattan or in the Borough of Brooklyn deemed the operation of such a line to be to their interest, at least no proposition for such operation was presented by these companies. Subsequently, the petition of the applicant Company was presented, as before stated, this Company not being, as I understand it, in any way connected with any other existing company.

It will be noted that the route of the Company is proposed to extend from the Flatbush avenue station of the Long Island Railroad Company in the Borough of Brooklyn, to the Desbrosses Street Ferry on the North River in the Borough of Manhattan, thus intersecting the main business street of Brooklyn, namely—Fulton street, connecting with an important point, that is, the Long Island Railroad Station, and extending entirely across the Borough of Manhattan. The proposed line in the Borough of Brooklyn either intersects or is located at points where easy transfer can be made to practically all the existing street surface and elevated railways in the Borough of Brooklyn, and likewise in the Borough of Manhattan intersects all the longitudinal lines whether elevated, subway or surface railways. Such operation, it is believed, would have the effect of distributing passengers at points where transfer can be made to lines which will take them to their destinations.

There already exist street surface railways on a large proportion of the proposed route—in fact the only railway which will be necessary for the Company to construct, should it obtain its franchise, is upon Flatbush Avenue Extension from the bridge entrance to Fulton street, Rockwell place from Fulton to Flatbush avenue, Fourth avenue from Flatbush avenue to Atlantic avenue, Hoyt street from Livingston street to Fulton street and Bridge street from Fulton street to Flatbush Avenue Extension; all of which is single track with the exception of that upon Flatbush Avenue Extension which is proposed to be double track. Under the present Railroad Law a street surface railway cannot be constructed and operated where there already exists a street surface railway, but the common use of a previously existing railway may be compelled for a distance of one thousand or less feet. In consequence, it will be necessary for the Company to obtain the consent of the existing companies to operate any portion of its route in the Borough of Manhattan in excess of one thousand feet.

In Brooklyn, the situation is somewhat different for the reason that it is not proposed to occupy more than a thousand feet of continuous track of any one company with the exception of the portion upon Livingston street. The franchise for the railway in that street reserves the right to the City to grant a franchise to any other company and requires the Company which operates thereon at the present time to give its consent to the operation of any other company to which the City may grant a franchise.

Proposed Contract.

It is most difficult to draw a franchise which appears to this Bureau to amply protect the City and at the same time meet the objections which have been raised by the Company. It will be easily seen in view of the foregoing that the operation of only a portion of the route would probably not accomplish that which was originally intended; that is, the distribution of passengers to points of easy transfer to lines leading to their destination. It was therefore considered at the outset that the Company should be required to operate the whole of the proposed line as well as the tracks upon the bridge. In order for the Company to guarantee that it will accomplish this it must necessarily have contracts with existing companies for the use of their tracks in Canal street and other streets in the Boroughs of Manhattan and Brooklyn. On the other hand, the Company states that it cannot negotiate to a final conclusion with the existing companies until it has obtained its franchise. Counsel for the Company states that he has taken the matter up with the Receiver of the Third Avenue Railroad Company, which company controls a large part, at least, of the tracks which the Company wishes to use in the Borough of Manhattan, but no conclusion can be reached with that company until it has obtained its franchise.

The report of the sitting Commissioner of the Public Service Commission upon the application of this Company for a certificate of convenience and necessity states as follows:

"For these reasons it is right that the application for a certificate of public convenience and a necessity should be granted. But it should be made emphatic that the public convenience and necessity are deemed to exist for the entire line from the Flatbush avenue station of the Long Island Railroad in the Borough of Brooklyn to the Hudson River in the Borough of Manhattan, and that if the company should fail for any reason to secure operating rights for the whole route it should not be allowed to operate a part. For instance, if it fails to secure operating rights to carry its passengers further west than the plaza of the Manhattan Bridge, it should not be allowed to construct and operate its road to that point only."

Thus showing that the Public Service Commission had in mind that the operation of a part of the route would not accomplish the intended purpose of the Company.

Submitted herewith is a form of contract, five of the conditions of which are not acceptable to the Company. The conditions of the contract are discussed hereinafter.

Term of Grant.

The term of grant has been fixed at ten years with the privilege of renewal for fifteen years upon a revaluation. With the exception of one franchise, I know of none which give the right to operate on any of the East River bridges for a term exceeding ten years; the exception being that of the Third Avenue Bridge Company which was given the right for twenty-five years upon the Queensboro Bridge with no privilege of renewal. In this case, which is unlike any other which the Board has had before it, the bridge forms the central portion of the proposed route. Without the right to operate on the bridge, the railway would be of scarcely any value to either the Company or the traveling public. In consequence, any term of grant fixed for the bridge should also apply to the remainder of the route, which is the reason for fixing the term of grant at a total of twenty-five years, rather than the shorter term for the use of the bridge and the longer term for the use of tracks in the street. The Company, however, objects to so short a term as twenty-five years for the entire route, and asks that the term be fixed at a greater period unless the City agrees to take over the plant and the property not within the streets at the end of the term.

Right not Exclusive.

The contract provides that the City may grant to any other company the right and privilege to operate over the same route and the Company will not oppose the granting of such right.

Compensation for the use of the Company's tracks is to be fixed by arbitration, but the Company receiving the second franchise shall be allowed to use the tracks after the expiration of ninety days after its franchise is obtained, even if the rate of compensation has not prior to that time been fixed. This provision is somewhat different in form from that previously used in that the compensation for the use of such tracks was not fixed by arbitration.

Motive Power and Electric Wires in Conduits.

The contract provides that the motive power in the Borough of Manhattan and upon the Manhattan Bridge shall be the underground electric system and the motive power in the Borough of Brooklyn may be the overhead electric system. This will necessitate the change from one system to the other at some point near the entrance to the Manhattan Bridge on the Brooklyn side.

Wires for the transmission of power, except trolley wires, must be placed underground, underneath or along the side of the railway; it being deemed bad policy to permit the stringing of such wires in this part of the City.

Conditions for the Use of the Bridge.

The contract contains the provisions which were used in franchises to companies to operate upon the Queensboro Bridge. They require that the Company shall use only the tracks assigned to it by the Commissioner of Bridges; that it must submit to the rules and regulations of the Commissioner of Bridges as to the operation of cars upon the bridge; it shall install a signal system if deemed necessary; it must make all changes in the track layout necessary for its operation; all of which work is to be done under the supervision of the Commissioner of Bridges.

Before the operation of cars begins, the Company must file with the Commissioner of Bridges a statement with reference to the kind and dimensions of cars proposed to be operated, etc. These conditions, I believe, give the Commissioner of Bridges full authority over the operation of the proposed railway in so far as is necessary to protect the structure under his care.

Operation of Route in Streets to Begin When Operation Upon Bridge Begins.

There is a clause inserted in the contract by which the Company agrees not to operate upon the Manhattan Bridge until it shall put in operation a railway upon the route from the easterly side of West Broadway in the Borough of Manhattan to the Manhattan Bridge and from the intersection of Flatbush Avenue Extension with Fulton street in the Borough of Brooklyn to the Manhattan Bridge. As already explained, it is believed by this Bureau that the Company should be required to operate a substantial portion of its route, but as already stated, the Company claims it cannot negotiate for the use of existing tracks until it has obtained a franchise, and cannot guarantee the operation of that portion of the route provided for in the provision above mentioned until it has negotiated to a final conclusion with the companies owning the existing tracks.

Rate of Fare.

The rate of fare has been fixed not to exceed three cents for a continuous ride from any point on the proposed road to any other point thereon or line or branch operated by it or under its control. The report of the Franchise Committee which has already been referred to instructed that there be incorporated in the contract a provision that should any merger take place between the applicant and the Manhattan or Brooklyn companies at any time in the future, it shall then become an obligation of this Company to receive passengers from the lines of such merged companies and transfer passengers to the lines of such merged companies at a total fare of not exceeding five cents. This condition has also been inserted, and it provides in addition that failure to comply therewith may result in the forfeiture of the franchise.

Express Matter.

The contract provides that the Company shall operate only passenger and express cars and that no freight cars shall be operated. The operation of cars for the transportation of express matter, however, is not to be permitted between the hours of 6 o'clock a. m. and 8 o'clock p. m., with the further provision that the Board may further limit such operation as public convenience may require. Some of the existing companies in the Borough of Manhattan formerly operated cars for the transportation of express matter, but have discontinued such operation for the reason that it was unprofitable. I doubt very much whether this Company will have an occasion to operate many cars for that purpose. However, I believe that the clause above described will give the Board ample power in the premises should the operation of such cars become a nuisance or a detriment to the operation of passenger cars.

Compensation and Security Fund.

This is the first application to my knowledge which has been presented to the Board for a railway upon which the fare is proposed by the applicant company to be as little as three cents, and therefore, there is no data upon which to base the probable income of such a project. Further than that an interborough railway between Brooklyn and Manhattan is without precedent. I obtained, however, from the Public Service Commission a copy of the estimated income of the Company, as submitted to that Commission during the time when the application for a certificate of convenience and necessity was pending. Upon this estimated probable income was calculated the amounts originally proposed for the minimum annual payments; that is, applying the three per cent. of the gross receipts for the first five years and five per cent. thereafter, which is the minimum percentage which the Company is required to pay under the Railroad Law. These minimum annual payments were submitted to the Company's representatives who contended that it could not pay such sums. Subsequently these amounts were somewhat reduced upon the theory that if the gross income of the Company is such that three and five per cent. of the same will yield more than that proposed by the annual minimum payments, the City will in any event receive the larger amount. The compensation provided by the contract is as follows:

(a) The sum of fifteen thousand dollars ($15,000) in cash within three (3) months after the signing of the contract.

(b) During the first five years three (3) per cent. of the gross receipts, to be not less than four thousand dollars ($4,000) per annum.

During the second five years, five (5) per cent. of the gross receipts, to be not less than seven thousand dollars ($7,000) per annum.

(c) For the use of the tracks owned by the City upon the Manhattan Bridge and approaches thereto, the sum of five (5) cents for each round trip for each car operated on the bridge; this last item being the amount which is paid by all the companies operating cars across the East River bridges.

It is provided that the compensation shall not be construed in any manner in the nature of a tax; that is, that the Company shall not be permitted to deduct the amounts paid for this franchise from its special franchise tax.

The security deposit has been fixed at the sum of ten thousand dollars ($10,000), to be paid to the Comptroller in either cash or securities to be approved by him, to insure the faithful performance of the terms and conditions of the franchise.

Other Provisions.

The other provisions contained in the contract are those which have heretofore been used for street surface railway franchises, and do not, I believe, need a special explanation.

—

The contract has been gone over carefully with the Counsel for the Company with a result that it seems to be impossible at the present time at least, to recommend a contract which is entirely acceptable to the Company. Counsel for the Company objects to five of the provisions of the contract attached hereto, as follows:

First—Section 3, Subdivision Fourth. This provision requires the operation of the railway in the streets between West Broadway and the Manhattan Bridge and Fulton street and the Manhattan Bridge in the Borough of Brooklyn when it begins operation on the Manhattan Bridge. The Company requests that this clause be modified to provide that the Company shall not operate cars upon the Manhattan Bridge until it shall have put in operation the railway upon the entire route unless it shall first obtain from the Board special permission to do so.

Second—The present contract provides that the initial payment of fifteen thousand dollars and the security deposit of ten thousand dollars be paid to the City within a fixed time after the contract is signed by the Mayor and that upon a forfeiture of the right, such sums are to become the property of the City. The Company wishes these sums returned to it if it is prevented from operating its railway by a final decree of a court of competent jurisdiction.

Third—Section 4, Subdivision First. This provision provides for compensation. By it the minimum annual payments are required from the date of the signing of the contract. The Company asks that these payments begin on the date of the commencement of operation.

Fourth—The subdivision last above referred to provides that none of the payments required shall be considered in any manner in the nature of a tax. The Company requests that the payment of three and five per cent. of the gross receipts be eliminated from that provision. In other words, the Company asks that it be allowed to deduct those payments from any sums which it may pay as a special franchise tax.

Fifth—Section 2, Subdivision Fourth. This provision provides that the property in the streets shall become the City's at the end of the term of grant. The Company wishes added to this provision a clause requiring the City to purchase at the end of the term at its then value the property not within the streets, provided the Company does not receive rights to further continue operation.

In view of the facts that the Franchise Committee has before it various other applications to operate upon the Manhattan Bridge and that it has already reported upon the application of this Company, it seems best that the contract be referred again to that Committee to determine what policy it wishes to pursue with reference to this application and to the various conditions in the franchise which have not been accepted by the Company.

It is recommended, therefore, that the application be again referred to the Franchise Committee, Respectfully,

HARRY P. NICHOLS, Engineer, Chief of Bureau.

Synopsis of Provisions of Contract.

Section 1. Grant.
    First—On streets.
    Second—On Manhattan Bridge.
Section 2. Conditions for franchise upon streets.
    First—Consents of property owners to be obtained.
    Second—Term of grant.
    Third—Right not exclusive.
    Fourth—Property to become City's at the end of term of grant.

Fifth—Commencement and completion of construction.

Sixth—Railway to be constructed, maintained and operated under the supervision of the proper local authorities.

Seventh—Motive power.

Eighth—Wires to be placed underground.

Ninth—Ice and snow to be removed.

Tenth—Company to pave between tracks.

Eleventh—Expense of alteration to drainage or sewerage systems to be borne by Company.

Twelfth—Right not to interfere with or be a hindrance to public work.

Thirteenth—If grades or lines of streets are changed, Company to change track to conform therewith.

Section 3 Conditions for franchise upon bridge.

First—Term of grant.

Second—Company to use tracks assigned to it by Commissioner of Bridges; to install signal system if required, etc.

Third—All apparatus of Company to be subject to inspection of Commissioner of Bridges and Company to comply with rules of said Commissioner.

Fourth—Cars not to be operated on bridge until the entire route between West Broadway and Fulton street is operated.

Fifth—Right not to affect authority of Commissioner of Bridges to make alterations and changes in construction.

Section 4. Conditions for franchise both on streets and on bridge.

First—Compensation.

Second—Annual charges to continue throughout whole term.

Third—Rights not to be assigned.

Fourth—Railway to be constructed and operated in the latest approved manner.

Fifth—Rate of fare.

Sixth—No freight cars to be operated.

Seventh—Fenders and wheelguards to be provided.

Eighth—Cars to be heated.

Ninth—Cars to be lighted.

Tenth—Headway of cars.

Eleventh—Annual report to the Board.

Twelfth—Company to keep accurate books of account.

Thirteenth—City may sue for forfeiture.

Fourteenth—Fine for inefficient public service.

Fifteenth—Company to assume all liability of damages.

Sixteenth—Security deposit.

Seventeenth—Definition of "notice and direction."

Eighteenth—Definition of "streets and avenues."

Nineteenth—If powers of Board or other authorities are transferred, then such other board or officers shall act for City.

Section 5. Contract not to limit jurisdiction of Public Service Commission.

Section 6. Provisions of Railroad Law to be complied with

Section 7. Company agrees to abide by all terms and conditions.

MANHATTAN BRIDGE THREE CENT LINE.

Proposed Form of Contract.

This contract, made this day of , 1911, by and between The City of New York (hereinafter called the City), party of the first part, by the Mayor of said City, acting for and in the name of said City, under and in pursuance of the authority of the Board of Estimate and Apportionment of said City (hereinafter called the Board), and the Manhattan Bridge Three Cent Line (hereinafter called the Company), party of the second part, witnesseth:

In consideration of the mutual covenants and agreements herein contained, the parties hereto do hereby covenant and agree as follows:

Section 1. The City hereby grants to the Company, subject to the conditions and provisions hereinafter set forth, the following rights and privileges:

First—To construct, maintain and operate a street surface railway with the necessary wires and equipment for the purpose of conveying passengers and property in the Boroughs of Manhattan and Brooklyn, in The City of New York, upon the following routes:

(1) Beginning at a point in the marginal way adjacent to the North River at or near the Desbrosses Street Ferry, thence by double track in, upon and across the

marginal way and West street to Desbrosses street, thence by double track in and upon Desbrosses street to Washington street, thence by single track in and upon Washington street to Vestry street, thence by single track in and upon Vestry street to Greenwich street, thence by double track in and upon Vestry street to Canal street, thence by double track in and upon Canal street to a point easterly from the Bowery and opposite the property acquired by the City for a terminal to the Manhattan Bridge, thence southerly in, upon and across Canal street to a point on the southerly side thereof where a connection can conveniently be made with the tracks to be constructed by the City upon said Manhattan Bridge, its approaches and terminals.

Also a branch beginning at and connecting with the above described route at the intersection of Washington and Desbrosses streets, thence by single track in and upon Desbrosses street to Greenwich street, thence by single track in and upon Greenwich street to Vestry street, and there connecting with the above-described tracks in said last-named street, all in the Borough of Manhattan.

(2) Beginning at a point on the northerly side of Nassau street, where a connection can conveniently be made with the tracks to be constructed by the City upon the Manhattan Bridge, its approaches and terminals, thence by double track in, upon and across Nassau street to Flatbush Avenue Extension, thence by double track in and upon Flatbush Avenue Extension to its intersection with Fulton street, thence by single track in and upon Fulton street to Rockwell place, thence by single track in and upon Rockwell place to Flatbush avenue, thence by single track in and upon Flatbush avenue to Fourth avenue, thence by single track in and upon Fourth avenue to Atlantic avenue, thence by single track in and upon Atlantic avenue to Third avenue, thence by single track in and upon Third avenue to Flatbush avenue, thence by single track in and upon Flatbush avenue to Livingston street, thence by single track in and upon Livingston street to Hoyt street, thence by single track in and upon Hoyt street to Fulton street, thence by single track in and upon Fulton street to Bridge street, thence by single track in and upon Bridge street to Flatbush Avenue Extension, and there connecting with the above-described double track in Flatbush Avenue Extension, all in the Borough of Brooklyn. And to cross such other streets and avenues, named and unnamed, as may be encountered in said routes. Provided, however, that nothing in this contract shall be construed as permitting more than a double track in any portion of said routes or branches thereof in which there already exist street surface railway tracks.

The said routes with turnouts, switches and crossovers hereby authorized are shown upon a map entitled: "Map showing proposed track of the Manhattan Bridge Three Cent Line in the Boroughs of Manhattan and Brooklyn, City of New York, to accompany petition to the Board of Estimate and Apportionment, dated December 30, 1909," and signed by F. W. Rowe, President, and J. C. Brackenridge, Engineer; a copy of which is attached hereto, is to be deemed a part of this contract, is to be construed with the text thereof, and is to be substantially followed, provided that deviations therefrom and additional turnouts, switches and crossovers which are consistent with the foregoing description, and the other provisions of this contract may be permitted by resolution of the Board.

Second—To operate the cars of the Company upon two (2) tracks when constructed upon the Manhattan Bridge and approaches thereto, such tracks to be assigned to the Company by the Commissioner of Bridges; beginning at a point in the southerly side of Canal street upon the land acquired by the City for bridge terminal purposes, in the Borough of Manhattan, and there connecting with the tracks of the Company first above described, thence in and upon said bridge terminal to the approach to the Manhattan Bridge in the Borough of Manhattan, thence upon and along said bridge approach to the Manhattan Bridge, thence upon and along said bridge to the approach thereto in the Borough of Brooklyn, to land acquired for the Manhattan Bridge terminal in the Borough of Brooklyn, thence upon and along said land to Nassau street, and there connecting with the above-described tracks in Nassau street. The said route is more particularly shown upon the map hereinbefore referred to and is to be operated by the Company as a continuous route in connection with the route hereinbefore described.

Section 2. The grant of the right or privilege to construct, maintain and operate said railway from a point in the marginal way adjacent to the North River at or near Desbrosses Street Ferry to the entrance to the Manhattan Bridge and upon the approach thereto upon the routes hereinbefore described in the Borough of Manhattan, and from the entrance to the Manhattan Bridge to the intersection of Atlantic avenue with Fourth avenue, upon the routes hereinbefore described in the Borough of Brooklyn, is subject to the following conditions which shall be complied with by the Company:

First—The consent in writing of the owners of half in value of the property bounded on said streets and avenues to the construction and operation of said railway shall be obtained by the Company within six (6) months from the signing of this contract by the Mayor, and a copy of such consents shall be filed with the Board within such time, or in the event that such consents cannot be obtained within such time, the Company shall, within said six (6) months or within one (1) month thereafter, make application to the Appellate Division of the Supreme Court for the appointment of Commissioners in the manner provided by the Railroad Law to determine if said railway ought to be constructed; otherwise this grant shall cease and determine.

Second—The said right and privilege shall be held and enjoyed by the Company for the term of ten (10) years from the date upon which this contract is signed by the Mayor, with the privilege of renewal of said contract for the further period of fifteen (15) years, upon a fair revaluation of such right and privilege.

If the Company shall determine to exercise its privilege of renewal it shall make application to the Board, or any authority which shall be authorized by law to act for the City in place of the Board. Such application shall be made at any time not earlier than two (2) years and not later than one (1) year before the expiration of the original term of this contract. The determination of the revaluation shall be sufficient if agreed to in writing by the Company and the Board, but in no case shall the annual rate of compensation to the City be fixed at a less amount than the sum required to be paid during the last year prior to the termination of the original term of this contract.

If the Company and the Board shall not reach such agreement on or before the day one (1) year before the expiration of the original term of this contract, then the annual rate of compensation for such succeeding fifteen (15) years shall be reasonable, and either the City (by the Board) or the Company shall be bound upon request of the other to enter into a written agreement with each other, fixing the rate of such compensation at such amount as shall be reasonable, but in no case shall the annual rate so fixed be less than the sum required to be paid for the last year prior to the termination of the original term of this contract, and if the parties shall not forthwith agree upon what is reasonable, then the parties shall enter into a written agreement fixing such annual rate and at such amount as shall be determined by three disinterested freeholders selected in the following manner:

One disinterested freeholder shall be chosen by the Board; one disinterested freeholder shall be chosen by the Company; these two shall choose a third disinterested freeholder, and the three so chosen shall act as appraisers and shall make the revaluation aforesaid. Such appraisers shall be chosen at least six (6) months prior to the expiration of this original contract, and their report shall be filed with the Board within three (3) months after they are chosen. They shall act as appraisers and not as arbitrators. They may base their judgment upon their own experience and upon such information as they may obtain by inquiries and investigations, without the presence of either party. They shall have the right to examine any of the books of the Company and its officers under oath. The valuations so ascertained. fixed and determined shall be conclusive upon both parties, but no annual sum shall, in any event, be less than the sum required to be paid for the last year of the original term of this contract. If in any case the annual rate shall not be fixed prior to the termination of the original term of this contract, then the Company shall pay the annual rate theretofore prevailing until the new rate shall be determined, and shall then make up to the City the amount of any excess of the annual rate then determined over the previous annual rate. The compensation and expenses of the said appraisers shall be borne jointly by the City and the Company each paying one-half thereof.

Third—Nothing in this contract shall be deemed to affect in any way the right of the City to grant to any other corporation or to any individual a similar right or privilege upon the same or other terms and conditions over the routes hereinbefore decribed, and the Company shall not at any time oppose, but shall consent to the construction and operation of any street surface railway by any such other corporation or individual which may receive a franchise therefor from the City, and which may necessitate the use of any portion of the railway which shall be constructed by the Company pursuant to this contract.

Should the City at any time during the term of this contract grant the right to any other corporation or to any individual the right or privilege to operate a railway upon the tracks of the Company on the route herein described or any portion thereof, then the City shall within thirty (30) days thereafter give notice to the Company that such right has been granted and of the name of the corporation or individual to which such right has been granted.

At the expiration of ninety (90) days after the giving of such notice such individual or corporation shall have the right to begin the operation of cars upon the tracks of the Company upon the route or any portion thereof over which such corporation or individual may receive a right or privilege, and continue such operation during the term thereof. Such corporation or individual shall pay to the Company for the right to use its tracks, equipment, power and all other property of the Company which shall be necessary in the operation of the railway upon the Company's tracks, such sum or sums as may be agreed upon by such corporation or individual and the Company within said ninety (90) days, or in the event that such agreement cannot be reached within said ninety (90) days, then such sum or sums as shall be determined by arbitrators, as hereinafter provided.

If the Company and such corporation or individual cannot, prior to the expiration of said ninety (90) days, agree upon the compensation for the use of such tracks, then such compensation shall be fixed by arbitrators selected in the following manner:

One fit and impartial person shall be chosen by the Company; one fit and impartial person shall be chosen by such corporation or individual. In default of such selection by either party within thirty (30) days after the expiration of said ninety (90) days, then the person who shall have been so selected by one party shall appoint and associate with himself one fit and impartial person for the purposes aforesaid, and if the persons so chosen shall differ in judgment, they shall appoint a fit and impartial person to be associated with them for the said purpose, if they can agree upon such person, or if they cannot agree, then each of them shall nominate two fit and impartial persons and from the names of the four persons so nominated that of one of them shall be drawn by lot, who shall be associated for the purpose aforesaid with the said two persons previously so respectively chosen or appointed. The decision under oath of any two of the said persons who shall be so selected shall be final and conclusive. The compensation and expenses of the persons so selected shall be borne by the individual or corporation to which such right may be granted.

Within thirty (30)) days after an agreement has been reached between said parties or in case said agreement cannot be reached before the time specified herein, then within thirty (30) days after the determination of the arbitrators as herein provided, the said parties shall enter into a written agreement which will specify the sum or sums which such corporation or individual shall pay to the Company for said privilege and the Company shall file the same with the Board. If the Company fails to sign such an agreement within said thirty (30) days and file the same with the Board, then the right herein granted shall cease and determine.

Fourth—Upon the termination of this original contract, or if the same be renewed, then at the termination of the said renewal term, or upon the termination of the rights hereby granted for any cause, or upon the dissolution of the Company before such termination, the tracks and equipments of the Company constructed pursuant to this contract within the streets and avenues shall become the property of the City without cost, and the same may be used or disposed of by the City for any purpose whatsoever, or the same may be leased to any Company or individual.

If, however, at the termination of this contract as above, the Board shall so order, by resolution, the Company shall, upon thirty (30) days' notice from the Board, remove any and all of its tracks and other equipment constructed pursuant to this contract, and the said streets and avenues shall be restored to their original condition at the sole cost and expense of the Company.

Fifth—The Company shall commence construction of the railway herein authorized within three (3) months from the date upon which the consents of the property owners are filed with the Board or from the date of the order of the Appellate Division of the Supreme Court made pursuant to section 174 of the Railroad Law confirming the determination of the Commissioners appointed thereunder, that such railway ought to be constructed, and shall complete the construction and place the same in full operation within six (6) months from the date of filing such consents or the date of such order; otherwise this right shall cease and determine, and all sums paid, or which may be deposited with the Comptroller of the City, as hereinafter provided, shall thereupon be forfeited to the City; provided that the period for commencement and the period for completion and placing the railway in full operation may be extended by the Board, but the total extension of time for either of such periods shall not exceed in the aggregate six (6) months; and provided, further, that when the commencement or completion of said construction shall be prevented by legal proceedings in any court or by works of public improvement, or from other causes not within control of the Company, the time for the commencement or completion of such construction may be extended for the period of such prevention, but no delay shall be allowed for unless the court proceedings shall be diligently prosecuted by the Company, and provided further, that in no case shall such delay be deemed to begin until the Company shall have given written notice to the Board of any such court proceedings or other occasion of delay, and deliver to the Board copies of any injunction or other orders, and the papers upon which the same shall have been granted, and unless upon the request of the Board, the Company shall, in writing, consent that the Board either in its own name as a party, or in the name of the City as a party, may intervene in any such proceedings.

Sixth—Said railway shall be constructed, maintained and operated subject to the supervision and control of all the authorities of the City who have jurisdiction in such matters, as provided by the Charter of the City.

No construction upon said railway shall be commenced until written permits have been obtained from the proper City officials. In any permits so issued such officials may also impose such conditions as a condition of the granting of the same, as are necessary for the purpose of protecting any structures, in the streets and avenues, over which such officials have jurisdiction and the Company shall comply with such conditions.

The electrical equipment to be installed by the Company for the operation of the railway within the limits of the City, whether the same be upon streets and avenues or upon private property, shall be constructed and maintained under the supervision and control of the Commissioner of Water Supply, Gas and Electricity.

Seventh—The portion of said railway in the Borough of Manhattan and upon the Manhattan Bridge and its terminals shall be operated by underground electric power substantially similar to the system of underground electric power now used by the street surface railways in the Borough of Manhattan, by gas engine power or by electric storage battery power; provided that any other power may be used, except locomotive steam power, horse power or overhead electric power, which may be lawfully used, approved by the Board and consented to by the abutting property owners in accordance with the provisions of law and by the Public Service Commission for the First District of the State of New York. The portion of said railway in the Borough of Brooklyn, except upon the Manhattan Bridge and its terminals, may be operated by overhead electric power substantially similar to the overhead electric system now in use by street surface railways in the Borough of Brooklyn, by gas engine power or by electric storage battery power; provided that any other power may be used, except locomotive steam power or horse power, which may be lawfully used, approved by the Board and consented to by the abutting property owners in accordance with the provisions of law and by the Public Service Commission for the First District of the State of New York.

Eighth—No wires for the transmission of power, except trolley wires, shall be permitted unless they be placed in conduits underneath or along the side of the railway. When such conduits are constructed the Company shall provide two (2) conduits not less than three (3) inches in diameter each for the exclusive use of the City. The Company hereby agrees that such conduits shall be used only by the Company and the City, as above.

Ninth—The Company shall at all times keep the streets and avenues upon which the said railway is constructed, between its tracks, the rails of its tracks and for a distance of two (2) feet beyond the rails, on either side thereof, free and clear from ice and snow; provided, however, that the Company shall, at the option of the Commissioner of Street Cleaning, enter into an agreement for each winter season, or part thereof, to clean an equivalent amount of street surface from house line to house line.

Tenth—As long as said railway, or any portion thereof, remains in any street or avenue, the Company shall pave and keep in permanent repair that portion of the surface of the street or avenue in which the said railway is constructed, between its tracks, the rails of its tracks and for a distance of two (2) feet beyond the rails on either side thereof, under the supervision of the local authorities, whenever required by them to do so, and in such manner as they may prescribe. In case of the neglect of the Company to make pavement or repairs in the Borough of Manhattan after the expiration of thirty (30) days' notice to do so from the President of the Borough of Manhattan or to make pavement or repairs in the Borough of Brooklyn, after like notice from the President of the Borough of Brooklyn, then the said Presidents or either of them may make such pavement or repairs in their respective Boroughs at the expense of the Company. And the City shall have the right to change the material or character of the pavement of any street or avenue, and in that event the Company shall be bound to replace such pavement in the manner directed by the proper City official, at its own expense, and the provisions as to repairs herein contained shall apply to such renewed or altered pavement.

Eleventh—Any alteration to the sewerage or drainage systems, or to any other subsurface or to any surface structures in the streets, required on account of the construction or operation of the railway, shall be made at the sole cost of the Company, and in such manner as the proper City officials may prescribe.

Twelfth—It is agreed that the right hereby granted to operate a street surface railway shall not be in preference or in hindrance to public work of the City, and should the said railway in any way interfere with the construction of public works in the streets and avenues, whether the same is done by the City directly or by a contractor for the City, the Company shall, at its own expense, protect or move the tracks and appurtenances in the manner directed by the City officials having jurisdiction over such public work.

Thirteenth—Should the grades or lines of the streets and avenues in which the railway is hereby authorized be changed at any time after the railway has been constructed and during the term of this contract, the Company shall, at its own expense, change its tracks and appurtenances to conform with such new grades and lines, and during the construction of any public improvement upon said streets and avenues the Company shall take care of and protect the tracks and appurtenances at its own expense, all to be done subject to the direction of the City official having jurisdiction over the construction of such change.

Section 3. The grant of the right or privilege to operate cars upon two (2) tracks on the Manhattan Bridge and the approaches thereto, upon the route hereinbefore described, and to use other equipment owned by the City upon said bridge, is subject to the following conditions, which shall be complied with by the Company:

First—The said right and privilege shall be held and enjoyed by the Company for a term of ten (10) years from the date upon which this contract is signed by the Mayor, with the privilege of renewal of said contract for the further period of fifteen (15) years, upon a fair revaluation of said right and privilege.

Such revaluation shall be made in like manner and upon the same conditions as that herein provided for the revaluation of the right and privilege to construct, maintain and operate a railway from Desbrosses Street Ferry to the Manhattan Bridge in the Borough of Manhattan and from the intersection of Atlantic avenue with Fourth avenue to the Manhattan Bridge in the Borough of Brooklyn.

Second—The Company shall use only such tracks as shall be assigned to the Company by the Commissioner of Bridges, and nothing in this contract shall be deemed to affect in any way the right of the City to grant to any individual or other corporation a similar right or privilege upon the same or other terms and conditions, or to affect the right of the Commissioner of Bridges to assign the same or other tracks to such individual or other corporation.

Such tracks and all electrical equipment necessary for the operation of cars thereon shall be installed at the expense of the City, and shall remain the property of the City, but the Company shall pay the cost of keeping and maintaining such tracks and electrical equipment in good order and repair, and in such manner as shall be approved and directed by the Commissioner of Bridges, and shall furnish all motive power required by the Commissioner of Bridges, for the operation of its cars, and the Company shall renew any or all tracks and electrical equipment used by it upon the bridge and its terminals when directed by the Commissioner of Bridges and in such manner as may be prescribed by him. If deemed necessary by the Commissioner of Bridges, the Company shall install and operate a system of signals to insure the safe and efficient operation of cars; such system to be approved by the Commissioner of Bridges. In the event of any necessity for changing the layout of tracks, curves, switches, sidings or platforms on the bridge in order to facilitate operation of cars by the Company, said Company must do all the work and furnish all the labor and tools necessary for affecting such changes, which shall all be made under the control and direction of the Commissioner of Bridges, and no such changes or construction connected therewith, or relating thereto, shall be made unless the plan or plans for the same have been first submitted to the Commissioner of Bridges and approved by him.

If, however, the tracks and appliances herein mentioned are used by any other individual or corporation, then the Company shall bear only such proportion of the cost or work required by the terms and conditions of this subdivision as the use of such track and appliances by the Company bears to the entire use of such track and appliances.

Third—Before beginning the operation of the cars, the Company shall file with the Commissioner of Bridges a statement for his approval and assent as to the type of car which it proposes to operate and a sketch showing clearance dimensions, weight on axles and wheel spacing, or such other information as may be required by said Commissioner. All cars operated over the bridge by the Company and all equipment and appliances relating to such operation shall be subject at all times to the inspection of the Commissioner of Bridges or his authorized representatives, who shall have power to forbid the entrance to the bridge of cars which may for any reason be unsatisfactory, and who shall have power to direct the removal of any old or inadequate appliance and the substitution therefor of appliances of approved character.

Said Commissioner may adopt rules and regulations in regard to the number of cars to be operated over the bridge, the rate of speed of said cars, the movement and headway thereof, the type and weight of cars to be used and the condition thereof, the switching of cars and the use of platforms and the control of the electrical current used by the Company, and the said Commissioner may alter and amend any such rules and regulations so as to secure the safety and comfort of persons using the bridge and preserve the purposes for which the bridge was constructed, and, upon serving notice upon the Company that such rules and regulations have been made, amended or altered, the Company shall comply with all the requirements thereof.

Fourth—The Company shall not operate cars upon the Manhattan Bridge until the Company shall have put in operation the railway upon the routes hereinbefore described from the easterly side of West Broadway to the westerly approach to the Manhattan Bridge in the Borough of Manhattan, and from the easterly approach to said bridge to the intersection of Flatbush Avenue Extension with Fulton street in the Borough of Brooklyn.

Fifth—Nothing in this contract shall be deemed to affect in any way the right of the Commissioner of Bridges to make any alterations or changes in the construction, operation or management of the bridge or to affect in any way the control of such Commissioner over such bridge, as provided by the Charter of the City.

Section 4. The grant of the said right and privilege to construct, maintain and operate a street surface railway from a point in the marginal way adjacent to the North River at or near Desbrosses Street Ferry to the westerly approach to the Manhattan Bridge in the Borough of Manhattan and from the easterly approach to said bridge to the intersection of Fourth and Atlantic avenues in the Borough of Brooklyn, upon the routes hereinbefore described and the grant of the said right and privilege to operate cars upon the Manhattan Bridge and the approaches thereto are both subject to the following conditions which shall be complied with by the Company:

First—The Company shall pay to the City for the privilege hereby granted the following sums of money:

(a) The sum of fifteen thousand dollars ($15,000) in cash within three (3) months after the date on which this contract is signed by the Mayor, and before anything is done in exercise of the privilege hereby granted.

(b) During the first of five (5) years an annual sum which shall in no case be less than four thousand dollars ($4,000), and which shall be equal to three (3) per cent. of its gross annual receipts if such percentage shall exceed the sum of four thousand dollars ($4,000).

During the second term of five (5) years an annual sum which shall in no case be less than seven thousand dollars ($7,000), and which shall be equal to five (5) per cent. of its gross annual receipts, if such percentage shall exceed the sum of seven thousand dollars ($7,000).

The gross annual receipts mentioned above shall be the gross receipts of the Company from all sources within the limits of the City.

The annual charges shall commence from the date upon which this contract is signed by the Mayor.

(c) For the use of the tracks owned by the City upon the Manhattan Bridge and the approaches thereto, the sum of five cents for each round trip or the sum of two and one-half cents for each single trip of each and every car operated upon the bridge.

The number of such cars shall be certified by the Commissioner of Bridges to the Comptroller once each month in such form as shall be designated by the Comptroller.

All annual charges as above shall be paid into the treasury of the City on November 1 of each year, and shall be for the amount due to September 30 next preceding. Provided that the first annual payment shall be only for that proportion of the first annual charge as the time between the date upon which this contract is signed by the Mayor and September 30 following shall bear to the whole of one year.

Whenever the percentage required to be paid shall exceed the minimum amount as above, then such sum over and above such minimum shall be paid on or before November 1 in each year for the year ending September 30 next preceding.

The annual charges herein provided are intended to include the percentages of gross receipts now required to be paid by railway companies to the City pursuant to the Railroad Law as amended.

Any and all payments to be made by the terms of this contract to the City by the Company shall not be considered in any manner in the nature of a tax, but such payments shall be made in addition to any and all taxes of whatsoever kind or description, now or hereafter required to be paid by any ordinance of the City or resolution of the Board or any law of the State of New York.

Second—The annual charges or payments shall continue throughout the whole term of this contract (whether original or renewal), notwithstanding any clause in any statute or in the charter of any other railway or railroad company providing for payment for railway or railroad rights or franchises at a different rate, and no assignment, lease or sublease of the rights or privileges hereby granted (whether original or renewal), or of any part thereof, or of any of the routes mentioned herein, or of any part thereof, shall be valid or effectual for any purpose unless the said assignment, lease or sublease shall contain a covenant on the part of the assignee or lessee that the same is subject to all the conditions of this contract; and that the assignee or lessee assumes and will be bound by all of said conditions, and especially said conditions as to payments, anything in any statute or in the charter of such assignee or lessee to the contrary notwithstanding, and that the said assignee or lessee waives any more favorable conditions created by such statute or its charter, and that it will not claim by reason thereof or otherwise exemption from liability to perform each and all of the conditions of this contract.

Third—The rights and privileges hereby granted shall not be assigned, either in whole or in part, or leased or sublet in any manner, nor shall the title thereto, or right, interest or property therein, pass to or vest in any other person or corporation whatsoever, either by the act of the Company, or by operation of law, whether under the provisions of the statutes relating to the consolidation or merger of corporations or otherwise, without the consent of the City, acting by the Board, evidenced by an instrument under seal, anything herein contained to the contrary thereof in any wise notwithstanding, and the granting, giving or waiving of any one or more of such consents shall not render unnecessary any subsequent consent or consents.

Fourth—Said railway shall be constructed and operated in the latest approved manner of street railway construction and operation, and it is hereby agreed that the Board may require the Company to improve or add to the railway equipment, including rolling stock and railway appurtenances, from time to time, as such additions and improvements are necessary, in the opinion of the Board. Upon failure on the part of the Company to comply with the direction of the Board within a reasonable time, the rights hereby granted shall cease and determine.

Fifth—The rate of fare for any passenger upon said railway shall not exceed three (3) cents, and the Company shall not charge any passenger more than three (3) cents for one continuous ride from any point on its road or on any road, line or branch operated by it or under its control to any other point thereof or any connecting branch thereof within the limits of the City.

Should the Company at any time during the term of this contract be merged or consolidated with any other street surface railway company or companies, whose lines connect with or intersect the lines of the Company, the Company shall, by reason of such merger or consolidation, become obligated to receive passengers from and transfer passengers to the lines of such merged or consolidated company or companies and said passengers shall be given a continuous ride over the lines of the Company and the lines of such merged or consolidated company or companies for a single fare of not exceeding five (5) cents.

In the event of the failure at any time subsequent to such merger or consolidation of the Company or any merged or consolidated company or companies whose lines connect with or intersect the lines of the Company or of the successors or assigns of such company or companies for any reason whatsoever to receive and transfer passengers as hereinabove provided, this franchise shall ipso facto become void and forfeited.

The Company shall carry free upon the railway hereby authorized during the term of this contract all members of the Police and Fire Departments of the City, when such employees are in full uniform.

Sixth—No cars shall be operated upon the railway hereby authorized, other than passenger cars, cars for the transportation of express matter and cars necessary for the repair or maintenance of the railway, and no freight cars shall be operated upon the tracks of said railway. Provided that no cars for the transportation of express matter shall be operated between the hours of six o'clock a. m. and eight o'clock p. m. daily, and that the Board may further limit the operation of such cars as public convenience may require.

The rate for the carrying of property over the said railway upon the cars of the Company shall in all cases be reasonable in amount, subject to the control of the Board, and may be fixed by the Board after notice to the Company and a hearing had thereon, and when so fixed such rates shall be binding upon the Company, and no greater sums shall be charged for such services than provided for by it.

Seventh—The Company shall attach to each car run over the said railway proper fenders and wheelguards, in conformity with such laws and ordinances as are now in force, or may hereafter, during the term of this contract be enacted or adopted by the State or City authorities, or as may be required by resolution of the Board.

Eighth—All cars which are operated on said railway shall be heated during the cold whether, in conformity with such laws and ordinances as are now in force, or may hereafter during the term of this contract be enacted or adopted by the State or City authorities, or as may be required by resolution of the Board.

Ninth—All cars operated on said railway shall be well lighted by electricity, or by some lighting system equally efficient, or as may be required by resolution of the Board.

Tenth—Cars on the said railway shall run at intervals of not more than thirty (30) minutes both day and night, and as much oftener as reasonable convenience of the public may require, or as may be directed by the Board.

Eleventh—The Company shall submit to the Board a report not later than November 1 of each year for the year ending September 30 next preceding, and at any other time upon the request of the Board, which shall state:

1. The amount of stock issued, for cash, for property.
2. The amount paid in as by last report.
3. The total amount of capital stock paid in.
4. The funded debt by last report.
5. The total amount of funded debt.
6. The floating debt as by last report.
7. The total amount of floating debt.
8. The total amount of funded and floating debt.
9. The average rate per annum of interest on funded debt.
10. Statement of dividends paid during the year.
11. The total amount expended for same.
12. The names of the directors elected at the last meeting of the corporation held for such purpose.
13. Location, value and amount paid for real estate owned by the Company as by last report.
14. Location, value and amount paid for real estate now owned by the Company.
15. Number of passengers carried during the year.
16. Total receipts of Company for each class of business.
17. Amounts paid by the Company for damage to persons or property on account of construction and operation.
18. Total expenses for operation, including salaries.

—and such other information in regard to the business of the Company as may be required by the Board.

Twelfth—The Company shall at all times keep accurate books of account of the gross receipts from all sources within the limits of the City, and shall, on or before November 1 of each year, make a verified report to the Comptroller of the City of the business done by the Company for the year ending September 30 next preceding, in such form as he may prescribe. Such report shall contain a statement of such gross receipts, the total miles in operation within the limits of the City and the miles of railway constructed and operated under this contract, and such other information as the Comptroller may require. The Comptroller shall have access to all books of the Company for the purpose of ascertaining the correctness of its report and may examine its officers under oath.

Thirteenth—In case of any violation or breach or failure to comply with any of the provisions herein contained or with any orders of the Board acting under the powers herein reserved, the franchise or consent herein granted may be forfeited by a suit brought by the Corporation Counsl, on notice of ten (10) days to the Company, or at the option of the Board by resolution of said Board, which said resolution may contain a provision to the effect that the railway constructed and in use by virtue of this contract shall thereupon become the property of the City without proceedings at law or in equity. Provided, however, that such action by the Board shall not be taken until the Board shall give notice to the Company to appear before it on a certain day not less than ten (10) days after the date of such notice, to show cause why such resolution declaring the contract forfeited should not be adopted. In case the Company fails to appear, action may be taken by the Board forthwith.

Fourteenth—If the Company shall fail to give efficient public service at the rates herein fixed, or fail to maintain its structures and equipment as herein provided in good condition throughout the whole term of this contract, the Board may give notice to the Company specifying any default on the part of the Company, and requiring the Company to remedy the same within a reasonable time; and upon failure of the Company to remedy such default within a reasonable time, the Company shall, for each day thereafter during which the default or defect remains, pay to the City the sum of two hundred and fifty dollars ($250) as fixed or liquidated damages, or the Board, in case such structures or equipment which may affect the surface of the streets shall not be put in good condition within a reasonable time after notice by the Board as aforesaid, shall have the right to make all needed repairs at the expense of the Company, in which case the Company shall pay to the City the amount of the cost of such repairs, with legal interest thereon, all of which sums may be deducted from the fund hereinafter provided for.

Fifteenth—The Company shall assume all liability to persons or property by reason of the construction or operation of the railway authorized by this contract, and it is a condition of this contract that the City shall assume no liability whatsoever to either persons or property on account of the same, and the Company hereby agrees to repay to the City any damage which the City shall be compelled to pay by reason of any acts or default of the Company.

Sixteenth—This grant is upon the express condition that the Company, within thirty (30) days after the signing of this contract by the Mayor, and before anything is done in exercise of the rights conferred hereby, shall deposit with the Comptroller of the City the sum of ten thousand dollars ($10,000), either in money or securities, to be approved by him, which fund shall be security for the performance by the Company of all of the terms and conditions of this contract and compliance with all orders of the Board acting under the powers herein reserved, especially those which relate to the payment of the annual charges for the privilege hereby granted, the rendering of efficient public service at the rates herein fixed, the repairs of the street pavement, the removal of snow and ice, the quality of construction of the railway and the maintenance of the property in good condition throughout the whole term of this contract, and in case of default in the performance by the Company of such terms and conditions, or compliance with such orders or either or any of them, the City shall have the right to cause the work to be done and the materials to be furnished for the performance thereof after due notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings; or after default in the payment of the annual charges, shall collect the same, with interest, from the said fund after ten (10) days' notice to the Company; or in case of failure to observe the said terms and conditions of this contract and orders of the Board acting thereunder, relating to the headway, heating and lighting of cars, fenders, wheelguards and watering of street pavements, the Company shall pay a penalty of fifty dollars ($50) per day for each day of violation, and the further sum of ten dollars ($10) per day for each car that shall not be properly heated, lighted or supplied with fenders or wheelguards, in case of a violation of the provisions relating to these matters, all of which sums may be deducted from said fund.

The procedure for the imposition and collection of the penalties in this contract shall be as follows:

The Board, on complaint made, shall give notice to the Company, directing its President, or other officer, to appear before the Board on a certain day not less than ten (10) days after the date of such notice, to show cause why the Company should not be penalized in accordance with the foregoing provisions. If the Company fails to make an appearance, or after a hearing appears in the judgment of the Board to be in fault, said Board shall forthwith impose the prescribed penalty, or where the amount of the penalty is not prescribed herein, such amount as appears to the Board to be just, and without legal procedure direct the Comptroller to withdraw the amount of such penalty from the security fund deposted with him. In case of any drafts made upon the security fund the Company shall, upon ten (10) days' notice, pay to the City a sum sufficient to restore said security fund to the original amount of ten thousand dollars ($10,000), and in default thereof this contract shall be cancelled and annulled at the option of the Board, acting in behalf of the City. No action or proceeding or right under the provisions of this contract shall affect any other legal rights, remedies or causes of action belonging to the City.

Seventeenth—The words "notice" or "direction," wherever used in this contract, shall be deemed to mean a written notice or direction. Every such notice or direction to be served upon the Company shall be delivered at such office in the City as shall have been designated by the Company, or if no such office shall have been designated, or if such designation shall have for any reason become inoperative, shall be mailed in the City, postage prepaid, addressed to the Company at the City. Delivery or mailing of such notice or direction as and when above provided shall be equivalent to direct personal notice or direction, and shall be deemed to have been given at the time of delivery or mailing.

Eighteenth—The words "streets or avenues" and "streets and avenues," wherever used in this contract, shall be deemed to mean "streets, avenues, highways, driveways, bridges, viaducts, public places or any other property to which the City has title or over which the public has an easement," encountered in the route hereinabove described, and upon or in which authority is hereby given to the Company to construct a railway.

Nineteenth—If at any time the powers of the Board or any other of the authorities herein mentioned or intended to be mentioned, shall be transferred by law to any other board, authority, officer or officers, then and in such case such other board, authority, officer or officers, shall have all the powers, rights and duties herein reserved to or prescribed for the Board or other authorities, officer or officers.

Section 5. Nothing in this contract shall be construed as in any manner limiting the present or future jurisdiction of the Public Service Commission under the laws of the State of New York.

Section 6. This grant is also upon the further and express condition that the provisions of article 5 and other provisions of the Railroad Law, pertinent hereto, shall be strictly complied with by the Company.

Section 7. The Company promises, covenants and agrees on its part and behalf to conform to and abide by and perform all the terms, conditions and requirements in this contract fixed and contained.

In witness whereof, the party of the first part, by its Mayor, thereunto duly authorized by the Board of Estimate and Apportionment of said City, has caused the corporate name of said City to be hereunto signed and the corporate seal of said City to be hereunto affixed; and the party of the second part, by its officers, thereunto duly authorized, has caused its corporate name to be hereunto signed and its corporate seal to be hereunto affixed, the day and year first above written.

THE CITY OF NEW YORK,

[CORPORATE SEAL.] By ...., Mayor.

MANHATTAN BRIDGE THREE CENT LINE,

[SEAL.] By ...., President.

Attest: .... Secretary.

(Here add acknowledgments.)

The matter was referred to the Franchise Committee.

Twenty-eighth and Twenty-ninth Streets Crosstown Railroad Company.

In the matter of the petition of the Twenty-eighth and Twenty-ninth Streets Crosstown Railroad Company for a franchise to construct, maintain and operate a street surface railway from the existing tracks of the Company at West 28th street and Seventh avenue, upon and along Seventh avenue to West 33d street, to Eighth avenue, to West 31st street, to Seventh avenue, there connecting with the existing tracks of the Company, Borough of Manhattan.

By resolution adopted June 8, 1911, this day was fixed as the day for public hearing.

The Secretary presented the following:

Mayer and Gilbert, New York, June 26, 1911.

The Honorable, the Board of Estimate and Apportionment, 277 Broadway, New York City.

Gentlemen—In respect of the petition of the Twenty-eighth and Twenty-ninth Streets Crosstown Railroad Company for a franchise designed to connect up said line with Pennsylvania Station, and which is set for public hearing on July 6, 1911, I beg to say that I am advised that the Borough President deems it unwise to have additional tracks in Seventh or Eighth avenues, or any tracks in 31st and 33d streets.

Under the circumstances, and until a satisfactory plan can be worked out, I beg to withdraw the petition and to state that consequently there will be no need of a public hearing on July 6. Yours very truly,

JULIUS M. MAYER, Attorney for JOSEPH B. MAYER, Receiver.

Board of Estimate and Apportionment, The City of New York, **Bureau of Franchises**, June 27, 1911.

HON. WILLIAM J. GAYNOR, *Mayor, Chairman of the Board of Estimate and Apportionment:*

Sir—Under date of May 12, 1911, the Twenty-eighth and Twenty-ninth Streets Crosstown Railroad Company, by its Receiver, Mr. Joseph B. Mayer, petitioned the Board for the right to construct, maintain and operate a street surface railway in the Borough of Manhattan upon the following route:

Beginning at the intersection of West 28th street and 7th avenue; thence northerly by double track in 7th avenue to West 32d street; thence northerly by single track in 7th avenue to West 33d street; thence westerly by single track in West 33d street to 8th avenue; thence southerly by single track in 8th avenue to West 31st street; thence easterly by single track in West 31st street to 7th avenue, and there connecting with the track in 7th avenue above described.

The petition was presented to the Board on May 25, 1911, and referred to the Chief Engineer.

At the meeting held on June 8, 1911, the Board adopted a resolution fixing July 6, 1911, as the date for the preliminary public hearing, and requesting the Mayor to designate the newspapers in which to publish the notice of such hearing, as required by law.

Subsequent to the filing of the petition, a copy of the same was transmitted to the President of the Borough of Manhattan, which is the usual custom, with a request that he have the matter investigated and report any objections he may have to the proposed route or suggest any special conditions which he believes should be imposed in the grant. In reply thereto, under date of June 22, 1911, the President of the Borough of Manhattan states that the territory in which the railway is proposed to be operated has been examined by his Consulting Engineer and Commissioner of Public Works and that they have determined that it would be unwise to construct any additional tracks in 7th and 8th avenues or any tracks at all in West 31st or West 33d streets and that his Engineers are convinced that traffic conditions in the vicinity of the Pennsylvania terminal situated between West 31st and West 33d streets and 7th and 8th avenues, would prohibit the operation of street surface railways in those streets.

Upon the receipt of this communication, the representatives of the Company were advised of the opposition and a conference was held in this office at which the Receiver of the applicant Company, President of the Borough of Manhattan and the Pennsylvania Railroad Company were represented. It was agreed by the representatives of the applicant Company that in view of the suggestions made, it would not proceed further with its application until a plan had been worked out whereby a route could be selected which would be satisfactory.

Accordingly, Mr. Julius M. Mayer, Counsel for the Receiver of the applicant Company, addressed a letter to the Board under date of June 26, 1911, in which he states that in view of the circumstances he wishes to withdraw the petition until a satisfactory plan can be worked out.

Consequently the public hearing fixed for July 6, 1911, should not be held and it is suggested that the matter be referred back to the Bureau of Franchises until the Company has determined upon a definite plan. Respectfully,

HARRY P. NICHOLS, Engineer, Chief of Bureau.

The matter was then referred back to the Bureau of Franchises.

New York Edison Company.

In the matter of the application of the New York Edison Company for permission to install, maintain and use eighteen (18) additional terra cotta ducts, set in concrete and designed to contain electrical conductors, in the existing bridge over East 39th street, connecting the power stations of the Company on the east side of First avenue, Borough of Manhattan.

This application was presented to the Board at the meeting of June 22, 1911, and referred to the Bureau of Franchises.

The Secretary presented the following:

Board of Estimate and Apportionment, Bureau of Franchises, City of New York, June 6, 1911.

To the Honorable Board of Estimate and Apportionment, City of New York:

Sirs—The bridge over East 39th street connecting our two power stations on the east side of First avenue, was completed in accordance with the amended plan which was approved by the Board November 19, 1909, and filed as Approved Resolution No. 50. We now find it necessary, owing to increase in our business and to provide for future extensions, to request permission for the installation of eighteen additional terra cotta ducts set in concrete and designed to contain electrical conductors connecting the busses of the two power stations.

Permission to lay these ducts is asked for on account of increase in business and owing to remodelling of one of the power houses now in course of construction, which has demanded an increase in the capacity of Waterside Power Station No. 1, making desirable an increase in the bus tie connection so that both power stations can be operated from either switchboard. This increase in business requires the introduction of a 60 cycle current bus in Waterside No. 1, which station has heretofore had no 60 cycle bus, and six of the proposed ducts are to be devoted to the connection of this new bus to the corresponding bus in Waterside No. 2. In planning the reconstruction of Waterside No. 1 it has been found desirable to provide facilities for future railroad business for the operation of which a special railroad bus has been arranged.

The large increase in the 25 cycle current capacity of Waterside No. 1, now being installed over 50,000 kilowatts, and the consequent increase in the number of distributing feeders requires the extension of the bus in this station and at least six of the remaining twelve ducts will be devoted at once to the necessary additional 25 cycle current bus connection.

The introduction of these additional ducts on the bridge overloads the present steel trusses and we have designed two additional trusses and reinforcement to take the added load. This reinforcement will not in any way affect the outside appearance of the bridge, and involves merely an extension in the interior of the existing facilities.

We are sending under separate cover drawings of a section of the bridge showing the proposed ducts and the new trusses and reinforcement.

Respectfully, J. W. LIEB, JR., Third Vice-President.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, June 29, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment.*

Sir—The Board of Estimate and Apportionment adopted a resolution on June 25, 1909, which was approved by the Mayor June 29, 1909, granting permission to the New York Edison Company to construct, maintain and use an enclosed single span bridge over and across East 39th street, in the Borough of Manhattan, about twelve feet east of the easterly line of First avenue and fifty feet above the roadway. The bridge connects the Company's buildings on opposite sides of the street and is used as a passageway between the buildings. It was also designed to carry electric cables in the flooring, but under date of October 22, 1909, the Company presented a petition to the Board requesting permission to amend the plan of the bridge so as to provide for the carrying of the electric cables set in concrete above the passageway instead of in the flooring. The petition further requested authorization to install twelve additional ducts along the easterly side of the bridge for the purpose of conducting telephone and signal wires between the buildings. No objections were found to the proposed amendment and a resolution was adopted by the Board of Estimate and Apportionment on November 19, 1909, and approved by the Mayor on November 22, 1909, authorizing the change in position of the ducts and the additional ducts along the easterly side of the bridge.

The Company has now presented a petition dated June 6, 1911, to the Board of Estimate and Apportionment for permission to install eighteen additional ducts on the bridge. The petition recites that owing to an increase in the Company's business and in order to provide for future extensions, the capacity of one of the Company's power houses has been considerably increased and the additional ducts are necessary in order to carry the increased current.

The proposed additional ducts will overload the present steel trusses which will therefore require reinforcement. The necessary reinforcements are shown on the plan accompanying the petition and have been designed to lie entirely within the lines of the existing bridge.

Copies of the petition and accompanying plan were sent to the President of the Borough of Manhattan and to the Commissioner of Water Supply, Gas and Electricity, with a request that examinations be made by the various bureaus having jurisdiction, with a view to ascertaining if there are any objections to the installation of the additional ducts or to the necessary reinforcements on account of the ducts

Replies to said communications dated June 19 and June 28, 1911, state there are no objections to the granting of the requested permission, and no particular conditions necessary to be inserted in the form of consent.

I can see no good reason why the requested permission should not be granted should the Board see fit to do so, particularly as the administrative departments of the city offer no objections. In such case I would, therefore, suggest that the resolution granting the consent for the said bridge as amended by the Board on November 19, 1909, be amended so as to permit of the installation of the proposed additional ducts and the requisite reinforcement of the bridge.

A resolution so providing is herewith submitted for adoption.

Respectfully, HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, By resolution adopted by the Board of Estimate and Apportionment on June 25, 1909, and approved by the Mayor June 29, 1909, the New York Edison Company was granted permission to construct, maintain and use an enclosed single span bridge over and across East 39th street at a point about twelve (12) feet east of the easterly line of First avenue, connecting its power houses on both sides of said street, the said bridge to be used as a passageway and to contain electric cables situated on the said bridge as shown on a certain plan attached to and made a part of said consent, and

Whereas, Said consent was amended by resolution adopted by the Board of Estimate and Apportionment November 19, 1909, and approved by the Mayor November 22, 1909, so as to permit of the carrying of the authorized cables and certain additional cables on the said bridge in the manner shown on a plan attached to and made a part of the said resolution of November, 1909, and

Whereas, The New York Edison Company has presented a petition dated June 6, 1911, to the Board of Estimate and Apportionment, requesting permission to install certain additional ducts on the said bridge to contain electric cables and to reinforce the said bridge in such manner as to carry the proposed additional ducts; now, therefore, be it

Resolved, That the resolution adopted by the Board of Estimate and Apportionment on June 25, 1909, approved by the Mayor June 29, 1909, and amended by resolution adopted November 19, 1909, and approved by the Mayor November 22, 1909, be and it hereby is amended so as to permit of the carrying of eighteen additional ducts and the reinforcing of the said bridge, all as shown on a plan, entitled:

"Second Amendment to plans showing location of Proposed Bridge connecting Water side Power-Houses over East 39th Street, Borough of Manhattan, New York City, for The New York Edison Company, 55 Duane Street, New York City. Date, June 1, 1911, Scale ½" = 1'-0."

—and signed J. W. Lieb, Jr., Third Vice-President, a copy of which is attached hereto and made a part hereof, and be it further

Resolved, That this consent should not become operative until the said grantee shall duly execute an instrument in writing wherein said grantee shall promise, covenant and agree on its part to conform to, abide by and perform all the terms, conditions and requirements in the original consent fixed and contained, except as herein and hereby expressly modified and file the same with the Board of Estimate and Apportionment of the City of New York within thirty (30) days after the approval of this consent by the Mayor.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

New York Central and Hudson River Railroad Company.

In the matter of the application of the New York Central and Hudson River Railroad Company for permission to continue to maintain and use an existing track diagonally across Harlem River Terrace, at a point about 850 feet north of the northerly line of Fordham road, Borough of The Bronx.

This application was presented to the Board at the meeting of June 22, 1911, and referred to the Bureau of Franchises.

The Secretary presented the following:

To the Honorable Board of Estimate and Apportionment of the City of New York, 277 Broadway, New York City.

Gentlemen—On July 1, 1910, your honorable Board passed a resolution, which was approved by the Mayor on July 5, 1910, granting permission to The New York Central & Hudson River Railroad Company to construct a spur track across Harlem River Terrace about 850 feet north of Fordham road, Borough of The Bronx. This spur track was constructed for the convenience of the Bartlett-Haywood Company, which Company has a contract with the Consolidated Gas Company for the construction of a large gas holder near University Heights. The consent granted by the Board of Estimate and Apportionment was for one year and will expire on July 5, 1911, and although all due diligence has been exercised, the contractor will be unable to finish his work until some time in 1912.

It is, therefore, respectfully requested that the permission to construct and use this spur track be extended for one year from July 5, 1911, or until July 5, 1912, under such conditions as your honorable Board may see fit to impose.

Very respectfully yours,

THE NEW YORK CENTRAL AND HUDSON RIVER RAILROAD COMPANY, by Alex. S. Lyman, General Attorney.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, June 26, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—A resolution was adopted by the Board of Estimate and Apportionment on July 1, 1910, and approved by the Mayor July 5, 1910, granting permission to the New York Central and Hudson River Railroad Company to construct, maintain and operate temporarily a spur track diagonally across Harlem River terrace at a point about 850 feet north of the northerly line of Fordham road, in the Borough of The Bronx, from the railroad of the petitioner on the westerly side of the terrace to property of the Consolidated Gas Company on the easterly side. The track was to be used for the convenience of the Bartlett-Haywood Company in conveying materials for the construction of a large gas tank.

Section 1 of the consent provided that it should not extend beyond a term of one year from the date of approval by the Mayor. The Railroad Company has now presented a petition to the Board reciting that although due diligence has been exercised, the contractor will be unable to finish the gas tank before the expiration of the consent on July 5, 1911, and permission is, therefore, requested to continue to maintain and use the track for a further period of one year to July 5, 1912.

The resolution of the Board authorizing this track was adopted pursuant to an opinion of the Corporation Counsel, wherein it was held that, in view of the fact that Harlem River terrace was not physically open or in use, public interest would be served in the speedy erection of the tank, and the Board could properly give its consent to the temporary construction and use of the spur.

I caused an examination to be made and it was found that the terrace has not yet been graded, and it is in no condition to be opened to public travel.

A copy of the petition was forwarded to the President of the Borough of The Bronx, with a request to advise this office if Harlem River terrace is to be physically opened before July 5, 1912, or if there are any other reasons why the track should not be permitted to continue in existence and use until said date. In a reply dated June 19, 1911, the Borough President states there are no objections to the granting of the request.

As there are no objections to the continued existence of the track, and as it would appear that the terrace will not be opened to public use for some time, I would suggest that the request be granted, and the resolution of July 1, 1910, be amended so as to continue the permission in full force and effect for another year to July 5, 1912.

A resolution so providing is herewith submitted for adoption.

Respectfully, HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, The Board of Estimate and Apportionment did by resolution adopted July 1, 1910, and approved by the Mayor July 5, 1910, grant permission to the New York Central and Hudson River Railroad Company to construct, maintain and operate temporarily a spur track diagonally across Harlem River terrace at a point about 850 feet north of the northerly line of Fordham road, in the Borough of The Bronx, for the purpose of facilitating the conveyance of materials from the tracks of the said company on the westerly side of Harlem River terrace across said Harlem River terrace to property belonging to the Consolidated Gas Company, the said materials to be used in the erection of a gas tank for the said gas company; and

Whereas, Section 1 of the aforesaid resolution provides as follows:

"1. Said consent shall continue only during the pleasure of the Board of Estimate and Apportionment, or its successors in authority, and shall be revocable upon thirty (30) days' notice in writing to said grantee, its successors or assigns, but in no case shall said consent extend beyond a term of one year from the date of the approval of this consent by the Mayor, and thereupon all rights of the said New York Central and Hudson River Railroad Company, its successors or assigns, in and upon said Harlem River terrace by virtue of this consent shall cease and determine. The said consent shall terminate upon the completion of the construction of the tank."

—and

Whereas, The New York Central and Hudson River Railroad Company has presented a petition to the Board of Estimate and Apportionment for permission to continue to maintain and operate the said spur track for another year to July 5, 1912; now, therefore, be it

Resolved, That section 1 of the aforesaid consent be and the same is hereby amended to read as follows:

"1. The said consent shall continue only during the pleasure of the Board of Estimate and Apportionment, or its successors in authority, and shall be revocable upon thirty (30) days' notice in writing to said grantee, its successors or assigns, but in no case shall said consent extend beyond July 5, 1912, after which date all rights of the said New York Central and Hudson River Railroad Company, its successors or assigns in and upon said Harlem River terrace by virtue of this consent shall cease and determine. The said consent shall terminate upon the completion of the construction of the gas tank."

—and be it further

Resolved, That the New York Central and Hudson River Railroad Company shall pay into the City Treasury within sixty (60) days of the approval of this resolution by the Mayor the sum of one hundred dollars ($100) as compensation for the privilege hereby granted; and be it further

Resolved, That this consent shall not become operative unless and until the said New York Central and Hudson River Railroad Company shall duly execute an instrument in writing to the satisfaction of the Board of Estimate and Apportionment accepting such consent and file the same in the office of said Board within thirty (30) days of the date of the approval of this resolution by the Mayor, wherein said Company shall promise, covenant and agree that the consent of the Board of Estimate and Apportionment so given to the extension of time for the use of the temporary spur track shall not in any wise change, alter or amend any of the terms, conditions and requirements in the original consent granted by resolution adopted by the Board of Estimate and Apportionment July 1, 1910, and approved by the Mayor July 5, 1910, fixed and contained, and which said consent and all the terms, conditions and requirements thereof shall remain in full force and effect as herein and hereby expressly modified.

And the said Company shall promise, covenant and agree in said instrument to hold The City of New York harmless from all loss or damage to persons or property which may result from the construction, maintenance or use of the railroad track hereby authorized.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

R. J. Dean & Company.

The Secretary presented the following:

Department of Finance, City of New York, William A. Prendergast, Comptroller, March 6, 1911.

Joseph Haag, Esq., *Secretary, Board of Estimate and Apportionment:*

Sir—On March 2, this Department rendered a bill to R. J. Dean & Co., for the privilege of maintaining and using a pipe from 607 to 610 Greenwich street, for the period beginning March 2, 1911, and ending March 2, 1912. In reply thereto a communication was received from F. C. Linde Company, successors to R. J. Dean & Company, in which they state that they are no longer interested in the pipe, as they discontinued its use and installed electricity in April, 1910.

Will you be good enough to refer this to the Bureau of Franchises for investigation and report. Respectfully, E. D. FISHER, Deputy Comptroller.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, June 23, 1911.

HON. WILLIAM J. GAYNOR, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—Under date of March 6, 1911, the Department of Finance addressed a communication to the Board of Estimate and Apportionment stating that in response to a bill rendered to R. J. Dean & Co., for the privilege of maintaining and using a pipe from No. 607 to No. 610 Greenwich street, in the Borough of Manhattan, for the year ending March 2, 1912, a reply was received from F. C. Linde Company stating that use of the pipe was discontinued in April, 1910, and the Department of Finaance requested that the matter be referred to this Bureau for investigation and report.

I caused an examination to be made which revealed that the pipe was installed by R. J. Dean & Co., under the authority of a resolution adopted by the Board of Aldermen on January 12, 1892, which became effective on January 23, 1892. Pursuant to said resolution the Commissioners of the Sinking Fund on March 2, 1892, fixed the compensation for the privilege at the sum of $32 per annum and required the filing of a bond with the Comptroller. In accordance with such requirement a bond dated March 3, 1892, for $1,000, and signed by Robert J. Dean and Alvin J. Donally was filed with the Department of Finance.

From information received from F. C. Linde Company it appears that 607 and 610 Greenwich street were occupied by R. J. Dean & Co. under lease and the said Company went into the hands of a receiver some years ago. F. C. Linde Company then leased said premises and made use of the said pipe.

Bills were annually rendered by the Finance Department to R. J. Dean & Co. at the said address and as F. C. Linde Company were using the pipe, checks were returned to the Comptroller in payment of the said bill. The said last-mentioned company has now no further desire to use the pipe and disclaims any ownership.

Under date of May 2, 1911, I fully advised the receivers for R. J. Dean & Co. of the facts and requested that, in accordance with the customary procedure in similar cases, application be made to the Board of Estimate and Apportionment for the revocation of the consent and the cancellation of the annual charge and of the bond filed. No such application has been presented and one of the receivers has informed me that no action will be taken in the matter as there is no money available for the removal of the pipe from the street.

In view of the fact that the pipe is of no further use to R. J. Dean & Co., the grantee, and F. C. Linde Company, the present occupant of the premises does not desire to use the pipe, the resolution of the Board of Aldermen granting the consent should be revoked and the receivers for R. J. Dean & Co. required to remove the pipe from the street.

A resolution is herewith submitted for adoption revoking the consent and requiring the receivers to remove the pipe by September 1, 1911. The resolution further provides in case the receivers should fail to remove the pipe by the date specified, that the President of the Borough of Manhattan cause the pipe to be removed at the expense of the receivers, and in the event that the costs of removal be not paid by the receivers, that the Corporation Counsel take action for the collection of such costs. Upon the completion of the work of removing the pipe by the receivers or, if removed by the City, upon the receipt of the costs of removal, the resolution authorizes the Comptroller to cancel the bond on file in his office.

Respectfully, HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, a resolution was adopted by the Board of Aldermen on January 12, 1892, reading as follows:

"Resolved, That permission be and the same is hereby given to R. J. Dean & Company to lay a six (6) inch W. I. pipe, enclosing a three and one-half (3½) inch iron pipe for conducting steam from Nos. 607 to 610 Greenwich street, between Clarkson and Leroy streets, as shown on the accompanying diagram, upon payment to the city, as compensation for the privilege, such amount as may be determined an equivalent by the Commissioners of the Sinking Fund, provided the said R. J. Dean & Company shall stipulate with the Commissioner of Public Works to save the city harmless from any loss or damage that may be occasioned by the exercise of the privilege hereby given, during the progress or subsequent to the completion of the work of laying said pipe, the work to be done at their own expense, under the direction of the Commissioner of Public Works; such permission to continue only during the pleasure of the Common Council," which duly became effective on January 23, 1892, and

Whereas, The Commissioners of the Sinking Fund on March 2, 1892, fixed the compensation for the privilege at the sum of thirty-two dollars per annum and provided that the grantee should file a satisfactory bond with the Comptroller, and

Whereas, in accordance with such provision R. J. Dean & Company filed a bond for one thousand dollars in the Department of Finance and the compensation for the privilege has been paid to March 2, 1911, and

Whereas, it would appear that R. J. Dean & Company no longer occupies the said premises and that use of the pipe was discontinued in April, 1910; now, therefore, be it

Resolved, That the said resolution be and it hereby is rescinded and be it further

Resolved, That John J. Lenehan and William H. Corbitt, of 71 Nassau street, receivers of R. J. Dean & Company, be and they hereby are directed to entirely remove the said pipe from within the lines of Greenwich street on or before September 1, 1911, under the supervision and to the satisfaction of the President of the Borough of Manhattan and the Commissioner of Water Supply, Gas and Electricity, and be it further

Resolved, That the said officials be and they hereby are requested to advise this Board when the said pipe has been removed and the street pavement properly restored, and be it further

Resolved, That should the receivers for R. J. Dean & Company fail or neglect to remove said pipe by the date specified, the President of the Borough of Manhattan be and he hereby is directed to remove the same and restore the street pavement to its original condition and advise the Board of the date of completion of such work and of the cost of the same and the said official be and he hereby is requested in such event to make formal demand upon the receivers for R. J. Dean & Company for the payment of such costs and advise the Board within thirty (30) days of such demand whether or not the same has been paid, and in the event of the said receivers failing or neglecting to make payment of the cost of the said work, that the Corporation Counsel be and he hereby is requested to take such action as may be necessary for the collection of such costs, and be it further

Resolved, That upon the completion of the work of removal of the pipe and the restoration of the street pavement by the said receivers, or upon the receipt by the City of payment of the costs of removal, as hereinabove provided, the Comptroller be and he is hereby authorized to cancel the bond of one thousand dollars hereinabove mentioned.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

Hardman, Peck & Company.

In the matter of the application of Hardman, Peck & Company for a revocation of the resolution adopted by the Board of Aldermen, July 14, 1903, approved by the Mayor July 20, 1903, granting Hardman, Peck & Company permission to install, maintain and use a pipe under and across West 49th street, connecting premises 636-640 with 635-637 West 49th street, Borough of Manhattan.

This application was presented to the Board at the meeting of April 27, 1911.

The Secretary presented the following:

April 18, 1911.

To the Honorable, the Board of Estimate and Apportionment of The City of New York:

Gentlemen—Your petitioner, Hardman, Peck & Co., a domestic corporation, respectfully petition your honorable Board to revoke and cancel a franchise granted by authority of a resolution of the Board of Aldermen July 14, 1903, and approved by the Mayor July 20, 1903, by which franchise your petitioner was authorized to carry a pipe for the purpose of conveying steam under and across the highway or street in West 49th street, in the Borough of Manhattan, from 636 to 640 West 49th street to 635 to 637 West 49th street. That your petitioners have no further use for said pipe and desire that the franchise hereinbefore referred to be revoked and cancelled and that the annual charge of sixty dollars ($60) per annum for said franchise and the bond given by your petitioner and filed with the Comptroller be cancelled, vacated and discharged. Yours respectfully,

HARDMAN, PECK & CO., by Carl E. Peck, Vice-President.

(corporate seal)

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, June 28, 1911.

Hon. William J. Gaynor, *Mayor, Chairman of the Board of Estimate and Apportionment:*

Sir—Hardman, Peck & Company presented a petition dated April 18, 1911, to the Board of Estimate and Apportionment for the revocation of a resolution, adopted by the Board of Aldermen on July 14, 1903, and approved by the Mayor, July 20, 1903, granting permission to the petitioner to install, maintain and use a pipe for the conveyance of steam under and across West 49th street, in the Borough of Manhattan, connecting its premises, known as Nos. 636-640 with Nos. 635-637 West 49th street. The petition further requested the cancellation of the annual charge of $60 for the privilege and of the bond filed with the Comptroller to protect the City from any loss or damage due to the said pipe.

At the meeting of the Board, held April 27, 1911, the matter was referred to this office for investigation and report.

Inquiry at the Finance Department revealed that the annual charge for the privilege has been paid into the City Treasury for the year, ending July 29, 1911, and a bond of one hundred and twenty dollars is on file in said Department.

In accordance with the procedure in all similar cases the petitioner was notified to remove the pipe from within the lines of West 49th street, under the supervision and direction of the President of the Borough and the Commissioner of Water Supply, Gas and Electricity. I am now in receipt of communication from said officials, dated respectively June 17 and June 28, 1911, stating that the pipe has been entirely removed from within the lines of the street and the pavement restored to its original condition.

I would therefore recommend that the resolution of the Board of Aldermen, authorizing the installation of the said pipe be revoked, and the Comptroller be authorized to cancel the bond filed in his office.

A resolution is herewith submitted for adoption, in accordance with the hereinabove contained suggestion. Respectfully,

HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, The Board of Aldermen adopted a resolution on July 14, 1903, reading as follows:

"Resolved, That permission be and the same hereby is given to Hardman, Peck & Co. to lay a 10-inch cast-iron pipe, as shown on the accompanying diagram, for the purpose of conducting steam under and across the carriageway of West 49th street, connecting their buildings, Nos. 636 to 640, on the south side of said street, with their buildings, Nos. 635 and 637, on the north side of said street; provided that the said Hardman, Peck & Co. shall pay to The City of New York, as compensation for the privilege, such amount as may be determined as an equivalent therefor by the Board of Estimate and Apportionment; and provided that said pipe shall not be laid more than three feet below the surface of the carriageway; and provided, further, that the said Hardman, Peck & Co. shall stipulate with the President of the Borough of Manhattan to save The City of New York harmless from any loss or damage that may be occasioned during the progress or subsequent to the completion of the work of laying said pipe; the work to be done at the expense of the said Hardman, Peck & Co. under the direction of the President of the Borough of Manhattan, such permission to continue only during the pleasure of the Board of Aldermen."

—which was approved by the Mayor July 20, 1903, and

Whereas, Pursuant to said resolution, the Board of Estimate and Apportionment on July 29, 1903, fixed the compensation for the privilege at the sum of sixty dollars per annum, and provided that the grantee should file a satisfactory bond with the Comptroller, and

Whereas, In accordance with such provision Hardman, Peck & Co. filed a bond, dated August 4, 1903, for one hundred and twenty dollars in the Department of Finance and the compensation for the privilege has been paid to July 29, 1911, and

Whereas, The President of the Borough of Manhattan and the Commissioner of Water Supply, Gas and Electricity have certified to the Board of Estimate and Apportionment that the said pipe has been removed from within the lines of West 49th street, and the street pavement satisfactorily restored; now, therefore, be it

Resolved, That the said resolution be and the same is hereby rescinded and be it further

Resolved, That the Comptroller be and he hereby is authorized and directed to cancel the bond of one hundred and twenty dollars hereinabove mentioned, and be it further

Resolved, That this resolution shall not become effective unless and until Hardman, Peck & Co. shall execute an instrument in writing, releasing the City of New York from any and all claims of any kind, character or description whatsoever held or claimed to be held under the terms and conditions of the aforesaid consent, and agreeing to quitclaim, waive and surrender to the City of New York any and all rights and privileges in and upon said West 49th street, in the Borough of Manhattan, held or claimed to be held under and by virtue of said consent and file the same with the Board of Estimate and Apportionment.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

American Ice Company; Ice Manufacturing Company.

The Secretary presented the following:

To the Honorable Board of Estimate and Apportionment of The City of New York:

Ice Manufacturing Company, a corporation organized and existing under the laws of the State of New York, and American Ice Company, a corporation organized and existing under the laws of the State of New Jersey, respectfully petition your Board and show and allege as follows:

I.

On February 5, 1909, a resolution was adopted by your Board, which was duly approved by the Hon. George B. McClellan on February 8, 1909, granting to the Seventieth Street Hygeia Ice Company, a New York corporation, the consent of the corporation of The City of New York to the installation, maintenance and use of a 16-inch iron pipe under and along East 70th street and Exterior street, in the Borough of Manhattan, City of New York, and connecting the property of said Seventieth Street Hygeia Ice Company situate on the northerly side of East 70th street, distant two hundred and fifteen (215) feet west of the westerly line of Exterior street with the East River, to be used for the purpose of obtaining salt water from the East River. The full particulars and conditions of said privilege and consent are more particularly shown in such resolution, which is "Approved Resolution Number 7 of the Year 1909." The said pipe line was duly constructed, and was thereafter and up to August 25, 1910, used and operated by the Seventieth Street Hygeia Ice Company in connection with its plant as aforesaid, and such pipe line was and is a necessary appurtenant to the said plant and to the operation thereof in the manufacture of ice.

II.

On or about August 25, 1910, the Seventieth Street Hygeia Ice Company sold to your petitioner, the American Ice Company, and the latter company purchased all the plant and property of the Seventieth Street Hygeia Ice Company situated as aforesaid, for the purpose and with the intention of continuing therein the manufacture of ice. On said August 25, 1910, the Seventieth Street Hygeia Ice Company and the American Ice Company presented to your Honorable Board a joint petition for the consent of your Board to the assignment and transfer of the aforementioned consent and privilege to the said American Ice Company, and such proceedings were thereafter had that your Board, at a meeting held on September 30, 1910, by "Approved Resolution Number 50 of the Year 1910," approved by the Mayor, October 10, 1910, consenting to such assignment on certain terms and conditions therein set forth, which terms and conditions your petitioners represent have been fulfilled and in all respects duly complied with. Thereafter the American Ice Company continued the manufacture of ice upon said premises.

III.

On or about May 5, 1911, the American Ice Company sold to your petitioner, Ice Manufacturing Company, and the latter company purchased all of the plant and property of the said American Ice Company, formerly of the Seventieth Street Hygeia Ice Company, situated as aforesaid, for the purpose and with the intention of continuing therein the manufacture of ice.

IV.

Your petitioner, Ice Manufacturing Company, desires the consent of your honorable Board to a transfer of such privilege by the American Ice Company, to Ice Manufacturing Company, as the salt water pipe is necessary to enable the Ice Manufacturing Company to continue to carry on the business of the manufacture of ice, and it is willing to comply with any and all conditions expressed in the original privilege granted to Seventieth Street Hygeia Ice Company, and in the consent to the transfer of such privilege to the American Ice Company and as may be required by your Honorable Board in order to obtain such consent.

V.

Your petitioner, the American Ice Company, joins in this application and will consent to the transfer of said privilege and will do any act that may be required by your Honorable Board for the purpose of procuring its consent to such transfer.

VI.

Your petitioners aver that *Ice Manufacturing Company* is ready, able and willing to comply with all the conditions of the said franchise.

Dated New York, June 15, 1911.

AMERICAN ICE COMPANY, Petitioner,
[Seal.] By Wesley M. Oler, President.

ICE MANUFACTURING COMPANY, Petitioner,
[Seal.] By Thos. Pettigrew, President.

City of New York, State of New York, County of New York, ss.:

On this 26th day of June, 1911, before me personally appeared Wesley M. Oler, to me known, who, being by me duly sworn did depose and say that he resides in Larchmont, New York; that he is the president of the American Ice Company, one of the corporations described in and which executed the foregoing petition; that he knew the seal of said corporation; that the seal affixed to said instrument was such corporate seal; that it was so affixed by order of the Board of Directors of said corporation, and that he signed his name thereto by the like order.

EDWARD J. REILLY, Notary Public, New York County, No. 25.
[Seal.] Certificate filed in Kings County.

City of New York, State of New York, County of New York, ss.:

On this 26th day of June, 1911, before me personally appeared Thomas Pettigrew, to me known, who, being by me duly sworn, did depose and say that he resides in The City of New York; that he is the president of the Ice Manufacturing Company, one of the corporations described in and which executed the foregoing petition; that he knew the seal of said corporation; that the seal affixed to said instrument was such corporate seal; that it was so affixed by order of the board of directors of said corporation, and that he signed his name thereto by the like order.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, June 26, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—The Board of Estimate and Apportionment adopted a resolution on February 5, 1909, which was approved by the Mayor February 8, 1909, granting permission to the Seventieth Street Hygeia Ice Company, a domestic corporation, and the owner of certain property on the northerly side of East 70th street distant two hundred and fifteen feet west of the westerly line of Exterior street, in the Borough of Manhattan, to install, maintain and use a sixteen-inch pipe under and along East 70th street and across said Exterior street, from its premises to the East River, for the purpose of obtaining salt water from the river.

In accordance with section 15 of the said resolution, the Company filed its certificate of acceptance and subsequently completed the installation of the pipe on June 21, 1909. Pursuant to the terms and conditions of said consent, the grantee also deposited a security fund of one thousand dollars with the Comptroller, and has paid into the City Treasury the annual sum of five hundred and eighty-six dollars, as required by section 2 of the consent.

Section 4 of the consent provided as follows:

"The consent hereby given is for the exclusive use of the grantee and shall not be assigned either in whole or in part or leased or sublet in any manner nor shall title thereto, or right, interest or property therein pass to or vest in any other person, firm or corporation whatsoever either by the acts of the said grantee, its successors or assigns or by operation of law without the consent in writing of The City of New York, acting by the Board of Estimate and Apportionment or its successors in authority."

The Seventieth Street Hygeia Ice Company and the American Ice Company presented a joint petition to the Board at the meeting held September 16, 1910, for its consent to a transfer of the privilege by the Seventieth Street Hygeia Ice Company to the American Ice Company. A resolution was adopted by the Board on September 30, 1910, and approved by the Mayor October 10, 1910, granting the requested consent, and pursuant to said resolution, the American Ice Company filed an agreement with the Board of Estimate and Apportionment on October 17, 1910.

The Ice Manufacturing Company, a domestic corporation, and the American Ice Company have now presented a joint petition dated June 15, 1911, to the Board for its consent to the transfer by the said American Ice Company of all its right, title and interest in and to the said pipe to the Ice Manufacturing Company. The petition recites that the said Ice Manufacturing Company on or about May 5, 1911, purchased the plant of the American Ice Company at the location stated, with the intention of continuing therein the manufacture of ice and the right to use the salt water pipe is necessary to carry on the business.

There would seem to be no objection to offer to the transfer and assignment by the American Ice Company of its right, title and interest in the said pipe, as proposed. In case the Board should see fit to grant its consent, the assignee should be required to execute an instrument in writing and file the same with the Board of Estimate and Apportionment, wherein it shall promise and agree to abide by and perform each and all of the terms and conditions of the resolution of February 5, 1909, and also agree to pay to the Comptroller within sixty days of the approval of the consent by the Mayor the sum of twenty-five dollars to cover the cost of report and publication.

The Comptroller should also be authorized to return the security of one thousand dollars deposited with him by the American Ice Company after the Ice Manufacturing Company has complied with the terms and conditions of the consent by depositing a security fund of one thousand dollars and filing the above mentioned agreement with the Board.

A form of resolution in accordance with the hereinabove contained suggestions is herewith submitted for adoption. Respectfully,

HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, By resolution adopted by the Board of Estimate and Apportionment February 5, 1909, and approved by the Mayor February 8, 1909, permission was granted to the Seventieth Street Hygeia Ice Company, a domestic corporation, to install, maintain and use a sixteen-inch cast-iron pipe from its premises on the northerly side of East 70th street, in the Borough of Manhattan, distant about 215 feet west of the westerly line of Exterior street under and along said East 70th street and across said Exterior street to the East River, for the purpose of conveying salt water to its premises; and

Whereas, Section 4 of said consent provided as follows:

"The consent hereby given is for the exclusive use of the grantee and shall not be assigned either in whole or in part or leased or sublet in any manner, nor shall title thereto, or right, interest or property therein pass to or vest in any other person, firm or corporation whatsoever either by the acts of the said grantee, its successors or assigns or by operation of law without the consent in writing of The City of New York, acting by the Board of Estimate and Apportionment or its successors in authority."

—and

Whereas, In response to a joint petition dated August 21, 1910, from the Seventieth Street Hygeia Ice Company and the American Ice Company, the Board of Estimate and Apportionment adopted a resolution on September 30, 1910, which was approved by the Mayor October 10, 1910, granting its consent to the transfer by the Seventieth Street Hygeia Ice Company of all its right, title and interest in and to the said pipe to the American Ice Company, the last mentioned Company having purchased the property of the said Seventieth Street Hygeia Ice Company; and

Whereas, The American Ice Company and the Ice Manufacturing Company, a corporation organized and existing under the laws of the State of New York, have presented a joint petition dated June 15, 1911, to the Board of Estimate and Apportionment for its consent to the transfer by the American Ice Company of all its right, title and interest in and to the said pipe to the Ice Manufacturing Company, the said last mentioned Company having purchased the said property of the American Ice Company on East 70th street and the said pipe being necessary for the continuance of the business of the manufacture of ice carried on in said property; now, therefore, be it

Resolved, That the consent of the corporation of The City of New York be and the same is hereby given to the assignment of the interest of said American Ice Company in and to the aforesaid pipe and its right to use the same to the Ice Manufacturing Company, provided, however, that the said assignee shall execute an instrument in writing, wherein it shall accept the terms and conditions contained in the resolution adopted by the Board of Estimate and Apportionment on February 5, 1909, and approved by the Mayor on February 8, 1909, and agree to conform to, abide by and perform all of such terms and conditions as if such consent had been originally granted to the said Ice Manufacturing Company, and file said instrument with the Board of Estimate and Apportionment within sixty (60) days of the date of the approval of this consent by the Mayor.

And said Ice Manufacturing Company shall further agree to hold The City of New York harmless from all damages to persons or property which may result from the construction, use, maintenance or operation of the said pipe, and shall pay to the Comptroller of The City of New York within sixty (60) days after the approval of this consent by the Mayor the sum of twenty-five dollars ($25) to cover the cost of examination and publication; and be it further

Resolved, Should the said Ice Manufacturing Company accept the consent hereby granted and deposit a security fund of one thousand dollars, as required by the terms and conditions of the consent heretofore granted to the Seventieth Street Hygeia Ice Company, the Comptroller shall and he hereby is authorized to return to the American Ice Company the security deposit of one thousand dollars deposited with him by the said American Ice Company for the faithful performance of the terms and conditions of the consent, pursuant to the resolution adopted by the Board of Estimate and Apportionment September 30, 1910, and approved by the Mayor October 10, 1910, authorizing the transfer by the Seventieth Street Hygeia Ice Company of all its right, title or interest in and to the said pipe to the American Ice Company.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

Greenhut-Siegel Cooper Company.

In the matter of the application of Greenhut-Siegel Cooper Company for permission to construct, maintain and use a conduit, under and across 6th avenue, at a point about 69 feet north of the northerly line of 18th street, Borough of Manhattan, connecting the properties of the petitioner on opposite sides of said avenue, for the purpose of conveying electric current between said premises.

This application was presented to the Board at the meeting of June 22, 1911, and referred to the Bureau of Franchises.

The Secretary presented the following:

In the matter of the application of Greenhut-Siegel Cooper Co. to place an electric conduit across 6th avenue.

To the Board of Estimate and Apportionment of The City of New York:

The petition of Greenhut-Siegel Cooper Co. respectfully shows:

1. That your petitioner is a corporation duly organized and existing under and by virtue of the laws of the State of New York.

2. That your petitioner was formed by the consolidation of Greenhut & Co. and Siegel Cooper Co., domestic corporations, and has acquired all the property and business of each of said Corporations.

3. That your petitioner is lessee of the entire block front located on the east side of 6th avenue, between 18th and 19th streets, Borough of Manhattan, City of New York, and the entire block front on the west side of 6th avenue, between 18th and 19th street, Borough of Manhattan, City of New York. That your petitioner has a large building on each side of said avenue between the streets hereinabove

mentioned, in which buildings it conducts its business, which is that of a general retail department store.

4. That it will be of great advantage and benefit to your petitioner to connect its respective stores by means of an electric conduit (as shown on plans submitted herewith), running under and across 6th avenue, for the purpose of supplying electric light and power necessitated by the business of your petitioner to the respective stores occupied by it, and to enable your petitioner to furnish such light and power, by operating only one electric plant at certain times. That in order to accomplish this purpose, it is necessary to place and maintain a conduit under and across 6th avenue. The dimensions and location of said conduit as hereinafter described, are more particularly shown on a plan of said conduit submitted herewith and made a part hereof. That the area of the cross section of said conduit is 34 inches wide and 11 inches in height; that the location of same is 115 feet south of the building line on the southerly side of 19th street, and 69 feet north of the building line on the northerly side of 18th street (the above distances are measured from the centre of the conduit).

Wherefore your petitioner respectfully prays that a permit may be granted it to place and maintain the aforesaid conduit as hereinabove described and shown on plan of same submitted herewith.

Dated New York, June 15, 1911.

GREENHUT-SIEGEL COOPER CO.,
(Corporate Seal.) By Joseph B. Greenhut, President.

State of New York, County of New York, ss.:

Joseph B. Greenhut, being duly sworn, says that he is an officer, to wit: the President of the Greenhut-Siegel Cooper Co., the petitioner herein; that he has read the foregoing petition and knows the contents thereof; that the same is true of his own knowledge, except as to the matters therein stated to be alleged on information and belief, and as to these matters he believes it to be true.

Deponent further says that the reason why this verification is not made by the petitioner is because the petitioner is a corporation, and that deponent is an officer thereof and is acquainted with the facts set forth in the petition herein.

JOSEPH B. GREENHUT.

Sworn to before me this 15th day of June, 1911.

William L. Boyle, Notary Public, New York County.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, June 26, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—The Greenhut-Siegel Cooper Company has presented a petition dated June 15, 1911, to the Board of Estimate and Apportionment for permission to construct, maintain and use a concrete conduit under and across 6th avenue at a point about 69 feet north of the northerly line of 18th street, in the Borough of Manhattan, connecting its properties on opposite sides of the avenue, for the purpose of conveying electric current between the said properties.

The petition recites that the Company is a domestic corporation formed by the consolidation of the Greenhut Company and Siegel Cooper Company and holds the said properties under lease. A general retail department store business is carried on by the petitioner in the premises on both sides of 6th avenue, and the proposed conduit will enable the Company to operate only one electric plant at certain times.

At the meeting of the Board held June 22, 1911, the petition was referred to the Bureau of Franchises for investigation and report.

Copies of the petition and accompanying plan were sent to the President of the Borough of Manhattan and to the Commissioner of Water Supply, Gas and Electricity, with a request that examinations be made by the various bureaus having jurisdiction with a view to ascertaining if there are any objections to the proposed conduit or any particular conditions necessary to be incorporated in the form of consent used by the Board for similar privileges.

In replies dated respectively June 19 and June 20, 1911, said officials have stated that there are no objections to the conduit and no particular conditions necessary to be inserted in the form of consent.

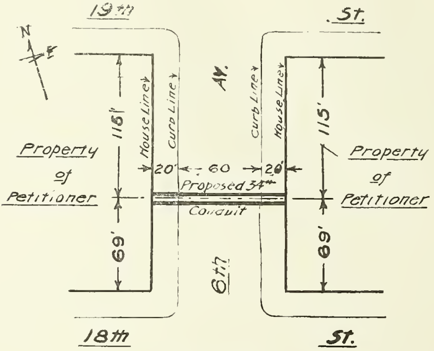
An examination of the plans submitted with the petition shows that the proposed conduit is designated to pass along the concrete flooring of the Hudson and Manhattan Railroad under 6th avenue, and at the request of this Bureau, the petitioner has filed a copy of the consent of the said Railroad Company to the installation of the conduit through its railroad.

As there are no objections to the proposed conduit, I can see no good reason why the requested permission should not be given should the Board see fit to do so. In such case I would suggest that consent be granted only during the pleasure of the Board of Estimate and Apportionment, but in no case to extend beyond a period of ten (10) years from the date of the approval of the consent by the Mayor and revocable upon sixty (60) days' notice in writing, and that it be made a condition of the consent that a security deposit in the sum of one thousand dollars ($1,000) be required, said deposit to be in the form of either cash or securities to be approved by and deposited with the Comptroller for the faithful performance of the terms and conditions of the consent.

The proposed conduit is to be 34 inches wide and 11 inches high, almost twice as large as a 16-inch pipe, and its length between building lines is 100 feet. On the basis of charge heretofore fixed by the Board for private pipes in the City streets, viz.: $2 per linear foot for pipes 100 feet in length and not over 16 inches in diameter, the charge for the privilege should be $372 per annum. Such sum should be paid into the City Treasury in advance on November 1 of each year.

It has been made a condition of the resolution herewith submitted that the conduit be completed by November 1, 1911. Respectfully,

HARRY P. NICHOLS, Engineer, Chief of Bureau.



Plan of
Proposed Electric Conduit
for
Greenhut-Siegel Cooper Co.

BUREAU OF FRANCHISES

The following was offered:

Whereas, Greenhut-Siegel Cooper Company has presented a petition dated June 15, 1911, to the Board of Estimate and Apportionment, for its consent to the construction, maintenance and use of a concrete conduit under and across 6th avenue, between 18th and 19th streets in the Borough of Manhattan, connecting the petitioner's property on opposite sides of said 6th avenue, for the purpose of conveying electric current between said properties; now, therefore, be it

Resolved, That the consent of the Corporation of The City of New York be and the same is hereby given to Greenhut-Siegel-Cooper Company, a domestic corporation, and the lessee of certain properties on opposite sides of 6th avenue, between 18th and 19th streets, in the Borough of Manhattan, to construct, maintain and use a concrete conduit under and across said 6th avenue at a point about 69 feet north of the northerly line of 18th street, for the purpose of conveying electric current for light and power purposes between the said properties, for the exclusive use of the petitioner and for no other purpose, all as shown on the plan accompanying the application and entitled:

"Plan showing location of Proposed Electric Conduit to be constructed in 6th avenue, Borough of Manhattan, to accompany application dated June 15, 1911, of Greenhut-Siegel Cooper Co., to the Board of Estimate and Apportionment, City of New York,"

—and signed J. B. Greenhut, president, a copy of which is annexed hereto and made a part hereof upon the following terms and conditions:

1. Said consent shall continue only during the pleasure of the Board of Estimate and Apportionment, and shall be revocable upon sixty (60) days' notice in writing to the grantee, but in no case shall it extend beyond a term of ten (10) years from the date of its approval by the Mayor, and thereupon all rights of the grantee in said street by virtue of this consent shall cease and determine.

2. The grantee shall pay into the Treasury of The City of New York, as compensation for the privilege hereby granted, the annual sum of $372. Such payments shall be made in advance on November 1 of each year, provided, however, that the first payment shall be made within sixty (60) days of the approval of this consent by the Mayor, and shall be only such proportion of the annual charge as the time between the approval of this consent by the Mayor and November 1 following bears to a whole year.

Such payments shall not be considered in any manner in the nature of a tax, but shall be in addition to any and all taxes of whatsoever kind or description now or hereafter required to be paid under any ordinance of The City of New York, or by any law of the State of New York.

3. Upon the removal of the grantee from either of the premises to be connected by the structure, or upon the revocation or termination by limitation of this consent, the grantee shall cause the structure hereby authorized to be removed and all of said street affected by this permission to be restored to its proper and original condition, if required so to do by The City of New York or its duly authorized representatives, and the entire cost of such work shall be borne by the said grantee. If the structure hereby authorized shall not be required to be removed, it is agreed that it shall become the property of The City of New York.

4. This consent is for the exclusive use of the grantee and shall not be assigned either in whole or in part, or leased or sublet in any manner, nor shall title thereto, or right, interest or property therein pass to or vest in any other person, firm or corporation whatsoever, either by the acts of the grantee or by operation of law, without the consent in writing of The City of New York, acting by the Board of Estimate and Apportionment.

5. The grantee shall pay the entire cost of all work, labor and material in connection with the structure hereby authorized, and particularly—

(a) Its construction, maintenance and removal.

(b) The protection of all structures which shall in any way be disturbed by its construction or removal.

(c) All changes in sewers or other subsurface structures necessitated by its construction or removal, including the laying or relaying of pipes, conduits, sewers or other structures.

(d) The replacing or restoring of the pavement in said street which may be disturbed during its construction or removal.

(e) Each and every item of the increased cost of the installation of any future structures or repairs or alterations to any existing or future structures caused by its presence in the street.

(f) The inspection of all work during its construction or removal as herein provided, which may be required by the President of the Borough and the Commissioner of Water Supply, Gas and Electricity.

6. Before the construction or removal shall be begun, the grantee shall obtain permits to do the work from the President of the Borough and from the Commissioner of Water Supply, Gas and Electricity. The grantee shall perform all the duties which may be imposed by those officials as conditions of such permits, provided such conditions are not inconsistent with the provisions of this consent. The grantee shall submit to those officials working plans which shall include and show in detail the method of construction of the structure hereby authorized and the mode of protection or changes in all structures required by the construction or removal of the same.

Upon the completion of the work, the grantee shall furnish to the President of the Borough a plan of such character as he may direct, showing accurately and distinctly the location, size and type of construction and complete dimensions of the structure erected or installed under this consent; also the location and dimensions of all substructures, encountered during the progress of the work. The depth below the street surface of the new structure and of the substructures encountered must be shown; also their location with reference to the nearest curb line and the nearest curb-line intersection.

7. The grantee shall allow to The City of New York a right of way through, under or above any part of the structure hereby authorized for any and all structures which are now or may be hereafter placed by The City of New York in said street.

If at any time it shall become necessary to replace or alter any structure in said street, the City shall have the right to break through or remove all or any portion of the structure hereby authorized and the grantee shall pay to the City the expense incurred by such removal.

8. The structure hereby authorized and any fixtures laid therein shall be constructed, maintained and operated subject to the supervision and control of the proper authorities of The City of New York. It shall be open at all times to the inspection of all the authorities who have jurisdiction in such matters under the Charter of The City of New York.

9. This consent is subject to whatever right, title or interest the owners of abutting property or others may have in and to said street.

10. Said grantee shall be liable for all damages to persons or property, including the street and structures therein and thereunder, by reason of the construction and operation or maintenance of the structure hereby authorized, and it is a condition of this consent that The City of New York assumes no liability to either person or property on account of this consent.

11. This consent is granted on the further and express condition that all laws or ordinances now in force, or which may hereafter be adopted, shall be strictly complied with.

12. This consent is upon the express condition that within sixty (60) days after its approval by the Mayor, and before anything is done in exercise of the rights conferred hereby, the grantee shall deposit with the Comptroller of The City of New York the sum of one thousand dollars ($1,000), either in money or in securities to be approved by him, which fund shall be security for the performance of the terms and conditions of this consent, especially those which relate to the payment of the annual charge, the repairs of the street pavement and the removal of the structure hereby authorized. In case of default in the performance by said grantee of any of such terms and conditions, The City of New York shall have the right to cause the work to be done and the materials to be furnished for making the necessary changes or repairs, after ten (10) days' notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings, or in case of default in the payment of the annual charge, shall collect the same, with interest, from such fund after ten (10) days' notice in writing to the said grantee.

In case of any drafts so made upon the security fund the said grantee shall, upon thirty (30) days' notice in writing, pay to the Comptroller of The City of New York a sum of money sufficient to restore the said fund to the original amount of one thousand dollars ($1,000), and in default of the payment thereof, the consent hereby given may be cancelled and annulled, at the option of the Board of Estimate and Apportionment of The City of New York, acting on behalf of said City. No action or proceeding or rights under the provisions of this section shall affect any other legal rights, remedies or causes of action belonging to The City of New York.

13. Said grantee shall give notice, in writing, to the President of the Borough and to the Commissioner of Water Supply, Gas and Electricity of its intention to begin the work hereby authorized at least forty-eight hours before such work commences. The grantee shall also give to the Board of Estimate and Apportionment notice, in writing, of the date on which the work is commenced and also the date on which the same is completed, not later than ten (10) days after such dates.

14. Said grantee shall commence the construction of the structure hereby authorized and complete the same on or before November 1, 1911, otherwise this consent shall be forfeited forthwith, and without any proceedings, either at law or otherwise, for that purpose; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

15. This consent shall be null and void unless said grantee shall duly execute an instrument in writing, wherein said grantee shall accept this consent and shall promise, covenant and agree to conform to, abide by and perform all the terms, conditions and requirements in this consent fixed and contained and file said instrument with the Board of Estimate and Apportionment of The City of New York within thirty (30) days after the approval of this consent by the Mayor; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

And said grantee shall promise, covenant and agree in said instrument to hold The City of New York harmless from all damages to persons or property which may result from the construction, use, maintenance or operation of the structure hereby authorized.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

Queens Borough Street Railway Company.

In the matter of the application of the Queens Borough Street Railway Company for a franchise to construct, maintain and operate a street surface railway, upon and along Van Alst avenue, from Franklin street to Winthrop avenue, in the First Ward, formerly Long Island City, Borough of Queens.

This petition was presented to the Board at the meeting of December 31, 1906, and after various reports and actions thereon, was referred back to the Bureau of Franchises on February 4, 1910.

The Secretary presented the following:

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, June 26, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—In 1906 the Queens Borough Street Railway Company was incorporated for the purpose of constructing a railway upon Van Alst avenue, from Franklin street to Winthrop avenue, in the First Ward (formerly Long Island City), in the Borough of Queens. The incorporators were those interested in the Rickert-Finley Realty Company, which Company owned a large tract of land between Van Alst avenue and the East River, throughout nearly the entire length of the proposed route, and the object of the railway was to make that section accessible by furnishing street railway facilities.

Under date of December 7, 1906, which is the same date on which the certificate of incorporation of the Company was filed in the office of the Secretary of State, the Company petitioned the Board for a franchise to construct, maintain and operate its railway. The petition was presented to the Board on December 31, 1906, and referred to the Bureau of Franchises for investigation and suggestions. Later the Board adopted a resolution fixing July 8, 1907, as the date for the preliminary public hearing, which hearing was duly held on that date. Nobody appeared in opposition, and only counsel for the Company appearing in favor. The matter was then referred to a Select Committee of the Board, consisting of the Comptroller, President of the Board of Aldermen, and President of the Borough of Queens.

On October 4, 1907, a report was presented containing a draft form of contract for the franchise, which report was referred to the Select Committee named above. This Committee never reported on the application, and on February 4, 1910, the matter was again referred to the Bureau of Franchises, together with other pending applications which had previously been referred to Select Committees, but not finally acted upon by the Board.

The counsel for the Company strongly objected to some of the conditions contained in the draft form of contract submitted by the Division of Franchises on October 4, 1907, and considerable correspondence and several conferences were held with the counsel of the Company in regard to the proposed contract. The matter was finally dropped by the Company, resulting in discontinuing of negotiations for the franchise. Recently, however, the attorney for the Company has again taken the matter up and submitted amendments to the contract, which, he stated, would be acceptable to the Company, provided the Board would grant the franchise in the amended form.

It is now over four years since the application was made to the Board, and the Realty Company has been unable to dispose of its property because of lack of transportation in that locality. The Company has spent large sums of money in laying out streets, setting curbs and laying sidewalks, which, of course, brings no return to the Company unless it can dispose of its property. Between Hoyt and Winthrop avenues, which embodies about four-fifths of the proposed route, there has been practically no development on either side of Van Alst avenue. At the northerly end of the route there exists the plant of the Astoria Light, Heat and Power Company, where there are a large number of employees, who have no railway facilities for reaching that point. The patronage of these employees is practically all that the Company has to look to at once. The southerly end of the proposed route is reached by a line of the

New York and Queens County Railway Company, which operates in Flushing avenue from points easterly to the Astoria Ferry. It will be necessary for passengers upon the proposed railway to pay two fares in order to reach other points in the Borough on the lines of the New York and Queens County Railway Company.

The Company has stated that it endeavored to influence the New York and Queens County Railway Company to extend its lines along Van Alst avenue, in order to furnish the transportation which is now sought. The Queens Company has steadfastly refused to make this extension or to apply for a franchise for the same, and for this reason it was necessary to organize the Company and file the petition under discussion.

Van Alst avenue is laid out on the City Map as 100 feet in width. The southerly portion—that is, between Franklin street and Hoyt avenue, a distance of about 950 feet—has been legally opened, and proceedings have been instituted for the acquisition of the remainder of the street covered by the route, though I understand title has not yet been vested.

A certificate of convenience and a necessity was granted the Company by the State Board of Railroad Commissioners on April 16, 1907. It will be necessary, however, under the present law to present a petition to the Public Service Commission for the First District for a certificate of approval of the franchise after it is obtained.

The conditions of the proposed grant to which the Company made the most objection, and which have been modified and embodied in a form of contract attached hereto, are as follows:

First. Rate of Fare—In the original draft it was recommended that the Company be permitted to charge a fare not exceeding two cents for a ride upon the proposed railway and a fare not exceeding five cents from any point on the proposed railway to any point on the lines of any other railway company, with which the Queens Borough Company may enter into a contract for interchange of transfers in the future. At the time this recommendation was made it was hoped that if the Company obtained a franchise and constructed the railway that traffic agreements would be made with the New York and Queens County Railway Company for interchange of transfers. This, however, the Company states, is a matter which the applicant cannot control, and has no assurance that the New York and Queens County Railway Company will enter into any such agreement. It is claimed, however, that the Company cannot operate upon this route, which is about 5,500 feet in length, for a fare of less than five cents per passenger, and that even at that rate of fare it would be impossible for the Company to carry enough passengers during the first years of operation to make the venture a financial success.

While I have not changed my views in relation to granting franchises for short lines, such as this, permitting the collection of a fare of five cents for each passenger, without transfer privileges, it appears that after four years those interested in this Company have been unable to obtain adequate transportation facilities by the company which practically controls the street surface railway facilities in the northerly portion of the Borough of Queens, and some effort should be made by the City to furnish such railway facilities. This Company being willing to furnish such facilities as is in its power, and being willing to invest its money in a property the financial success of which is so uncertain, I believe it should be given some consideration. It is possible that either the New York and Queens County Railway Company may subsequently acquire the property, in which case it can charge only a single fare of five cents from any point on the proposed railway to any point on any of its existing lines, or the applicant Company may secure further rights upon streets leading to terminal points, such as the Astoria Ferry or Queensboro Bridge, in which case the Company would be justified in charging a fare of five cents. Until this takes place, however, the only solution of the problem seems to be to permit this Company to construct its railway and charge the full fare of five cents. In the contract submitted herewith the Company is permitted to charge such fare.

Second. Term of Grant—The original contract provided for a term of fifteen years, with the privilege of renewal of a further term of ten years. This has been increased to a term beginning on the date upon which the contract is signed by the Mayor until June 10, 1934, with the privilege of renewal for a term of twenty-five years. The contract provides that the property in the street shall become the City's at the expiration of the term of the grant, and it has been argued that the Company cannot make the profit large enough to provide for a sinking fund within the short term originally proposed which will be sufficiently large to equal the value of the property.

In view of what has been already stated, it is recommended that the term of grant be increased. The object of fixing the expiration of the original term to June 10, 1934, is to make the grant coterminous with the grant to the New York and Queens County Railway Company on 2d avenue, so that if the New York and Queens County

Railway Company should acquire the proposed railway the limited term of franchises of the New York and Queens County Railway Company would expire on the same date and renewals of the same could be negotiated for at the same time.

Third. Compensation and Security Deposit—The initial payment and the minimum annual sums have been somewhat reduced from that first proposed. The percentage of gross receipts remain as previously recommended—that is, 3 per cent. for the first five years and 5 per cent. thereafter—those being the minimum percentages required by the Railroad Law. The minimum annual payments are fixed in most cases at amounts which will not exceed amounts due the City computed upon the basis of percentages of gross receipts required by the franchise. In any event, should the amounts due by the percentages of gross receipts exceed the minimum payments, the City will receive the larger amount. I see, therefore, no objection to reducing the minimum annual payments, and I believe that the initial payment which is now recommended is sufficient to show the good faith of the Company. The compensation required by the contract submitted herewith is as follows:

(a) Initial payment of $1,000.

(b) During the first term of five years 3 per cent. of the gross receipts to be not less than $250 per annum.

During the second term of five years 5 per cent. of the gross receipts to be not less than $350.

conditions of the contract.

Fourth. Watering of the Streets—The Company objected to the clause requiring the Company to water the street three times every twenty-four hours when the temperature is above 35 degrees Fahrenheit. This provision is used particularly where there is no pavement or only a macadam pavement. There is no pavement at the present time on Van Alst avenue, and no doubt the street should be watered frequently if street cars are operated therein. There seems to be no objection, however, to changing the clause to make it effective only on direction of the Borough President. A number of contracts have been drawn in this manner recently, and in view of that fact I see no reason why such an amendment should not be made in this case. The contract submitted herewith contains that amendment.

Fifth. Other Changes—The other changes which have been made in the contract are those which are necessary to comply with the form which is now used, the original contract being drawn about four years ago. These changes, however, do not materially affect the meaning of the contract, and do not need an explanation.

The counsel for the Company, Mr. Charles Benner, has stated that the Company will accept the contract with the amendments hereinbefore described, provided the Board will grant the franchise upon those conditions.

It is suggested that if the Board desires to grant the franchise in its present form, that it tentatively approve the contract and refer the same to the Corporation Counsel for his approval as to form and to incorporate therein such matter as he deems necessary to fully protect the interests of the City. After the contract has been approved by the Corporation Counsel, it is necessary under the law to fix a date for a final public hearing upon the same, due notice of which must be published in daily newspapers and in the City Record, and place the contract upon the minutes of the Board for at least thirty days. After this is done the Board may take final action authorizing the execution of the contract.

Respectfully, HARRY P. NICHOLS, Engineer, Chief of Bureau.

Synopsis of Provisions of Contract.

Section 1. Grant.

Section 2. Conditions of grant.

First—Consent of property owners to be obtained.

Second—Term of grant.

Third—Compensation.

Fourth—Annual charges to be maintained throughout term of grant.

Fifth—Rights not exclusive.

Sixth—Rights not to be assigned.

Seventh—Property in streets to become City's at end of term.

Eighth—Commencement and completion of construction.

Ninth—Construction to be in the latest approved manner.

Tenth—Railway to be constructed under the control of the City authorities.

Eleventh—Motive power.

Twelfth—Company to place transmission wires underground upon six months' notice.

Thirteenth—Rate of fare.

Fourteenth—No freight cars to be operated.

Fifteenth—Fenders and wheelguards to be provided.

Sixteenth—Cars to be heated.

Seventeenth—Cars to be lighted.

Eighteenth—Headway of cars.

Nineteenth—Streets to be watered.

Twentieth—Snow and ice to be removed.

Twenty-first—Company to pave streets.

Twenty-second—Alteration of drainage or sewerage systems to be done at the expense of Company.

Twenty-third—Railway not to be in preference or in hindrance to public work.

Twenty-fourth—When grades or lines of streets are changed, Company must change tracks.

Twenty-fifth—Annual report to the Board.

Twenty-sixth—Company to keep accurate books of account.

Twenty-seventh—City may sue for forfeiture.

Twenty-eighth—Fine for inefficient public service.

Twenty-ninth—Company to assume all liability of damages.

Thirtieth—Security deposit.

Thirty-first—Grant to be subject to rights of property owners.

Thirty-second—Definition of words "notice" and "direction."

Thirty-third—Definition of "streets and avenues."

Thirty-fourth—If authority of Board or other officer is transferred, then such other board or officer shall act for City.

Section 3. Contract not to be construed as limiting jurisdiction of Public Service Commission.

Section 4. Railroad Law to be complied with.

Section 5. Company promises, covenants and agrees to abide by terms and conditions.

QUEENS BOROUGH STREET RAILWAY COMPANY.

Proposed Form of Contract.

This contract, made this day of , 19 , by and between The City of New York (hereinafter called the City), party of the first part, by the Mayor of said City, acting for and in the name of said City, under and in pursuance of the authority of the Board of Estimate and Apportionment of said City (hereinafter called the Board), and the Queens Borough Street Railway Company (hereinafter called the Company), party of the second part, witnesseth:

In consideration of the mutual covenants and agreements herein contained, the parties hereto do hereby covenant and agree as follows:

Section 1. The City hereby grants to the Company, subject to the conditions and provisions hereinafter set forth, the right and privilege to construct, maintain and operate a double track street surface railway with the necessary wires and equipment, for the purpose of conveying passengers and property in the Borough of Queens, in The City of New York, upon the following route, to wit:

Beginning at the intersection of Franklin street with Van Alst avenue; thence northeasterly in and upon Van Alst avenue to Winthrop avenue.

And to cross such other streets and avenues, named and unnamed, as may be encountered in said route.

The said route with turnouts, switches and crossovers, hereby authorized, is shown upon a map entitled: "Queens Borough Street Railway Company. Map and profile of the proposed line, First Ward, Borough of Queens, New York City," and signed by C. E. Finlay, President, and G. A. Roullier, Engineer; a copy of which is attached hereto, is to be deemed a part of this contract, is to be construed with the text thereof, and is to be substantially followed, provided that deviations therefrom and additional turnouts, switches and crossovers which are consistent with the foregoing description, and the other provisions of this contract may be permitted by resolution of the Board.

Section 2. The grant of this privilege is subject to the following conditions, which shall be complied with by the Company:

First—The consent in writing of the owners of half in value of the property bounded on said streets and avenues to the construction and operation of said railway shall be obtained by the Company within six (6) months from the signing of this contract by the Mayor, and a copy of such consents shall be filed with the Board within such time, or in the event that such consents cannot be obtained within such time, the Company shall within said six (6) months or within one (1) month thereafter, make application to the Appellate Division of the Supreme Court for the appointment of Commissioners in the manner provided by the Railroad Law to determine if said railway ought to be constructed; otherwise this grant shall cease and determine.

Second—The said right to construct, maintain and operate said railway shall be held and enjoyed by the Company from the date upon which this contract is signed by the Mayor until June 10, 1934, with the privilege of renewal of said contract for the further period of twenty-five (25) years, upon a fair revaluation of such right and privilege.

If the Company shall determine to exercise its privilege of renewal, it shall make application to the Board, or any authority which shall be authorized by law to act for the City in place of the Board. Such application shall be made at any time not earlier than two (2) years and not later than one (1) year before the expiration of the original term of this contract. The determination of the revaluation shall be sufficient if agreed to in writing by the Company and the Board, but in no case shall the annual rate of compensation to the City be fixed at a less amount than the sum required to be paid during the last year prior to the termination of the original term of this contract.

If the Company and the Board shall not reach such agreement on or before the day one (1) year before the expiration of the original term of this contract, then the annual rate of compensation for such succeeding twenty-five (25) years bound upon request of the other to enter into a written agreement with each other fixing the rate of such compensation at such amount as shall be reasonable, but in no case shall the annual rate so fixed be less than the sum required to be paid for the last year prior to the termination of the original term of this contract, and if the parties shall not forthwith agree upon what is reasonable, then the parties shall enter into a written agreement fixing such annual rate and at such amount as shall be determined by three disinterested freeholders selected in the following manner:

One disinterested freeholder shall be chosen by the Board; one disinterested freeholder shall be chosen by the Company; these two shall choose a third disinterested freeholder, and the three so chosen shall act as appraisers and shall make the revaluation aforesaid. Such appraisers shall be chosen at least six (6) months prior to the expiration of this original contract, and their report shall be filed with the Board within three (3) months after they are chosen. They shall act as appraisers and not as arbitrators. They may base their judgment upon their own experience and upon such information as they may obtain by inquiries and investigations, without the presence of either party. They shall have the right to examine any of the books of the Company and its officers under oath. The valuations so ascertained, fixed and determined shall be conclusive upon both parties, but no annual sum shall, in any event, be less than the sum required to be paid for the last year of the original term of this contract. If in any case the annual rate shall not be fixed prior to the termination of the original term of this contract, then the Company shall pay the annual rate theretofore prevailing until the new rate shall be determined, and shall then make up to the City the amount of any excess of the annual rate then determined over the previous annual rate. The compensation and expenses of the said appraisers shall be borne jointly by the City and the Company, each paying one-half thereof.

Third—The Company shall pay to the City for the privilege hereby granted, the following sums of money:

(a) The sum of one thousand dollars ($1,000) in cash within three (3) months after the date on which this contract is signed by the Mayor, and before anything is done in exercise of the privilege hereby granted.

(b) During the first term of five (5) years an annual sum, which shall in no case be less than two hundred and fifty dollars ($250), and which shall be equal to three (3) per cent. of its gross annual receipts if such percentage shall exceed the sum of two hundred and fifty dollars ($250).

During the second term of five (5) years an annual sum, which shall in no case be less than three hundred and fifty dollars ($350), and which shall be equal to five (5) per cent. of its gross annual receipts, if such percentage shall exceed the sum of three hundred and fifty dollars ($350).

During the third term of five (5) years an annual sum which shall in no case be less than five hundred dollars ($500), and which shall be equal to five (5) per cent. of its gross annual receipts if such percentage shall exceed the sum of five hundred dollars ($500).

During the fourth term of five (5) years an annual sum which shall in no case be less than six hundred dollars ($600), and which shall be equal to five (5) per cent. of its gross annual receipts, if such percentage shall exceed the sum of six hundred dollars ($600).

During the remaining term, expiring June 10, 1934, an annual sum which shall in no case be less than seven hundred dollars ($700), and which shall be equal to five (5) per cent. of its gross annual receipts if such percentage shall exceed the sum of seven hundred dollars ($700).

The gross annual receipts mentioned above shall be the gross receipts of the Company from all sources within the limits of the City.

The annual charges shall commence from the date upon which this contract is signed by the Mayor.

All annual charges as above shall be paid into the treasury of the City on November 1 of each year and shall be for the amount due to September 30 next preceding. Provided, that the first annual payment shall be only for that proportion of the first annual charge as the time between the date upon which this contract is signed by the Mayor and September 30 following shall bear to the whole of one year.

Whenever the percentage required to be paid shall exceed the minimum amount as above, then such sum over and above such minimum shall be paid on or before November 1 in each year for the year ending September 30 next preceding.

The annual charges herein provided are intended to include the percentage of gross receipts now required to be paid by railway companies to the City pursuant to the Railroad Law, as amended.

Any and all payments to be made by the terms of this contract to the City by the Company, shall not be considered in any manner in the nature of a tax, but such payments shall be made in addition to any and all taxes of whatsoever kind or description, now or hereafter required to be paid by any ordinance of the City, or resolution of the Board, or any law of the State of New York.

Fourth—The annual charges or payments shall continue throughout the whole term of this contract (whether original or renewal), notwithstanding any clause in any statute or in the character of any other railway or railroad company providing for payment for railway or railroad rights or franchises at a different rate, and no assignment, lease or sublease of the rights or privileges hereby granted (whether original or renewal), or of any part thereof, or of any of the routes mentioned herein, or of any part thereof, shall be valid or effectual for any purpose unless the said assignment, lease or sublease shall contain a covenant on the part of the assignee or lessee that the same is subject to all the conditions of this contract; and that the assignee or lessee assumes and will be bound by all of said conditions, and especially said conditions as to payments, anything in any statute or in the charter of such assignee or lessee to the contrary notwithstanding, and that the said assignee or lessee waives any more favorable conditions created by such statute or its charter, and that it will not claim by reason thereof or otherwise exemption from liability to perform each and all of the conditions of this contract.

Fifth—Nothing in this contract shall be deemed to affect in any way the right of the City to grant to any individual or other corporation a similar right or privilege upon the same or other terms and conditions over the route hereinbefore described.

The use of the railway constructed by the Company under this contract, including the tracks, wires and other equipment or any structures used in connection therewith, in streets and avenues hereinbefore described, shall be permitted by the Company, to any individual or corporation to which the City may have granted, or may hereafter grant, the right or privilege to use such streets and avenues for street railway purposes, upon payment of an annual sum by such individual or corporation to the Company, which shall equal the legal interest on such proportion of the actual cost of the construction of such railway and structures, and additions and betterments thereto, as the number of cars operated by such individual or corporation shall bear to the number of cars operated by the companies then using the same; and also such proportion of the cost of keeping the tracks and electrical equipment in repair, and the cost of additions and betterments thereto, such proportion of laying and repairing of pavement and removal of snow and ice and all other duties imposed upon the Company by the terms of this contract in connection with the maintenance or the operation of said railway so used, as the number of cars operated by such individual or corporation shall bear to the number of cars operated by the companies then using the same, together with the actual cost of the power necessary for the operation of the cars thereon of such individual or corporation. Provided, however, that if, in the opinion of the Company, the legal rate of interest upon the cost of such railway shall be an insufficient sum to be paid for the use of such tracks, it may appeal to the Board, and the Board may fix a percentage upon the cost to be paid to the Company, at a sum in excess of the legal rate of interest, if, in its opinion, such action is justified.

The Company shall not any time oppose, but shall, upon the request of the Board, consent to the construction or operation of any street surface railway which may necessitate the use of any portion of the railway which shall be constructed by the Company pursuant to this contract.

Sixth—The rights and privileges hereby granted shall not be assigned, either in whole or in part, or leased or sublet in any manner, nor shall the title thereto, or right, interest or property therein, pass to or vest in any other person or corporation whatsoever, either by the act of the Company, or by operation of law, whether under the provisions of the statutes relating to the consolidation or merger of corporations or otherwise, without the consent of the City, acting by the Board, evidenced by an instrument under seal, anything herein contained to the contrary thereof in any wise notwithstanding, and the granting, giving or waiving of any one or more of such consents shall not render unnecessary any subsequent consent or consents.

Seventh—Upon the termination of this original contract, or if the same be removed, then at the termination of the said renewal term, or upon the termination of the rights hereby granted for any cause, or upon the dissolution of the Company before such termination, the tracks and equipments of the Company constructed pursuant to this contract within the streets and avenues shall become the property of the City without cost, and the same may be used or disposed of by the City for any purpose whatsoever, or the same may be leased to any company or individual.

If, however, at the termination of this contract as above, the Board shall so order by resolution, the Company shall, upon thirty (30) days' notice from the Board, remove any and all of its tracks and other equipment constructed pursuant to this contract and the said streets and avenues shall be restored to their original condition at the sole cost and expense of the Company.

Eighth—The Company shall commence construction of the railway herein authorized within three (3) months from the date upon which the consents of the property owners are filed with the Board, or from the date of the order of the Appellate Division of the Supreme Court, made pursuant to section 174 of the Railroad Law, confirming the determination of the Commissioners appointed thereunder, that such railway ought to be constructed and shall complete the construction and place the same in full operation within six (6) months from the date of filing such consents or the date of such order; otherwise this right shall cease and determine, and all sums paid, or which may be deposited with the Comptroller of the City, as hereinater provided, shall thereupon be forfeited to the City; provided that the period for commencement and the period for completion and placing the railway in full operation may be extended by the Board, but the total extension of time for either of such periods shall not exceed in the aggregate six (6) months; and provided, further, that when the commencement or completion of said construction shall be prevented by legal proceedings in any court or by works of public improvement, or from other causes not within control of the Company, the time for the commencement or completion of such construction may be extended for the period of such prevention, but no delay shall be allowed for unless the court proceedings shall be diligently prosecuted by the Company, and provided, further, that in no case shall such delay be deemed to begin until the Company shall have given written notice to the Board of any such court proceedings or other occasion of delay, and deliver to the Board copies of any injunction or other orders, and the papers upon which the same shall have been granted, and unless upon the request of the Board the Company shall, in writing, consent that the Board either in its own name as a party, or in the name of the City as a party, may intervene in any such proceedings.

Ninth—Said railway shall be constructed and operated in the latest approved manner of street railway construction and operation, and it is hereby agreed that the Board may require the Company to improve or add to the railway equipment, including rolling stock and railway appurtenances, from time to time, as such additions and improvements are necessary, in the opinion of the Board. Upon failure on the part of the Company to comply with the direction of the Board within a reasonable time, the rights hereby granted shall cease and determine.

Tenth—Said railway shall be constructed, maintained and operated subject to the superivision and control of all the authorities of the City who have jurisdiction in such matters, as provided by the Charter of the City.

No construction upon said railway shall be commenced until written permits have been obtained from the proper City officials.

In any permits so issued such officials may also impose such conditions as a condition of the granting of the same as are necessary for the purpose of protecting any structures in the streets and avenues over which such officials have jurisdiction and the Company shall comply with such conditions.

The electrical equipment to be installed by the Company for the operation of the railway within the limits of the City, whether the same be upon streets and avenues or upon private property, shall be constructed and maintained under the supervision and control of the Commissioner of Water Supply, Gas and Electricity.

Eleventh—Said railway may be operated by overhead electric power, substantially similar to the overhead electric system now in use by street surface railways in the Borough of Queens, or by any other motive power, except locomotive steam power or horse power, which may be approved by the Board, and consented to by the abutting property owners, in accordance with the provisions of law, and by the Public Service Commission for the First District of the State of New York.

Provided, howeved, that the Board, at any time after the first ten (10) years of this contract, upon giving to the Company one (1) year's notice, may require the Company to operate its railway upon the whole or upon any portion of its route by underground electric power substantially similar to the system now in use on the street surface railways in the Borough of Manhattan, or by any other practical motive power then in use which does not require the use of poles and overhead wires in the streets and avenues, and thereupon to discontinue the use of the overhead trolley system, and to remove its poles, wires, and other structures used by it for that purpose, from the streets and avenues of the City.

Twelfth—Upon six (6) months' notice by the Board to the Company, all wires for the transmission of power, except trolley wires, for the operation of the railway, upon all or any portion of the route hereby authorized, shall be placed in conduits beneath or alongside of the railway. The Company shall provide in such conduits two (2) ducts not less than three (3) inches in diameter for the exclusive use of the City. Such ducts shall be used only by the Company for the operation of its railway and by the City, as above.

Thirteenth—The rate of fare for any passenger upon said railway shall not exceed five (5) cents and the Company shall not charge any passenger more than five (5) cents for one continuous ride from any point on its road or on any road, line or branch operated by it or under its control to any other point thereof, or any connecting branch thereof within the limits of the City.

The Company shall carry free upon the railway hereby authorized during the term of this contract all members of the Police and Fire Departments of the City, when such employees are in full uniform.

Fourteenth—No cars shall be operated upon the railway hereby authorized, other than passenger cars, cars for the transportation of express matter and cars necessary for the repair or maintenance of the railway, and no freight cars shall be operated upon the tracks of said railway.

The rate for the carrying of such property over the said railway upon the cars of the Company shall in all cases be reasonable in amount, subject to the control of the Board, and may be fixed by the Board after notice to the Company and a hearing had thereon, and when so fixed such rates shall be binding upon the Company, and no greater sums shall be charged for such services than provided for by it.

Fifteenth—The Company shall attach to each car run over the said railway proper fenders and wheel guards, in conformity with such laws and ordinances as are now in force, or may hereafter, during the term of this contract, be enacted or adopted by the State or City authorities, or as may be required by resolution of the Board.

Sixteenth—All cars which are operated on said railway shall be heated during the cold weather, in conformity with such laws and ordinances as are now in force, or may hereafter, during the term of this contract, be enacted or adopted by the State or City authorities, or as may be required by resolution of the Board.

Seventeenth—All cars operated on said railway shall be well lighted by electricity, or by some lighting system equally efficient, or as may be required by resolution of the Board.

Eighteenth—Cars on the said railway shall run at intervals of not more than thirty (30) minutes both day and night, and as much oftener as reasonable convenience of the public may require, or as may be directed by the Board.

Provided, however, that the Company, during the first five (5) years of this contract, shall not be required to operate its cars between the hours of 1 o'clock a. m. and 5 o'clock a. m., each day, unless the Board shall determine after a hearing had thereon that public convenience requires the operation of cars during said hours.

Nineteenth—The Company, so long as it shall continue to use any of the tracks upon the streets and avenues in which said railway shall be constructed, shall, if required by the President of the Borough of Queens, cause to be watered at least three (3) times every twenty-four (24) hours when the temperature is above thirty-five (35) degrees Fahrenheit, the entire width of the streets and avenues, except when the width of such streets and avenues shall exceed sixty (60) feet between curblines, in which case the Company shall cause to be watered only sixty (60) feet in width of such roadway, and the Company shall provide for such purpose at least one tank car, the capacity of which shall be sufficient to water such streets and avenues in a satisfactory manner.

Twentieth—The Company shall at all times keep the streets and avenues upon which the said railway is constructed, between its tracks, the rails of its tracks and for a distance of two (2) feet beyond the rails, on either side thereof, free and clear from ice and snow; provided, however, that the Company shall, at the option of the President of the Borough of Queens, enter into an agreement for each winter season, or part thereof, to clean an equivalent amount of street surface from house line to house line.

Twenty-first—As long as said railway, or any portion thereof, remains in any street or avenue, the Company shall pave and keep in permanent repair that portion of the surface of the street or avenue in which the said railway is constructed, between its tracks, the rails of its tracks and for a distance of two (2) feet beyond the rails on either side thereof, under the supervision of the local authorities, whenever required by them to do so, and in such manner as they may prescribe. In case of the neglect of the Company to make payment or repairs after the expiration of thirty (30) days' notice to do so from the President of the Borough of Queens, said President may make the same at the expense of the Company. And the City shall have the right to change the material or character of the pavement of any street or avenue, and in that event the Company shall be bound to replace such pavement in the manner directed by the proper City official, at its own expense, and the provisions as to repairs herein contained shall apply to such renewed or altered pavement.

Twenty-second—Any alteration to the sewerage or drainage systems, or to any other subsurface or to any surface structures in the streets, required on account of the construction or operation of the railway, shall be made at the sole cost of the Company, and in such manner as the proper City officials may prescribe.

Twenty-third—It is agreed that the right hereby granted to operate a street surface railway shall not be in preference or in hindrance to public work of the City, and should the said railway in any way interfere with the construction of public works in the streets and avenues, whether the same is done by the City directly or by a contractor for the City, the Company shall, at its own expense, protect or move the tracks and appurtenances in the manner directed by the City officials having jurisdiction over such public work.

Twenty-fourth—Should the grades or lines of the streets and avenues in which the railway is hereby authorized be changed at any time after the railway has been constructed and during the term of this contract, the Company shall, at its own expense, change its tracks and appurtenances to conform with such new grades and lines, and during the construction of any public improvement upon said streets and avenues the Company shall take care of and protect the tracks and appurtenances at its own expense, all to be done subject to the direction of the City official having jurisdiction over the construction of such change.

Twenty-fifth—The Company shall submit to the Board a report not later than November 1 of each year for the year ending September 30 next preceding, and at any other time, upon request of the Board, which shall state:

1. The amount of stock issued, for cash, for property.
2. The amount paid in as by last report.
3. The total amount of capital stock paid in.
4. The funded debt by last report.
5. The total amount of funded debt.
6. The floating debt as by last report.
7. The total amount of floating debt.
8. The total amount of funded and floating debt.
9. The average rate per annum of interest on funded debt.
10. Statement of dividends paid during the year.
11. The total amount expended for same.
12. The names of the directors elected at the last meeting of the corporation held for such purpose.
13. Location, value and amount paid for real estate owned by the Company as by last report.
14. Location, value and amount paid for real estate now owned by the Company.
15. Number of passengers carried during the year.
16. Total receipts of Company for each class of business.
17. Amounts paid by the Company for damage to persons or property on account of construction and operation.
18. Total expenses for operation, including salaries.

—and such other information in regard to the business of the Company as may be required by the Board.

Twenty-sixth—The Company shall at all times keep accurate books of account of the gross receipts from all sources within the limits of the City, and shall, on or before November 1 of each year, make a verified report to the Comptroller of the City of the business done by the Company for the year ending September 30 next preceding, in such form as he may prescribe. Such report shall contain a statement of such gross receipts, the total miles in operation within the limits of the City and the miles of railway constructed and operated under this contract, and such other information as the Comptroller may require. The Comptroller shall have access to all books of the Company for the purpose of ascertaining the correctness of its report, and may examine its officers under oath.

Twenty-seventh—In case of any violation or breach or failure to comply with any of the provisions herein contained, or with any orders of the Board acting under the powers herein reserved, the franchise or consent herein granted may be forfeited by a suit brought by the Corporation Counsel, on notice of ten (10) days to the Company, or at the option of the Board by resolution of said Board, which said resolution may contain a provision to the effect that the railway constructed and in use by virtue of this contract shall thereupon become the property of the City without proceedings at law or in equity. Provided, however, that such action by the Board shall not be taken until the Board shall give notice to the Company to appear before it on a certain day not less than ten (10) days after the date of such notice, to show cause why such resolution declaring the contract forfeited should not be adopted. In case the Company fails to appear, action may be taken by the Board forthwith.

Twenty-eighth—If the Company shall fail to give efficient public service at the rates herein fixed, or fail to maintain its structures and equipment as herein provided in good condition throughout the whole term of this contract, the Board may give notice to the Company specifying any default on the part of the Company, and requiring the Company to remedy the same within a reasonable time; and upon failure of the Company to remedy such default within a reasonable time, the Company shall, for each day thereafter during which the default or defect remains, pay to the City the sum of two hundred and fifty dollars ($250) as fixed or liquidated damages, or the Board, in case such structure or equipment which may affect the surface of the streets shall not be put in good condition within a reasonable time after notice by the Board as aforesaid shall have the right to make all needed repairs at the expense of the Company, in which case the Company shall pay to the City the amount of the cost of such repairs, with legal interest thereon, all of which sums may be deducted from the fund hereinafter provided for.

Twenty-ninth—The Company shall assume all liability to persons or property by reason of the construction or operation of the railway authorized by this contract, and it is a condition of this contract that the City shall assume no liability whatsoever to either persons or property on account of the same, and the Company hereby agrees to repay to the City any damage which the City shall be compelled to pay by reason of any acts or default of the Company.

Thirtieth—This grant is upon the express condition that the Company, within thirty (30) days after the signing of this contract by the Mayor, and before anything is done in exercise of the rights conferred hereby, shall deposit with the Comptroller of the City the sum of two thousand dollars ($2,000), either in money or securities, to be approved by him, which fund shall be security for the performance by the Company of all of the terms and conditions of this contract and compliance with all orders of the Board acting under the powers herein reserved, especially those which relate to the payment of the annual charges for the privilege hereby granted, the rendering of efficient public service, at the rates herein fixed, the repairs of the street pavement, the removal of snow and ice, the quality of construction of the railway, and the maintenance of the property in good condition throughout the whole term of this contract, and in case of default in the performance by the Company of such terms and conditions, or compliance with such orders or either or any of them, the City shall have the right to cause the work to be done and the materials to be furnished for the performance thereof after due notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings; or after default in the payment of the annual charges, shall collect the same, with interest, from the said fund after ten (10) days' notice to the Company; or in case of failure to observe the said terms and conditions of this contract and orders of the Board acting hereunder, relating to the headway, heating and lighting of cars, fenders, wheelguards and watering of street pavements, the Company shall pay a penalty of fifty dollars ($50) per day for each day of violation, and the further sum of ten dollars ($10) per day for each car that shall not be properly heated, lighted or supplied with fenders or wheelguards, in case of a violation of the provisions relating to those matters, all of which sums may be deducted from said fund.

The procedure for the imposition and collection of the penalties in this contract shall be as follows:

The Board, on complaint made, shall give notice to the Company, directing its President, or other officer, to appear before the Board on a certain day not less than ten (10) days after the date of such notice, to show cause why the Company should not be penalized in accordance with the foregoing provisions. If the Company fails to make an appearance, or, after a hearing appears in the judgment of the Board to be in fault, said Board shll forthwith impose the prescribed penalty, or where the amount of the penalty is not prescribed herein, such amount as appears to the Board to be just, and without legal procedure direct the Comptroller to withdraw the amount of such penalty from the security fund deposited with him. In case of any drafts made upon the security fund the Company shall, upon ten (10) days' notice pay to the City a sum sufficient to restore said security fund to the original amount of two thousand dollars ($2,000), and in default thereof this contract shall be canceled and annulled at the option of the Board, acting in behalf of the City. No action or proceeding or right under the provisions of this contract shall affect any other legal rights, remedies or causes of action belonging to the City.

Thirty-first—The grant of this privilege is subject to whatever right, title or interest the owners of abutting property or others may have in and to the streets and avenues in which the Company is hereby authorized to operate.

Thirty-second—The words "notice" or "direction," wherever used in this contract, shall be deemed to mean a written notice or direction. Every such notice or direction to be served upon the Company shall be delivered at such office in the City as shall have been designated by the Company, or if no such office shall have been designated, or if such designation shall have for any reason become inoperative, shall be mailed in the City, postage prepaid, addressed to the Company at the City. Delivery or mailing of such notice or direction as and when above provided shall be equivalent to direct personal notice or direction, and shall be deemed to have been given at the time of delivery or mailing.

Thirty-third—The words "streets or avenues' and "streets and avenues" wherever used in this contract shall be deemed to mean "streets, avenues, highways, parkways, driveways, concourses, boulevards, bridges, viaducts, tunnels, public places or any other property to which the City has title, or over which the public has an easement" encountered in the route hereinbefore described, and upon or in which authority is hereby given to the Company to construct a railway.

Thirty-fourth—If at any time the powers of the Board or any other of the authorities herein mentioned or intended to be mentioned, shall be transferred by law to any other board, authority, officer or officers, then and in such case such other board, authority, officer or officers shall have all the powers, rights and duties herein reserved to or prescribed for the Board or other authorities, officer or officers.

Section 3. Nothing in this contract shall be construed as in any way limiting the present or future jurisdiction of the Public Service Commission under the Laws of the State of New York.

Section 4. This grant is also upon the further and express condition that the provisions of Article 5 and other provisions of the Railroad Law, pertinent thereto, shall be strictly complied with by the Company.

Section 5. The Company promises, covenants and agrees on its part and behalf to conform to and abide by and perform all the terms, conditions and requirements in this contract fixed and contained.

In witness whereof, the party of the first part, by its Mayor, thereunto duly authorized by the Board of Estimate and Apportionment of said City has caused the corporate name of said City to be hereunto signed and the corporate seal of said City to be hereunto affixed; and the party of the second part, by its officers, thereunto duly authorized, has caused its corporate name to be hereunto signed and its corporate seal to be hereunto affixed, the day and year first above written.

THE CITY OF NEW YORK,

[CORPORATE SEAL.] By..........................Mayor.

Attest..........................City Clerk.

QUEENS BOROUGH STREET RAILWAY COMPANY,

[SEAL.] By..........................President.

Attest..........................Secretary.

(Here add acknowledgments.)

Hon. Daniel Ehntholt appeared in opposition to the proposed grant.

The matter was referred to the President of the Borough of Queens at his request.

Mason and Hanger Company.

The Secretary presented the following:

New York, June 23, 1911.

Honorable Board of Estimate and Apportionment, Division of Franchises, 277 Broadway, New York:

Sirs—In planning for the distribution of power to the five shafts of Contract 63, for the construction of the northerly section of the City Tunnel of the Catskill Aqueduct, recently awarded to us by the Board of Water Supply, we find it most advantageous to construct a central compressor plant on swamp lands near the intersection of Van Cortlandt avenue and Van Cortlandt Park South, for which permission has been given by the Commissioner of Parks, and to distribute compressed air from this point to the shafts located in the park. We have also been granted permission by the Commissioner of Water, Gas and Electricty to lay the compressed air line along the westerly bank of the West Basin of Jerome Park Reservoir, thence on top of the embankment covering the old Croton Aqueduct, to Shaft 5, located at 183d street.

For this purpose it is necessary to lay the compressed air line in the public highways, and we respectfully request permission to open the following streets, as indicated below, and to lay the above pipes therein, of the sizes noted. We also enclose plan showing the location of these crossings:

12-inch pipe from Van Cortlandt Park South to Sedgwick avenue, on Van Cortlandt avenue; 10-inch pipe, Sedgwick avenue, from Van Cortlandt avenue to Shaft 3, at the head of Jerome Park Reservoir; 8-inch pipe, crossing Sedgwick avenue in northerly direction at Shaft 3; 7-inch pipe, crossing Jerome avenue, just south of East 233d street; 7-inch pipe, crossing East 233d street, just east of Jerome avenue; 7-inch pipe, crossing Kingsbridge road at Reservoir avenue; 7-inch pipe, crossing West 192d street at Old Croton Aqueduct right-of-way; 7-inch pipe, crossing West 190th street at Old Croton Aqueduct right-of-way; 7-inch pipe, crossing West 188th street at Old Croton Aqueduct right-of-way; 7-inch pipe, crossing Fordham road at Old Croton Aqueduct right-of-way.

We beg to say the proposed air line will be in use for a period of about forty months, during the construction of contract with the Board of Water Supply, and we propose taking the pipe out of the ground at the completion of our work.

Yours Respectfully, MASON & HANGER COMPANY,

H. B. Hanger, President.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, June 29, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sirs—The Mason and Hanger Company has presented a petition dated June 23, 1911, to the Board of Estimate and Apportionment for permission to install, maintain and use a compressed air pipe under, along and across various streets and avenues in the Borough of The Bronx in connection with the construction of the northerly section of the City tunnel of the Catskill Aqueduct under a contract numbered 63, recently awarded to the petitioner by the Board of Water Supply. The streets and avenues under and along which the Company desires to install the said pipe line and the sizes of pipe to be installed are as follows:

A 12-inch pipe in Van Cortlandt avenue, from Van Cortland Park South to Sedgwick avenue.

A 10-inch pipe under and across Sedgwick avenue at Van Cortlandt avenue.

A 8-inch pipe under and across Sedgwick avenue near Harold avenue.

A 7-inch pipe under and diagonally across Jerome avenue at East 233d street.

A 7-inch pipe under and across Fordham road, West 188th street, West 190th street, West 192d street and Kingsbridge road, all within the extended lines of the old Croton Aqueduct.

The petitioner states that an agreement is about to be entered into with the Commissioner of Parks to construct a central compressor plant on swamp lands near the intersection of Van Cortlandt avenue and Van Cortlandt Park South and distribute the compressed air from that point under and across the park lands encountered by the proposed pipe line. Permission has also been obtained from the Commissioner of Water Supply, Gas and Electricity to lay the pipe line along the westerly bank of the west basin of Jerome Park Reservoir and along the embankment covering the old Croton Aqueduct, and a copy of such permission has been filed in this office. The permission of the Board of Estimate and Apportionment is necessary for those portions of the pipe line crossing streets and avenues under its authority. The pipe line will be in use for a period of about forty months, within which time it is anticipated that the contract will be completed and the pipe line will then be removed from the streets.

The petitioner is incorporated under the Laws of the State of West Virginia, and at my request has filed in this office a copy of its certificate of authority to do business in the State of New York, issued by the Secretary of State June 14, 1909.

Copies of the petition with accompanying plans were forwarded to the President of the Borough of The Bronx and the Commissioner of Water Supply, Gas and Electricity with a request that examinations be made by the various bureaus of said Departments having jurisdiction, with a view to ascertaining if there are any objections to the proposed pipe line or any particular conditions which should be incorporated in the form of revocable consent heretofore used by the Board for similar privileges. Replies to said communications dated, respectively, June 26 and June 29, 1911, state there are no objections to the project and no particular conditions necessary to be inserted in the consent.

The greatest length of the proposed pipe line within the City streets is on Van Cortlandt avenue from Van Cortlandt Park South to Sedgwick avenue, but the installation of the pipe line in Van Cortlandt avenue will not cause any disturbance to the City's street system as the petitioner holds a contract from the City to regulate and grade that portion of the said avenue.

As there are no objections to the project, I can see no good reason why the requested permission should not be given. Should the Board see fit to do so, I would suggest that consent be granted during the pleasure of the Board of Estimate and Apportionment, but in no case to extend beyond a period of five (5) years from the date of the approval of the consent by the Mayor, and revocable upon sixty (60) days' notice in writing, and that it be made a condition of the consent that a security deposit in the sum of three thousand dollars ($3,000) be required; said deposit to be in the form of either money or securities to be approved by and deposited with the Comptroller for the faithful performance of the terms and conditions of the consent.

The lengths of the pipe line within the City streets are as follows: Van Cortlandt avenue from Van Cortlandt Park South to Sedgwick avenue and across Sedgwick avenue, 1,099 feet; Jerome avenue, 140 feet; Kingsbridge road, 234 feet; West 192d street, 60 feet; West 190th street, 60 feet; West 188th street, 30 feet; Fordham road, 90 feet; making a total length of 1,713 feet of pipe line within the lines of the streets. All of this pipe is less than sixteen inches in diameter and at the rate heretofore fixed by the Board for private pipes in the City streets, the charge for the pipe line should be two thousand and forty-five and 50/100 dollars ($2,045.50) per annum.

It has been made a condition of the consent that such sum be paid into the City Treasury in advance on November 1 of each year; the first payment, however, to be made within sixty (60) days of the date of approval of the consent by the Mayor and to be only such proportion of said two thousand and forty-five and 50/100 dollars ($2,045.50) as the time between the date of approval of the consent by the Mayor and November 1, 1911, bears to a whole year.

The customary form of resolution granting consent is herewith submitted for adoption. Respectfully,

HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, Mason and Hanger Company has presented a petition dated June 23, 1911, to the Board of Estimate and Apportionment for its consent to the installation, maintenance and use of a pipe line under, along and across certain streets and avenues in the Borough of The Bronx for the purpose of conveying compressed air from a compressor plant to be erected by the petitioner on the northerly side of Van Cortland Park South near Van Cortlandt avenue to the line of the City tunnel of the Catskill Aqueduct; now, therefore, be it

Resolved, That the consent of the Corporation of The City of New York be and the same is hereby given to Mason and Hanger Company, a corporation organized and existing under the Laws of the State of West Virginia and duly authorized by a certificate from the Secretary of State dated June 14, 1909, to do business in the State of New York, to install, maintain and use a pipe line in the Borough of The Bronx from a compressor plant to be constructed by the said grantee on property situated on the northerly side of Van Cortlandt Park South near Van Cortlandt avenue to the line of the City tunnel of the Catskill Aqueduct for the purpose of using compressed air in the prosecution of the work of constructing said tunnel under a contract awarded to the said grantee by the Board of Water Supply, and for no other purpose; said pipe to pass under, along and across Van Cortlandt avenue from Van Cortlandt Park South to Sedgwick avenue, and under and across Sedgwick avenue and under and across Fordham road, West 188th street, West 190th street, West 192d street, Kingsbridge road and Jerome avenue at East 233d street, all as shown upon the plan accompanying the application, and entitled:

"Plan showing locations of proposed pipes to be constructed in West 188th street, Fordham road, West 190th street, West 192d street, Kingsbridge road, Sedgwick avenue, Albany road, Jerome avenue, Van Cortlandt avenue, Borough of The Bronx, to accompany application dated June 23, 1911, of Mason and Hanger Company to the Board of Estimate and Apportionment, City of New York,"
—and signed Mason and Hanger Company, Edgar A. Groves, Engineer; a copy of which is attached hereto and made a part hereof upon the following terms and conditions:

1. Said consent shall continue only during the pleasure of the Board of Estimate and Apportionment, and shall be revocable upon sixty (60) days' notice in writing to the grantee, but in no case shall it extend beyond a term of five (5) years from the date of its approval by the Mayor, and thereupon all rights of the grantee in said streets by virtue of this consent shall cease and determine.

2. The grantee shall pay into the Treasury of The City of New York, as compensation for the privilege hereby granted, two thousand and forty-five and 50/100 dollars ($2,045.50). Such payments shall be made in advance on November 1 of each year, provided, however, that the first payment shall be made within sixty (60) days of the approval of this consent by the Mayor, and shall be only such proportion of the annual charge as the time between the approval of this consent by the Mayor and November 1 following bears to a whole year.

Such payments shall not be considered in any manner in the nature of a tax, but shall be in addition to any and all taxes of whatsoever kind or description now or hereafter required to be paid under any ordinance of The City of New York, or by any law of the State of New York.

3. Upon the removal of the grantee from either of the premises to be connected by the structure, or upon the revocation or termination by limitation of this consent, the grantee shall cause the structure hereby authorized to be removed and all of said street affected by this permission to be restored to its proper and original condition, if required so to do by The City of New York or its duly authorized representatives, and the entire cost of such work shall be borne by the said grantee. If the structure hereby authorized shall not be required to be removed, it is agreed that it shall become the property of The City of New York.

4. This consent is for the exclusive use of the grantee and shall not be assigned either in whole or in part, or leased or sublet in any manner, nor shall title thereto, or right, interest or property therein pass to or vest in any other person, firm or corporation whatsoever, either by the acts of the grantee or by operation of law, without the consent in writing of The City of New York, acting by the Board of Estimate and Apportionment.

5. The grantee shall pay the entire cost of all work, labor and material in connection with the structure hereby authorized, and particularly—

(a) Its construction, maintenance and removal.

(b) The protection of all structures which shall in any way be disturbed by its construction or removal.

(c) All changes in sewers or other subsurface structures necessitated by its construction or removal, including the laying or relaying of pipes, conduits, sewers or other structures.

(d) The replacing or restoring of the pavement in said street which may be disturbed during its construction or removal.

(e) Each and every item of the increased cost of the installation of any future structures or repairs or alterations to any existing or future structures caused by its presence in the street.

(f) The inspection of all work during its construction or removal as herein provided, which may be required by the President of the Borough and the Commissioner of Water Supply, Gas and Electricity.

6. Before the construction or removal shall be begun, the grantee shall obtain permits to do the work from the President of the Borough and from the Commissioner of Water Supply, Gas and Electricity. The grantee shall perform all the duties which may be imposed by those officials as conditions of such permits, provided such conditions are not inconsistent with the provisions of this consent. The grantee shall submit to those officials working plans which shall include and show in detail the method of construction of the structure hereby authorized and the mode of protection or changes in all structures required by the construction or removal of the same.

Upon the completion of the work, the grantee shall furnish to the President of the Borough a plan of such character as he may direct, showing accurately and distinctly the location, size and type of construction and complete dimensions of the structure erected or installed under this consent; also the location and dimensions of all substructures, encountered during the progress of the work. The depth below the street surface of the new structure and of the substructures encountered must be shown; also their location with reference to the nearest curb line and the nearest curb-line intersection.

7. The grantee shall allow to The City of New York a right of way through, under or above any part of the structure hereby authorized for any and all structures which are now or may be hereafter placed by The City of New York in said street.

If at any time it shall become necessary to replace or alter any structure in said street, the City shall have the right to break through or remove all or any portion of the structure hereby authorized and the grantee shall pay to the City the expense incurred by such removal.

8. The structure hereby authorized and any fixtures laid therein shall be constructed, maintained and operated subject to the supervision and control of the proper authorities of The City of New York. It shall be open at all times to the inspection of all the authorities who have jurisdiction in such matters under the Charter of The City of New York.

9. This consent is subject to whatever right, title or interest the owners of abutting property or others may have in and to said street.

10. Said grantee shall be liable for all damages to persons or property, including the street and structures therein and thereunder, by reason of the construction and operation or maintenance of the structure hereby authorized, and it is a condition of this consent that The City of New York assumes no liability to either person or property on account of this consent.

11. This consent is granted on the further and express condition that all laws or ordinances now in force, or which may hereafter be adopted, shall be strictly complied with.

12. This consent is upon the express condition that within sixty (60) days after its approval by the Mayor, and before anything is done in exercise of the rights conferred hereby, the grantee shall deposit with the Comptroller of The City of New York the sum of three thousand dollars ($3,000), either in money or in securities to be approved by him, which fund shall be security for the performance of the terms and conditions of this consent, especially those which relate to the payment of the annual charge, the repairs of the street pavement and the removal of the structure hereby authorized. In case of default in the performance by said grantee of any of such terms and conditions, The City of New York shall have the right to cause the work to be done and the materials to be furnished for making the necessary changes or repairs, after ten (10) days' notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings, or in case of default in the payment of the annual charge, shall collect the same, with interest, from such fund after ten (10) days' notice in writing to the said grantee.

In case of any drafts so made upon the security fund the said grantee shall, upon thirty (30) days' notice in writing, pay to the Comptroller of The City of New York a sum of money sufficient to restore the said fund to the original amount of three thousand dollars ($3,000), and in default of the payment thereof, the consent hereby given may be cancelled and annulled, at the option of the Board of Estimate and Apportionment of The City of New York, acting on behalf of said City. No action or proceeding or rights under the provisions of this section shall affect any other legal rights, remedies or causes of action belonging to The City of New York.

13. Said grantee shall give notice, in writing, to the President of the Borough and to the Commissioner of Water Supply, Gas and Electricity of its intention to begin the work hereby authorized at least forty-eight hours before such work commences. The grantee shall also give to the Board of Estimate and Apportionment notice, in writing, of the date on which the work is commenced and also the date on which the same is completed, not later than ten (10) days after such dates.

14. Said grantee shall commence the construction of the structure hereby authorized and complete the same on or before January 1, 1912, otherwise this consent shall be forfeited forthwith, and without any proceedings, either at law or otherwise, for that purpose; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

15. This consent shall be null and void unless said grantee shall duly execute an instrument in writing, wherein said grantee shall accept this consent and shall promise, covenant and agree to conform to, abide by and perform all the terms, conditions and requirements in this consent fixed and contained and file said instrument with the Board of Estimate and Apportionment of The City of New York within thirty (30) days after the approval of this consent by the Mayor; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

And said grantee shall promise, covenant and agree in said instrument to hold The City of New York harmless from all damages to persons or property which may result from the construction, use, maintenance or operation of the structure hereby authorized.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen, and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

J. B. Malatesta.

In the matter of the application of J. B. Malatesta for permission to construct, maintain and use a narrow gauge railroad track from the easterly side of White Plains road and Boston road, across White Plains road and along Astor avenue to Olinville avenue, to Britton street, to Bronx boulevard, to Burke street, Borough of The Bronx.

This application was presented to the Board at the meeting of June 29, 1911, and referred to the Bureau of Franchises.

The Secretary presented the following:

3169 Jerome Avenue, New York City, June 27, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment*, 277 Broadway, New York, N. Y.:

Dear Sir—In connection with my contracts for regulating and grading Boston road and Bronx boulevard, I hereby make application for a permit to lay a temporary narrow gauge railroad track from the junction of Boston road, White Plains road and Astor avenue, thence along Astor avenue to Olinville avenue, thence northerly along Olinville avenue to Britton street, thence along Britton street to Bronx boulevard, thence along Bronx boulevard to Burke street.

I have received the consents of the property owners on Britton street, this being the only street where title has not been vested in the City.

The construction of this railroad will greatly facilitate the work on the above named contracts, and in granting same I shall be able to complete them in much less time than is allowed.

The streets through which this railroad is intended to run are not built up, there being only one house on the entire line. In view of the foregoing, I would request that you use every endeavor to secure this permission. Yours very truly,

J. B. MALATESTA, Contractor.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, June 30, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—J. B. Malatesta has presented a petition dated June 27, 1911, to the Board of Estimate and Apportionment for permission to lay down, maintain and use temporarily a narrow gauge railroad track from the easterly side of White Plains road at Boston road directly across White Plains road and along Astor avenue to Olinville avenue; thence northerly along Olinville avenue to Britton street; thence westerly along Britton street to Bronx boulevard; thence northerly along Bronx boulevard to Burke street.

The petition recites that the proposed railroad track will facilitate the work of regulating and grading Boston road and Bronx boulevard under contracts from the City held by the petitioner and will enable the work to be completed in less time than provided.

Title to the land within the lines of Britton street has not yet vested in the City, and said street is not physically open to public use, but the owners' consent has been obtained by the petitioner. The other streets upon which the proposed track is to be placed are regulated and graded and White Plains road is paved, but there is only one building along the entire line of the proposed track. The petitioner has stated that permission is only requested for a term of about seven months, during which period the work will be entirely completed.

In a communication dated June 29, 1911, The President of the Borough of The Bronx has stated that there are no objections to the granting of a temporary permit for this proposed construction track but that the grantee should be required to furnish security for the restoration of the pavement across White Plains road.

I have been informed by the office of the Borough President that Mr. Malatesta has lately been awarded the contract for regulating and grading the portion of

Bronx baulevard north of Burke street, his bid being $57,961, such sum being almost $10,000 less than the next lowest bidder, and that he was enabled to present such a low bid on account of his ability to furnish filling to Bronx boulevard from his Boston road contract by means of the proposed temporary railroad.

In view of the decision in the case of Hatfield vs. Straus, it would not ordinarily be within the power of the Board to grant the requested permission, but in this particular case the proposed contract is a means of saving to the City some $10,000. Furthermore, there is no great public use of the larger part of the route upon which it is proposed to construct the track. In view of these facts, it was deemed advisable to request an opinion of the Corporation Counsel as to whether authorization could properly be granted for such a track in this particular case.

In response to such request, the Corporation Counsel rendered an opinion, wherein it is held that, in view of the saving to the City incident to the construction and use of the proposed track and the rapidity with which the work may be done, the Board might elect to consider this a case where a revocable consent could properly be granted. The opinion further suggests that the petitioner should be required to first obtain consents of all abutting property owners along the line of the proposed railroad. Such course of procedure would undoubtedly be best, but in this particular case the object of the petitioner would be defeated by such a requirement, as it might take considerable time to obtain such consents and the track is only desired for about seven months. It would therefore seem that such requirement might be waived, the petitioner having already obtained the consent of the owner of the property within the lines of Britton street, and the form of consent herewith submitted provides that it is subject to whatever right, title or interest the owners of abutting property may have in and to the said streets.

In view of this opinion, there appears to be no reason why the requested privilege should not be granted. Should the Board deem it advisable to do so, I would suggest that consent be given only during the pleasure of the Board of Estimate and Apportionment, and in no case to extend beyond March 1, 1912, and revocable upon ten days' notice, in order that the consent may be revoked immediately upon the receipt of objections by abutting property owners to the track. It should also be made a condition of the consent that a security deposit in the sum of two thousand dollars ($2,000) be required; said deposit to be in the form of either money or securities to be approved by and deposited with the Comptroller for the faithful performance of the terms and conditions of the consent. Such fund will insure the restoration of the street pavements as requested in the hereinbefore mentioned communication from the Borough President.

At the rate of charge heretofore fixed by the Board for railroad tracks in the City streets, viz.—four per cent. per annum of the assessed valuation of the area of street occupied, a width of ten feet being estimated for a single track, the charge for this privilege for the term of the consent—a period of seven and one-half monthly only—should be one hundred and sixty-five dollars ($165).

The customary form of resolution granting consent is herewith submitted for adoption. Respectfully,

HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, J. B. Malatesta has presented a petition dated June 27, 1911, to the Board of Estimate and Apportionment for its consent to the construction, maintenance and use of a narrow gauge railroad track from the junction of Boston road and White Plains road, directly across said White Plains road and along Astor avenue to Olinville avenue; thence northerly along Olinville avenue to Britton street; thence along Britton street to Bronx boulevard; thence along Bronx boulevard to Burke street; said track to be used for the purpose of conveying material; all as more fully recited in a report of the Bureau of Franchises presented herewith; now therefore be it

Resolved, That the consent of the Corporation of The City of New York be and the same is hereby given to J. B. Malatesta to construct, maintain and use temporarily a narrow gauge railroad track beginning at the easterly side of White Plains road at Boston road; thence extending directly across White Plain road and westerly along Astor avenue to Olinville avenue; thence northerly along Olinville avenue to Britton street; thence westerly along Britton street to Bronx boulevard; thence northerly along Bronx boulevard to Burke street; said track to be used for the purpose of conveying material in connection with the regulating and grading of Bronx boulevard, and for no other purpose; all as shown on a plan accompanying the application, entitled:

"Plan showing location of 36-inch gauge railroad track to be constructed across White Plains road and along Astor avenue and Olinville avenue, Britton street and Bronx boulevard, to accompany application dated June 27, 1911, of J. B. Malatesta to the Board of Estimate and Apportionment, City of New York,"
—and signed by J. B. Malatesta; a copy of which is attached hereto and made a part hereof upon the following terms and conditions:

1. Said consent shall continue only during the pleasure of the Board of Estimate and Apportionment, and shall be revocable upon ten (10) days' notice in writng to the grantee, but in no case shall it extend beyond March 1, 1912, and thereupon all rights of the grantee in said street by virtue of this consent shall cease and determine.

2. The grantee shall pay into the Treasury of The City of New York, as compensation for the privilege hereby granted, the sum of one hundred and sixty-five dollars ($165.) Such payments shall be made in advance on November 1 of each year, provided, however, that the first payment shall be made within sixty (60) days of the approval of this consent by the Mayor, and shall be only such proportion of the annual charge as the time between the approval of this consent by the Mayor and November 1 following bears to a whole year.

Such payments shall not be considered in any manner in the nature of a tax, but shall be in addition to any and all taxes of whatsoever kind or description now or hereafter required to be paid under any ordinance of The City of New York, or by any law of the State of New York.

3. Upon the removal of the grantee from either of the premises to be connected by the structure, or upon the revocation or termination by limitation of this consent, the grantee shall cause the structure hereby authorized to be removed and all of said street affected by this permission to be restored to its proper and original condition, if required so to do by The City of New York or its duly authorized representatives, and the entire cost of such work shall be borne by the said grantee. If the structure hereby authorized shall not be required to be removed, it is agreed that it shall become the property of The City of New York.

4. This consent is for the exclusive use of the grantee and shall not be assigned either in whole or in part, or leased or sublet in any manner, nor shall title thereto, or right, interest or property therein pass to or vest in any other person, firm or corporation whatsoever, either by the acts of the grantee or by operation of law, without the consent in writing of The City of New York, acting by the Board of Estimate and Apportionment.

5. The grantee shall pay the entire cost of all work, labor and material in connection with the structure hereby authorized, and particularly—

(a) Its construction, maintenance and removal.

(b) The protection of all structures which shall in any way be disturbed by its construction or removal.

(c) All changes in sewers or other subsurface structures necessitated by its construction or removal, including the laying or relaying of pipes, conduits, sewers or other structures.

(d) The replacing or restoring of the pavement in said street which may be disturbed during its construction or removal.

(e) Each and every item of the increased cost of the installation of any future structures or repairs or alterations to any existing or future structures caused by its presence in the street.

(f) The inspection of all work during its construction or removal as herein provided, which may be required by the President of the Borough and the Commissioner of Water Supply, Gas and Electricity.

6. Before the construction or removal shall be begun, the grantee shall obtain permits to do the work from the President of the Borough and from the Commissioner of Water Supply, Gas and Electricity. The grantee shall perform all the duties which may be imposed by those officials as conditions of such permits, provided such conditions are not inconsistent with the provisions of this consent. The grantee shall submit to those officials working plans which shall include and show in detail the method of construction of the structure hereby authorized and the mode of protection or changes in all structures required by the construction or removal of the same.

Upon the completion of the work, the grantee shall furnish to the President of the Borough a plan of such character as he may direct, showing accurately and distinctly the location, size and type of construction and complete dimensions of the structure erected or installed under this consent; also the location and dimensions of all substructures encountered during the progress of the work. The depth below the street surface of the new structure and of the substructures encountered must be shown; also their location with reference to the nearest curb line and the nearest curb-line intersection.

As proceedings have been initiated for the opening of Britton street, where the proposed track is to be located, but title has not yet vested in the City, it is made a particular condition of this resolution that the consent of the City to the construction of the track on the said portion of Britton street shall not take effect until such time as title to said portion of said street shall vest in the City.

7. The grantee shall allow to The City of New York a right of way through, under or above any part of the structure hereby authorized for any and all structures which are now or may be hereafter placed by The City of New York in said street.

If at any time it shall become necessary to replace or alter any structure in said street, the City shall have the right to break through or remove all or any portion of the structure hereby authorized and the grantee shall pay to the City the expense incurred by such removal.

8. The structure hereby authorized and any fixtures laid therein shall be constructed, maintained and operated subject to the supervision and control of the proper authorities of The City of New York. It shall be open at all times to the inspection of all the authorities who have jurisdiction in such matters under the Charter of The City of New York.

9. This consent is subject to whatever right, title or interest the owners of abutting property or others may have in and to said street.

10. Said grantee shall be liable for all damages to persons or property, including the street and structures therein and thereunder, by reason of the construction and operation or maintenance of the structure hereby authorized, and it is a condition of this consent that The City of New York assumes no liability to either person or property on account of this consent.

11. This consent is granted on the further and express condition that all laws or ordinances now in force, or which may hereafter be adopted, shall be strictly complied with.

12. This consent is upon the express condition that within sixty (60) days after its approval by the Mayor, and before anything is done in exercise of the rights conferred hereby, the grantee shall deposit with the Comptroller of The City of New York the sum of two thousand dollars ($2,000), either in money or in securities to be approved by him, which fund shall be security for the performance of the terms and conditions of this consent, especially those which relate to the payment of the annual charge, the repairs of the street pavement and the removal of the structure hereby authorized. In case of default in the performance by said grantee of any of such terms and conditions, The City of New York shall have the right to cause the work to be done and the materials to be furnished for making the necessary changes or repairs, after ten (10) days' notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings, or in case of default in the payment of the annual charge, shall collect the same, with interest, from such fund after ten (10) days' notice in writing to the said grantee.

In case of any drafts so made upon the security fund the said grantee shall, upon thirty (30) days' notice in wrting, pay to the Comptroller of The City of New York a sum of money sufficient to restore the said fund to the original amount of two thousand dollars ($2,000), and in default of the payment thereof, the consent hereby given may be cancelled and annulled, at the option of the Board of Estimate and Apportionment of The City of New York, acting on behalf of said City. No action or proceeding or rights under the provisions of this section shall affect any other legal rights, remedies or causes of action belonging to The City of New York.

13. Said grantee shall give notice, in writing, to the President of the Borough and to the Commissioner of Water Supply, Gas and Electricity of its intention to begin the work hereby authorized at least forty-eight hours before such work commences. The grantee shall also give to the Board of Estimate and Apportionment notice, in writing, of the date on which the work is commenced and also the date on which the same is completed, not later than ten (10) days after such dates.

14. Said grantee shall commence the construction of the structure hereby authorized and complete the same on or before October 1, 1911, otherwise this consent shall be forfeited forthwith, and without any proceedings, either at law or otherwise, for that purpose; provided. however, that such time may be extended by the Board of Estimate and Apportionment.

15. This consent shall be null and void unless said grantee shall duly execute an instrument in writing, wherein said grantee shall accept this consent and shall promise, covenant and agree to conform to, abide by and perform all the terms, conditions and requirements in this consent fixed and contained and file the said instrument with the Board of Estimate and Apportionment of The City of New York within thirty (30) days after the approval of this consent by the Mayor; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

And said grantee shall promise, covenant and agree in said instrument to hold The City of New York harmless from all damages to persons or property which may result from the construction, use, maintenance or operation of the structure hereby authorized.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

Rapid Transit Railway, Battery-East River-Atlantic Avenue Route.

The Secretary presented the following:

To the Board of Estimate and Apportionment of The City of New York:

The Public Service Commission for the First District herewith transmits to you for your approval and the approval of the Mayor of the City as required by law certified copies of resolutions adopted by it on the 30th day of June, 1911, determining and establishing a route and general plan of construction for an additional rapid transit railroad to be known as the Battery-East River-Atlantic Avenue Route.

This route is among those recommended for construction in the report dated June 5, 1911, of the Select Committee of the Board of Estimate and Apportionment and of the members of the Commission, which report was later approved by the Board of Estimate and Apportionment.

The proposed route will connect the routes heretofore adopted and approved terminating at the Battery with Brooklyn routes also adopted and approved in Atlantic, 4th and Flatbush avenues. The benefit to be derived from putting the Borough of Brooklyn on an all-rail connection with the Borough of Manhattan is too obvious to require discussion.

As the construction of the under-river crossings will probably require the greatest time, the Commission considers it important that steps be taken to secure the necessary consents for this route at as early a date as possible. The matter of canvassing for property owners' consents will, of course, have to await the determination upon this matter of your honorable Board and the Mayor.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, By W. R. WILLCOX, Chairman.

[SEAL OF THE COMMISSION]

Attest: TRAVIS H. WHITNEY, Secretary.

Dated June 30, 1911.

The following was offered:

Resolved, That the communication be received and in pursuance of law, this Board hereby appoints Thursday, the 13th day of July, 1911, at 10.30 o'clock in the forenoon as the time, and Room 16, City Hall, Borough of Manhattan, as the place when and where such plans and conclusions will be considered; and be it further

Resolved, That the Secretary be and he hereby is directed to cause notice of such consideration to be published in the CITY RECORD.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The matter was then referred to the Franchise Committee.

The following matter not on the Calendar for this day was considered by unanimous consent:

Rapid Transit Railways.

The President of the Borough of Manhattan presented a communication from the Brooklyn Rapid Transit Company in reply to resolution adopted by this Board at the special meeting on June 30, 1911, as follows:

Brooklyn Rapid Transit Co., 85 Clinton Street, Brooklyn, N. Y., Office of the President, July 5, 1911.

Hon. WILLIAM R. WILLCOX, *Chairman, Public Service Commission for the First District;* Hon. GEORGE MCANENY, *Chairman, Special Committee of the Board of Estimate and Apportionment,* Borough of Manhattan.

Gentlemen—We acknowledge receipt of your communication of the 30th ultimo transmitting copy of report made by you to the Board of Estimate and Apportionment, the recommendations of which were adopted by that body at a special meeting on June 30 last.

Replying particularly to subdivision G of paragraph 1 of said report,

"That the contract for the lines aforesaid shall be conditioned upon the company's agreement to operate upon the general terms set forth in the resolutions adopted by the Board on June 21, 1911, as herein amended, the additional lines and extensions set forth in its proposition of April 25, 1911, and upon the company's assurance to the Board of Estimate and Apportionment not later than July 6, 1911, that it will operate such additional lines if requested so to do."

—we hereby formally assure you and the Board of Estimate and Apportionment of our willingness to operate such additional lines upon the general terms set forth in the resolutions adopted by the Board on June 21, 1911, and as amended in the committee's report of June 29, 1911.

We call your attention to certain language of the report as embodied in the copy transmitted to us which we assume does not fully express the purpose of your committee.

In subdivision A of paragraph 1 referring to recapture, it is provided that there shall be paid to the company the actual cost of the equipment "less the amount of expenditures for depreciation and renewals, and the amount accrued in any sinking fund," etc. We assume that this is intended to mean any unexpended balance of depreciation and renewal charges.

In subdivision E of paragraph 1, we assume that the words "cost of construction" are intended to include also the cost of equipment.

In subdivision F of paragraph 1, we assume that the words "any incidental fee damages for rights of way in acquiring streets allowed by the courts" are not limited to damages for rights of way in the opening of new streets, but include generally damages for rights of way in streets already opened.

We stand ready to cooperate with the Public Service Commission and your Committee in the preparation of plans and specifications and the formulation of contracts, to the end that there may promptly be secured for the public the fullest measure of transit benefits permitted under our proposals. Respectfully submitted,

BROOKLYN RAPID TRANSIT COMPANY, by T. S. *Williams*, President.

The President of the Borough of Manhattan then moved that the communication be laid on the table and taken up for consideration at the special meeting to be held Monday, July 10, 1911, at 10.30 o'clock a. m.

Which motion was agreed to.

FINANCIAL MATTERS.

The following transfers of appropriations were made upon the recommendation of the Comptroller:

$1,000 within the appropriation made to the Department of Bridges for the year 1911.

Department of Bridges, City of New York, 13-21 Park Row, Manhattan, N. Y., June 7, 1911.

To the Honorable Board of Estimate and Apportionment of The City of New York:

Gentlemen—I have to request the following transfer within the Budget appropriation for the Department of Bridges for the year 1911, as follows:

From

Manhattan Bridge—

139. General Supplies	$1,000 00

—the amount therefor being in excess of requirements.

To

Manhattan Bridge—

141. Repairs and Replacements by Contract or Open Order	$1,000 00

—the amount thereof being insufficient.

This transfer does not increase the Budget appropriation for this Department for the year 1911. Respectfully,

WM. H. SINNOTT, Deputy and Acting Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 27, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 7, 1911, the Deputy and Acting Commissioner of Bridges requested a transfer of $1,000 within the appropriations to the Department of Bridges for 1911. In connection therewith I report as follows:

The proposed transfer is from Manhattan Bridge, No. 139, General Supplies, to Manhattan Bridge, No. 141, Repairs and Replacements by Contract or Open Order. The credit transfer is stated to be necessary for repairs to the bridge. The Budget appropriation of $1,000 for the purpose is almost exhausted, and there is an ample unencumbered balance in No. 139 for debit transfer.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The folowing resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Department of Bridges for the year 1911, as follows:

From

Manhattan Bridge—

139. General Supplies	$1,000 00

To

Manhattan Bridge—

141. Repairs and Replacements by Contract or Open Order	$1,000 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

$2,575 within the appropriation made to the Department of Public Charities for the year 1910.

Department of Public Charities of The City of New York, Foot of East 26th Street, June 16, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—I beg respectfully to request the transfer of two thousand five hundred and seventy-five dollars ($2,575) from the appropriation to this Department for the year 1910, entitled, "Department of Public Charities, Miscellaneous, Code 1910, No. 638, State Hospital for Incipient Tuberculosis," the same being in excess of the amount required therefor, to the appropriation: "Department of Public Charities, Miscellaneous, Code 1910, No. 636, Clothing for Epileptics Sent to Craig Colony," the same being insufficient. Respectfully yours,

M. J. DRUMMOND, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 27, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 16, 1911, the Commissioner of the Department of Public Charities requested the transfer of $2,575 within appropriations to his Department for the year 1910. In connection therewith, I report as follows:

The transfer is from Miscellaneous, No. 638, State Hospital for Incipient Tuberculosis, to Miscellaneous, No. 636, Clothing for Epileptics sent to Craig Colony.

The appropriation for No. 638 was $17,000. The liability incurred was $13,819.68, leaving an unencumbered balance of $3,180.32.

The appropriation for No. 636 was $7,500. Bills amounting to $10,050.23 for clothing furnished to about 400 epileptics sent by the City to Craig Colony, Sonyea, N. Y., have been received, indicating a deficit of $2,550.23.

I recommend that the request be approved by the adoption of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, that the Board of Estimate and Apportionment ,pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Department of Public Charities for the year 1910, as follows:

From

Miscellaneous—

638. State Hospital for Incipient Tuberculosis	$2,575 00

To

Miscellaneous—

636. Clothing for Epileptics sent to Craig Colony	$2,575 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

$2,500, within the appropriation made to the President of the Borough of The Bronx for the year 1911.

City of New York, President of the Borough of The Bronx, 3d Avenue and 177th Street, Office of the President, June 20, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—Request is hereby respectfully made that the sum of $2,500 be transferred from the appropriation made to the President, Borough of The Bronx, for the year 1911, entitled Bureau of Highways—Maintenance of Highways—Code 1727, "Repairs and Replacements by Contract or Open Market Order," the same being in excess of the amount required for the purposes thereof, to the appropriation made to the said President for the same year, entitled Bureau of Highways—Maintenance of Highways—Code 1732, "Contingencies," the amount of said appropriation being insufficient.

The purpose of this transfer is to provide funds to purchase seven (7) additional horses. It has been several years since any additional horses have been purchased for the use of Highways-Maintenance of this Department, although several have been worn out in the service from time to time and sold at public auction. The special use designed for these horses is to convey throughout the Borough daily the General Inspectors, which, owing to the long distance traversed, requires the use of different horses twice a day, or morning and afternoon.

The funds can be spared from the appropriation for Repairs and Replacements as above stated, for the reason that the painting of the superstructures of bridges crossing the railroads of the Borough, for which an appropriation was made, are to be painted by the railroad companies, instead of by this Department, as originally contemplated. Respectfully,

CYRUS C. MILLER, President, Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 28, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the President of the Borough of The Bronx requested the transfer of $2,500 within the appropriations for the Bureau of Highways in his office for 1911. In connection therewith, I report as follows:

The transfer is to provide for the purchase of seven horses for use in connection with maintenance work. It is stated that no horses have been purchased for the work for several years, although several horses have been worn out in the service and sold at auction. The horses are used throughout the Borough by the general Inspectors in making their tours. Owing to the great area covered it is necessary to use two horses for each Inspector during the working day.

It is proposed to transfer the amount from No. 1727, Repairs and Replacements by Contract or Open Order. The appropriation for the account was $21,000. Part of the allowance was to be expended for painting several highway bridges in the Borough. The work has been done by the railroad companies over whose tracks the bridges pass, thereby saving to the City enough for the transfer. No provision was made in the Budget for the purchase of horses. The credit transfer is proposed for No. 1732, Contingencies.

I recommend the approval of the request by the adoption of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the transfer of funds appropriated to the office of the President of the Borough of The Bronx for the year 1911, as follows:

From

Bureau of Highways—Maintenance of Highways—	
1727. Repairs and Replacements by Contract or Open Order	$2,500 00

To

1732. Contingencies	$2,500 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

$100, within the appropriation made to the Board of Assessors for the year 1911.

Office, Board of Assessors, 320 Broadway, New York, June 2, 1911.

Hon. W. J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment,* City of New York:

Sir—The Board of Assessors respectfully asks for a transfer of one hundred dollars ($100) from its telephone account of 1911, account No. 1338, to its contingency account of 1911, account No. 1339, said transfer being within its total appropriation for the current year.

There was an unexpended balance of one hundred and twenty-one dollars ($121) from the appropriation for telephone service for the year 1910, and as this service has not been changed, it is likely that a similar balance will remain at the close of 1911 unless this transfer is made.

The Board desires the transfer for the purchase of the Court of Appeals reports, which it regards very necessary for the use of the office. The sum of $75 appropriated under the general supplies account simply covers the cost of current reports and other books of a special character which are required from time to time.

Yours respectfully, THOMAS J. DRENNAN, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 27, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 2, 1911, the Secretary of the Board of Assessors requested the transfer of $100 within appropriations for the Board for the year 1911.

The proposed transfer is from No. 1338, Telephone Service, to No. 1339, Contingencies. The appropriation for No. 1339 was $375. The $100 is for the purchase of the Court of Appeals Reports. The Board states that the Reports are necessary for the use of the office. There is ample balance in No. 1338 for the debit transfer.

I recommend that the request be approved by the adoption of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the transfer of funds appropriated to the Board of Assessors, for the year 1911, as follows:

From	
1338. Telephone Service	$100 00
To	
1339. Contingencies	$100 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

$8, within the appropriation made to the County Court and Surrogate's Court, Richmond County, for the year 1910.

County of Richmond, Surrogate's Office, Richmond, N. Y., June 26, 1911.

Hon. William J. Gaynor, *Chairman, Board of Estimate and Apportionment,* City Hall, New York:

Dear Sir—I find that, through an error, there is still outstanding against Account No. 1972, 1910, the sum of eight dollars in favor of the Matthew Bender Company, for books furnished for use in the library of this Department.

As there are no funds in said Account No. 1972, 1910, and there is an unexpended balance in Account No. 1971, 1910, I would respectfully request that the sum of eight dollars be transferred from Telephone Account No. 1971, 1910, to Contingencies Account No. 1972, 1910. Respectfully yours,

SIDNEY F. RAWSON, County Judge and Surrogate.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 26, 1911, the County Judge and Surrogate of Richmond County requested the transfer of $8 within appropriations to the Court for the year 1910.

The transfer is from No. 1971, Telephone Service, to No. 1972, Contingencies. The appropriation for 1972 was $250. The liabilities incurreed amount to $258. The $8 deficiency is on account of the purchase of law books from the Matthew Bender Company.

I recommend that the request be approved by the adoption of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the County Court and Surrogate's Court, Richmond County, for the year 1910, as follows:

From

1971. Telephone Service	$8 00

To

1972. Contingencies	$8 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Pressident of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

$32.99 within the appropriation made to the Pressident of the Borough of Queens for the year 1910.

The City of New York, Offices, Commissioner of Public Works of the Borough of Queens, Long Island City, June 15, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment,* New York City:

Sir—Pursuant to provisions of section 237 of the Charter of The City of New York, application is hereby made for a resolution authorizing the transfer between the following funds of the Bureau of Public Buildings and Offices, this Department, to wit:

Fund, President of the Borough of Queens, Bureau of Public Buildings and Offices, No. 1658, 1910, General Supplies, $32.99, to Fund, President of the Borough of Queens, Bureau of Public Buildings and Offices, No. 1660, 1910, Repairs and Replacements by Contract or Open Order, $32.99.

This transfer is neceessary to liquidate vouchers on account of orders issued by this Department, amounting to ninety-six dollar ($96).

We have an apparent balance in Fund No. 1660 of $63.01, plus the transfer of $32.99—equals $96. Your repectfully,

WALTER H. BUNN, Acting President of the Borough of Queens.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 15, 1911, the Acting President of the Borough of Queens requested the transfer of $32.99 within appropriations to his office for the year 1910.

The transfer is in the Bureau of Public Buildings and Offices, from No. 1658, General Supplies, to No. 1660, Repairs and Replacements by Contract or Open Order. It is stated the $32.99 is needed to cover a deficit on account of orders issued by the Bureau.

I recommend that the request be approved by the adoption of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the transfer of funds appropriated to the office of the President of the Borough of Queens for the year 1910, as follows:

From

Bureau of Public Buildings and Offices, Maintenance—

1658. General Supplies	$32 99

To

Maintenance—

1660. Repairs and Replacements by Contract or Open Order	$32 99

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Pressident of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

$75, within the appropriation made to the Department of Parks, Boroughs of Manhattan and Richmond, for the year 1910.

The City of New York, Department of Parks, Boroughs of Manhattan and Richmond, Arsenal, Central Park, June 26, 1911.

To the Board of Estimate and Apportionment, City of New York:

Gentlemen—I beg to request that your Honorable Board will authorize the traneser of the sum of seventy-five dollars ($75) from the appropriation No. 857 for the year 1910 (Repair and Replacement by Contract or Open Order), to No. 856 for the same year (Materials for Repairs and Replacements by Departmental Labor), the latter being insufficient to cover the expense of purchasing materials necessary for repairs to the park drives. It is found that about 37½ cubic yards of such material was used to complete the work in excess of the quantity covered by contract made for supplying gravel for that purpose. Respectfully,

CHAS. B. STOVER, Commissioner of Parks, Boroughs of Manhattan and Richmond.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 3, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 26, 1911, the Commissioner of Parks, Boroughs of Manhattan and Richmond, requested a transfer of $75 within appropriation to the Department for the year 1911. In connection therewith I report as follows:

The proposed transfer is from No. 857, Repairs and Replacements by Contract or Open Order, to No. 856, Materials for Repairs and Replacements by Departmental Labor. The Commissioner states that about 37½ cubic yards of material were used for making repairs to the park drives in excess of the quantity provided for in a contract. The $75 will enable the Commissioner to liquidate the outstanding liability against the account for the year.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves transfer of funds appropriated to the Department of Parks, Boroughs of Manhattan and Richmond, for the year 1910, as follows:

From

Parks, Manhattan and Richmond, Maintenance, Parks and Boulevards—

857. Repairs and Replacements by Contract or Open Order	$75 00

To

Maintenance, Parks and Boulevards—

856. Material for Repairs and Replacements by Departmental Labor	$75 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

$1,300 within the appropriation made to the Department of Parks, Borough of The Bronx, for the year 1911.

Department of Parks, The City of New York, Office of Commissioner for the Borough of The Bronx, Zbrowski Mansion, Claremont Park, June 28, 1911.

Hon. William J. Gaynor, *Mayor and Chairman, Board of Estimate and Apportionment*, 277 Broadway, New York City:

Sir—At the request of Dr. N. L. Britton, Director of the New York Botanical Garden, application is hereby made for a transfer of thirteen hundred dollars ($1,300) from the appropriation made to the Department of Parks, Borough of The Bronx, for the year 1911, entitled, and as follows:

1150. Maintenance, New York Botanical Garden: Fuel, 1911	$1,000 00
1153. Maintenance, New York Botanical Garden: Forage, shoeing and boarding horses, 1911	300 00

—to the appropriation made to this Department for the year 1911, entitled and as follows:

1147. Maintenance, New York Botanical Garden: General Supplies, 1911	$500 00
1148. Maintenance, New York Botanical Garden: Materials for repairs and replacements by departmental labor, 1911:	500 00
1149. Maintenance, New York Botanical Garden: Repairs and replacements by contract or open order, 1911	300 00

Dr. Britton in his communication stated that the amounts allowed for general supplies, materials for repairs and replacements by departmental labor, and repairs and replacements by contract or open order, are insufficient for the purposes thereof.

On the other hand, for the reason that there is a large quantity of wood available for fuel, caused by the necessary cutting down of dead chestnut trees, a considerable saving can be made in the purchase of coal, making it possible to take some of the money provided for fuel and devote it to the purposes mentioned above. The appropriation for forage also proves to be somewhat larger than is necessary this year, on account of the hay crop, which is now being harvested.

An unusual item of expense has to be provided for this year in the painting of the interior of the great central dome (Palm House) of Conservatory Range No. 1. I find that this has become necessary in order to protect the iron work, which is beginning to rust, and it must be done this year, as a matter of precaution.

Trusting that this request will meet with the approval of your honorable Board, I remain, yours very truly,

T. J. HIGGINS, Commissioner of Parks, Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 3, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 28, 1911, the Commissioner of Parks, Borough of The Bronx, requested a transfer of $1,300 within appropriations to the Department for the year 1911. In connection therewith I report as follows:

The requested transfers are within the allowance for the New York Botanical Garden, under the jurisdiction of the Department of Parks, and are made at the request of Dr. N. L. Britton, the Director.

Dr. Britton states that the appropriations for No. 1147, General Supplies; No. 1148, Material for Repairs and Replacements by Departmental Labor, and No. 1149, Repairs and Replacements by Contract or Open Order, are insufficient. He also states that there has been a considerable saving in No. 1150, Fuel, by reason of the cutting out of dead chestnut trees. A saving also has been made in No. 1153, Forage, Shoeing and Boarding Horses, by the harvesting of a heavy crop of hay.

The credit transfers, in the sums of $500 for No. 1147, $500 for No. 1148 and $300 for No. 1149 are to provide for the painting of the interior of the central dome of the Palm House. It is stated that the painting is necessary to protect the iron work from rust.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New ork Charter, the Board of Estimate and Apportionment hereby approves transfers of funds appropriated to the Department of Parks, Borough of The Bronx, for the year 1911, as follows:

From

Parks, Bronx, Maintenance, New York Botanical Garden—

1150. Fuel	$1,000 00
1153. Forage, Shoeing and Boarding Horses	300 00

To

Maintenance, New York Botanical Garden—

1147. General Supplies	$500 00
1148. Material for Repairs and Replacements by Departmental Labor	500 00
1149. Repairs and Replacements by Contract or Open Order	300 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmound—16.

The Secretary presented a communication from the Secretary of the Board of Education, transmitting certified copy of resolution adopted by said Board relative to fixing the compensation of the Janitors of certain school buildings.

Which was referred to the Committee on Salaries and Grades, consisting of the Comptroller and the President of the Board of Aldermen.

Consideration of the communication from the Corporation Counsel, in response to resolution adopted by the Board on April 6, 1911, requesting that information be furnished the Board in regard to the present status of the suit started by The City of New York against the New York Central and Hudson River Railroad Company for $231,750, with interest, claimed to be due for the past use and occupation of certain lands and lands under water between 60th aund 72d streets, west of 11th avenue, Borough of Manhattan, was laid over one week.

(At the meeting held June 15, 1911, the Corporation Counsel was requested to advise the Board by its next meeting, June 22, 1911, exactly what rights are left the City as the result of the decision of the Court of Appeals in the injunction suit brought by the Railroad Company to restrain the City from interfering with its tracks, etc., and what courses are left open to it, if any.)

(On June 22, 1911, the above matter was laid over for one week at the request of the Corporation Counsel.)

(On June 29, 1911, the matter was again laid over for one week.)

The Secretary presented a communication from the Secretary of the 11th Avenue Track Removal Association relative to taxes due the City by the New York Central and Hudson River Railroad Company.

Which was ordered filed.

The Secretary presented communications as follows:

From the District Attorney of New York County, requesting the issue of $12,212 special revenue bonds (subdivision 7, section 188 of the Charter), to be used in making additions to the professional and administrative force of his office, and for the purchase of desk and other office supplies, which are necessary in order to carry out the provisions of chapters 115 and 516 of the Laws of 1911, which provide for two additional Stenographers to the Grand Jury and four Assistant District Attorneys;

From the Board of Water Supply, requesting approval of the purchase from the Staten Island Rapid Transit Railway Company for $3,000 of an easement in and under Parcel 159, Section 1, City Aqueduct;

From Adrian Sizer, of Washington, D. C., regarding an alleged claim of $651,720, which The City of New York has against the Federal Government for expenses incurred in raising troops during the Civil War;

From the Board of Education, transmitting certified copies of resolutions of said Board relative to the resolutions of the Board of Aldermen, requesting appropriations for general repairs and supplies for classes of anaemic children; and

Resolutions (18) of the Board of Aldermen, requesting issues of special revenue bonds (subdivision 8, section 188 of the Charter), as follows:

$2,500 for the purpose of furnishing, equipping and making alterations in the new offices of the Probation Department, Court of Special Sessions, in the Ashland Building, 24th street and 4th avenue, Manhattan;

$5,000, the proceeds to be used by the District Attorney of Kings County for the purpose of paying the salaries of two additional Assistant District Attorneys, as provided by chapter 309 of the Laws of 1911;

$3,200 for the salaries of sixteen extra Nurses in the Department of Public Charities, for four months, beginning July 1, 1911;

$50,000 for the purpose of regenerating the lawns in Central Park, Department of Parks, Boroughs of Manhattan and Richmond.

$6,300 for the purpose of replenishing the fund for general repairs, Department of Education;

$845 for furnishing certain supplies and equipment for classes of anaemic children, Department of Education;

$473.77, the proceeds to be used by the President of the Borough of The Bronx for the purpose of compensating the Department of Docks and Ferries for the use of a boring machine;

$6,065.51 for the salaries of two Pathologists and for increases in the wages of Deckhands and Steamfitters, Department of Public Charities;

$1,575 for the salaries of three Automobile Enginemen for the last six months of 1911, at the rate of $1,050 per annum each, under the jurisdiction of the President of the Borough of Queens;

$5,274, the proceeds to be used by the Comptroller for the payment of rent of property leased for the use of the various Departments of the County Government;

$5,000 for the wages of an engineering force, for purchasing filing cases and supplies, and for other contingent expenses in connection with the work of locating, recording and mapping subsurface structures in the Borough of Richmond during 1911;

$1,600 for the salaries of four additional Keepers at the Penitentiary, Blackwells Island, from July 1 to December 31, 1911, at $800 per annum, each under the jurisdiction of the Department of Correction;

$200 for placing fire escapes on "Turnbull Mansion," at Bartow-on-the-Sound, under the jurisdiction of the Department of Parks, Borough of The Bronx;

$3,000 for the salary of a Consulting Engineer, Borough of Queens, for the last six months of 1911;

$6,000 for the purchase of street flushing machines for the use of the Bureau of Street Cleaning, Borough of Richmond;

$1,177.25 for the increases in wages of Plumbers and Tinsmiths in the Department of Street Cleaning;

$2,743.58 for the purpose of meeting a deficiency in the salaries account of the Fire Department for 1911;

$319.50 for the increase in salary of the Foreman of Plumbers, Bureau of Public Buildings and Offices, Borough of Queens; and a

Report of the Commissioner of Parks, Boroughs of Brooklyn and Queens, in response to resolution adopted April 13, 1911, requesting the Commissioner to furnish the Board with certain information concerning the construction of a lagoon in Dyker Beach Park, Brooklyn.

Which were referred to the Comptroller.

The Secretary presented communications as follows:

(3) from T. Mortimer Lloyd, M. D., of 125 Pierrepont street, Brooklyn; Miss Marion Libby, Hotel St. George, Brooklyn, and C. S. Davis, of 80 Willoughby street, Brooklyn, urging the Board to grant appropriations to the Departments of Health and Public Charities for increased hospital facilities for tuberculosis cases:

From the Public Service Commission for the First District, requesting the additional issue of $100,000 corporate stock for the acquisition of real estate or interest therein necessary for the construction and operation of the Manhattan-Bronx Rapid Transit Railroad:

From the President of the Borough of The Bronx, transmitting schedule of employees whose time will be charged either wholly or in part, against corporate stock.

Which were referred to the Corporate Stock Budget Committee, consisting of the Comptroller, the President of the Board of Aldermen and the President of the Borough of Manhattan.

The Secretary presented a communication from the President of the Borough of The Bronx, relative to adding the position of Estimator to the force of the Building Bureau in each Borough.

Which was ordered filed.

The Secretary presented communications relative to additional rapid transit railways, as follows:

From the Secretary of the City Club of New York, transmitting report of the Transit Committee of the City Club on a proposal for the construction of future subways capable of accommodating trains composed of twenty cars or more;

From the United Real Estate Owners' Associations of The City of New York, containing copy of resolution adopted by said association on June 27, 1911, "demanding that the Board of Estimate and Apportionment and the Public Service Commission drop all negotiations with the existing transit corporations and proceed to immediately award the contracts to the successful bidders of last October";

From Henry S. Wood, submitting proposition for the construction of the proposed 8th avenue subway, etc.; and a

Protest of numerous property owners and merchants of New York against the erection of a third track for the elevated railway system through the Bowery.

Which were referred to the Committee of The Whole.

The Secretary presented the following communication from the Fire Commissioner requesting authority to award a contract for terminal posts to J. F. Pennell, other than the lowest bidder, for $20,177.10, together with a report of the Comptroller. to whom this application was referred June 29, 1911, recommending that said request be denied:

Fire Department of the City of New York, Office of the Commissioner, June 9, 1911.

Hon. William A. Prendergast, *Comptroller:*

Sir—At public letting on May 25, 1911, bids were submitted for furnishing terminal posts and terminal boxes in accordance with Fire Department specifications approved by the Board of Estimate and Apportionment by the following bidders:

Name.	Terminal Posts.	Terminal Boxes.
J. L. Mott Iron Works	$21,091 25	$4,950 00
Trenton Foundry and Machine Company	19,461 25	....
J. F. Pennell	20,177 10	4,716 00
Frederick Pearce Company	23,479 00	4,385 00
Western Electric Company	....	4,506 00

The bids were referred to Mr. J. C. Rennard, electrical engineer, for his recommendation, and Mr. Rennard's report submitted thereon is as follows:

"May 29, 1911.

"In connection with the proposals recently opened for furnishing fire alarm signal and lamp posts and terminal boxes for installation in the Boroughs of Manhattan and Brooklyn under C-F D-3B and C-F D-22, I beg to report as follows:

"The lowest bid for the fire alarm signal and lamp-posts was submitted by the Trenton Foundry and Machine Company in the amount of $19,461.25 for the five hundred posts to be furnished. The next higher bid, in the amount of $20,177.10, was by J. F. Pennell, of 45 Broadway. This bid being, therefore, $715.85 higher than the lowest bid submitted.

"I believe it to be for the best interests of the City to award the contract to J. F. Pennell at the additional cost of $715.85 for the reason that I do not believe the Trenton Foundry and Machine Company will furnish satisfactory posts or make satisfactory deliveries.

"E. H. Jonson, who has recently become Vice-President and General Manager of the Trenton Foundry and Machine Company, signed a contract under his own name November 12, 1910, for furnishing a certain number of fire alarm box keyless doors and fire alarm box shells to the Department, delivery to be made by December 31. The time for the delivery of this material was twice extended, the last extension expiring February 10, 1911. This material has not yet been satisfactorily completed.

"On December 28, an open market order for frames for fire alarm signal posts was placed with E. H. Jonson, in the amount of $120, the frames to be delivered in thirty days. At the expiration of this time Mr. Jonson was communicated with in reference to delivery and stated that he had never received the order for the material, although such order was duly mailed. A duplicate order was sent him March 2, 1911, and on April 18 this order was canceled for non-delivery of material.

"On March 14, an order was given to the Trenton Foundry and Machine Company for furnishing twenty "Old Style" frames for fire alarm lamp-posts, in the amount of $149, delivery to be made in thirty days from receipt of order. No deliveries have yet been made on this contract, although the Department has repeatedly been advised by Mr. Jonson that deliveries would be made in a few days.

"Considerable material offered by Mr. Jonson on his contract, dated November 12, 1910, was rejected on account of poor workmanship and poor material.

"The lowest bidder for the five hundred terminal boxes was the Frederick Pearce Company, in the amount of $4,385. This firm have always satisfactorily fulfilled their contracts with the Department and I recommend that the order for the terminal boxes be placed with them.

"Should you approve my recommendation to award the contract for the fire alarm signal and lamp-posts to J. F. Pennell, the total expenditure for the terminal posts and boxes would be $24,562.10, an amount of $562.10 greater than the estimated cost when specifications were approved by the Board of Estimate and Apportionment for this work."

"June 9, 1911.

"Since the preceding report was submitted the Trenton Foundry and Machine Company delivered on June 7 twenty "Old Style" frames, referred to above, for which an order was given them on March 14. These frames have been inspected and are found to be not in accordance with sample, defective in several particulars, unsuitable for use and have been rejected."

I have approved the recommendations contained in the report for the reasons stated, and respectfully request authority to award the contract for the terminal posts to J. F. Pennell, the next lowest bidder, in the amount of $20,177.10, the amount of his estimate, and for the terminal boxes to the Frederick Pearce Company, the lowest bidder, in the amount of $4,385.

In approving the specifications for this work the Board of Estimate and Apportionment, on March 30, authorized an expenditure of not exceeding $24,000. As this amount is not sufficient, I request that the resolution be amended by increasing the authorized expenditure by $562.10, a total of $24,562.10, of which $14,737.26 should be changed C-FD-3B and $9,824.84 to C-FD-22.

The early action of the Board of Estimate and Apportionment in this matter is requested, as this equipment is necessary for the maintenance of the fire alarm telegraph system. Respectfully JOS. JOHNSON, Fire Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In a communication dated June 9, 1911, the Fire Commissioner requested authority to award a contract for terminal posts to J. F. Pennell, whose bid of $20,177.10 was next to the lowest, but $715.85 higher than the lowest, when bids were opened on May 25, 1911.

The low bid was $19,461.25, and was submitted by the Trenton Foundry and Machine Compaany.

The Fire Commissioner gives as his reasons for wishing to reject this low bid and award the contract to the next lowest bidder a statement, in the form of a report from Mr. J. C. Rennard, Electrical Engineer in the Department, which, in part, reads as follows:

"I believe it to be for the best interests of the City to award the contract to J. F. Pennell at the additional cost of $715.85 for the reason that I do not believe the Trenton Foundry and Machine Company will furnish satisfactory posts or make satisfactory deliveries.

"E. H. Jonson, who has recently become Vice-President and General Manager of the Trenton Foundry and Machine Company, signed a contract under his own name, November 12, 1910, for furnishing a certain number of fire alarm box keyless doors and fire alarm box shells to the Department, delivery to be made by December 31. The time for the delivery of this material was twice extended, the last extension expiring February 10, 1911. This material has not yet been satisfactorily completed.

"On December 28 an open market order for frames for fire alarm signal posts was placed with E. H. Jonson, in the amount of $120, the frames to be delivered in thirty days. At the expiration of this time, Mr. Jonson was communicated with in reference to delivery and stated that he had never received the order for the material, although such order was duly maailed. A duplicate order was sent him March 2, 1911, and on Aprirl 18 this order was cancelled for non-delivery of material.

"On March 14 an order was given to the Trenton Foundry and Machine Company for furnishing twenty 'Old Style' frames for fire alarm lamp posts, in the amount of $149.00, delivery to be made in thirty days from receipt of order. No deliveries have yet been made on this contract, although the Department has repeatedly been advised by Mr. Jonson that deliveries would be made in a few days.

"Considerable material offered by Mr. Jonson on his contract, dated November 12, 1910, was rejected on account of poor workmanship and poor material."

The Fire Commissioner noted in his communication that since Mr. Rennard's report was submitted, the twenty "Old Style" frames, referred to in the report, had been delivered on June 7, and that the frames had been inspected and found to be not in accordance with sample, defective in several particulars and unsuitable for use. On the day the frames were delivered they were rejected and the order cancelled.

It will be noted that the only complaint against the Trenton Foundry and Machine Company is that based on the open market order for twenty "Old Style" frames to cost $149. All other complaints are directed against E. H. Jonson, who has recently become Vice-President and General Manager of the Trenton Foundry and Machine Compaany.

The Trenton Foundry and Machine Company made a written offer to make entirely new castings or to change the frames delivered on June 7 to meet the requirements of the Inspector of the Fire Department.

However, the company had no opportunity to correct any defects in the castings, as the order had already been cancelled and a new order given to another concern.

The Department of Finance has made a very thorough investigation of this matter. I find that the Fire Commissioner is seeking to reject the low bid of a company which has a plant in operation in Trenton, N. J., and to award the contract, amounting to more than $20,000, to a man who has no foundry or manufacturing plant whatsoever. The only evidence submitted by the Fire Commissioner to justify this action is the unsatisfactory work performed on the small order for frames referred to above.

The Trenton Foundry and Machine Company has been the lowest bidder on two biddings for this same contract for terminal posts. Bids were opened the first time on May 8, 1911. At the same time bids were opened for terminal boxes. Four bids were received. Two bids were for boxes only, one for both boxes and posts, and one for posts only. The two bids for posts were as follows:

Trenton Foundry and Machine Company	$20,241 25
J. L. Mott Iron Works	24,421 00

The Trenton Foundry and Machine Company was the low bidder on posts by more than $4,000, but it did not get the contract on the ground that the J. L. Mott Iron Works bid was informal, in that it proposed to finish delivering the posts within 200 working days, whereas the specifications called for 160 working days.

The bids of the Trenton Foundry and Machine Company were in due form and in accordance with the specifications.

The Trenton Company's bid was thrown out because the Mott Company's bid was adjudged informal, and, according to Mr. Rennard, it was not considered advisable to let the contract on this work on only one bid.

(That it was not the practice in the Fire Department to re-advertise when only one bid was received was made an evident fact at that time by the request before the Board of Estimate and Apportionment made by the then Fire Commissioner to award a contract for more than $5,000 in excess of the approved estimate of cost in a case where only one bid was received. This was the matter of two aerial hook and ladder trucks of self-propelling design. The Webb Motor Fire Apparatus Company was the only bidder. It bid $25,200 on the two trucks. The Board of Estimate and Apportionment had approved an estimate of cost of only $20,000 for the two trucks. Instead of throwing out the bid on the ground that it was the only one received, the Fire Commissioner requested permission to exceed the approved estimate of cost and award the contract to the Webb Company.)

The contract for terminal posts and terminal boxes was re-advertised and bids were opened again on May 25, 1911. At that time there were four bidders for the posts, as follows:

J. L. Mott Iron Works	$21,091 25
Trenton Foundry and Machine Company	19,461 25
J. F. Pennell	20,177 10
Frederick Pearce Company	23,479 00

It should be noted that on the second advertising the specification regarding the time of delivery was changed to 200 days, the time stated in the so-called informal bid of J. L. Mott Iron Works, submitted May 8, 1911.

Four days after the second opening of bids Mr. Rennard made his report, recommending the rejection of the Trenton Foundry and Machine Compaany bid and the award of the contract to J. F. Pennell. That report was made about two weeks before the rejection of the twenty "Old Style" frames, which rejection is now urged as one of the reasons why the contract should not go to the Trenton Foundry and Machine Company.

Mr. Rennard's report is directed chiefly against Mr. E. H. Jonson individually. He cites two instances of small orders in which unsatisfactory deliveries were made. Mr. Jonson states that in these two cases he accepted open market orders and turned them over to the H. E. Boucher Manufacturing Company, of 20 Fulton street, Manhattan. At that time Mr. Jonson had no plant of his own, and had to rely upon the foundries and manufactories with which he had no immediate connection.

It is a conceded fact that Mr. Jonson had nothing to do with the work of manufacture in either of these cases, except that he turned the orders over to the Boucher Company. Even if it were shown that Mr. Jonson as an individual had failed to make prompt deliveries on open market orders, that could hardly be regarded as a valid reason for rejecting the bid of the company with which Mr. Jonson has only recently become connected. The Trenton Foundry and Machine Company could not fairly be blamed for the business conduct of one of its officers before that officer had any connection with the company. However, I have caused an investigation to be made of the business career of Mr. Jonson, and find that, for a long period, while operating as Julius Jonson's Sons, he had large contracts with some of the most important corporations in this country.

I have received a communication from the Standard Underground Cable Company, signed C. J. Marsh, General Manager, Eastern and Northeastern Sales Department, in regard to that company's experience with Mr. Jonson before and since he became connected with the Trenton Foundry and Machine Company. The communication gives a list of the orders placed with the Trenton company since Mr. Jonson became its Vice-President and General Manager. In every case deliveries were made on time, or ahead of time. In fact, in every case, except one, shipments were made ahead of the time promised. The Standard Underground Cable Company closes its letter, as follows:

"This company has been placing orders, and many of them, with E. H. Jonson, and earlier with his father, covering a period of twenty to twenty-five years, and we are pleased to say that we have not one word of complaint to make. The writer, also, about fifteen or sixteen years ago, or prior to his connection with this company, had considerable business transactions with Mr. E. H. Jonson and his father, as Treasurer and Manager of the Brush Electric Illuminating Company, 210 Elizabeth street, this City, and all of those transactions, as I recall them, were entirely satisfactory both as to material furnished and delivery of same."

There appears to be no good reason why the bid of the Trenton Foundry and Machine Company should be rejected. Even if the Trenton Foundry and Machine Company were not well equipped with a good plant, it would seem to be bad business policy to take a contract from the lowest bidder and give it to the next to the lowest bidder unless there were very strong reasons to justify such a course.

In this case if the request of the Fire Commissioner were granted, the contract would be taken from a company with a plant in operation and given to a broker in iron and steel castings who has no plant at all. Mr. Pennell, the next to the lowest bidder, states that if the contract is awarded to him he will have the work done by the Kuebler Foundries, Incorporated, of Easton, Pa. The Kuebler Company is reported to be a highly reputable and responsible concern, but the City's contract would not be with that company but with Mr. Pennell.

The Trenton Foundry and Machine Company has shown a willingness to do its utmost to guarantee the City against any loss in case the company should be awarded the contract. The company, in a communication dated June 17, states that it would be glad to furnish not only the $10,000 bond required, but a bond equal in amount to the bid of J. F. Pennell. If this offer were accepted, the contract would be secured by a bond of $715.85 in excess of the amount of the contract.

I recommend that the request of the Fire Commissioner be denied.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the request of the Fire Commissioner, contained in a communication dated June 9, 1911, for authority to award the contract for furnishing terminal posts to J. F. Pennell, at his bid of twenty thousand one hundred and seventy-seven dollars and ten cents ($20,177.10), being next to the lowest bidder, be and the same is hereby denied.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Docks and Ferries requesting and report of the Comptroller, recommending the modification of Salary Schedule No. 194, supporting the appropriation made in the Budget for the year 1911, for said Department, by changing the number of working days for pipefitters from 312 to 365, and of painters from 365 to 312:

Department of Docks and Ferries, City of New York, Pier "A," North River, New York, June 19, 1911.

Hon. William J. Gaynor, *Mayor and Chairman of the Board of Estimate and Apportionment:*

Sir—It is necessary to have a modification of Code 194—Mechanical and Labor Force, engaged on repairs—by increasing the number of days of Pipefitters from 312 to 365 and by reducing the five Painters from 365 to 312 days. This change is made necessary for the reason that the Pipefitters are employed every day in the year, Sundays being the most important day their services are required. The Pipefitters were originally in the schedule for 365 days but the number of days were reduced to 312 when their pay was increased from $5.00 to $5.50 per day, the change being made in order to render unnecessary the issue of revenue bonds to meet the increased compensation.

The Painters have not worked on Sundays since the beginning of this year.

I respectfully request that the 1911 Budget be modified as above.

Yours respectfully, CALVIN TOMKINS, Commissioner of Docks.

Department of Finance, City of New York, Bureau of Municipal Invesigation and Statistics, June 27, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 19, 1911, the Commissioner of Docks requested modification of Schedule No. 194, Bureau of Ferries, Maintenance, Mechanical and Labor Force Engaged on Repairs, Wages, Regular Employees, supporting appropriations for the Department of Docks and Ferries for the year 1911. In connection therewith, I report as follows:

It is proposed to increase the number of working days for Pipe Fitters from 312 to 365, by decreasing Painters from 365 to 312 days. The Commissioner states that the change is necessary as Pipe Fitters are employed every day in the week, while Painters are not.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
194.	Pipe Fitters, 3 at $5.50 per diem, 312 days	$5,148 00	....	$2,904 00	....
	Pipe Fitters, 3 at $5.50 per diem, 365 days	....	$6,022 50	....	$3,399 00
	Painters, 5 at $4 per diem, 365 days	7,300 00	....	4,120 00	....
	Painters, 5 at $4 per diem, 312 days	....	6,240 00	....	3,520 00
	Unassigned	....	185 50	....	105 00
		$12,448 00	$12,448 00	$7,024 00	$7,024 00

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Department of Docks and Ferries for the year 1911, to become effective as of June 9, 1911, as follows:

Department of Docks and Ferries.

Bureau of Ferries, Maintenance, Mechanical and Labor Force Engaged on Repairs—

194. Wages, Regular Employees:

Pipefitters, 3 at $5.50 per day (365 days)	$6,022 50
Pipefitters' Helpers, 2 at $3 per day (365 days)	2,190 00
Ship Carpenters, 4 at $4 per day (365 days)	5,840 00
Dock Builders, 8 at $3.50 per day (365 days)	10,220 00
Foreman Dock Builder, 1 at $4.50 per day (365 days)	1,642 50
Machinists, 7 at $4.50 per day (365 days)	11,497 50
Machinists' Helpers, 6 at $3 per day (365 days)	6,570 00
Foreman Wireman	1,500 00
Wireman, 1 at $4.50 per day (365 days)	1,642 50
Carpenters, 3 at $4.80 per day (365 days)	5,256 00
Foreman House Painter, 1 at $5 per day (365 days)	1,825 00
Painters, 5 at $4 per day (312 days)	6,240 00
Letterer, 1 at $4 per day (365 days)	1,460 00
Riggers, 2 at $3.50 per day (365 days)	2,555 00
Blacksmith, 1 at $4.50 per day (365 days)	1,642 50
Blacksmith's Helper, 1 at $3 per day (365 days)	1,095 00
Tinsmith and Roofer, 1 at $4.75 per day (365 days)	1,733 75
Unassigned	421 25
	$69,353 50

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Secretary of the Board of Municipal Justices requesting, and report of the Comptroller recommending, the modification of salary schedules Nos. 1429 and 1435, supporting the appropriation made in the Budget for the year 1911, for the Municipal Courts, providing for the transfer of an Assistant Clerk at $3,000 per annum from the Second District to the Fifth District Court, Manhattan, involving the transfer of $1,500:

Municipal Court of the City of New York, Board of Justices, New York, June 12, 1911.

Joseph Haag, Esq., Secretary Board of Estimate and Apportionment:

Dear Sir—Pursuant to a resolution adopted at a meeting of the Board of Justices, Municipal Court, City of New York, held on Monday, June 5, 1911, application is hereby made to the Board of Estimate and Apportionment for the modification of the Schedule of Salaries accompanying the Budget for the year 1911, by increasing the number of Assistant Clerks in the Fifth District Municipal Court, Borough of Manhattan and decreasing the number of Assistant Clerks in the Second District Municipal Court of the same Borough by one incumbent, said change to become operative on and after July 1, 1911.

In order to meet the change in schedule, request is also made for the transfer of the sum of fifteen hundred ($1,500) dollars from the appropriation of salaries for the Second District Municipal Court, to that of salaries for the Fifth District Court, Borough of Manhattan.

The purpose of making this request is to provide for the salary of an Assistant Clerk who has been transferred from the Second District to the Fifth District Municipal Court, Borough of Manhattan. Respectfully yours,

JAMES J. DEVLIN, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 27, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 12, 1911, the Secretary of the Board of Justices of the Municipal Courts requested the modification of two salary schedules supporting appropriations to the courts for the year 1911, and involving the transfer of $1,500. In connection therewith, I report as follows:

The modification provides for the transfer, without change in compensation, of an Assistant Clerk from the Second District to the Fifth District Municipal Court, Manhattan. The Board of Justices has approved the transfer. The $1,500 transfer is for the six months from July 1 to December 31, 1911.

The following table shows the changes in detail:

Account No.	Schedule Line.	Schedule Transfer. Decrease.	Schedule Transfer. Increase.	Cash Transfer. Decrease.	Cash Transfer. Increase.
1429.	Assistant Clerks, 10 at $3,000.	$3,000 00	....	$1,500 00	....
1435.	Assistant Clerks, 2 at $3,000..	....	$3,000 00	....	$1,500 00

I recommend that the request be approved by the adoption of the attached resolutions. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Municipal Courts, City of New York, for the year 1911, as follows:

Municipal Courts, City of New York.

Borough of Manhattan, Second District Court—

1429. Salaries:

Justices, 4 at $8,000	$32,000 00
Clerk	3,000 00
Deputy Clerk	3,000 00
Assistant Clerks, 9 at $3,000	27,000 00
Stenographers, 4 at $2,000	8,000 00
Interpreters, 5 at $1,500	7,500 00
Attendants, 16 at $1,500	24,000 00
	$104,500 00

Borough of Manhattan, Fifth District Court—

1435. Salaries:

Justices, 3 at $8,000	$24,000 00
Clerk	3,000 00
Deputy Clerk	3,000 00
Assistant Clerks, 3 at $3,000	9,000 00
Stenographers, 3 at $2,000	6,000 00
Interpreter	1,500 00
Attendants, 5 at $1,500	7,500 00
	$54,000 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Municipal Courts, City of New York, for the year 1911, as follows:

From

Borough of Manhattan, Second District Court—

1429. Salaries $1,500 00

To

Borough of Manhattan, Fifth District Court—

1435. Salaries $1,500 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Fire Department requesting, and report of the Comptroller recommending, the modification of Salary Schedules Nos. 962 and 968 supporting the appropriation made in the Budget for the year 1911, for said Department, providing for the elimination of the position of Superintendent of Buildings at $3,000 per annum in the Bureau of Repairs and Supplies, Manhattan, The Bronx and Richmond, and adding two Inspectors of Blasting at $1,500 each per annum in the Bureau of Combustibles, involving the transfer of $1,500, said modification to take effect as of July 1, 1911:

Fire Department of The City of New York, Office of the Commissioner, June 9, 1911.

Hon. William J. Gaynor, *Mayor, and Chairman Board of Estimate and Apportionment:*

Sir—I have the honor to request revision and modification of schedules supporting appropriations made to this Department, Boroughs of Manhattan, The Bronx and Richmond, for the current year, entitled "962, Bureau of Combustibles, Salaries," and "968, Bureau of Repairs and Supplies, Salaries," by incorporating in the first mentioned provision for "Inspectors of Blasting, 2 at $1,500," and eliminating from the last mentioned the position of "Superintendent of Buildings, $3,000"; also that the necessary transfer of appropriation be made in connection therewith.

In compliance with request of this Department the Board of Estimate and Apportionment, on May 4, 1911, adopted a resolution recommending the establishment in this Department of the position of Inspector of Blasting for two incumbents at $1,500 per annum each. This resolution was concurred in by the Board of Aldermen May 16, 1911, and became effective without the approval or disapproval of the Mayor June 6, 1911. No additional expense is involved, as the position of Superintendent of Buildings has been vacant since December 1, 1910, and it is not the purpose to fill the same. Respectfully, JOS. JOHNSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 28, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 9, 1911, the Fire Commissioner requested modifications of two salary schedules supporting appropriations to his Department for the year 1911, involving the transfer of $1,500. In connection therewith, I report as follows:

It is proposed to eliminate the position of Superintendent of Buildings, at $3,000 per annum, in No. 968, Bureau of Repairs and Supplies, Manhattan, The Bronx and Richmond, and add two Inspectors of Blasting, at $1,500 each, in No. 962, Bureau of Combustibles, Manhattan, The Bronx and Richmond. It is stated that the Inspectors of Blasting are needed for the inspection of depositories of blasting explosives and the supervision of blasting operations.

The following table shows the changes in detail:

Account No.	Schedule Line.	Schedule Transfer. Decrease.	Schedule Transfer. Increase.	Cash Transfer. Decrease.	Cash Transfer. Increase.
962.	Inspectors of Blasting, 2 at $1,500	....	$3,000 00	....	$1,500 00
968.	Superintendent of Buildings	$3,000 00	....	$1,500 00	....

I recommend the adoption of the attached resolutions approving the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Fire Department for the year 1911, to be effective as of July 1, 1911, as follows:

Fire Department.

General Administration, Manhattan, The Bronx and Richmond, Bureau of Combustibles—

962. Salaries:

Inspector of Combustibles	$3,000 00
Cashier	2,000 00
Oil Surveyors, 16 at $1,500	24,000 00
Inspectors of Blasting, 2 at $1,500	3,000 00
Stenographer and Typewriter	1,500 00

Clerk	1,500 00
Clerk	1,200 00
	$36,200 00

Bureau of Repairs and Supplies—

968. Salaries:

Clerk	$2,100 00
Clerk	1,800 00
Clerk	1,650 00
Clerks, 3 at $1,200	3,600 00
Clerks, 4 at $900	3,600 00
Stenographer and Typewriter	1,200 00
Stenographer and Typewriter	1,050 00
Storekeeper	1,500 00
	$16,500 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Fire Department for the year 1911, as follows:

From

General Administration, Manhattan, The Bronx and Richmond, Bureau of Repairs and Supplies—

968. Salaries	$1,500 00

To

General Administration, Manhattan, The Bronx and Richmond, Bureau of Combustibles—

962. Salaries	$1,500 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the President of the Borough of Richmond requesting, and report of the Comptroller relative to, the modification of Salary Schedule No. 1921, supporting the appropriation made in the Budget for the year 1911, for the office of said Borough President, to take effect as of July 1, 1911, providing for the increase in salary of the Assistant Superintendent of the Bureau of Street Cleaning from $1,500 to $1,800 per annum, for the elimination of a Clerk at $1,200 per annum and the substitution of a Typewriting Copyist at $900 per annum:

The City of New York, Office of the President of the Borough of Richmond, Borough Hall, New Brighton, New York City, June 16, 1911.

Board of Estimate and Apportionment, 277 Broadway, New York:

Dear Sirs—I would request a modification of Salary Schedule No. 1921, supporting the appropriation made in the Budget for the year 1911, office of the President of the Borough of Richmond, Bureau of Street Cleaning, fixing the salary of Assistant Superintendent at $1,800 per annum, rescinding the title of Clerk at $1,200 per annum, and replacing it by Typewriter Copyist at $900 per annum. The foregoing changes involve no additional appropriation.

In explanation of the modification requested I would state that on May 4, 1911, the Board of Estimate and Apportionment established the grade of Assistant Superintendent of Street Cleaning for one incumbent at $1,800 per annum, and the Board of Aldermen approved and concurred in the action of the Board of Estimate on June 13, 1911 (City Record, page 5238, issue of June 15, 1911). It will not be possible to promote the Assistant Superintendent to the new grade and appoint a Typewriter Copyist from the Civil Service list until the foregoing modification in salary schedule is approved, and as the time is near at hand when the Board will adjourn for the summer vacation, I would ask, if possible that the modifications be made before the final meeting in July. Yours truly,

GEORGE CROMWELL, President of the Borough.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 27, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 16, 1911, the President of the Borough of Richmond requested modification of the 1911 salary schedule for the Bureau of Street Cleaning, Administration. In connection therewith I report as follows:

On June 13, 1911, the Board of Aldermen approved of the establishment of the grade of position of Assistant Superintendent, at $1,800 per annum. It is proposed, therefore, to provide for an increase for the present incumbent from the rate of $1,500. The $300 necessary for the increase is to be provided by striking out a Clerk, at $1,200, and substituting a Typewriting Copyist, at $900 per annum. The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Increase.	Decrease.	Increase.	Decrease.
1921.	Assistant Superintendent, at $1,500	....	$1,500 00	....	$750 00
	Assistant Superintendent, at $1,800	$1,800 00	....	$900 00	....
	Clerk, 1 at $1,200	....	1,200 00	....	600 00
	Typewriting Copyist, at $900.	900 00	....	450 00	....
		$2,700 00	$2,700 00	$1,350 00	$1,350 00

The attached resolution, if adopted, will grant the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the office of the President of the Borough of Richmond, for the year 1911, to take effect July 1, as follows:

President, Borough of Richmond.

Bureau of Street Cleaning, Administration—

1921. Salaries:

Assistant Engineer (Acting Superintendent)	$3,000 00
Assistant Superintendent	1,800 00
Clerk	1,800 00
Clerk	1,650 00
Clerk	1,200 00
Typewriting Copyist	900 00
	$10,350 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Bellevue and Allied Hospitals requesting, and report of the Comptroller recommending, the modification of Salary Schedules Nos. 215, 217, 219, 221 and 226, supporting the appropriation made in the Budget for the year 1911, said Department, providing for an Assistant Superintendent of Training Schools at $1,200 per annum; for the elimination of a Clerk at $900 per annum; for the transfer of a Trained Nurse at $600 per annum, and of a Hospital Helper at $180 per annum from one schedule to another, and for changing the title of a Hospital Helper at $480 per annum to Laundress at the same rate, involving transfers of $525 and $455, said modification to be effective as of June 1, 1911:

Bellevue and Allied Hospitals, Office of the Board of Trustees, 1st Avenue and 26th Street, New York, June 14, 1911.

Hon. Joseph Haag, *Secretary, Board of Estimate and Apportionment,* 277 Broadway,
New York City:

Sir—The Trustees of Bellevue and Allied Hospitals have the honor to request the Board of Estimate and Apportionment to amend the schedules of salaries and wages of this Department for the year 1911 in accordance with the schedules attached. The changes therein do not involve any additional expenditure and are made to meet the present needs of the Department. The principal change is in the utilization of $900 in a vacant clerkship, together with an unassigned balance of $300, to provide for an Assistant Superintendent of Training School, who is to take charge of the new school for Hospital Attendants which is now being organized. The place of Assistant Superintendent was originally provided in the Budget for 1911, but was temporarily discontinued in March.

To meet these modifications it is requested that transfers of funds be made as follows:

From	
215. Salaries	$900 00
To	
217. Salaries	$900 00
From	
219. Wages, Temporary Employees	$780 00
To	
221. Wages, Temporary Employees	$180 00
226. Wages, Temporary Employees	600 00
	$780 00

Respectfully, J. K. PAULDING, Secretary, Board of Trustees.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 28, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 14, 1911, the Board of Trustees of Bellevue and Allied Hospitals requested modification of five schedules of salaries and wages in the Department for the year 1911, involving the transfer of $980. I report thereon as follows:

In No. 217, Bellevue Hospital, Operation and Maintenance, Salaries, an Assistant Superintendent of Training Schools, at $1,200 per annum, is asked for, to have charge of the new school for Hosiptal Attendants. The necessary funds are to be provided by dropping a Clerk, at $900 per annum, in No. 215, Bellevue Hospital, Administration, and by transfer of $300 from an unassigned balance in No. 217.

It is proposed to transfer a Trained Nurse, at $600 per annum, from No. 219, Bellevue Hospital, Operation and Maintenance, Wages, Temporary Employees, to No. 226, Gouverneur Hospital, Operation and Maintenance. The Nurse is employed on the Tuberculosis Day Camp "Westfield," at Gouverneur Hospital. A Laundress on the payroll as a Hospital Helper, at $480 per annum, in No. 219, is to be given the proper title. A Hospital Helper, at $180 per annum is to be transferred from No. 219 to No. 221, Bellevue Hospital, Nurses' Residence.

The following table shows the changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
215.	Clerk (Employment Agent) at $900	$900 00	....	$525 00	....
217.	Assistant Superintendent of Training Schools, at $1,200	....	$1,200 00	....	$700 00
	Unassigned balance	300 00	....	175 00	....
219.	Trained Nurses, at $70,600	600 00	....	350 00	....
	Laundresses, at $5,880	....	480 00	....	280 00
	Hospital Helper, at $90,500	660 00	....	385 00	....
221.	Hospital Helpers, at $5,988	....	180 00	....	105 00
226.	Trained Nurses, at $10,226	....	600 00	....	350 00
		$2,460 00	$2,460 00	$1,435 00	$1,435 00

No increase in compensation is involved. I recommend that the request be granted by the adoption of the attached resolution.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Department of Bellevue and Allied Hospitals, for the year 1911, to become effective as of June 1, 1911, as follows:

Department of Bellevue and Allied Hospitals.

Bellevue Hospital, Administration—

215. Salaries:

Assistant Medical Superintendent	$3,500 00
Assistant Medical Superintendent	2,500 00
Assistant Superintendent	2,000 00
Chaplains, 4 at $450	1,800 00
Clerk	600 00
Hospital Clerks, 2 at $900	1,800 00
Hospital Clerk	720 00
Hospital Clerks, 2 at $600	1,200 00
Hospital Clerk	540 00
Hospital Clerk	480 00
Typewriting Copyist	600 00
Investigator	1,200 00
Trained Nurse (social service)	900 00
	$17,840 00

Bellevue Hospital, Operation and Maintenance—

217. Salaries:

Resident Physician	$4,000 00
Assistant Resident Physician	1,500 00
Assistant Alienists, 2 at $2,100	4,200 00
Pathologist	1,800 00
Pathologists, 2 at $1,500	3,000 00
Admitting Physicians, 3 at $1,000	3,000 00
Physicians to Out-Patients, 3 at $600	1,800 00
Physicians to Out-Patients, 5 at $300	1,500 00
X-Ray Photographer	1,800 00
Instructors in Anæsthesia, 4 at $750	3,000 00
Apothecary	1,200 00
Apothecaries, 2 at $900	1,800 00
Stenographers, 2 at $900	1,800 00
Clerk	900 00
Hospital Clerks, 2 at $480	960 00
Superintendent of Training School	1,800 00
Assistant Superintendent of Training Schools	1,200 00
Interpreter	1,000 00
Inspector	720 00
Unassigned balance	10 00
	$36,990 00

219. Wages, Temporary Employees:

Trained Nurses	$70,000 00
Pupil Nurses	17,328 00
Head Pupil Nurses	3,000 00
Orderlies	1,320 00
Seamstresses	1,464 00
Cooks	4,680 00
Waitresses	2,940 00
Waiters	1,020 00
Laundrymen	3,000 00
Laundresses	6,360 00
Hospital Helpers	89,840 00
	$200,952 00

Bellevue Hospital, Nurses' Residence—

221. Wages, Temporary Employees:

Laundresses	$2,952 00
Waitresses	2,328 00
Hospital Helpers	6,168 00
	$11,448 00

Gouverneur Hospital, Operation and Maintenance—

226. Wages, Temporary Employees:

Trained Nurses	$10,826 00
Pupil Nurses	4,752 00
Cooks	1,812 00
Laundresses	1,320 00
Hospital Helpers	15,960 00
	$34,670 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Department of Bellevue and Allied Hospitals for the year 1911, as follows:

From

215. Bellevue Hospital, Administration, Salaries	$525 00

To

217. Bellevue Hospital, Operation and Maintenance, Salaries	$525 00

Which was adopted by the following vote:

Affirmative—The Mayor, The Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Department of Bellevue and Allied Hospitals for the year 1911, as follows:

From

219. Bellevue Hospital, Operation and Maintenance, Wages, Temporary Employees	$455 00

To

221. Bellevue Hospital, Nurses' Residence, Wages, Temporary Employees	$105 00
226. Gouverneur Hospital, Operation and Maintenance, Wages, Temporary Employees	350 00

Which was adopted by the following vote:

Affirmative—The Mayor, The Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a report of the Comptroller recommending that the request of the Board of Aldermen for an issue of $7,235.74 special revenue bonds (subdivision 8, section 188 of the Charter), "in lieu of the unassigned balance of the same amount in Wages, Regular Employees, Account 1829, President of the Borough of Queens, Bureau of Highways, Maintenance of Highways, Budget for 1911," to provide for the payment of salaries of six Foremen assigned as General Foremen in the Bureau of Highways, be disapproved, for the reason that an allowance was made in the Budget for 1911, Account 1830, for the salaries of these six Foremen, which also provides for a ratio of 1 to 7½ for Foremen of Laborers, Bureau of Highways, Borough of Queens, whereas the ratio in other Boroughs is about 1 Foreman to 9 Laborers.

Which was laid over.

(On June 8, 1911, the above resolution was referred to the Comptroller.)

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Comptroller recommending, the issue of $1,500 special revenue bonds (subdivision 8, section 188 of the Charter), to provide for the employment of Temporary Copyists by the County Clerk of Richmond County; also recommending approval of a schedule for said fund:

(On April 6, 1911, the resolution of the Board of Aldermen, requesting the above appropriation, was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of one thousand five hundred dollars ($1,500), the proceeds whereof to be used by the County Clerk of Richmond County for the purpose of employing Temporary Copyists.

Adopted by the Board of Aldermen March 14, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor March 28, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, May 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a resolution of the Board of Aldermen on March 14, 1911, requesting special revenue bonds to the amount of $1,500, the proceeds to be used by the County Clerk of Richmond County for the purpose of employing Temporary Copyists, I report as follows:

The $1,500 is estimated to be necessary to bring the recording in the office up-to-date. Chapter 513 of the Laws of 1909 changed the office from a fee to a salary basis. Up to January 1, 1910, when the law become operative, the recording was complete. Since that date the work has fallen in arrears to the extent that at present deeds and mortgages to the number approximately of 2,000 are uncopied. It therefore appears that coincident with the establishment of the office on a salary basis, the current work of copying has fallen steadily behind.

In the course of an examination under the direction of the Comptroller, a test was made by the County Clerk of the efficiency of the Clerks copying record deeds, mortgages, etc. The test indicated that the number of Clerks is sufficient for the current work, but not enough to lessen the amount in arrears.

Those who have filed and paid fees for recording instruments, deeds, mortgages, etc., are entitled to a prompt return of the papers and office delays should not operate to their disadvantage. It would therefore appear that action should at once be taken to clear the office of the arrears. The uncopied instruments approximate 30,000 folios and the $1,500 would be sufficient. This is estimated on compensation at the rate of 5 cents per folio, the rate for similar work in the office of the Register of Kings County.

I recommend the adoption of the attached resolutions granting the request and approving a schedule for the fund. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on March 14, 1911, requesting an issue of special revenue bonds in the sum of one thousand five hundred dollars ($1,500), the proceeds whereof to be used by the County Clerk of Richmond County for the purpose of employing Temporary Copyists, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding one thousand five hundred dollars ($1,500), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, The Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for employees other than those paid from Budget funds, in the office of the County Clerk, Richmond County, as follows:

County Clerk, Richmond County.

Revenue Bond Force—

Compensation of Temporary Employees:

Copyists, at 5c. per folio	$1,500 00

Which was adopted by the following vote:

Affirmative—The Mayor, The Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communications from the Public Service Commission for the First District, requesting, and report of the Comptroller recommending, an issue of $170,000 special revenue bonds (section 10, chapter 4, Laws of 1891, and section 14, chapter 429 of the Laws of 1907, as amended) for the following purposes:

For the payment of the general expenses of the Public Service Commission, for the First District, in connection with new work relative to additional transportation facilities	$100,000 00
For securing borings along the various routes wherever it is expected that construction will be had	70,000 00
	$170,000 00

(On June 22, 1911, the request of the Public Service Commission for the above appropriation was referred to the Comptroller.)

State of New York, Public Service Commission for the First District, Tribune Building, 154 Nassau Street, New York, June 16, 1911.

To the Board of Estimate and Apportionment of The City of New York:

Sirs—On December 9, 1910, the Public Service Commission for the First District made requisition for $946,316, deemed requisite and necessary for the expenses of the Commission for the year 1911. Upon the request of the Comptroller of the City data was furnished to him in the form of supporting schedules. This made necessary a further requisition for $38,877.45. Your Board accordingly made an appropriation of $985,193.45.

The Commission stated in its communication of December 9, 1910, the purposes for which the appropriation was deemed requisite and necessary.

The Commission further stated: "No estimate can be made at this time, and additional requisition may hereafter be necessary for expenses for the proceedings to secure the necessary legal consent for rapid transit routes and changes in such routes and for the acquisition of real estate and other rights necessary to rapid transit construction, for the necessary printing and advertising required by law to secure bidders for rapid transit routes and for the clerical, legal and engineering force necessary if contracts are made during the year for additional rapid transit routes not now under contract, or for the extensive preparation of new plans."

Your Board now has before it a report by a subcommittee appointed to consider the matters presented in the communication of the Commission of December 20, 1910, relative to additional transportation facilities. Should your Board take action advising the Commission in such a way that immediate progress can be made in the preparation of plans and contracts for additional facilities, the Commission will be under the necessity of making increases in its force in order to cover the various steps necessary as to plans and contracts. While the Commission cannot at this time definitely determine the full amount that may be needed for this additional work, it deems it requisite and necessary at this time to ask that one hundred thousand dollars ($100,000) be appropriated for the general expenses of the Commission to be incurred in connection with such new work, and seventy thousand dollars ($70,000) for the purpose of securing borings along various routes where it is expected that construction will be had.

Accordingly, the Public Service Commission for the First District, pursuant to resolution adopted June 16, 1911, hereby makes requisition in accordance with the provisions of the Public Service Commission's law and of chapter 4 of the Laws of 1891, as amended, for the sum of one hundred seventy thousand dollars ($170,000), deemed requisite and necessary to cover additional expenses for the year ending December 31, 1911, as set forth above. Respectfully,

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by Wm. R. Willcox, Chairman. TRAVIS H. WHITNEY, Secretary. [SEAL.]

Resolved, That this Commission make requisition upon the Board of Estimate and Apportionment of The City of New York, in accordance with the provisions of the Public Service Commission's law and of chapter 4 of the Laws of 1891, as amended, for the sum of one hundred and seventy thousand dollars ($170,000), deemed requisite and necessary to cover additional expenses for the year ending December 31, 1911, and that the Chairman and the Secretary be and they hereby are authorized and directed to send a communication, including a requisition, to the said Board of Estimate and Apportionment, in the following form:

State of New York, County of New York, ss.:

I, Travis H. Whitney, Secretary of the Public Service Commission for the First District, do hereby certify that I have compared the above with the original adopted by said Commission on June 16, 1911, and that it is a correct transcript therefrom and of the whole of the original.

In testimony whereof, I have hereunto subscribed my hand and affixed the seal of the Commission this 19th day of June, 1911.

[SEAL.] TRAVIS H. WHITNEY, Secretary.

State of New York, Public Service Commission for the First District, Tribune Building, 154 Nassau Street, New York, June 30, 1911.

To the Board of Estimate and Apportionment:

Under date of June 16, 1911, this Commission transmitted to your Board a requisition for $170,000, being $70,000 for borings and $100,000 for general expenses. In the communication transmitting the requisition the Commission pointed out that the requisition and appropriation made at the beginning of the year for this Commission was for the administrative expenses connected with regulation and existing rapid transit work and that an additional appropriation would be necessary for any new rapid transit work necessary to undertake. It was pointed out that in view of the report signed by your Special Committee and the Public Service Commission for the First District it was essential that certain preliminary work should be undertaken at once, in anticipation of rapid transit construction which it seemed likely would be undertaken.

The necessity for an additional appropriation is very urgent. The Engineering Department of the Commission had a large force at work at the time when the Triborough plans were being completed. Since that time over two hundred men have been laid off on account of lack of work or have been given leave of absence without pay, for the purpose of keeping the expenses of the Department as low as possible. At the present time all of the men in the Department are actively engaged in the supervision of actual construction work now going on, either on Contracts 1 and 2, on the Centre street loop or on the 4th avenue subway. This requires that if any men are to be engaged in the preliminary work necessary to new construction some of the men who have been laid off must be returned to the force. This cannot be done unless the appropriation is made.

So far as the requisition relates to an appropriation for borings, it may be pointed out that borings along proposed routes must be made before the preparation of plans and these borings take considerable time. In addition, bids must be obtained for such borings.

For these reasons, it is important that the money should be made available at the earliest moment, in order that the men may be notified to report for work and that bids may be obtained for the borings. Respectfully,

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by W. R. Willcox, Chairman.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 29, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 16, 1911, the Public Service Commission for the First District, requested an additional appropriation of $170,000 for the year 1911. In connection therewith I report as follows:

On January 5, 1911, the Board of Estimate and Apportionment authorized $985,193.45 in special revenue bonds for the expenses of the Commission in 1911. The following reasons are given by the Commission for the request:

"Your Board now has before it a report by a subcommittee appointed to consider the matter presented in the communication of the Commission of December 20, 1910, relative to additional transportation facilities. Should your Board take action advising the Commission in such a way that immediate progress can be made in the preparation of plans and contracts for additional facilities, the Commission will be under the necessity of making increases in its force in order to cover the various steps necessary as to plans and contracts. While the Commission cannot at this time definitely determine the full amount that may be needed for this additional work, it deems it requisite and necessary at this time to ask that $100,000 be appropriated for the general expenses of the Commission to be incurred, in connection with such new work, and seventy thousand dollars ($70,000) for the purpose of securing borings along various routes where it is expected that construction will be had."

Appropriations from special revenue bonds to the Commission have been as follows:

1908	$1,000,000 00
1909	1,037,500 00
1910	1,093,000 00

The expenditures for 1910 were approximately $1,200,000. The present request would give a total of $1,155,193.45 in special revenue bonds for 1911.

When the request was made for the first appropriation the Commission stated the following:

"No estimate can be made at this time, and additional requisition may hereafter be necessary for expenses for the proceedings to secure the necessary legal consent for rapid transit routes and changes in such routes and for the acquisition of real estate and other rights necessary to rapid transit construction, for the necessary printing and advertising required by law to secure bidders for rapid transit routes and for the clerical, legal and engineering force necessary if contracts are made during the year for additional rapid transit routes not now under contract, or for the extensive preparation of new plans."

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 10, chapter 4 of the Laws of 1891, and section 14, chapter 429 of the Laws of 1907, as amended, and on account of the requisition of the Public Service Commission for the First District, for one hundred and seventy thousand dollars ($170,000), duly made by the Chairman and Secretary thereof on June 16, 1911, the Board of Estimate and Apportionment hereby approves of an issue of special revenue bonds to an amount not exceeding one hundred thousand dollars ($100,000), to provide means for the payment of the general expense of said Commission in connection with new work relative to additional transportation facilities, and seventy thousand dollars ($70,000), to provide means for the purpose of securing borings along the various routes where it is expected that construction will be had relative to additional transportation facilities, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of section 10, chapter 4 of the Laws of 1891, and section 14, chapter 429 of the Laws of 1907, as amended, to issue special revenue bonds of The City of New York to an amount not exceeding one hundred and seventy thousand dollars ($170,000), redeemable from the tax levy of the year succeeding the year of their issue, the proceeds to be applied to the purposes aforesaid, in accordance with schedules to be approved by this Board.

Which was adopted by the following vote:

Affirmative—The Mayor, The Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Docks and Ferries requesting approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost (*$9,500*) for replacing the present walls and partitions of the Record Room, on Pier "A," North River, Borough of Manhattan, with fireproof construction and installing metal filing cases therein, together with a report of the Comptroller, to whom, on June 22, 1911, this application was referred, recommending the approval of said plans and specifications at an estimated cost of *$8,700*:

Department of Docks and Ferries, City of New York, Pier "A," North River, New York, June 15, 1911.

Hon. William J. Gaynor, *Mayor, Chairman of the Board of Estimate and Apportionment:*

Sir—This Department has prepared a contract, No. 1255, for installing fireproof partitions and filing cases on Pier "A," North River. Plans, specifications and estimate were sent to the Board of Estimate and Apportionment for approval on December 10, 1910. The request for the approval of the plans, specifications and estimate was referred to the Corporate Stock Budget Committee on January 19, 1911, for consideration in connection with the 1911 Corporate Stock Budget.

At a meeting of the Board of Estimate and Apportionment held June 8, 1911, a resolution was adopted authorizing the Comptroller to issue corporate stock to the extent of $9,500, to cover construction of fireproof record room on Pier "A."

I request that action be now taken in the matter of approving the plans, specifications and estimate on this contract. Yours very truly,

CALVIN TOMKINS, Commissioner of Docks.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 28, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 15, 1911, the Commissioner of Docks requested approval of plans, specifications and estimate of cost for installing fireproof partitions and filing cases on Pier "A," North River. In connection therewith I report as follows:

Request was originally made by the Commissioner on July 28, 1910, for authority to advertise and award a contract for the installation of fireproof partitions on Pier "A," at a cost of $4,000. On September 27, 1910, an amended request was made in which the amount was increased to $9,500. No funds were available for the proposed contract until June 8, 1911, when the Board of Estimate and Apportionment, pursuant to a resolution adopted on April 26, 1911, by the Commissioners of the Sinking Fund, authorized an issue of corporate stock to an amount not exceeding $9,500, the proceeds to be applied to the construction of a fireproof record room on Pier "A," North River, under the jurisdiction of the Department of Docks and Ferries.

The room to be constructed and made fireproof now is made up of timber and wooden partition walls, with the exception of the floor which is partly of concrete. It is proposed to replace the timber and wooden partition walls with walls of fireproof construction, consisting of steel studding carried from the asphalt deck of the pier to the under side of the second floor. The steel frame work is to be filled in with terra cotta blocks laid in Portland cement, and the ceiling is to be of reinforced concrete.

The walls will have a length of about 94 feet on the south side and about 117 feet on the north side, connected by two transverse walls eleven feet in length.

Within this enclosure it is proposed to install metal filing cases 46 feet long, 39 inches deep and about 13 feet high.

The contract is to be divided into two classes, as follows:

Class 1—Providing for the construction of fireproof walls and partitions at an estimated cost of $3,100.

Class 2—Providing for the installing of metal filing cases at an estimated cost of $5,600.

The total estimated cost of the contract work, therefore, is $8,700, which appears to be reasonable.

To this amount it is proposed to add $800, or approximately 10 per cent. for overhead charges and incidental expenses.

In view of the fact that engineering and inspection charges are paid from a special fund for the purpose, entitled, "C-DD-26, Department of Docks and Ferries," Payrolls for Construction and Improvement of Docks," I am of the opinion that an allowance of $800 for overhead and incidental charges would be excessive. I recommend, therefore, that this item in the request be not approved.

The plans and specifications are satisfactory.

I recommend the adoption of the resolution hereto attached.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves of the plans, specifications and estimate of cost to the amount of eight thousand, seven hundred dollars ($8,700), for replacing the present walls and partitions of the Record Room, on Pier "A," North River, Borough of Manhattan, with fireproof construction and installing metal filing cases therein, under the jurisdiction of the Department of Docks and Ferries.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary was directed to transmit a copy of the report of the Comptroller as above to the Commissioner of Docks.

The Secretary presented the following communication from the President of the Borough of The Bronx requesting, and report of the Comptroller recommending, the modification of budgetary-part Salary Schedule No. 1714 for the office of said Borough President for the year 1911, to take effect as of May 12, 1911, providing for the addition of two Structural Steel Draftsmen, at $1,800 each per annum, and the substitution of two Topographical Draftsmen, at $1,350 each per annum, for two at $1,500 each per annum:

City of New York, President of the Borough of The Bronx, 3d avenue and 177th street, June 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—Request is hereby respectfully made for a modification of the schedule line supporting the part budgetary appropriation made to this office for the year 1911, as follows:

President, Borough of The Bronx.

Division of Design—

1714. Salaries:

Assistant Engineer	1 at	$3,600 00
Assistant Engineer	1 at	3,000 00
Assistant Engineer	1 at	2,250 00
Assistant Engineer	1 at	1,950 00
Topographical Draftsmen	2 at	1,800 00
Topographical Draftsmen	3 at	1,650 00
Topographical Draftsmen	4 at	1,500 00
Topographical Draftsmen	3 at	1,350 00
Mechanical Draftsmen	2 at	1,800 00
Mechanical Draftsmen	2 at	1,650 00
Structural Steel Draftsmen	3 at	1,800 00
Leveler	1 at	1,500 00
Stenographer and Typewriter	1 at	1,200 00
Clerk	1 at	600 00

Part budgetary allowance, $10,000.

It is requested that the resolution to be adopted approving above schedule take effect as of May 12, 1911, as upon that date one Structural Steel Draftsman was appointed, while another was appointed on May 15. Both of these appointments were emergencies, there being so much structural steel work under way, no time could be lost by being required to wait until a modification was adopted permitting their employment. Respectfully,

CYRUS C. MILLER, President, Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 23, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 5, 1911, the President of the Borough of The Bronx requested modification of the budgetary-part salary schedule for the Division of Design in his office for the year 1911. In connection therewith I report as follows:

The President states that in May two Structural Steel Draftsmen, at $1,800 per annum, were added to the force on account of a great amount of structural steel work under way. The only other change is the substitution of two Topographical Draftsmen, at $1,350 per annum, for two at $1,500.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer	
		Increase.	Decrease.
1714.	Topographical Draftsmen, 6 at $1,500	....	$3,000 00
	Topographical Draftsman, 1 at $1,350	$2,700 00	....
	Structural Steel Draftsman, 1 at $1,800	3,600 00	....
		$6,300 00	$3,000 00

The Structural Steel Draftsmen were appointed on May 12, 1911, and to provide for payment of their compensation modification is necessary as of that date. No increase in compensation is involved.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule as revised, for the office of the President of the Borough of The Bronx for the year 1911, to take effect as of May 12, 1911, as follows:

President, Borough of The Bronx.

Division of Design—

1714. Salaries:

Assistant Engineer	1 at	$3,600 00
Assistant Engineer	1 at	3,000 00
Assistant Engineer	1 at	2,250 00
Assistant Engineer	1 at	1,950 00
Topographical Draughtsmen	2 at	1,800 00
Topographical Draughtsmen	3 at	1,650 00
Topographical Draughtsmen	4 at	1,500 00
Topographical Draughtsmen	3 at	1,350 00
Mechanical Draughtsmen	2 at	1,800 00
Mechanical Draughtsmen	2 at	1,650 00
Structural Steel Draughtsmen	3 at	1,800 00
Leveler	1 at	1,500 00
Stenographer and Typewriter	1 at	1,200 00
Clerk	1 at	600 00

Part budgetary allowance, $10,100.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller. the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following report of the Comptroller, referring to the claim of Robert Carter & Co. for $103 for work done in connection with a contract for laying and hauling water mains in the Borough of Brooklyn in the years 1908 and 1909, and stating that the City is not justly and equitably obligated to pay said claim, as the so-called extra work came within the terms of said contract and the City did not receive any benefit therefrom:

(On December 15, 1910, the above claim was filed with the Board under the provisions of section 246 of the Charter and referred to the Comptroller.)

City of New York, Department of Finance, Comptroller's Office, June 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—Under and pursuant to the provisions of section 246 of the Charter, Robert Carter & Company heretofore filed with the Secretary of your Board, for your consideration and approval, a claim in the sum of $103, for work done in connection with, but alleged to be outside of, a contract for hauling and laying water mains, made with the Department of Water Supply, Gas and Electricity for the Borough of Brooklyn, during the months of September and October 1908, and April, May, June, July and August 1909, said claimant alleging that the charge of $103 is for work not embraced within the terms of said contract, but made necessary by the terms of said contract, because, without such extra hauling said contract wouuld not have been properly and expeditiously performed.

You referred said claim to me for investigation and to report to you thereon. The claim is as above stated.

Chief Engineer De Varona, who was primarily in charge of the work under said contract, refused to certify claimant's bill for $103, stating, "I can find no provision in your contract which permits me to certify this bill."

Mr. Carter, President of claimant Company, when examined on this claim, stated, "Through inadvertance on the part of the Engineer they (the small special castings which were hauled, and for the hauling of which this charge is made) were not called for on the original plans. * * * If the materials had all been called for on the plan it could have been all hauled at the same time and would not have necessitated these various special trips to obtain it and the delay incidental thereto. Both Engineers held this work was within the contract. I do not so hold. I hold I should be paid for the extra expense to which I was put, through their lack of furnishing me with sufficient material at the time I was carting it out on those streets. At the time I did this work nothing was said about extra compensation for it. I did it for the benefit of the City and to enable me to complete my contract and I make my demand strictly upon an honorable and equitable basis. By doing as we did it became possible to charge the pipe lines with water immediately upon their completion, thereby giving the City the full and immediate benefit of the same, which it took."

I have fully considered the facts and Mr. Carter's testimony on claimant's behalf, and having no doubt that the so-called extra work came within the terms of said contract, and that the City did not receive any benefit therefrom that it was not entitled to receive under said contract, I report that the City is not justly and equitably obligated to pay said claim. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the claim of Robert Carter & Company, in the sum of $103, for "Extra cartage from Gowanus Pipe Yard, Water pipe c't dated August 10, 1908," in connection with a contract made with the Department of Water Supply, Gas and Electricity, which was filed with the Board of Estimate and Apportionment December 9, 1910, for its consideration and approval, be and the same hereby is disallowed, it appearing that the City is not justly and equitably obligated to pay the same.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Education requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, that the compensation of Janitors of certain public schools in Manhattan, Brooklyn, Queens and Richmond, be fixed temporarily and until further modified:

(On June 22, 1911, the resolution of the Board of Education relative to the above matter was referred to said Committee.)

Resolved, That the Board of Estimate and Apportionment be and it is hereby respectfully requested to recommend to the Board of Aldermen that the compensation of Janitors of public school buildings, etc., be fixed in accordance with the following list, taking effect on the date indicated in each instance:

Transfers.

George W. Winant (Janitor), from Public School 72, Queens, to Public School 79, Queens; annual compensation, $1,080; taking effect June 5, 1911.

John W. Werner (Janitor), from Public School 36, Brooklyn, to Public School 90, Brooklyn; annual compensation, $1,548; taking effect June 7, 1911.

Thomas F. Toell (Janitor), from Public School 119, Brooklyn, to Public School 36, Brooklyn; annual compensation, $2,160; taking effect June 7, 1911.

Timothy Wilson (Janitor-Engineer), from Public School 61, Brooklyn, to Public School 39, Brooklyn; annual compensation, $1,356; taking effect June 7, 1911.

William Thiesen (Janitor), from Public School 37, Brooklyn, to Public School 72, Queens; annual compensation, $1,080; taking effect June 19, 1911.

Robert H. Hughes (Janitor-Engineer), from Public School 90, Brooklyn, to Public School 61, Brooklyn; annual compensation, $984; taking effect June 8, 1911.

John J. Smith (Janitor-Engineer), from Public School 22, Brooklyn, to Public School 119, Brooklyn; annual compensation, $2,628; taking effect June 12, 1911.

Temporary Assignments.

John J. Goff, assigned to Public School 129, Manhattan; compensation, $50 per month; taking effect June 1, 1911.

K. D. Johnson, assigned to Public School 61, Brooklyn; compensation, $50 per month; taking effect June 7, 1911.

Herman A. Hintz, assigned to Public School 119, Brooklyn; compensation, $120 per month; taking effect June 7, 1911.

Gustav Muhlbauer, assigned to Public School 36, Brooklyn; compensation, $110 per month; taking effect June 7, 1911.

New Position.

Joost C. Slingerland (Janitor-Engineer), Public School 33, Richmond; compensation, $732 per annum; taking effect June 5, 1911.

Changes in Compensation.

Public School 77, Queens; present compensation, $100 per month (temporary); proposed compensation, $225 per month (temporary); taking effect May 1, 1911; (on account of additional rooms being occupied).

Public School 56, Queens; present compensation, $186 per month (temporary); proposed compensation, $2,436 per annum; taking effect June 1, 1911 (entire building being occupied).

True copy of resolution adopted by the Board of Education on June 14, 1911.

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 14, 1911, the Board of Education requested the fixation, pursuant to the provisions of section 56 of the Greater New York Charter, of the compensation of fourteen Janitors for Public Schools 129, Manhattan, 90, 36, 39, 61 and 119, Brooklyn, 79, 77, 72 and 56, Queens, and 33, Richmond.

We recommend that the request be approved by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Whereas, By opinions of the Corporation Counsel, as of June 28, 1910, and July 30, 1910, the Comptroller was advised that the payment of salaries of Janitors in the Department of Education is illegal, unless such salary shall have been established under the provisions of section 56 of the Greater New York Charter; and

Whereas, The matter of adjusting the compensation of Janitors and the fixation of their salaries under the provisions of section 56 of the Charter is now in the hands of a Special Committee of the Board of Estimate and Apportionment; therefore be it

Resolved, That, pursuant to the provisions of section 56 of the Charter, the Board of Estimate and Apportionment hereby recommends to the Board of Aldermen, pending the report of said Committee, the compensation of Janitors in the Department of Education be fixed temporarily, and until further modified, in accordance with the following list:

	Compensation.
Janitor, P. S. 79, Queens (per annum)	$1,080 00
Janitor, P. S. 90, Brooklyn (per annum)	1,548 00
Janitor, P. S. 36, Brooklyn (per annum)	2,160 00
Janitor-Engineer, P. S. 39, Brooklyn (per annum)	1,356 00
Janitor, P. S. 72, Queens (per annum)	1,080 00
Janitor-Engineer, P. S. 61, Brooklyn (per annum)	984 00
Janitor-Engineer, P. S. 119, Brooklyn (per annum)	2,628 00
Janitor, P. S. 129, Manhattan (per month)	50 00
Janitor, P. S. 61, Brooklyn (per month)	50 00
Janitor, P. S. 119, Brooklyn (per month)	120 00
Janitor, P. S. 36, Brooklyn (per month)	110 00
Janitor, P. S. 77, Queens (per month)	225 00
Janitor, P. S. 56, Queens (per annum)	2,436 00
Janitor, Engineer, P. S. 33, Richmond (per annum)	732 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following report from the Chairman, Commission on Standardization, approved by the Select Committee of the Board on Standardization of Supplies, wherein it is recommended that the Commissioner of Docks be granted permission to add the following clause to the Standard Specifications for furnishing, delivering, storing and trimming coal as part of the Standard Form of Contract for the purchase of supplies:

"10. In case of a strike interfering with the delivery of coal under this contract as required, the said specifications may, with the approval of the Commissioner, be modified by the Superintendent so as to fairly meet the conditions existing on account of such strike."

Which was ordered printed in the minutes and filed.

June 9, 1911.

Whereas, The Department of Docks and Ferries has asked the Commission on Standardization for permission to amend the standard form of contract for supplies, adopted by the Board of Estimate and Apportionment, April 27, 1911, by including in Contract No. 1282 of that department for coal to be supplied the Municipal Ferry Service for the year beginning July 1, 1911, the following strike clause:

"In case of a strike interfering with the delivery of coal under this contract as required, the said specifications may, with the approval of the Commissioner, be modified by the Superintendent so as to fairly meet the conditions existing on account of such strike."

Whereas, The Select Committee of the Board of Estimate and Apportionment, composed of the Mayor, the Comptroller and the President of the Board of Aldermen, was empowered under the following resolution of the Board, passed April 27, authorizing the use of the said standard form of contract for supplies, to make such changes as might be necessary to meet the requirements of special conditions and cases:

"Be it Resolved, That the forms of Bid or Estimate, Proposal for Bids or Estimates, Contract and Specifications and Schedules of Quantities and Prices be approved by this Board and adopted by the various departments, bureaus and offices under the City Government authorized to purchase supplies, but inasmuch as it cannot be assumed in advance of experience that the new forms adopted will be fully adequate to meet the requirements of special conditions and cases; therefore modifications in the said forms to suit such special conditions and cases may be had by securing the approval in writing of the Committee of the Board of Estimate and Apportionment on the Purchase of Supplies."

Whereas, The amendment asked for by the Department of Docks and Ferries could best be secured by adding the above quoted special contract provision to the special contract provisions of the Standard Specifications for Furnishing, Delivering, Storing and Trimming Coal, which form a part of the Standard Form of Contract for the Purchase of Supplies when the supplies to be purchased consist only of coal;

It is recommended by the Commission on Standardization that the Select Committee of the Board of Estimate and Apportionment on the Purchase of Supplies hereby approves the addition of the following clause to the special contract provisions attached to the Standard Specifications for Furnishing, Delivering, Storing and Trimming Coal as part of the Standard Form of Contract for the Purchase of Supplies:

10. In case of a strike interfering with the delivery of coal under this contract as required, the said specifications may, with the approval of the Commissioner, be modified by the Superintendent so as to fairly meet the conditions existing on account of such strike. Respectfully submitted,

EDMUND D. FISHER, Chairman, Commission on Standardization.

Approved: W. J. GAYNOR, Mayor; WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee on the Purchase of Supplies.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of Comptroller recommending, an issue of $50,000 special revenue bonds (subdivision 8, section 188 of the Charter), to be used by the Corporation Counsel for expenses of City litigation, in securing an injunction against the State of New Jersey and the Passaic Valley Sewerage Commissioners, restraining them from discharging crude sewage into New York Bay:

(On June 29, 1911, the resolution of the Board of Aldermen as above was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special reveenue bonds to the amount of fifty thousand dollars ($50,000), the proceeds whereof to be used by the Corporation Counsel of The City of New York for the purpose of meeting expenses on the part of The City of New York in litigation between the State of

New York and the State of New Jersey, and the Passaic Valley Sewerage Commissioners in the Supreme Court of the United States.

Adopted by the Board of Aldermen June 20, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor June 27, 1911. P. J. SCULLY, Clerk.

Department of Finanace, City of New York, Bureau of Municipal Investigation and Statistics, July 3, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Board of Aldermen adopted a resolution requesting an issue of special revenue bonds to the amount of $50,000, to be used by the Corporation Counsel for expenses on the part of the City of New York in litigation between the State of New York and the State of New Jersey and the Passaic Valley Sewerage Commissioners in the Supreme Court of the United States. In connection therewith, I report as follows:

Under an order of the Supreme Court of the United States, in the case of the People of the State of New York, complainants, versus The State of New Jersey and Passaic Valley Sewerage Commissioners defendants, a Commissioner, to take testimony, has been appointed. The Court ordered that the complainants' testimony shall begin to be taken on June 1, 1911, and that all testimony for both sides must be concluded in March, 1912, unless further time be granted by the Court.

The object of the suit is to secure an injunction against the State of New Jersey and the Passaic Valley Sewerage Commissioners, restraining them from discharging into New York Bay, near the New York City line, more than 360,000,000 gallons of crude sewage per diem, an amount estimated to be far beyond the power of the already contaminated waters of the Bay to assimilate.

The State of New Jersey is prepared to defend the suit. Thirty-five thousand dollars has already been appropriated to meet the legal, expert aand other expenses of the trial. Two of the most eminent lawyers in the State have been engaged, and five sanitary experts have been retained to protect the State's interests.

The State of New York, with exhaustive technical data to support its claims, is at present without money to carry on the suit. As the burden of proof lies with the State of New York, with the hearings already under way, the situation can readily be seen to constitute an emergency.

The Corporation Counsel states the following:

"The character of the testimony is almost entirely scientific and the evidence to be offered will be furnished by Sanitation Specialists, Chemists, Bacteriologists, Engineers and Physicians. Such evidence which will warrant the United States Supreme Court to grant the injunction asked for must be furnished by and secured from men of the greatest eminence and professional reputation. In order to secure the services of such men, it will be necessary to compensate them properly. To substitute second rate men would be to doom our City to loss of prestige in conducting an important suit and risk losing the suit itself, which seeks to enjoin the perpetration of a great nuisance, that would not only menace the health and comfort of our citizens, but threaten the commercial pre-eminence of our City."

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Resolution adopted by the Board of Aldermen on June 20, 1911, and approved by the Mayor June 27, 1911, requesting an issue of special revenue bonds in the sum of fifty thousand dollars ($50,000), the proceeds whereof to be used by the Corporation Counsel of The City of New York for the purpose of meeting expenses on the part of The City of New York in litigation between the State of New York and the State of New Jersey, and the Passaic Valley Sewerage Commissioners in the Supreme Court of the United States, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding fifty thousand dollars ($50,000), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—**16.**

The Secretary presented communications, as follows:

From J. E. Noeggerath, relative to the development of plans for a rapid transit system believed to be more efficient than the present subways;

From the Central Federated Union of Greater New York and Vicinity, relative to the need of proper ventilation in the subways.

Which were referred to the Public Service Commission for the First District.

The Secretary presented the following report of the Comptroller, recommending that the resolution adopted June 1, 1911, which authorized the acquisition of property on Benedict ave. near Fulton ave., Woodhaven, Borough of Queens, for the use of the Fire Department, at a price not exceeding $3,000, be amended by adding thereto the words "subject to the covenants contained in the deed recorded in Liber 1698, page 16, other than so much thereof as reads 'subject also to covenants in former deeds, if any'":

Department of Finance, City of New York, Comptroller's Office, June 28, 1911.

To the Honorable, the Board of Estimate and Apportionments

Gentlemen—On June 1, 1911, your honorable Board adopted a resolution approving of the acquisition of a plot of ground having a frontage of 50 feet on the west side of Benedict ave., with a depth of 100 feet, in the Borough of Queens, for use of the Fire Department, to wit:

Resolved, That the Board of Estimate and Apportionment hereby approves of the selection by the Commissioner of the Fire Department of the following described property for use of said Department.

All that certain piece or parcel of land, situate, lying and being in the Fourth Ward of the Borough of Queens, City and State of New York, bounded and described as follows:

Beginning at a point on the westerly side of Benedict ave., distant 94.46 feet northerly from the corner formed by the intersection of the westerly line of Benedict ave. with the northerly line of Fulton ave., as laid down on map of Wyckoff Park, said map being filed in the office of the Clerk of the County of Queens on April 14, 1909, as Map No. 911: running thence westerly and at right angles with Benedict ave. a distance of 100 feet; thence northerly and parallel with Benedict ave. a distance of 50 feet; thence easterly and again at right angles to Benedict ave. a distance of 100 feet to the westerly line of Benedict ave.; thence southerly along the westerly line of Benedict ave. a distance of 50 feet to the point or place of beginning, together with all the right, title and interest of the owner of said premises, of, in and to the street in front thereof to the centre thereof, and authorizing the Comptroller to enter into a contract for the acquisition of said property at private sale at a price not to exceed $3,000, said contract to be approved by the Corporation Counsel as to form.

A search of these premises by the Title Guarantee and Trust Company develops the fact that a covenant appears in deed recorded in Liber 1698, page 16, as follows:

"The said parties of the second part, for themselves, their heirs, executors, administrators and assigns do hereby covenant and agree to and with the said party of the first part, its successors and assigns, as follows: That the said parties of the second part, their heirs, executors, administrators or assign will not erect or permit on any part of the above decribed premises any livery, public or milkman's stable or slaughterhouse, or any manufactory for making gunpowder, glue, varnish, vitriol, ink or turpentine, or for the boiling of bones, or for the dressing, tanning or preparing of skins, hides or leather, or any brewery or building for the carrying on of any noxious or dangerous trade or business, or sell or suffer or allow to be sold on the premises hereby conveyed or any part thereof strong or spirituous liquors, or ale or wine or intoxicating liquors of any kind."

This covenant will not restrict the City as to the use of the property for the purposes for which it is to be acquired.

I, therefore, respectfully recommend that the above resolution be amended by adding the words, *subject to the covenants contained in the deed recorded in Liber* 1698, *page* 16, other than so much thereof as reads "subject also to covenants in former deeds, if any." Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Estimate and Apportionment June 1, 1911, which reads as follows:

> "Resolved, That the Board of Estimate and Apportionment hereby approves of the selection by the Commissioner of the Fire Department of the following-described property for the use of said Department:

"All that certain lot, piece or parcel of land situate, lying and being in the Fourth Ward of the Borough of Queens, City and State of New York, bounded and described as follows:

"Beginning at a point on the westerly side of Benedict avenue distant 94.46 feet northerly from the corner formed by the intersection of the westerly line of Benedict avenue and the northerly line of Fulton avenue, as laid down on map of Wyckoff Park, said map being filed in the office of the Clerk of the County of Queens on April 14, 1909, as Map No. 911; running thence westerly and at right angles with Benedict avenue a distance of 100 feet; thence northerly and parallel with Benedict avenue a distance of 50 feet; thence easterly and again at right angles with Benedict avenue a distance of 100 feet to the westerly line of Benedict avenue; thence southerly along the westerly line of Benedict avenue a distance of 50 feet to the point or place of beginning; together with all the right, title and interest of the owner of said premises, of, in and to the street in front thereof to the centre thereof.

"—and authorizes the Comptroller to enter into a contract for the acquisition of said property at private sale, at a price not to exceed three thousand dollars ($3,000), said contract to be approved by the Corporation Counsel as to form." *—be and the same is hereby amended by authorizing said purchase "subject to the covenants contained in the deed recorded in Liber 1698, page 16," other than so much thereof as reads "subject also to covenants in former deeds, if any."*

Which was adopted by the following vote

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following report of the Comptroller, recommending that the resolution adopted April 6, as amended May 18 and June 1, 1911, which authorized the acquisition of property on Pennsylvania ave., distant 50 feet southerly from the corner formed by the intersection of the southerly side of Liberty ave. with the easterly side of Pennsylvania ave., Brooklyn, for the use of the Department of Education, at a price not exceeding $22,500, be amended by adding thereto the words "subject to the covenants contained in Liber 218 of Conveyances, page 137":

Department of Finance, City of New York, Comptroller's Office, June 28, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—Under date of April 6, 1911, your Board adopted a resolution approving of the acquisition of a plot of ground, 281 feet on Pennsylvania avenue, with a depth of about 110 feet, in the Borough of Brooklyn, for use of the Department of Education, which was amended by a resolution adopted by your Board on May 18, 1911, authorizing the acquisition of the property in three separate parcels, two at private sale and one through condemnation.

One of the resolutions reads as follows:

"Resolved, That the Board of Estimate and Apportionment hereby approves of the action of the Board of Education in the matter of the selection of the following described premises in the Borough of Brooklyn:

"All that certain lot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, City of New York, bounded and described as follows:

"Beginning at a point on the easterly side of Pennsylvania avenue distant 50 feet southerly from the corner formed by the intersection of the southerly side of Liberty avenue with the easterly side of Pennsylvania avenue; running thence easterly and parallel with Liberty avenue 105 feet; thence southerly parallel with Pennsylvania avenue 150 feet; thence westerly and again parallel with Liberty avenue 105 feet to the easterly side of Pennsylvania avenue; thence northerly along the easterly side of Pennsylvania avenue 150 feet to the point or place or beginning; together with all the right, title and interest, if any, of the owner, of, in and to the avenue in front thereof to the centre thereof, and the Comptroller be and is hereby authorized to enter into contract for the acquisition of the above mentioned premises at private sale, at a price not exceeding $22,500, said contract to be submitted to the Corporation Counsel for his approval as to form."

A search of these premises by the Title Guarantee and Trust Company develops the fact, that in the year 1849 a restriction was placed on the property, which provides that the owners will not conduct or carry on any business upon the above described premises, or any part thereof, which shall be or become a nuisance to the owners of the property in the vincity.

Inasmuch as this restriction does not affect the purposes for which the property is acquired, and for the further reason that the restriction has already been nullified by reason of the character of the improvements in the neighborhood, I recommend that the above resolution be amended by adding the words, *subject to the covenants contained in Liber* 218 *of Conveyances, page* 137. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Estimate and Apportionment *June 1, 1911,* which reads as follows:

"Resolved, That the resolution adopted by the Board of Estimate and Apportionment May 18, 1911, which reads as follows:

"'Resolved, That the resolution adopted by the Board of Estimate and Apportionment April 6, 1911, which reads as follows:

"'Resolved, That the Board of Estimate and Apportionment hereby approves of the action of the Board of Education in the matter of the selection of the following described premises in the Borough of Brooklyn:

"'All that certain lot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Brooklyn, City of New York, bounded and described as follows:

"'Beginning at a point on the easterly side of Pennsylvania avenue distant 50 feet southerly from the corner formed by the intersection of the southerly side of Liberty avenue with the easterly side of Pennsylvania avenue; running thence easterly and parallel with Liberty avenue 105 feet; thence southerly and parallel with Pennsylvania avenue 150 feet; thence easterly and again parallel with Liberty avenue 5 feet; thence southerly and again parallel with Pennsylvania avenue 131 feet 3 inches; thence westerly and again parallel with Liberty avenue 110 feet to the easterly side of Pennsylvania avenue; thence northerly along the easterly side of Pennsylvania avenue 281 feet 3 inches to the point or place of beginning; together with all the right, title and interest, if any, of the owner, of, in and to the avenue in front thereof to the centre thereof.

"'—and the Comptroller be and is hereby authorized to enter into contract for the acquisition of the above-described premises, at private sale, at a price not exceeding $48,500, said contract to be submitted to the Corporation Counsel for his approval as to form.

"'—be and the same is hereby amended to read as follows:

"'Resolved, That the Board of Estimate and Apportionment hereby approves of the action of the Board of Education in the matter of the selection of the following-described premises in the Borough of Brooklyn:

"'All that certain lot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, City of New York, bounded and described as follows:

"'Beginning at a point on the easterly side of Pennsylvania avenue distant 50 feet southerly from the corner formed by the intersection of the southerly side of Liberty avenue with the easterly side of Pennsylvania avenue; running thence easterly and parallel with Liberty avenue 105 feet; thence southerly parallel with Pennsylvania avenue 150 feet; thence westerly and again parallel with Liberty avenue 105 feet to the easterly side of Pennsylvania avenue; thence northerly along the easterly side of Pennsylvania avenue 150 feet to the point or place of beginning; together with all the right, title and interest, if any, of the owner of, in, and to the avenue in front thereof to the centre thereof.

—be and the same is further amended—in so far as it relates to the purchase at $22,500 *of that parcel of land beginning at a point on the easterly side of Pennsylvania avenue distant* 50 *feet southerly from the corner formed by the intersection of the southerly side of Liberty avenue with the easterly side of Pennsylvania avenue, etc.—by addingthereto the words and figures "subject to the covenants contained in Liber 218 of Conveyances, page 137."*

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communications from the Department of Health requesting, and report of the Comptroller recommending, the modification of Salary Schedules Nos. 355 and 368, supporting the appropriation made in the Budget for the year 1911 for said Department, providing for the transfer of a Food Inspector at $1,200 per annum from one schedule to another, involving the transfer of $600, said modifications to take effect July 1, 1911.

Department of Health, City of New York, southwest corner Fifty-fifth street and Sixth avenue, Borough of Manhattan, New York, June 21, 1911.

Hon. JOSEPH HAAG, *Secretary, Board of Estimate and Apportionment,* 277 Broadway:

Sir—At a meeting of the Board of Health of the Department of Health, held June 20, 1911, the following resolution was adopted:

Resolved, That the Board of Estimate and Apportionment be, and it is hereby respectfully requested to approve of the following further changes and modifications in the schedules supporting the appropriations made to the Department of Health for salaries for the year 1911:

Supporting Schedule to No. 355—Divisions of Inspectors, Salaries.

Strike out item, "Food Inspector, at $1,200."

Supporting Schedule to No. 368—Division of Milk Inspection, Salaries.

Change item, "Food Inspectors, 46 at $1,200," to read, "Food Inspectors, 47 at $1,200."

A true copy, EUGENE W. SCHEFFER, Secretary.

Department of Health, City of New York, southwest corner Fifty-fifth street and Sixth avenue, Borough of Manhattan, New York, June 21, 1911.

Hon. JOSEPH HAAG, *Secretary, Board of Estimate and Apportionment,* 277 Broadway, Borough of Manhattan.

Sir—At a meeting of the Board of Health of the Department of Health, held June 20, 1911, the following resolution was adopted:

Resolved, That the Board of Estimate and Apportionment be, and it is hereby respectfully requested to transfer the sum of $700 from the appropriration made to the Department of Health for the year 1911, entitled, and as follows:

Code No. 355, Division of Inspections, Salaries, the same being in excess of the amounts required for the purposes thereof, to the appropriation made to the same Department for the same year, entitled:

Code No. 368, Division of Milk Inspection, Salaries, the same being insufficient for the purposes thereof. A true copy, EUGENE W. SCHEFFER, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Board of Health requested modification of two schedules of salaries supporting appropriations to the Department of Health for the year 1911, involving a transfer of $600. In connection therewith I report as follows:

The only change proposed is the transfer of a Food Inspector, at $1,200 per annum, from the Division of General Sanitary Inspection, No. 355, to the Division of Milk Inspection, City and Country, No 368.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
355.	Inspector of Foods, at $1,200.	$1,200 00	....	$600 00	....
368.	Inspector of Foods, 46 at $1,200	....	$1,200 00	....	$600 00

I recommend that the request be granted, by the adoption of the attached resolutions. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Department of Health for the year 1911, to take effect July 1, as follows:

Administration, Division of General Sanitary Inspection—

355. Salaries:

Sanitary Inspector	$3,000 00
Sanitary Inspector	2,550 00
Sanitary Inspector	1,800 00

	$87,900 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmoond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Department of Health for the year 1911 as follows:

From

355. Administration, Division of General Sanitary Inspection, Salaries.. $600 00

To

368. Administration, Division of Milk Inspection, City and Country, Salaries $600 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Acting President of the Borough of Brooklyn requesting, and report of the Comptroller relative to the modification of salary schedule 1806, supporting the approprirationa made in the Budget for the year 1911, for the office of the President of the Borough of Brooklyn, providing for the increase in compensation of 14 Attendants from $750 to $900 per annum, 20 from $500 to $750 per annum, 1 Janitor from $1,200 to $1,500, 1 Plumber from $4.50 to $5.50 a day and 2 Laborers from $750 to $900 per annum, and for the elimination of 4 Attendants at $600 per annum, 2 Janitors at $900 per annum, 1 Watchman at $900 per annum and 2 Laborers at $750 per annum.

The City of New York, office of the President of the Borough of Brooklyn, Brooklyn, June 15, 1911.

Hon. William A. Prendergast, *Comptroller, Department of Finance,* 280 Broadway, Manhattan, City of New York.

Dear Sir—I respectfully request you to kindly recommend to the Board of Estimate and Apportionment the adoption of a resolution modifying schedule No. 1806, "Wages, Regular Employes," in accordance with the proposed schedule attached hereto. This modification, if granted, will provide for the increase of male Attendants in this Department from $750 to $900, female Attendants in this Department from $600 to $750 per annum. It also provides for the increase of 2 Laborers from $750 to $900 per annum, 1 Janitor from $1,200 to $1,500 per annum, 1 Plumber from $4.50 to $5.50 per diem. It also creates an unassigned balance of $623.

Some of the male Attendants, at the present time, in the Bureau of Public Buildings and Offices are paid $900 per annum, while others doing the same kind of work receive only $750. The same applies to the female Attendants, a portion of whom receive only $600, while others are paid $750 per annum for doing the same kind of work.

I would thank you to give this matter your early consideration so that these changes can take effect from June 1. Yours very respectfully,

L. H. POUNDS, Acting Borough President.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 15, 1911, the Acting President of the Borough of Brooklyn requested modification of the wage schedule for the Bureau of Public Buildings and Offices, Maintenance, No. 1806, in his office for the year 1911. In connection therewith I report as follows:

Increases in compensation are asked for as follows:

Attendants, 14 from $750 to $900	$2,100 00
Attendants, 20 from $600 to $750	3,000 00
Janitor, 1 from $1,200 to $1,500	300 00
Plumber, 1 from $4.50 to $5.50 per day	277 00
Laborers, 2 from $750 to $900	300 00
	$5,977 00

It is proposed to eliminate the following positions:

Attendants, 4 at $600	$2,400 00
Janitors, 2 at $900	1,800 00
Watchman, 1 at $900	900 00
Laborers, 2 at $750	1,500 00
	$6,600 00

The changes will leave an unassigned balance of $623. The increase for the plumber is to conform to the prevailing rate of wage for the position. The other increases, the Acting President states, are to provide for equal pay for equal work.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
1806.	Attendants, 34 at $900	....	$12,600 00	....	$7,350 00
	Attendants, 42 at $750	....	4,500 00	....	2,625 00
	Attendants, 25 at $600	$14,400 00	....	$8,400 00	....
	Janitor, 1 at $1,500	....	1,500 00	....	875 00

Account No.	Schedule Line.	Schedule Transfer. Decrease.	Schedule Transfer. Increase.	Cash Transfer. Decrease.	Cash Transfer. Increase.
	Janitor, 1 at $1,200	1,200 00	....	700 00	....
	Janitors, 9 at $900	1,800 00	....	1,050 00	....
	Plumber, 1 at $5.50	....	1,523 50	....	888 25
	Plumber, 1 at $4.50	1,246 50	....	726 75	....
	Watchmen, 10 at $900	900 00	....	525 00	....
	Laborers, 6 at $900	....	1,800 00	....	1,050 00
	Laborers, 68 at $750	3,000 00	....	1,750 00	....
	Unassigned balance	....	623 00	....	363 50
		$22,546 50	$22,546 50	$13,151 75	$13,151 75

The attached resolution, if adopted, will grant the request.
Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the office of the President of the Borough of Brooklyn, to take effect as of June 1, 1911, as follows:

President of the Borough of Brooklyn.

Bureau of Public Buildings and Offices, Maintenance—

Wages, Regular Employees:

Attendant	$1,200 00
Attendants, 48 at $900	43,200 00
Attendants, 48 at $750	36,000 00
Attendant	600 00
Janitors, 2 at $1,800	3,600 00
Janitors, 2 at $1,500	3,000 00
Janitors, 7 at $900	6,300 00
Janitor	750 00
Janitresses, 2 at $750	1,500 00
Carpenters, 3 at $1,050	3,150 00
Elevator Conductors, 12 at $900	10,800 00
Matron	1,050 00
Plasterer	1,000 00
Watchmen, 9 at $900	8,100 00
Driver	900 00
Drivers, 2 at $750	1,500 00
Laborers, 8 at $900	7,200 00
Laborers, 64 at $750	48,000 00
Cleaners, 61 at $360	21,960 00
Stationary Engineers, 25 at $4.50 per day (365 days)	41,062 50
Housesmith, 1 at $4.50 per day (277 days)	1,246 50
Plumber, 1 at $5.50 per day (277 days)	1,523 50
Foremen Laborers, 2 at $4 per day (313 days)	2,504 00
Firemen, 29 at $3 per day (365 days)	31,755 00
Oiler, 1 at $3 per day (365 days)	1,095 00
Unassigned balance	623 00
	$279,614 50

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Acting President of the Borough of Brooklyn requesting, and report of the Comptroller relative to the modification of the budgetary part allowance, Salary Schedule No. 1770, supporting the appropriation made in the Budget for the year 1911, for the office of the President of the Borough of Brooklyn, providing for increases in salaries of a Topographical Draftsman, a Messenger and four Clerks, and for the addition of several new positions and for the elimination of various other positions:

The City of New York, Office of the President of the Borough of Brooklyn, Brooklyn, June 14, 1911.

Hon. Wm. A. Prendergast, *Comptroller, Department of Finance, City of New York:*

Dear Sir—I respectfully request you to recommend to the Board of Estimate and Apportionment the adoption of a resolution modifying Salary Schedule No. 1770, Engineering Division, Bureau of Highways, in accordance with the attached statement. This modification will allow the appointment of the following new employees:

Transitman, 1 at (per annum)	$1,500 00
Stenographer, 1 at (per annum)	1,050 00
Rodmen, 3 at (per annum)	1,050 00
Topographical Draftsmen, 2 at (per annum)	1,200 00
Clerks, 2 at (per annum)	1,050 00
Clerk, 1 at (per annum)	900 00

—also for the increase of salary of

Clerk, 1 at $1,500 (per annum), to $1,650.

—and the promotion of

1 Messenger, at $1,050, to Clerk, at $1,200 per annum.
1 Topographical Draftsman, at $1,200, to $1,500 per annum.
2 Clerks, at $900 each, to $1,050 each per annum.
1 Clerk, at $1,050 to $1,200 per annum.

It also eliminates

Assistant Engineer, 1 at (per annum)	$4,000 00
Leveler, 1 at (per annum)	1,350 00
Axeman, 1 at (per annum)	900 00
Clerks, 2 at (per annum)	1,800 00
Clerk, 1 at (per annum)	1,500 00
Clerk, 1 at (per annum)	480 00

This modification will not increase the appropriation of this Department and requires no transfer of money.

Would thank you to give this matter early consideration.

Yours very respectfully, L. H. POUNDS, Acting Borough President.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 14, 1911, the Acting President of the Borough of Brooklyn requested modification of the budgetary part allowance salary schedule for the Bureau of Highways, No. 1770, Engineering Division, Regular Force, in his office for the year 1911. In connection therewith I report as follows:

Increases in compensation are proposed as follows:

Joseph C. O'Dea, Topographical Draftsman, from $1,200 to $1,500 per annum. Mr. O'Dea was appointed on September 8, 1910, at the present rate.

Daniel Bartley, Clerk, from $1,500 to $1,650 per annum. Mr. Bartley was appointed in the Tenement House Department on November 26, 1906, at $1,050 per annum. On September 23, 1907, he was transferred to the office of the President of the Borough of Brooklyn at the same rate. On October 1, 1908, his salary was increased to $1,200, and on April 1, 1909, to the present rate.

Maurice F. Carmody, Clerk, from $1,050 to $1,200 per annum. Mr. Carmody was appointed on March 29, 1906, at $600 per annum. On February 1, 1907, he was increased to $750, and on April 1, 1907, to the present rate.

Constantine M. Dressle, Clerk, from $900 to $1,050 per annum. Miss Dressel was appointed on June 5, 1905, at $600 per annum; increased on February 1, 1907, to $750, and on April 1, 1908, to the present rate.

Benjamin Schumacher, Messenger, at $1,050, to Clerk at $1,200 per annum. Mr. Schumacher was appointed on May 26, 1906, as an Automobile Engineman at $3 per diem. On July 16, 1909, his title was changed to Messenger, at $1,050 per annum.

Edward Dahnsen, Clerk, from $900 to $1,050 per annum. Mr. Dahnsen was appointed on June 15, 1907, at $600 per annum, and increased on April 1, 1909, to the present rate.

In addition, the following new positions are requested:

Transitman	1 at	$1,500 00
Topographical Draftsmen	2 at	1,200 00
Rodman	1 at	1,200 00
Rodmen	3 at	1,050 00

Clerk	1 at	900 00
Clerk	1 at	1,050 00
Stenographer and Typewriter	1 at	1,050 00

The position of Clerk at $1,050 per annum is for Mr. Dahnsen, now in the Administration Division at $900 per annum. Mr. Dahnsen is to be transferred to the Engineering Division.

The necessary amount for the increases and new positions are to be provided for by the elimination of the following positions:

Assistant Engineer	1 at	$4,000 00
Assistant Engineer	1 at	2,100 00
Leveler	1 at	1,350 00
Axeman	1 at	900 00
Clerks	2 at	1,800 00
Clerk	1 at	480 00

The various changes would yearly give a decrease of $280. It appears from an examination of the records in the Department of Finance that the grade of Clerk, at $1,650 per annum, has not been established to permit of the proposed increase for one incumbent. Pending establishment, pursuant to the provisions of section 56 of the Greater New York Charter, I recommend that no action be taken on this item in the request.

The following table shows the changes in detail:

Account No.	Schedule Line.	Schedule Transfer.	
		Decrease.	Increase.
1770.	Assistant Engineers, 5 at $4,000	$4,000 00	....
	Assistant Engineers, 2 at $2,100	2,100 00	....
	Transitman, 1 at $1,500	....	$1,500 00
	Topographical Draftsmen, 2 at $1,500	....	1,500 00
	Topographical Draftsman, 1 at $1,200	....	1,200 00
	Leveler, 1 at $1,350	1,350 00	....
	Rodman, 1 at $1,200	....	1,200 00
	Rodmen, 4 at $1,050	....	3,150 00
	Axeman, 1 at $900	900 00	....
	Clerks, 2 at $1,800	3,600 00	....
	Clerk, 1 at $1,200	....	2,400 00
	Clerks, 9 at $1,050	....	1,050 00
	Clerk, 1 at $480	480 00	....
	Stenographer and Typewriter, 1 at $1,050	....	1,050 00
	Messengers, 2 at $1,050	1,050 00	....
		$13,480 00	$13,050 00

The attached resolution, if adopted, will grant the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the office of the President of the Borough of Brooklyn, to take effect as of June 1, 1911, as follows:

President of the Borough of Brooklyn.

Bureau of Highways, Engineering Division, Regular Force—

1770. Salaries:

Chief Engineer	1 at	$6,000 00

Clerk	1 at	1,500 00
Clerks	3 at	1,200 00
Clerks	10 at	1,050 00
Clerk	1 at	900 00
Stenographers and Typewriters	4 at	1,200 00
Stenographer and Typewriter	1 at	1,050 00
Typewriting Copyists	2 at	1,050 00
Messenger	1 at	1,050 00
Superintendent of Asphalt Plant	1 at	2,500 00
Mechanical Draftsman	1 at	1,500 00
Typewriter Accountant	1 at	1,500 00
Automobile Engineman	1 at	1,200 00

Budgetary part allowance, $78,400.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the President of the Borough of The Bronx requesting, and report of the Comptroller recommending, the modification of Salary Schedule No. 1721, supporting the appropriation made in the Budget for the year 1911 for the Office of said Borough President, providing for the elimination of the items Assistant Foreman, at $3.50, for 1,440 days, and Stokers, at $3, for 250 days, and adding $5,040 to the item Engineers, at $4.50, for 1,000 days, and $750 to the item Firemen, at $3, for 500 days:

City of New York, President of the Borough of The Bronx, 3d Avenue and 177th Street, June 20, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—Request is hereby respectfully made for the modification of the schedule lines supporting the appropriation made to this office for the year 1911 as follows:

President, Borough of The Bronx.

Bureau of Highways, Maintenance of Highways—

1721. Wages, Temporary Employees:

Foremen, at $4 per day (7,200 days)	$28,800 00
Carpenters, at $4.50 per day (1,200 days)	5,400 00
Pavers, at $5 per day, (3,400 days)	17,000 00
Rammers, at 4 per day (1,700 days)	6,800 00
Painters, at $4.50 per day (600 days)	2,700 00
Engineers, at $4.50 per day (2,120 days)	9,540 00
Flaggers, at $4.50 per day (720 days)	3,240 00
Laborers, at $2.25 per day (84,000 days)	189,000 00
Firemen, at 3 per day (500 days)	1,500 00
	$263,980 00

The above schedule provides for two changes from the present one.

First—The elimination of the schedule line for Assistant Foremen, which provided for an appropriation of $5,040, and adding said sum to that of the appropriation for Engineers, making a total for the latter schedule of $9,540. There are now five steam rollers in use on the macadam work of the Department, and it is intended to push that feature of maintenance continuously to the close of the current year, and, if possible, add one or two additional Engineers.

Second—The title of Stoker is eliminated and united with that of Firemen, under a recent Civil Service ruling. Respectfully,

CYRUS C. MILLER, President, Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the President of the Borough of The Bronx requested modification of the wage schedule for temporary employees in the Bureau of Highways, Maintenance of Highways, in his office, for the year 1911. In connection therewith I report as follows:

It is proposed to eliminate the line for Assistant Foreman, at $3.50, for 1,440 days, and add the $5,040 in the line to Engineers, at $4.50, for 1,000 days. The President states that the increase for the Engineers is due to the fact that five steam rollers are being used on maintenance work and that the additional funds are necessary to keep them in operation.

It is further proposed to strike out the line for Stokers, at $3, for 250 days, and transfer the funds to the line for Firemen, at $3, for 250 days. The President states that the transfer is in accordance with a Civil Service ruling.

No increase in compensation is involved.

Approval of the request will effect the Budget lines as follows:

Schedule No.		Line Transfer. Increase.	Line Transfer. Decrease.
1721.	Assistant Foremen, at $3.50 (1,440 days)	....	$5,040 00
	Engineers, at $4.50 per day (2,120 days)	$5,040 00	....
	Stokers, at $3 per day (250 days)	....	750 00
	Firemen, at $3 per day (500 days)	750 00	....
		$5,790 00	$5,790 00

I recommend approval of the request by the adoption of the attached resolution.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the office of the President of the Borough of The Bronx for the year 1911, as follows:

President, Borough of The Bronx.

Bureau of Highways, Maintenance of Highways—

1721.	Wages, Temporary Employees:	
	Foremen, at $4 per day (7,200 days)	$28,800 00
	Carpenters, at $4.50 per day (1,200 days)	5,400 00
	Pavers, at $5 per day (3,400 days)	17,000 00
	Rammers, at $4 per day (1,700 days)	6,800 00
	Painters, at $4.50 per day (600 days)	2,700 00
	Engineers, at $4.50 per day (2,120 days)	9,540 00
	Flaggers, at $4.50 per day (720 days)	3,240 00
	Laborers, at $2.25 per day (84,000 days)	189,000 00
	Firemen, at $3 per day (500 days)	1,500 00
		$263,980 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Acting President of the Borough of Queens requesting, and report of the Comptroller recommending, a modification of budgetary part allowance, Schedule No. 1839, supporting the appropriation made in the Budget for the year 1911, for the President of the Borough of Queens:

The City of New York, Offices, Commissioner of Public Works, Borough of Queens, Long Island City, April 25, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, Chairman, Board of Estimate and Apportionment,* New York City:

Dear Sir—Pursuant to resolution prefacing Budget for the year 1911, application is hereby made for revision of Appropriation Budget line 1839, Bureau of Sewers, Engineering Division, Regular Force, Supervising and Preliminary Force, Salaries, allotted to this Department for the year 1911, as follows:

Present Schedule.

Bureau of Sewers, Engineering Division, Regular Force—

1839. Supervising and Preliminary Survey Force, Salaries

Chief Engineer	1 at	$3,000 00
Assistant Engineers	2 at	2,700 00
Assistant Engineer	1 at	2,500 00
Assistant Engineer	1 at	2,250 00
Assistant Engineer	1 at	1,950 00
Assistant Engineers	2 at	1,800 00
Draughtsman	1 at	2,100 00
Draughtsmen	2 at	1,800 00
Draughtsman	1 at	1,650 00
Transitman	1 at	1,800 00
Rodmen	2 at	1,200 00
Axeman	1 at	900 00
Stenographer and Typewriter	1 at	1,200 00

Budgetary part allowance, $13,425.

Proposed Schedule.

Bureau of Sewers, Engineering Division, Regular Force—

1839. Supervising and Preliminary Survey Force, Salaries:

Chief Engineer	1 at	$3,000 00
Assistant Engineers	2 at	2,700 00
Assistant Engineer	1 at	2,500 00
Assistant Engineer	1 at	2,250 00
Assistant Engineer	1 at	1,950 00
Assistant Engineers	4 at	1,800 00
Draughtsman	1 at	2,100 00
Draughtsman	1 at	1,800 00
Draughtsman	1 at	1,650 00
Rodmen	2 at	1,200 00
Axeman	1 at	900 00
Stenographer and Typewriter	1 at	1,200 00

Budgetary part allowance, $13,425.

This modification is to provide for the promotion of 1 Transitman at $1,800 and 1 Draughtsman at $1,800 to the position of Assistant Engineer, and it does not involve any change of salary.

The Transitman, John D. C. Mackey, has been employed as Transitman at $1,800 since January 1, 1907, and by reason of particular fitness is qualified to take charge of large works. My object in changing his title is, that I desire to put him in direct charge, under the Chief Engineer, of construction of the Richmond Hill sewers and to make his title in keeping with the dignity of that position.

As to qualifications and character, the same may be said of Carl H. Nordell, whose title I wish to change from Topographical Draughtsman to Assistant Engineer. Mr. Nordell has been employed as a Draughtsman in the Bureau of Sewers since August 1, 1907. We desire to employ him in the field and place him in charge of large work.

Both of the above named employees are eligible for the contemplated change of title, having passed promotion examinations therefor. Respectfully,

WALTER H. BUNN, Commissioner of Public Works and Acting President, Borough of Queens.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On April 25, 1911, the Acting President of the Borough of Queens requested modification of the budgetary part schedule for the Bureau of Sewers, Engineering Division, Regular Force, No. 1839, Supervising and Preliminary Survey Force, in his office for the year 1911. In connection therewith, I report as follows:

The request was for changes in the titles of a Transitman and a Draughtsman, at $1,800 per annum each, to Assistant Engineer, without increase in compensation. On July 5, 1911, the President orally amended the request to provide for the change in title for only the Transitman. The Municipal Civil Service Commission has approved of the new title.

I recommend the adoption of the attached resolution granting the request as amended. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the office of the President of the Borough of Queens, for the year 1911, as follows:

President, Borough of Queens.

Bureau of Sewers, Engineering Division, Regular Force—

1839. Supervising and Preliminary Survey Force, Salaries:

Chief Engineer	1 at	$3,000 00
Assistant Engineers	2 at	2,700 00
Assistant Engineer	1 at	2,500 00
Assistant Engineer	1 at	2,250 00
Assistant Engineer	1 at	1,950 00
Assistant Engineers	3 at	1,800 00
Draftsman	1 at	2,100 00
Draftsmen	2 at	1,800 00
Draftsman	1 at	1,650 00
Rodmen	2 at	1,200 00
Axemen	1 at	900 00
Stenographer and Typewriter	1 at	1,200 00

Budgetary part allowance, $13,425.

Which was adopted by the following vote

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Public Charities requesting, and report of the Comptroller recommending, approval of the schedule for temporary employees of said Department paid from Appropriation No. 754, Administration, Manhattan and The Bronx, Contingencies, to provide for the temporary employment of two Examiners of Charitable Institutions for four months at $100 each per month, involving the transfer of $800:

Department of Public Charities of the City of New York, Foot of East 26th street, June 6, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—I beg respectfully to request the transfer of eight hundred dollars ($800) from the appropriation to this Department for the year 1911, entitled, Department of Public Charities, Manhattan and The Bronx, Code 1911, 745, General Supplies, to the appropriation, Department of Public Charities, Manhattan and The Bronx, Code 1911, 754, Contingencies, to meet the cost of two (2) Examiners of Charitable Institutions for four (4) months; said Examiners to be engaged on reinvestigation work.

Respectfully yours. M. J. DRUMMOND, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 6, 1911, the Commissioner of Public Charities requested the transfer of $800 within appropriations to his Department for the year 1911. In connection therewith I report as follows:

The transfer is from 745, General Supplies, Manhattan and The Bronx, to 754, Contingencies, Manhattan and The Bronx.

The appropriation for No. 754 was $925,000. The liability incurred to June 15. 1911, was $514,858.81, leaving an unencumbered balance of $410,141.19. The appropriation for No. 745 was $5,000. The liability incurred to June 15, 1911, was $3,107.50. The Commissioner states that the balance of $1,892.50 will be needed for carfares, postage, etc., for the remainder of the year.

The $800 is to provide for the temporary employment of two Examiners of Charitable Institutions for four months, at $100 each per month. The Examiners are to reinvestigate the conditions of families whose children have been committed to private institutions and are maintained at the expense of the City. On April 30, 1911, the number of children maintained as public charges, through commitment by the Department of Public Charities in the Borough of Manhattan, was 12,820. The number of children proposed for commitment during the year 1910 was 9,890. As a result of the investigations made by the 15 Examiners connected with the Children's Bureau, 6,569 of the applications were denied. In addition to the investigations made at the time of application, 5,299 reinvestigations were made into the ability of parents to maintain children who had been public charges for long periods. The reinvestigations resulted in 312 children being disapproved for further retention as public charges, representing a yearly saving to the City of more than $36,000.

The Commissioner states that owing to the great number of investigations which have to be made in connection with the commitment of children, and those made upon applications of parents for the discharge of children (the latter numbering 1,694 in 1910), it has been impossible to make proper reinvestigations, which are now several months behind.

The State Board of Charities, in a communication to this Board, under date of April 17, 1911, called attention to the increase in the census of institutions for children, and stated that one of the causes of such increase was the failure to reinvestigate commitments carefully at the end of each year in order to return as many children to their parents and guardians as possible. The State Board further stated that in The City of New York this condition seems to have been due largely to an inadequate examining force in the Department of Public Charities.

The Commissioner states that there are no funds in any of the salary appropriations of the Department available for the temporary employment of the additional Examiners. He is of the opinion that the proposed reinvestigating will result in returning to their homes many children now maintained at public expense, thereby saving a considerable sum to the City.

I recommend, therefore, that the request be approved by the adoption of the attached resolutions. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of schedule for temporary employees of the Department of Public Charities, paid from appropriation for 754, Administration, Manhattan and The Bronx, Contingencies, for the year 1911, as follows:

Department of Public Charities.

Administration, Manhattan and The Bronx, Contingencies—

754. Salaries, Temporary Employees:

Examiners of Charitable Institutions, at $1,200 per annum (8 months).

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Department of Public Charities for the year 1911, as follows:

From

Administration, Manhattan and The Bronx—

745. General Supplies	$800 00

To

Administration, Manhattan and The Bronx—

754. Contingencies	$800 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Board of Education requesting, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($174,000) for the general construction, etc., of additions to and alterations in Public School 132, Manhattan, under the jurisdiction of the Department of Education:

Department of Education, City of New York, Board of Education, Park Avenue and 59th Street, New York, June 23, 1911.

Hon. W. A. Prendergast, *Comptroller:*

Dear Sir—I beg to advise you of the receipt of a communication from Mr. C. B. J. Synder, Superintendent of School Buildings, under date of June 22, 1911, reading as follows:

"I am forwarding herewith the plans and specifications for the general construction, etc., of additions to and alterations in Public School 132, Borough of Manhattan, for transmission to the Comptroller, to be presented to the Board of Estimate and Apportionment in compliance with the resolution adopted by that Board on January 5, 1911.

"These plans have all been approved under the provisions of section 1073 of the Charter.

"The plans and specifications have also been approved by the Department of Water Supply, Gas and Electricity, as noted on same.

"The above have just been returned by the said Department. Approximate cost, $174,000."

The plans and specifications referred to in the above quoted letter are transmitted herewith. Respectfully yours,

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—The Board of Education, in a communication dated June 23, 1911, requested approval by the Board of Estimate and Apportionment of plans, specifications and estimate of cost, $174,000, for the general construction, etc., of additions to and alterations in Public School 132, Borough of Manhattan.

An examination of the plans and specifications shows that the new addition is to be erected in the rear of the present building, and will contain twenty-two rooms and an auditorium.

The present toilet building in the rear of the school building is to be removed and new toilets are to be provided in the basement of the existing building. Alterations are to be made in this building, such as are necessary to allow of the construction of these toilets, and for the proper connections between the old and new buildings. The plans and specifications bear the approval of the Department of Water Supply, Gas and Electricity, and are complete and satisfactory. The estimate of cost is reasonable.

The cost of this work is to be charged to fund C-DE-100B, authorized by the Board of Estimate and Apportionment April 13, 1911, in the sum of $230,140 for the construction and equipment of additions to and alterations in Public School 132, Borough of Manhattan.

I submit for adoption the resolution appended hereto. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted June 3, 1910, hereby approves the plans, specifications and estimate of cost, one hundred and seventy-four thousand dollars ($174,000), for the general construction, etc., of additions to and alterations in Public School 132, Borough of Manhattan, under the jurisdiction of the Department of Education.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Bridges requesting, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($13,500) for removing the old Pelham Bridge over Eastchester Bay, in Pelham Bay Park, The Bronx, under jurisdiction of said Department:

Department of Bridges, City of New York, 13-21 Park Row, Manhattan, N. Y., June 22, 1911.

Hon. William A. Prendergast, *Comptroller,* City of New York:

Dear Sir—Pursuant to a resolution adopted by the Board of Estimate and Apportionment on January 5, 1911, I transmit herewith for your examination and report to the said Board, plans, specifications and estimate of cost of the proposed contract for removing the old Pelham Bridge over Eastchester Bay in Pelham Bay Park, Borough of The Bronx.

The plans are shown on drawing No. 33, and the estimate of cost is $13,500.

The removal of the old bridge is necessary in order to clear the channel as required by the War Department, and also in order to remove an unsightly and useless object in this portion of Pelham Bay Park.

The proposed contract is chargeable to the fund of the Department of Bridges, entitled C-DB-9A, Bridge Over Eastchester Bay in Pelham Bay Park, Removal of Old Bridge, which fund was duly established by resolution of the Board of Estimate and Apportionment adopted May 4, 1911, and by resolution of the Board of Aldermen adopted May 23, 1911. Yours truly,

ARTHUR J. O'KEEFFE, Commissioner.

New York, June 30, 1911.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—The Commissioner of Bridges, in a communication dated June 22, 1911, requested approval by the Board of Estimate and Apportionment of plans, specifications and estimate of cost, $13,500, for removing the old Pelham Bridge over Eastchester Bay in Pelham Bay Park, Borough of The Bronx.

An examination of the plans and specifications submitted showed that the depth to which the crib fender of the pivot pier is to be excavated was not indicated. At the request of the Assistant Engineer of the Department of Finance this defect has been remedied by stating the exact depth on the plan for the work. The plans and specifications are now satisfactory and the estimate of cost is reasonable. Funds for this work were authorized by the Board of Estimate and Apportionment May 4, 1911.

I submit for adoption the resolution appended hereto. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted June 3, 1910, hereby approves the plans, specifications and estimate of cost, thirteen thousand five hundred dollars ($13,500) for removing the old Pelham Bridge over Eastchester Bay in Pelham Bay Park, Borough of The Bronx, under the jurisdiction of the Department of Bridges.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Fire Department requesting, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($5,600) for an extension of the underground system of the Fire Department fire alarm telegraph circuits on Vernon and Jackson avenues, from 1st street to Payntar avenue, and on Vernon avenue, from 2d street to 8th street, Borough of Queens:

Fire Department of The City of New York, June 5, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller:*

Sir—Forwarded herewith for the approval of the Board of Estimate and Apportionment are specifications and plans for an extension of the underground system of the Fire Department fire alarm telegraph circuits. This work is part of a new system and is to be provided under C-FD-2, Fire Alarm System, Extension of, Borough of Queens.

The estimated cost of this improvement is $5,600.

The completion of this work will permit the removal of poles along Vernon and Jackson avenues from 1st street to Payntar avenue, also the removal of fire alarm telegraph circuits from high tension poles on Vernon avenue from 2d street to 8th street. Respectfully, JOS. JOHNSON, Fire Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 5, 1911, the Fire Commissioner requested the approval of plans, specifications and estimated cost of $5,600 for an extension of the underground system of the Fire Department fire alarm telegraph circuits on Vernon and Jackson avenues, from 1st street to Payntar avenue and on Vernon avenue from 2d street to 8th street, Borough of Queens.

The plans and specifications call for material similar to that included in the specifications prepared for a new fire alarm telegraph system for the Borough of Manhattan by John J. Carty and Kempster B. Miller, and included in their report dated September 25, 1907.

The completion of the work will permit the removal of poles on Vernon and Jackson avenues, and the removal of wires from poles on Vernon avenue, which carry high tension wires.

The plans and specifications are correctly drawn and the work is necessary.

The Fire Commissioner proposes to charge the cost to the fund entitled: C-FD-2, Fire Alarm System, Extension of, Borough of Queens, in which the sum of $9,519.16 was released by the Board of Estimate and Apportionment on June 3, 1910.

I recommend that the plans, specifications and estimate of cost be approved by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted on June 3, 1910, hereby approves the plans, specifications and estimate of cost, five thousand six hundred dollars ($5,600), for an extension of the underground system of the Fire Department fire alarm telegraph circuits on Vernon and Jackson avenues, from 1st street to Payntar avenue, and on Vernon avenue, from 2d street to 8th street, Borough of Queens.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a report of the Comptroller referring to the resolution of the Board of Aldermen, requesting an issue of $8,225 special revenue bonds (subdivision 8, section 188 of the Charter), to provide for the employment in the Bureau of Buildings, Borough of Queens, of ten additional Building Inspectors at $1,200 each per annum, and two additional Clerks at $1,050 each per annum from June 1, 1911, recommending that no action be taken on the request, and that the President of the Borough be advised to make application for the additional force in the Budget estimate for his office for the year 1912.

Which was referred to the Budget Committee, consisting of the Comptroller, the President of the Borough of Manhattan and the President of the Board of Aldermen.

(On May 25, 1911, the above resolution was referred to the Comptroller.)

The Secretaary presented the following communication from the Department of Docks and Ferries requesting, and report of the Comptroller recommending, approval, pursuant to resolution adopted June 3, 1910, of the specifications and estimate of cost ($7,500) for dredging about 15,000 cubic yards in the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond, under the jurisdiction of said Department:

Department of Docks and Ferries, City of New York, Pier "A," North River, New York, February 23, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment,*

Sir—I transmit herewith specifications of Contract 1238, for hard digging dredging in all Boroughs. This contract calls for dredging about 15,000 cubic yards of material. The estimate is 50 cents per cubic yard. This is a corporate stock charge.

Request has been before you for some time past for authority to advertise and award this contract.

I now respectfully request approval of the specifications and estimate in accordance with resolution adopted June 3, 1910. Yours respectfully,

CALVIN TOMKINS, Commissioner of Docks.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On February 23, 1911, the Commissioner of Docks and Ferries requested the approval of specifications and estimated cost of $7,500 for dredging about 15,000 cubic yards of materials in the Boroughs of Manhattan, Brooklyn, Queens, The Bronx and Richmond. In connection therewith I report as follows:

No funds for the work were available until June 8, 1911, when $33,000 in corporate stock was approved by the Board of Estimate and Apportionment.

The proposed contract is for the dredging of mud and hard material at points where the construction of the new bulkheads and piers is in progress. Bulkheads and piers are being constantly built and it is essential that a contract for dredging should be in force so that trenches may be opened up for the foundations.

The new contract is to provide that the 15,000 cubic yards of materials must not be exceeded to an extent greater than five per cent.

The estimated cost of $7,500, or 50 cents per cubic yard, is based on prices that have been paid under former contracts for similar work, and is reasonable. The specifications have been amended as regards the date of completion of the work and are satisfactory. The cost is to be charged to the corporate stock fund entitled C-DD-31, Mud and Hard Dredging in New York Harbor.

I recommend the adoption of the atttached resolution approving the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves of the specifications and estimate of cost, seven thousand five hundred dollars ($7,500), for dredging, under the jurisdiction of the Department of Docks and Ferries, about fifteen thousand (15,000) cubic yards in the Boroughs of Manhattan, Brooklyn, Queens, The Bronx and Richmond.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Acting President of the Borough of Richmond requesting, and report of the Comptroller recommending, approval of the schedule of salaries and wages for the Topographical Bureau in the office of the President of the Borough of Richmond to take effect as of May 1, 1911, with the exception of the lines "Rodmen, at $1,050, for 6 incumbents," and "Topographical Draftsman, at $1,350, for 8 incumbents," which shall take effect as of June 20, 1911, in order to permit of the payment of the salaries of the incumbents affected for May and June:

The City of New York, Office of the President of the Borough of Richmond, Borough Hall, New Brighton, New York City, June 21, 1911.

Honorable Board of Estimate and Apportionment, 277 Broadway, New York:

Gentlemen—I would request a modification of the schedules of salaries and wages of the Topographical Bureau of this office (payable principally from corporate stock fund entitled C-PR-2, Fund for Topographical Bureau of the Borough of Richmond), as follows:

Principal Assistant Engineer	1 at	$3,600 00
Assistant Engineer	1 at	2,400 00
Assistant Engineer	6 at	2,250 00

Assistant Engineer	4	at	2,000 00
Assistant Engineer	2	at	1,800 00
Assistant Engineer	4	at	1,650 00
Assistant Engineer	2	at	1,500 00
Assistant Engineer	1	at	1,350 00
Assistant Engineer	1	at	1,200 00
Chief Draftsman	1	at	2,000 00
Topographical Draftsman	4	at	1,800 00
Topographical Draftsman	1	at	1,650 00
Topographical Draftsman	1	at	1,500 00
Topographical Draftsmen	8	at	1,350 00
Topographical Draftsman	4	at	1,200 00
Transitman and Computer	4	at	1,650 00
Transitman and Computer	5	at	1,350 00
Transitman and Computer	5	at	1,200 00
Leveler	1	at	1,500 00
Rodman	2	at	1,200 00
Rodman	7	at	1,050 00
Rodman	3	at	900 00
Axeman	9	at	900 00
Foreman	1	at	1,200 00
Foremen	3	at	1,050 00
Drivers	3	at	900 00
Laborers	17	at	900 00
Stenographer and Typewriter	1	at	1,500 00
Clerk	1	at	1,200 00
Clerk	1	at	1,050 00
Messenger	1	at	900 00

It is desired to have this modification for the purpose of covering the employees of the above bureau during the month of June as the schedule adopted on June 1 makes provisions for increases in salaries which it has not been found practicable to make, as yet, although it is proposed at a later date to put into effect the salaries provided for in the June 1 schedule.

I would request that immediate action be taken toward the establishment of this schedule and that it be made to take effect as of May 1, 1911. Yours respectfully,

LOUIS L. TRIBUS, Acting President of the Borough.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 21, 1911, the Acting President of the Borough of Richmond requested approval of a modification of the schedule for the non-budgetary allowance for the Topographical Bureau in the office for the year 1911. In connection therewith I report:

It is stated that a modification approved by your Board on June 1, 1911, provided for increases in salaries which it has not been found practicable to make at this time. It is proposed, therefore, to include the old rates in the schedule to permit of the payment of the incumbents involved for May and June. The grades of positions of Rodman at $1,050 per annum, for six incumbents, and Topographical Draftsman, at $1,350, for eight incumbents, were established on June 20, 1911, pursuant to the provisions of section 56 of the Greater New York Charter. Modification of these items, therefore, can only become operative as of that date.

I recommend that the request be approved by the adoption of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment approves of the following modification of the schedule of salaries and wages for the Topographical Bureau, in the office of the President of the Borough of Richmond, for the Corporate Stock Fund, to take effect as of May 1, 1911, with the exception of the lines: Rodman, at $1,050, for 6 incumbents, and Topographical Draftsman, at $1,350, for 8 incumbents, which shall take effect as of June 20, 1911, as follows:

Fund for Topographical Bureau, Borough of Richmond—

C-PR-2. Salaries:

Principal Assistant Engineer	1	at	$3,600 00
Assistant Engineer	1	at	2,400 00

Assistant Engineers	6 at	2,250 00
Assistant Engineers	4 at	2,000 00
Assistant Engineers	2 at	1,800 00
Assistant Engineers	4 at	1,650 00
Assistant Engineers	2 at	1,500 00
Assistant Engineer	1 at	1,350 00
Assistant Engineer	1 at	1,200 00
Chief Draftsman	1 at	2,000 00
Topographical Draftsmen	4 at	1,800 00
Topographical Draftsman	1 at	1,650 00
Topographical Draftsman	1 at	1,500 00
Topographical Draftsmen	8 at	1,350 00
Topographical Draftsmen	4 at	1,200 00

Leveler	1 at	1,500 00
Rodmen	2 at	1,200 00
Rodmen	7 at	1,050 00
Rodmen	3 at	900 00
Axemen	9 at	900 00
Foreman	1 at	1,200 00
Foremen	3 at	1,050 00
Drivers	3 at	900 00
Laborers	17 at	900 00
Messenger	1 at	900 00
Stenographer and Typewriter	1 at	1,500 00
Clerk	1 at	1,200 00
Clerk	1 at	1,050 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Comptroller, requesting the modification of salary schedules supporting the appropriation made in the Budget for the year 1911, for the Department of Finance, providing for the abolishment of the positions of Examiner at $2,400; 2 Clerks, 1 at $480 and 1 at $750, and Stenographer and Typewriter at $1,050 per annum; for the appointment of 5 Clerks at $300 each per annum and a Stenographer and Typewriter at $750 per annum, and for increasing the salary of a Financial Clerk from $2,100 to $2,250 per annum:

City of New York, Department of Finance, Comptroller's Office, July 1, 1911.

The Honorable Board of Estimate and Apportionment:

Gentlemen—Request is hereby made that the Budget Schedule Lines supporting the salaries appropriations, as made to the Department of Finance for the year 1911, be modified in order to provide for the following changes:

1. For abolishing the position now vacant, of Examiner, at $2,400 per annum, in the Law and Adjustment Division.

2. For the appointment of two Clerks at $300 per annum each in the office of City Paymaster.

3. For abolishing one position of Clerk, now vacant at $480 per annum, in the office of City Paymaster.

4 For the promotion of a Financial Clerk in the Paymaster's office from $2,100 to $2,250 per annum.

This promotion is intended for James S. McCabe, who has been in the service of the Department of Finance since January 1, 1899.

5. For the appointment of a Stenographer and Typewriter in the Auditing Bureau at $750 per annum, and the abolishment of one position of Stenographer and Typewriter in that Bureau, now vacant, at $1,050 per annum.

6. For changing "Balance Unassigned" in Executive Division Schedule from "$160" to "$2,290."

7. For the appointment of an additional Clerk at $300 per annum in the Auditing Bureau.

8. For the appointment of two additional Clerks at $300 per annum, in the Bureau for the Collection of Taxes.

9. For abolishing one position of Clerk, now vacant, at $750 per annum, in the Bureau for the Collection of Taxes.

10. For changing item "Balance Unassigned" from "$1,160" to "$1,310" in schedule of Revenue: Taxes, Assessments and Arrears, Miscellaneous.

Resolution authorizing the changes as requested, is transmitted herewith for adoption. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the following modification of the schedules of salaries supporting the appropriation made to the Department of Finance for the year 1911, entitled and as follows:

Executive Division—

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following report of the Comptroller certifying pursuant to section 246 of the Charter the claim of the "Sun" for $316.80 for certain advertising for the Board of Water Supply from December 8 to December 13, 1910, inclusive:

City of New York, Department of Finance, Comptroller's Office, July 1, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—Under and pursuant to the provisions of chapter 601 of the Laws of 1907, being section 246 of the Greater New York Charter, as amended, entitled "An Act to amend the Greater New York Charter in relation to the powers of the Board of Estimate and Apportionment," I hereby certify that a claim has been presented by "The Sun" in the sum of $316.80, for advertising rendered the Board of Water Supply of The City of New York, from December 8 to December 13, 1910, inclusive; that such claim, according to the opinion of the Acting Corporation Counsel, is illegal and invalid as against The City of New York, but notwithstanding in my judgment it is equitable and proper for the City to pay said claim, inasmuch as the City has received value for the same, and that $316.80 is the amount which should be paid in full satisfaction thereof. Respectfully, WM. A. PRENDERGAST, Comptroller.

City of New York, Department of Finance, Comptroller's Office, July 1, 1911.

In the matter of the petition of "The Sun," under chapter 246 of the Greater New York Charter, for the payment of the sum of $316.80, alleged to be due for the publication of certain advertisements at the request of the Board of Water Supply, inviting proposals for contracts 63, 65, 66 and 67, for the construction of portions of City tunnels, Catskill Aqueduct.

Hon. William A. Prendergast, *Comptroller:*

Sir—The following communication, a copy of which is here set forth, was received from the petitioner June 28, 1911:

"Hon. Wm. A. Prendergast, *Comptroller,* City of New York, New York:

"My Dear Mr. Prendergast—Enclosed herewith a bill for advertising amounting to $316.80 for advertisements published in 'The Sun' during the month of December, 1910, soliciting proposals under contracts 63, 65, 66 and 67, for the construction of portions of the City tunnels, Catskill Aqueduct.

"The original order received by 'The Sun,' authorizing this advertising, is on file in the office of the Board of Water Supply, having been, as required by the rules of that Department, returned to the office of said Board by 'The Sun,' together with the bill and proof of publication.

"The service was performed in accordance with the above order on December 8, 9, 10, 11, 12 and 13, six days in all. Thereafter the advertising was ordered stopped, which order was complied with.

"This bill is long past due and unpaid, although demand has been made for payment of the same. As we are innocent parties to any other transaction in the matter, we look to The City of New York for the full payment of this amount, $316.80, under section 246 of the Charter. Respectfully, (Signed) D. W. QUINN, Cashier."

A copy of the bill transmitted with the above application is here set forth.

"1910.	Lines.	Times.	Rate.	
December 8, 9, 10, 11, 12, 13..................	33	6	40	$79 20
December 8, 9, 10, 11, 12 13..................	34	6	40	81 60
December 8 9, 10, 11, 12, 13..................	29	6	40	69 60
December 8, 9, 10, 11, 12, 13..................	36	6	40	86 40
				$316 80"

In response to a request for information concerning this petition, the Board of Water Supply, with a letter dated June 29, 1911, and signed by Joseph P. Morrissey, Secretary, transmits a copy of a communication dated May 26, 1911, which is addressed to the Corporation Counsel. The communication in question reads as follows:

"Hon. Archibald R. Watson, *Corporation Counsel, City of New York,* Hall of Records, New York City:

"Sir—On December 7, 1910, two of the Commissioners of the Board of Water Supply, at an informal meeting, directed the Secretary of the Board to publish in certain newspapers advertisements soliciting proposals under contracts 63, 65, 66 and 67, for the construction of portions of the City Tunnel, Catskill Aqueduct, bids to be opened December 24, 1910.

"Under date of December 13, 1910, the advertisements were discontinued by the Board of Water Supply for the reason that the contracts in question had not received the approval of the Corporation Counsel as to form.

"Bills have been received for this advertising from the date of insertion, December 8, 1910, to the date of discontinuance, December 13, 1910, as follows:

'The Sun'	$316 80
'The Brooklyn Daily Eagle'	130 56
'The World'	268 80
'Engineering Record'	44 80
Total	$760 96

"In view of the fact that the form of these contracts received your subsequent approval on April 13, 1911, the Board of Water Supply desires to be advised if vouchers can be properly certified to the Comptroller of The City of New York in payment of the advertisements soliciting the opening of proposals on December 24, 1910.

"Respectfully, BOARD OF WATER SUPPLY,
"Per Secretary.

Replying to the request of the Board of Water Supply, Acting Corporation Counsel G. L. Sterling, in an opinion dated June 12, 1911, says:

"Your Secretary informs me that at an informal meeting of two of the Commissioners held December 7, 1910, he was directed to publish in certain newspapers advertisements soliciting proposals under contracts 63, 65, 66 and 67, for the construction of portions of the City Tunnel, Catskill Aqueduct. These advertisements were inserted, but were discontinued on December 13, 1910, for the reason that the contracts in question had not received the approval of the Corporation Counsel as to form. On April 13, 1911, the Corporation Counsel gave his approval as to form.

"I think these claims cannot be enforced. Section 26, chapter 724, Laws of 1905, provides that the forms of contract, specifications and bonds for faithful performance shall be subject to approval as to form by the Corporation Counsel, which approval shall be endorsed thereon or attached thereto, and section 27 provides that when the form of any contract, with its specifications, and the form of bond for the performance thereof shall have been approved as provided for in section 26, the Board of Water Supply shall advertise for sealed bids or for proposals for the doing of the work, or the furnishing of the materials called for in such approved form of contract. The same section directs that the advertisement shall be published in the City Record and in two daily newspapers published in The City of New York, to be designated by the Board of Water Supply for at least fifteen days consecutively before the time fixed for the closing of the bid box.

"Section 27 contemplates that no advertisement shall be published prior to the actual approval as to form of the contract by the Corporation Counsel. The reason for this is apparent. The contract as originally drawn might not be acceptable in form to the Corporation Counsel, and it might be necessary to make many material changes. The language of the statute is explicit and is based upon sound policy.

"Even if the contract has been approved by the Corporation Counsel prior to its advertisement, the statute restricts advertising to the City Record and to two daily newspapers. I know of no authority for publishing the notices in four papers, as seems to have been done in the present instance.

"If the four newspapers shall present petitions to the Comptroller in conformity with the provisions of section 246 of the Charter, it is possible that the facts, when fully presented, may justify the Comptroller in acting thereon.

"Yours respectfully (Signed) G. L. STERLING, Acting Corporation Counsel."

Charles D. Cords, of the Division of Law and Adjustment of this Department, makes a report concerning this petition under date of June 29, 1911, in which he states:

"The advertisements were inserted as the result of the following order, which was transmitted to 'The Sun':

'Board of Water Supply, City of New York, 165 Broadway, New York, December 7, 1910.

'The Sun, Printing House Square, New York City:

'Gentlemen—We send you herewith advertisements for bids for contracts 63, 65, 66 and 67 (for the construction of portions of the City Tunnel of the Catskill Aqueduct), bids to be opened December 24, 1910, at the offices of the Board of Water Supply, 165 Broadway, seventh floor, at 11 a. m.

'Please publish these advertisements in your paper, commencing December 8, 1910, and continuing in each issue of your paper thereafter, including Sundays and holidays, to and including December 24, 1910.

'These advertisements should be set in agate type, and only the appearing lines should be charged for.

'Please send bill in triplicate for each contract separately, together with affidavit of publication for each contract separately, in duplicate, to this office.

'Please return this order with your bills.

'Very truly yours, BOARD OF WATER SUPPLY,
"Per (signed) THOMAS H. KEOGH, Secretary.'

"It seems that because of the fact that the contracts had not yet been approved by the Corporation Counsel, it was feared by the Board of Water Supply that the provisions in relation to advertising had not been fully complied with, resulting in the following communication to 'The Sun' under date of December 13, 1910:

"Gentlemen—Confirming telephone conversation of this afternoon, kindly discontinue the advertisements requesting bids for contracts 63, 65, 66 and 67, for work on the Catskill Aqueduct, appearing in your paper. The advertisements should not appear in to-morrows issue of your paper. Kindly submit your bill therefor up to and including to-day. Very truly yours, BOARD OF WATER SUPPLY,
'Per (signed) THOMAS H. KEOGH, Secretary.'

"Commissioner Charles N. Chadwick's version of how the advertising was ordered before the contracts were actually approved as to form by the Corporation Counsel, is as follows: That on the supposition that the Corporation Counsel had approved the form of the contracts, Commissioners John A. Bensel and Charles A. Shaw held an informal meeting on December 7, 1910, after which they directed the then Secretary, Mr. Keogh, to have the advertisements inserted. Mr. Chadwick states that his co-Commissioners acted entirely in good faith and with the object only of precipitating the work as much as possible. Mr. Chadwick states that he was informed that the advertising had been given out and that it occurred to him to locate the opinion of the Corporation Counsel which approved the contracts as to form. The approval was not found, and so on December 13, 1910, the Commissioners concluded that the best policy was to discontinue the advertisements until the contracts had been approved. On April 11, 1911, the Corporation Counsel did approve the form of the contracts, without alteration in any particular from the original, subsequent to which orders were issued for the continuance of the advertising. It seems that the order for the original advertising for which claim is herein made, was based upon a misconception of a telephone message which had been received.

"Mr. Chadwick states that there is no doubt about the City's having received great benefit by this advertising; he showed statements which revealed a comparatively wide variance between the various bids received, particularly the contrast between the high and the low bidders; and averred that the additional publicity unquestionably inured to the benefit and profit of the City.

"There seems no question about 'The Sun's' having acted in good faith; it received the order to insert the matter; it published it, and has submitted proofs of publication which are hereto attached and which show the publication of the four different advertisements on the six respective dates claimed.

"The following dates of publication appear, showing the number of lines used, number of times inserted, rate per line, the totals and final total:

"Dates of Publication.	Number of Lines.	Times Published.	Rate per Line.	Total.	Final Total.
December 8, 9, 10, 11, 12, 13......	33	6	$0 40	$79 20	
December 8, 9, 10, 11, 12, 13......	34	6	40	81 60	
December 8, 9, 10, 11, 12, 13......	29	6	40	69 60	
December 8, 9, 10, 11, 12, 13......	36	6	40	86 40	
					$316 80

"It has been ascertained in the Bureau of Audit in this Department that the rate which has always been charged by 'The Sun' for public notices of every character has always been 40 cents a line and this rate has always been allowed, and is still effective. The amounts have been verified, the computations checked, the price charged, therefore, may be deemed reasonable and just."

It is provided in section 27 of chapter 724 of the Laws of 1905, which is an act to provide for a supply of pure and wholesome water for the City, etc., as follows:

"When the form of any contract with its specifications and the form of bond for the performance thereof shall have been approved as provided for in the last section, the board of water supply shall advertise for sealed bids or for proposals for the doing of the work or the furnishing of the materials called for in such approved form of contract. Said advertisement shall be published in the City Record and in two daily newspapers published in The City of New York, to be designated by the board of water supply, for at least fifteen days consecutively before the time fixed for the closing of the bid box."

In a communication addressed to former Comptroller Herman A. Metz, under date of June 12, 1909, Acting Corporation Counsel G. L. Sterling, in construing the above section, said:

"The provisions in this statute as to advertising should, of course, be observed and in fact they are mandatory. Their object is to secure at least a certain amount of advertising so that there can be no secrecy or concealment of what is going on. The object to be secured is publicity, and to obtain the most advantageous terms in the public interest. I do not think these provisions should be construed to mean that there is no power in the Board of Water Supply to publish more extensively than required by the strict terms of the statute. As already noted, there are two clauses that are to be considered in this connection, one in section 1 reading as follows: The Board 'shall have such further powers as may be requisite to the efficient performance of the duties imposed upon it by this Act.' The other is in section 44, which concludes as follows: The Board is authorized and empowered 'to incur other necessary expenses suitable and proper to enable it to carry out the provisions of this Act.'

"In my opinion these clauses, taken in connection with the general scheme and plan of the statute, are sufficient to authorize the Board of Water Supply to contract for more advertising than the lowest limit provided by the other sections of the statute if, in the judgment of the Board, that course is in the interest of the City."

From the facts in this case, as set forth above, it appears that the advertising referred to is not chargeable against the City as a legal liability, owing to the fact that the contracts in connection with which proposals were solicited were not approved by the Corporation Counsel at the time or prior to the publication of the advertisements in question. The fact that said advertisements were published in more papers than were required by statute does not, in my opinion, bar the payment of this claim, as section 27 of chapter 724 of the Laws of 1905, quoted above, does not appear to restrict the publication to certain papers, but rather prescribes those papers in which it is necessary for the advertisement to appear.

It is also disclosed that the petitioner received an order from the Board of Water Supply covering the publication of the advertising in question, and while I do not approve the method or circumstances under which said order was issued; nevertheless, knowledge thereof is not chargeable against the petitioner, who, in good faith, published the advertisements for which payment is now sought.

Mr. Cords states that Commissioner Chadwick, of the Board of Water Supply, is of the opinion that the City has benefitted by said advertisement, and as the price therefor has been certified to as correct, as well as to be reasonable and just, it is respectfully recommended that you issue your certificate pursuant to section 246 of the Greater New York Charter. Respectfully,

H. C. W. MELICK, Auditor of Accounts.

Approved: Albert E. Hadlock, Chief of the Division of Law and Adjustment.

The following resolution was offered:

Resolved, That pursuant to chapter 601 of the Laws of 1907, being section 246 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby determines that the City has received a benefit from "The Sun," and is justly obligated to pay to "The Sun," without interest, the sum of $316.80, for certain advertising rendered the Board of Water Supply from December 8 to December 13, 1910, inclusive, that the said sum shall be paid in full satisfaction of the claim which has been presented on behalf of "The Sun" for the period above mentioned, and shall be paid only upon the execution by said claimant of a full release in favor of the City, in such form as shall be approved by the Corporation Counsel, and the Comptroller is hereby authorized to pay said claim from the fund entitled "C-CM-3, New Water Supply for The City of New York, chapter 724, Laws of 1905."

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens, and Richmond—16.

The Secretary presented the following communication from the Engineer in Charge, Bureau of Franchises, office of the Board of Estimate and Apportionment, requesting that the salary schedules adopted June 22, 1911, be modified by having the promotion of Frederick P. Peirce, Topographical Draftsman, from $1,800 to $2,100, become effective as of June 20, 1911:

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, July 3, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—By resolution adopted by the Board of Estimate and Apportionment, June 22, 1911, Frederick P. Peirce, Topographical Draftsman in this office, was promoted to the position of Assistant Engineer at $2,100 per annum. The Municipal Civil Service Commission has declined to pass the payroll as Assistant Engineer at this salary, due to the existence of a preferred eligible list and other matters which they have not definitely stated.

I would therefore request that the matter be presented to the Board at its meeting of July 6, 1911, with the recommendation that the Salary Schedules be modified by having the promotion become effective as Topographical Draftsman at $2,100. The position of Topographical Draftsman should be effective as of June 20, 1911. The grade of Topographical Draftsman at $2,100 has already been established.

Yours very truly, HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Estimate and Apportionment June 22, 1911, which reads as follows:

> Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules for salary increases to be paid from other than budgetary funds under the jurisdiction of the Board of Estimate and Apportionment for the year 1911, as follows:
>
> *Board of Estimate and Apportionment.*
>
> General Administration—
>
> Salary increases of regular employees to be paid from special revenue bonds:

	Per Annum.
Clerk, 1, from $750 to $900 per annum, from June 1, 1911	$150 00
Clerk, 1, from $300 to $480 per annum, from June 1, 1911	180 00
Stenographer and Typewriter, 1, from $1,500 to $2,100 per annum, from June 1, 1911	600 00
Stenographers and Typewriters, 2, from $1,500 to $1,650 per annum, from June 1, 1911	300 00

Division of Public Improvements—

Salary increases of regular employees to be paid from special revenue bonds:

	Per Annum.
Engineer, 1, from $6,000 to $7,500 per annum, from June 1, 1911	$1,500 00
Assistant Engineer, 1, from $3,000 to $3,500 per annum, from June 1, 1911	500 00
Assistant Engineer, 1, from $2,400 to $2,700 per annum, from June 1, 1911	300 00
Assistant Engineer, 1, from $2,250 to $2,700 per annum, from June 20, 1911	450 00

Stenographer and Typewriter, 1, from $1,500 to $1,800 per annum, from June 1, 1911	300 00
Topographical Draftsman, 1, from $2,000 to Assistant Engineer at $2,400 per annum, from June 1, 1911	400 00
Clerk, 1, from $1,350 to $1,650 per annum, from June 20, 1911	300 00
Clerk, 1, from $540 to $750 per annum, from June 1, 1911	210 00
Clerk, 1, from $480 to $750 per annum, from June 20, 1911	270 00

Division of Franchises—

Salary increases of regular employees to be paid from special revenue bonds:

	Per Annum.
Engineer, 1, from $6,000 to $7,500 per annum, from June 1, 1911	$1,500 00
Assistant Engineer, 1, from $3,300 to $3,800 per annum from June 20, 1911	500 00
Assistant Engineer, 1, from $2,400 to $2,700 per annum, from June 1, 1911	300 00
Assistant Engineer, 1, from $2,400 to $2,700 per annum, from June 20, 1911	300 00
Topographical Draftsman, 1, *from* $1,800 *to Assistant Engineer at* $2,100 *per annum, from June* 1, 1911	300 00
Clerk, 1 from $2,850 to $3,150 per annum, from June 20, 1911	300 00
Clerk, 1, from $2,400 to $2,550 per annum, from June 1, 1911	150 00
Clerk, 1, from $1,500 to $1,800 per annum, from June 1, 1911	300 00
Clerk, 1, from $1,050 to $1,200 per annum, from June 1 1911	150 00
Clerk 1, from $600 to $750 per annum, from June 20, 1911	150 00
Clerk, 1, from $300 to $480 per annum, from June 1, 1911	180 00
Law Clerk, 1, from $1,650 to $1,950 per annum, from June 20, 1911	300 00
Stenographer and Typewriter, 1, from $1,200 to $1,350 per annum, from June 1, 1911	150 00
Stenographers and Typewriters, 2, from $1,050 to $1,350 per annum, from June 1, 1911	600 00

—be and the same is hereby amended by striking therefrom the item, "Topographical Draftsman, 1, *from* $1,800 *to Assistant Engineer at* $2,100 *per annum, from June* 1, 1911, $300," *and inserting in place thereof the item "Topographical Draftsman,* 1, *from* $1,800 *to* $2,100 *per annum, from June* 20, 1911, $300."

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Estimate and Apportionment June 22, 1911, which reads as follows:

"Resolved, That the Board of Estimate and Apportionment hereby fixes the salaries of the following named employees in the office of the Board of Estimate and Apportionment, to take effect June 1, 1911:

Office of the Secretary—

	Per Annum.
Edward P. O'Connor, Stenographer and Typewriter, at	$2,100 00
Orrin N. Webster, Stenographer and Typewriter, at	1,650 00
Bessie M. Ross, Stenographer and Typewriter, at	1,650 00
Mary V. Murphy, Stenographer and Typewriter, at	1,650 00
Charlotte V. Eaton, Stenographer and Typewriter, at	1,500 00
Theresa Stern, Stenographer and Typewriter, at	1,500 00
Horace F. Burpee, Clerk, at	900 00
John Kennedy, Clerk, at	480 00
Office of Chief Engineer—	
Frederick W. Koop, Assistant Engineer, at	3,300 00
Division of Public Improvements—	
Arthur S. Tuttle, Engineer in Charge, at	7,500 00
Frederick F. Fuess, Assistant Engineer, at	3,500 00
Vernon S. Moon, Assistant Engineer, at	2,700 00
Berthold Scheiman, Assistant Engineer (title changed from Topographical Draftsman), at	2,400 00
John W. Meade, Stenographer and Typewriter, at	1,800 00
Douglas J. Fitts, Clerk, at	750 00

Bureau of Franchises—

Harry P. Nichols, Engineer in Charge, at	7,500 00
Edward W. Libaire, Assistant Engineer, at	2,700 00
Frederick P. Peirce, Assistant Engineer (title changed from Topographical Draftsman), at	2,100 00
James D. McGann, Clerk, at	2,550 00
John F. Conway, Clerk, at	1,800 00
Joseph A. Young, Clerk at	1,200 00
Eugene J. Carlin, Clerk, at	480 00
Josephine E. A. Schmidt, Stenographer and Typewriter, at	1,350 00
Florence B. McQueeny, Stenographer and Typewriter, at	1,350 00
Josephine Brennan, Stenographer and Typewriter, at	1,350 00

—and fixes the salaries of the following named employees, to take effect June 20, 1911:

Office of the Chief Engineer—

John E. Kelly, Stenographer and Typewriter, at	2,700 00

Division of Public Improvements—

John E. Hill, Assistant Engineer, at	2,700 00
James J. O'Connor, Clerk, at	1,650 00
John J. Ahearn, Clerk, at	750 00

Bureau of Franchises—

John A. McCollum, Assistant Engineer, at	3,800 00
Charles H. Vanderbilt, Assistant Engineer, at	2,700 00
Victor McLaughlin, Clerk, at	3,150 00
Martin J. Karl, Clerk, at	750 00
Joseph A. Devery, Law Clerk, at	1,950 00

—and be it further

Resolved, That the Secretary be and he hereby is authorized to make the following appointments in his office:

	Per Annum.
Clerk, 1, at	$300 00
Stenographers and Typewriters, 2 at (each)	750 00"

—be and the same is hereby amended by striking therefrom the item *"Frederick P. Peirce, Assistant Engineer (title changed from Topographical Draftsman), at $2,100,"* and inserting the item *"Frederick P. Peirce, Topographical Draftsman, at $2,100"* immediately following the item *"Charles H. Vanderbilt, Assistant Engineer, at $2,700."*

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Estimate and Apportionment June 22, 1911, which reads as follows:

"Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules as revised for the Board of Estimate and Apportionment for the year 1911, as follows:

Division of Public Improvements—

1348. Salaries:

Engineer in Charge	$6,000 00
Assistant Engineer	3,000 00
Assistant Engineer	2,400 00
Assistant Engineer	2,250 00
Assistant Engineer	2,000 00
Topographical Draftsman	1,800 00
Stenographer and Typewriter	1,500 00
Stenographer and Typewriter	1,150 00
Clerk	1,350 00
Clerk	540 00
Clerk	480 00

Division of Franchises—

1349. Salaries:

Engineer in Charge	$6,000 00
Assistant Engineer	3,300 00
Assistant Engineers, 2 at $2,400	4,800 00
Assistant Engineer	1,800 00
Clerk	2,850 00
Clerk	2,400 00
Clerk	1,500 00
Clerk	1,050 00
Clerk	600 00
Clerk	300 00
Law Clerk	1,650 00
Stenographer and Typewriter	1,200 00
Stenographers and Typewriters, 2 at $1,050	2,100 00
Typewriting Copyist	750 00"

—be and the same is hereby amended by striking from Schedule 1,349, Salaries, the item *"Assistant Engineer, $1,800,"* and inserting in place thereof the item *"Topographical Draftsman, $1,800."*

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a communication from the Secretary of the Brooklyn League, inclosing copy of resolutions adopted by the Committee on Education of the Brooklyn League, urging the Board to grant such increase in their appropriation for the maintenance of public schools of the City in the year 1912 as will permit the payment of the salaries of all teachers for whom school rooms can be provided up to the limit of the requirements for instruction in the established grades of public schools in the City of New York and that increased provision be made for the giving of instruction in drawing and physical and industrial training; also that the appropriation of a sum not less than ten millions of dollars be appropriated in the Corporate Stock Budget for 1911 for new school sites, buildings and equipment.
—which was referred to the Budget Committee and to the Corporate Stock Budget Committee.

The Secretary presented the following communication from the City Chamberlain requesting, and report of the Comptroller recommending, the modification of Salary Schedule No. 35 supporting the appropriation made in the Budget for the year 1911, for the office of the City Chamberlain, providing for the elimination of a Clerk at $1,200 per annum and the substitution of one at $900 per annum, said modification to take effect July 1, 1911:

Office of the Chamberlain, City of New York, June 29, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller, City of New York:*

Dear Sir—I desire to withdraw my request made under date of June 19, 1911, for a modification in the salary schedule of the employees of this office, by providing for 4 Clerks at $1,350 and 1 Clerk at $900, in place of 3 Clerks at $1,350 and 1 Clerk at $1,200, leaving a balance unassigned of $150.

Instead, I respectfully request that the salary schedule be modified so as to provide for 1 Clerk at $900 in place of 1 Clerk at $1,200, leaving a balance unassigned of $300. Yours very truly, R. R. MOORE, Chamberlain.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 29, 1911, the City Chamberlain requested modification of the salary schedule for his office for the year 1911. In connection therewith we report as follows:

It is proposed to strike out a Clerk at $1,200 per annum, and substitute one at $900; the balance of $300 to be scheduled as unassigned.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Increase.	Decrease.	Increase	Decrease.
35.	Clerk, 1 at $1,200	......	$1,200 00	......	$600 00
	Clerk	$900 00	......	$450 00	......
	Unassigned balance	300 00	......	150 00	......
		$1,200 00	$1,200 00	$600 00	$600 00

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the office of the City Chamberlain, in the Department of Finance, for the year 1911, to take effect July 1, as follows:

Department of Finance.

The Chamberlain—

35. Salaries:

Chamberlain	$12,000 00
Deputy Chamberlain	5,000 00
Bookkeepers, 2 at $2,850	5,700 00
Bookkeeper	2,000 00
Bookkeeper	1,950 00
Bookkeeper	1,800 00
Clerks, 2 at $1,650	3,300 00
Clerk	1,500 00
Clerks, 3 at $1,350	4,050 00
Clerks, 3 at $1,050	3,150 00
Stenographer	1,200 00
Clerk	900 00
Secretary	3,000 00
Warrant Clerk	2,500 00
Warrant Clerks, 3 at $1,650	4,950 00
Warrant Clerk	1,500 00
Warrant Clerk	1,350 00
Bank Messengers, 2 at $1,200	2,400 00
Examiner of Coupons, etc	1,000 00
Unassigned Balance	300 00
	$59,550 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the President of the Borough of Queens requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, relative to the revision of the schedule of salaries and wages for the Topographical Bureau of the office of said Borough President, to take effect July 1, 1911, providing for an increase of $300 in the salary of one incumbent and of $150 for twenty-eight incumbents, and for increasing the number of Laborers at $2.50 per diem:

The City of New York, offices Commissioner of Public Works of the Borough of Queens, Long Island City, June 6, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, and Chairman Board of Estimate and Apportionment:*

Dear Sir—At a meeting of the Corporate Stock Budget Committee of the Board of Estimate and Apportionment, consisting of the Comptroller and the President of the Board of Aldermen, held May 22, 1911, we were informed that a recommendation would be sent to the full Board that this office be allowed two hundred and four thousand dollars, ($204,000.00) for the use of the Topographical Bureau, beginning July 1, 1911, which, with the balance on hand, would approximate an authorization of two hundred and twenty-four thousand dollars ($224,000.00), available that date.

It, therefore, becomes necessary, in order to meet the additional demands of the public and to get this Bureau on a proper working basis, to revise the present schedule of positions allowed by your Board, and to that end we desire a resolution authorizing the following schedule of positions for the Topographical Bureau, this office, to be effective July 1, 1911, to wit:

President of the Borough of Queens, Topographical Bureau.

Salaries, regular force:

Engineer in charge	1 at	$5,000 00
Assistant Engineer	1 at	4,000 00
Assistant Engineer	1 at	2,850 00
Assistant Engineer	1 at	3,000 00
Assistant Engineers	3 at	2,550 00
Assistant Engineers	2 at	2,250 00
Assistant Engineers	8 at	2,100 00
Assistant Engineers	3 at	1,950 00
Assistant Engineers	5 at	1,800 00
Transitman and Computer	1 at	1,800 00
Transitmen and Computers	13 at	1,650 00
Transitmen and Computers	4 at	1,500 00
Transitmen and Computers		1,200 00
Topographical Draughtsmen	5 at	1,650 00
Topographical Draughtsmen	8 at	1,800 00
Topographical Draughtsmen	20 at	1,500 00
Topographical Draughtsmen	12 at	1,350 00
Topographical Draughtsmen		1,200 00
Computers	3 at	1,800 00
Computers	3 at	1,200 00
Rodmen	2 at	1,200 00
Rodmen	4 at	1,050 00
Axemen	24 at	900 00
Draughtsman's Helper	1 at	900 00
Clerk	1 at	1,200 00
Clerk	1 at	540 00
Stenographer and Typewriter	1 at	1,050 00
Stenographer and Typewriter	1 at	900 00
Typewriting Copyist	1 at	1,050 00
Messenger	1 at	1,200 00
Messenger	1 at	1,050 00

Which amends the present schedule by eliminating the positions of

Assistant Engineer	1 at	$1,800 00
Transitmen and Computers	2 at	1,350 00
Topographical Draughtsmen	6 at	1,350 00
Rodmen	1 at	900 00
Messenger	1 at	1,050 00
Clerk	1 at	1,050 00

—and adding thereto

Assistant Engineer	1 at	2,100 00
Transitmen and Computers	2 at	1,500 00
Topographical Draughtsmen	16 at	1,500 00
Computers	3 at	1,200 00
Rodman	1 at	1,050 00
Axemen	8 at	900 00
Messenger	1 at	1,200 00

—and the positions of Topographical Draughtsmen at $1,200, and Transitmen and Computers at $1,200, the number of incumbents to be limited only by the requirements of the Bureau and the funds at hand.

And to amend the additional schedule, "non-technical positions," allowed by your Board, to read as follows

Messenger, 1 at, per diem (302 days)	$4 50
Messenger, 1 at, per diem (302 days)	4 00
Foremen, 2 at, per diem (302 days)	4 00
Assistant Foremen, 2 at, per diem (302 days)	3 25
Driver, 1 at, per diem (302 days)	3 00
Driver, 1 at, per diem (302 days)	2 75
Flagger, 1 at, per diem (302 days)	4 00

Laborers, 2 at, per diem (302 days)	4 00
Laborers, 12 at, per diem (302 days)	3 00
Laborers, 8 at, per diem (302 days)	2 75
Laborers, 13 at, per diem (302 days)	2 50
An addition being made of eight (8) laborers, at, per diem	2 50

Our Engineer reports that it is imperative that his force should be materially increased; that the technical men employed in this Bureau receive less money than is being paid for similar service in other Departments and Bureaus of the City Government; that since January, 1910, twenty-five technical men have resigned from this Bureau, six within the last month, to accept positions in other Departments in the Municipality at an increase in salary of from $150.00 to $300.00 per annum. That this is a very serious matter—most of the men having grown up with this work in the Borough of Queens, and to obviate this difficulty in Administration—he recommends that salaries be increased.

Pursuant therewith and in accordance with the conditions of the resolution of your honorable Board, dated September 13, 1910, your approval is respectfully requested to increase the salaries of the following employees, to wit:

	Per Annum.
Conrad J. Mueller, Assistant Engineer, from	$1,800 00 to $2,100 00
Ignatius Conway, Transitman and Computer, from	1,350 00 to 1,500 00
William H. Clayton, Transitman and Computer, from	1,350 00 to 1,500 00
Benjamin Weiss, Topographical Draughtsman, from	1,350 00 to 1,500 00
Charles T. Chatfield, Topographical Draughtsman, from	1,350 00 to 1,500 00
Earl K. Williams, Topographical Draughtsman, from	1,350 00 to 1,500 00
William H. Bertram, Topographical Draughtsman, from	1,350 00 to 1,500 00
Edward P. King, Topographical Draughtsman, from	1,350 00 to 1,500 00
Edmond F. O'Brien, Topographical Draughtsman, from	1,350 00 to 1,500 00
Hans Tradelius, Topographical Draughtsman, from	1,350 00 to 1,500 00
Harry K. Murphy, Topographical Draughtsman, from	1,350 00 to 1,500 00
Myron A. Finke, Topographical Draughtsman, from	1,350 00 to 1,500 00
Anthony B. Grande, Topographical Draghtsman, from	1,350 00 to 1,500 00
Charles T. Nafey, Topographical Draughtsman, from	1,350 00 to 1,500 00
Rudolph G. Pundt, Topographical Draughtsman, from	1,350 00 to 1,500 00
Emil F. Zipfel, Topographical Draughtsman, from	1,350 00 to 1,500 00
Nathan L. Weiss, Topographical Draughtsman, from	1,350 00 to 1,500 00
Paul Klepper, Topographical Draughtsman, from	1,350 00 to 1,500 00
George S. Nobles, Topographical Draughtsman, from	1,200 00 to 1,350 00
Robert Lowenderg, Topographical Draughtsman, from	1,200 00 to 1,350 00
Alfred R. Scott, Topographical Draftsman, from	1,200 00 to 1,350 00
Richard C. Fulton, Topographical Draughtsman, from	1,200 00 to 1,350 00
Raymond G. Clayton, Topographical Draughtsman, from	1,200 00 to 1,350 00
George G. Doran, Topographical Draughtsman, from	1,200 00 to 1,350 00
Fred. Woehrlin, Topographical Draughtsman, from	1,200 00 to 1,350 00
Harry Sylvester, Topographical Draughtsman, from	1,200 00 to 1,350 00
Nazareth Haroutun, Topographical Draughtsman, from	1,200 00 to 1,350 00

Engineer Crowell's recapitulation of his force by six months' periods, beginning January, 1910, is as follows:

	Jan. 1, 1910.	June 1, 1910.	Jan. 1, 1911.	Proposed 1911-1912.
Employees	232	205	159	191
Annual salary	$289,025 04	$258,933 84	$223,307 50	$258,307 50

Respectfully submitted,

LAWRENCE GRESSER, President of the Borough of Queens.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

The Board of Estimate and Apportionment:

Gentlemen—In relation to a request of the President of the Borough of Queens on June 6, 1911, for modification of the non-budgetary schedules for the Topographical Bureau in his office, we report as follows:

Twenty-nine increases in salary are proposed as follows:

Name and Date of Appointment.	Present Rate.	Proposed Rate.
Assistant Engineer—		
Conrad J. Mueller, January 1, 1898	$1,800 00	$2,100 00
Transitmen and Computers—		
Ignatius Conway, October 16, 1908	1,350 00	1,500 00
William H. Clayton, April 11, 1907	1,350 00	1,500 00
Topographical Draftsmen—		
Benjamin Weiss, September 16, 1907	1,350 00	1,500 00
Charles T. Chatfield, September 4, 1907	1,350 00	1,500 00
Earl K. Williams, September 1, 1907	1,350 00	1,500 00
William H. Bertram, September 12, 1907	1,350 00	1,500 00
Edward P. King, September 1, 1907	1,350 00	1,500 00
Edmond F. O'Brien, September 10, 1907	1,350 00	1,500 00
Hans Tradelius, March 15, 1907	1,350 00	1,500 00
Harry K. Murphy, September 1, 1907	1,350 00	1,500 00
Myron A. Finke, September 16, 1907	1,350 00	1,500 00
Anthony B. Grande, September 9, 1907	1,350 00	1,500 00
Charles T. Nafey, September 16, 1907	1,350 00	1,500 00
Rudolph G. Pundt, September 1, 1907	1,350 00	1,500 00
Emil F. Zipfel, September 1, 1907	1,350 00	1,500 00
Nathan L. Weiss, October 1, 1906	1,350 00	1,500 00
Paul Klepper, July 1, 1906	1,350 00	1,500 00
George S. Nobles, September 1, 1909	1,200 00	1,350 00
Robert Lowenberg, October 5, 1909	1,200 00	1,350 00
Alfred R. Scott, September 9, 1907	1,200 00	1,350 00
Richard C. Fulton, September 9, 1907	1,200 00	1,350 00
Raymond G. Clayton, September 9, 1907	1,200 00	1,350 00
George G. Dorn, November 1, 1906	1,200 00	1,350 00
Fred. Woehrlin, September 1, 1909	1,200 00	1,350 00
Harry Sylvester, March 23, 1911	1,200 00	1,350 00
Nazareth Haroutun, September 1, 1907	1,200 00	1,350 00
Messenger—		
William T. Stevenson, July 21, 1904	1,050 00	1,200 00
Rodman—		
Harold Larsen, March 3, 1908	900 00	1,050 00

One increase is for $300 per annum, and twenty-eight for $150, or a total increase in yearly cost of $4,500. The Engineer in charge of the Bureau states that the increases are proposed to keep the staff from being depleted by transfer to other City departments at higher rates of compensation. He states that since January 1, 1911, twenty-five employees have been transferred at increases of from $150 to $300 per annum. In view of these statements, the proposed promotions would appear to be reasonable.

The increase for the Messenger from $1,050 to $1,200 per annum, cannot be granted at this time, as the $1,200 grade does not appear to have been established pursuant to the provisions of section 56 of the Greater New York Charter.

It is proposed to increase the force by the following positions:

Topographical Draftsman,	1 at	$1,500 00
Computers	3 at	1,200 00
Axemen	8 at	900 00
Laborers (per day)	8 at	2 50

Request also is made for an unlimited number of Topographical Draftsmen, at $1,200 per annum, and Transitmen and Computers, at $1,200.

There seems to be no reason why any increase in force, except for Laborers, should be granted at the present time, as the following vacancies exist in the present schedule, and have existed in a number of cases since January and February:

Transitman and Computer	1 at	$1,650 00
Transitman and Computer	1 at	1,500 00
Topographical Draftsman	1 at	1,500 00
Topographical Draftsmen	2 at	1,350 00
Topographical Draftsmen	2 at	1,200 00
Axemen	3 at	900 00
Clerk	1 at	1,200 00

Clerk	1 at	1,050 00
Laborer (per day)	1 at	4 00

The request provides for striking out only one of these positions, namely, the Clerk, at $1,050. We recommend, therefore, that only the eight Laborers, at $2.50, be added, and that the vacant position of Laborer at $4 per day be dropped.

The attached resolution, if adopted, will permit of the increases and the additional Laborers. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules of salaries and wages for the Topographical Bureau in the office of the President of the Borough of Queens, for the year 1911, as revised, to take effect July 1, 1911, as follows:

President, Borough of Queens.

Topographical Bureau—

Salaries, Regular Force:

Engineer in Charge	1 at	$5,000 00
Assistant Engineer	1 at	4,000 00
Assistant Engineer	1 at	3,000 00
Assistant Engineer	1 at	2,850 00
Assistant Engineers	3 at	2,550 00
Assistant Engineers	2 at	2,250 00
Assistant Engineers	8 at	2,100 00
Assistant Engineers	3 at	1,950 00
Assistant Engineers	5 at	1,800 00
Transitman and Computer	1 at	1,800 00
Transitmen and Computers	13 at	1,650 00
Transitmen and Computers	4 at	1,500 00
Topographical Draftsmen	5 at	1,650 00
Topographical Draftsmen	8 at	1,800 00
Topographical Draftsmen	19 at	1,500 00
Topographical Draftsmen	12 at	1,350 00
Topographical Draftsmen	3 at	1,200 00
Computers	3 at	1,800 00
Rodmen	2 at	1,200 00
Rodmen	4 at	1,050 00
Axemen	16 at	900 00
Draftsman's Helper	1 at	900 00
Clerk	1 at	1,200 00
Clerk	1 at	540 00
Stenographer and Typewriter	1 at	1,050 00
Stenographer and Typewriter	1 at	900 00
Typewriting Copyist	1 at	1,050 00
Messengers	2 at	1,050 00

Wages, Regular Force:

Messenger, 1 at per day (302 days)	$4 00
Messenger, 1 at per day (302 days)	4 50
Foremen, 2 at per day (302 days)	4 00
Assistant Foremen, 2 at per day (302 days)	3 25
Driver, 1 at per day (302 days)	3 00
Driver, 1 at per day (302 days)	2 75
Flagger, 1 at per day (302 days)	4 00
Laborer, 1 at per day (302 days)	4 00
Laborers, 12 at per day (302)	3 00
Laborers, 8 at per day (302 days)	2 75
Laborers, 13 at per day (302 days)	2 50

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Docks and Ferries requesting, and report of the Comptroller recommending, the modification of salary schedule No. 146 and budgetary part allowance No. 154 supporting appropriation made in the Budget for the year 1911, for said Department, providing for the positions of First Deputy Dock Commissioner and Second Deputy Dock Commissioner, at $5,000 each per annum, involving transfer of $2,750:

Department of Docks and Ferries, Pier "A," North River, New York, June 14, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, and Chairman of the Board of Estimate and Apportionment:*

Sir—Chapter 301 of the Laws of 1911 provides for the appointment of 2 Deputy Commissioners for this Department, to be known as First Deputy and Second Deputy. It further provides that the salary of the Commissioner of Docks and of the 2 Deputy Commissioners shall be fixed by the Board of Estimate and Apportionment of The City of New York.

This Department's Budget for the year 1911, in Code No. 146, provides for 1 Commissioner, at $7,500 per annum and for 1 Deputy Commissioner, at $4,500 per annum. I have forwarded to you a recommendation for fixing the salary of the Commissioner of Docks at $7,500 per annum, the present rate, and for fixing salaries for the 2 Deputy Commissioners at the rate of $6,000 per annum each.

In order to provide for the compensation of the First Deputy Commissioner and of the Second Deputy Commissioner at the rate of $6,000 per annum each, it will be necessary to increase Item No. 146, General Administration, Salaries, from $61,500, as at present, to $69,000, the amount required to meet the changed conditions.

This sum ($7,500) may be transferred from Item No. 154, Budgetary Part Allowance, to Item No. 146 to meet the increases noted. There was allowed in Item No. 154 (budgetary part allowance) $23,674.

Of this amount there has been expended to June 8, 1911	$3,300 00
Estimated amount required in this item for remainder of the year	11,200 00
For transfer to item No. 146	7,500 00
	$22,000 00
Leaving an estimated balance at the end of the year in item No. 154	$1,674 00

With these changes, item No. 146, General Administration, Salaries, will be as follows:

146. Code No. 146, General Administration, Salaries as Revised—

Commissioner	$7,500 00
Deputy Commissioners, 2 at $6,000	12,000 00
Secretary to Commissioner	3,000 00
Secretary	4,000 00
Assistant Secretary	3,600 00
Chief Clerk	4,000 00
Clerks, 2 at $2,100	4,200 00
Clerks, 3 at $1,800	5,400 00
Clerk, 1 at $1,500	1,500 00
Clerks, 1 at $900	900 00
Stenographers and Typewriters, 3 at $1,500	4,500 00
Stenographers and Typewriters, 1 at $1,200	1,200 00
Stenographers and Typewriters, 3 at $900	2,700 00
Chief Confidential Inspector	2,200 00
Assistant Confidential Inspectors, 2 at $1,200	2,400 00
Messengers, 4 at $1,200	4,800 00
Telephone Operators, 2 at $1,050	2,100 00
Enginemen (Locomobile), 2 at $1,500	3,000 00
	$69,000 00

I request that the 1911 Budget Schedules be changed as outlined above. Attention is called to the fact that the changes indicated herein will not increase the salary appropriations for this Department for the current year. Yours very truly,

CALVIN TOMKINS, Commissioner of Docks.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 14, 1911, the Commissioner of Docks requested modification of a salary schedule and a budgetary part salary schedule, involving the transfer of $7,500, in the Department of Docks and Ferries for the year 1911. In connection therewith I report as follows:

The request is in General Administration, No. 146, and the Bureau of Enginering, No. 154. In No. 146 it is proposed to add a Deputy Commissioner, at $6,000 per annum, and to increase the compensation of the present Deputy Commissioner from $4,500 to the same rate. The total increase of $7,500 is to be covered by transfer from the budgetary allowance of $23,674 for No. 154.

Chapter 301 of the Laws of 1911 provides for the appointment of two Deputy Commissioners, their rates of compensation to be fixed by the Board of Estimate and Apportionment. The $6,000 rate was requested by the Commissioner. The rate of $5,000 for each position has been recommended to your Board by your Select Committee.

The budgetary expenditures in No. 154 to June 8, 1911, amounted to $3,300. The estimated expenditures for the rest of the year amount to $11,200, leaving a balance available for transfer of $9,174.

Code. No.	Title.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
146.	Deputy Commissioner, 1 at $4,500	$4,500 00	....	$2,250 00	....
	First Deputy Commissioner, at $5,000	....	$5,000 00	....	$2,500 00
	Second Deputy Commissioner, at $5,000	....	5,000 00	....	2,500 00
154.	Budgetary part allowance	5,500 00	....	2,750 00	....
		$10,000 00	$10,000 00	$5,000 00	$5,000 00

I recommend the adoption of the attached resolution granting the request to the extent of $5,000 for each Deputy Commissioner.

Respectfully, WM. A. PRENDERGAST, Comptroller:

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Department of Docks and Ferries for the year 1911, as follows:

Department of Docks and Ferries.

General Administration—

Draftsman	1 at	1,800 00
Draftsman, Architectural	1 at	1,600 00
Draftsman, Mechanical, Sanitary	1 at	1,600 00
Draftsman, Topographical	1 at	1,800 00
Draftsmen, Topographical	5 at	1,600 00
Draftsman, Topographical	1 at	1,350 00
Draftsman, Topographical	1 at	1,200 00
Clerks	3 at	3,000 00
Clerks	3 at	2,100 00
Clerks	6 at	1,800 00
Clerk	1 at	1,500 00
Clerks	3 at	1,200 00
Clerks	10 at	1,050 00
Clerks	2 at	900 00
Stenographers and Typewriters	3 at	1,500 00
Stenographer and Typewriter	1 at	1,000 00
Stenographers and Typewriters	6 at	900 00
Foreman of Yard	1 at	1,800 00
Foremen of Dock Laborers	2 at	1,800 00
Painter	1 at	1,350 00
Messengers	6 at	1,200 00
Searcher	1 at	2,000 00
Engineman, Locomobile	1 at	1,500 00
Supervising Diver	1 at	1,800 00

Budgetary part allowance, $20,924.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Department of Docks and Ferries for the year 1911, as follows:

From

Bureau of Engineering—

154. Salaries $2,750 00

To

General Administration—

146. Salaries $2,750 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

The Secretary presented the following communication from the Department of Taxes and Assessments requesting, and report of the Comptroller recommending, modification of salary schedule supporting the appropriation made to said Department in the Budget for the year 1911, providing for additionl grades of positions adopted by the Board of Estimate and Apportionment on June 22, 1911:

Department of Taxes and Assessments of The City of New York, Borough of Manhattan, Hall of Records, June 30, 1911.

To the Honorable, the Board of Estimate and Apportionment, 277 Broadway, New York:

Gentlemen—In compliance with the resolutions of the Board of Taxes and Assessments adopted at a meeting held June 29, 1911, request is hereby made that the Board of Estimate and Apportionment will make such amendments to the lines in the supporting schedules or in the schedules supporting the appropriations for the Department of Taxes and Assessments for the year 1911, relating to salaries as is shown by the accompanying schedule. This request being made in order to carry out and comply with the resolution establishing additional grades adopted by the Board of Estimate and Apportionment June 22, 1911, and a resolution of the Board of Aldermen authorizing the issue of special revenue bonds. Respectfully,

LAWSON PURDY, President.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 30, 1911, the President of the Department of Taxes and Assessments requested modification of the 1911 salary schedule supporting the Budget appropriation for the Department. In connection therewith I report as follows:

On June 22, 1911, the Board of Estimate and Apportionment approved a request involving the establishment for the Department as provided by section 56 of the Charter, of various positions and grades of positions. The items have been approved by the Board of Aldermen as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Deputy Tax Commissioner	$4,500 00	1
Deputy Tax Commissioner	4,000 00	9
Deputy Tax Commissioner	3,750 00	3
Deputy Tax Commissioner	2,400 00	Unlimited.
Assistant Tax Commissioner	5,000 00	1
Secretary	4,500 00	1
Confidential Stenographer	1,800 00	1
Confidential Stenographer	1,650 00	2
Messenger	1,800 00	1
Messenger	1,500 00	1
Searcher	1,500 00	3

The Commissioners state that the proposed increases in salaries for the present force are divided as follows:

Deputy Tax Commissioners and Executive Staff	$46,800 00
Clerks	9,960 00
Searchers, Messengers and Stenographers	1,500 00
	$58,260 00

The Commissioners further state that the additional force is to consist of the following:

	Cost Per Annum.
Twelve Deputy Tax Commissioners, at $2,400	$28,800 00
Fourteen Clerks, at $750	10,500 00
One Clerk, at $1,800	1,800 00
One Clerk, at $1,500	1,500 00
One Clerk, at $1,050	1,050 00
Two Clerks, at $600	1,200 00
	$44,850 00

The proposed increased cost in compensation and the cost of the additional force on this basis would make a total increase in annual cost of $103,110. Vacant positions are eliminated and the unassigned balance reduced by $1,170, so that the net increase is $91,290.

On June 27, 1911, the Board of Aldermen adopted a resolution requesting the Board of Estimate and Apportionment to authorize special revenue bonds amounting to $45,645 for the purpose of paying increases in salaries in the Department. This amount is exactly one-half of the net annual increase and will therefore carry the new force from July 1 to December 31.

Submitted herewith is a schedule showing the changes in the Budget lines in accordance with the request of the Commissioners:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Increase.	Decrease.	Increase.	Decrease.
1342.	Secretary at $4,000	......	$4,000 00	......	$2,000 00
	Secretary at $4,500	4,500 00	......	2,250 00	......

Confidential Stenographer	1,500 00
Confidential Stenographers, 2 at $1,350	2,700 00
Confidential Stenographers, 2 at $1,200	2,400 00
Messenger	1,800 00
Messengers, 4 at $1,350	5,400 00
Book Typewriters, 5 at $1,050	5,250 00
Unassigned balance	100 00
	$581,120 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Board of Education requesting, and report of the Comptroller recommending, theapproval of the schedule, as revised, for the Department of Education for the year 1911, Bureau of Buildings, Corporate Stock Force, providing for the addition of several positions not included in the original schedule adopted by the Board:

Department of Education, City of New York, New York, May 15, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—In accordance with a resolution adopted by the Board of Education on November 23, 1910, the undersigned respectfully request modifications in the salary schedule for the Bureau of Buildings, Corporate Stock Force, as follows:

Strike out:

Architectural Draftsmen, 4 at, per week	$35 00
Architectural Draftsmen, 5 at, per week	32 50
Structural Steel Draftsmen, 6 at, per week	35 00
Expert Blue Printer, 1 at, per day	5 00

—and insert

Architectural Draftsmen, 2 at, per week	50 00
Architectural Draftsmen, 7 at, per week	40 00
Architectural Draftsmen, 5 at, per week	35 00
Architectural Draftsmen, 4 at, per week	32 50
Mechanical Draftsmen, 5 at, per week	30 00
Junior Draftsmen, 11 at, per week	17 50
Structural Steel Draftsmen, 1 at, per week	45 00
Structural Steel Draftsmen, 8 at, per week	35 00
Assistant Foreman Carpenter, 1 at, per week	30 00
Mason, 1 at, per week	33 60
Painter, 1 at, per week	33 00
Special Laborer, 1 at, per week	33 00
Expert Blue Printer, 1 at, per week	30 00

A copy of the schedule, as modified, is enclosed. Respectfully yours,

A. E. PALMER, Secretary, Board of Education; HENRY R. M. COOK, Auditor, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a request of the Board of Education on May 15, 1911, for modification of the salary schedule for the corporate stock force of the Bureau of buildings, I report as follows:

The request was approved in part by the Board of Estimate and Apportionment on June 8, 1911. The remaining items are for the addition of various classes of employees which were not included in the original schedule when it was approved by this Board on April 27, 1911, for the reason that the necessary grade had not been established, pursuant to the provisions of section 56 of the Greater New York Charter.

On June 20, 1911, additional grades were established as follows:

Title.	Rate.	Number of Incumbents.
Architectural Draftsman, per week	$50 00	2
Architectural Draftsman, per week	40 00	6
Mechanical Draftsman, per week	30 00	5
Structural Steel Draftsman, per week	45 00	1
Assistant Foreman Carpenter	5 00	1
Mason, per day	5 60	1

The addition of these positions to the schedule is necessary for the payment of the incumbents. The change involves, it is stated, no increase in compensation nor in the number of employees.

I recommend, therefore, that the above-mentioned positions be added to the schedule by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Department of Education for the year 1911, as follows:

Department of Education.

Bureau of Buildings, Corporate Stock Force—

Architectural Draftsman, 1 at, per annum	$4,500 00
Architectural Draftsman, 1 at, per annum	3,000 00
Assistant Chief Heating and Ventilating Division, 1 at, per annum	3,000 00
Clerk, 1 at, per annum	540 00
Clerks, 5 at, per annum	300 00
Cleaner, 1 at, per annum	480 00
Engineer, 1 at, per week	50 00
General Inspectors, 7 at, per week	45 00
Inspector Iron and Steel Construction, 1 at, per week	45 00

Draftsman's Helper, 1 at, per week	17 50
Structural Steel Draftsmen, 6 at, per week	35 00
Laborer, 1 at, per week	15 00
Expert Blue Printer, 1 at, per day	5 00
Junior Draftsmen, 11 at, per week	17 50
Architectural Draftsmen, 2 at, per week	50 00
Architectural Draftsmen, 6 at, per week	40 00
Mechanical Draftsmen, 5 at, per week	30 00
Structural Steel Draftsman, 1 at, per week	45 00
Assistant Foreman Carpenter, 1 at, per day	5 00
Mason, 1 at, per day	5 60

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Parks, Boroughs of Manhattan and Richmond requesting, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($24,000) for setting and resetting curbstones, paving, repairing and otherwise improving the Transverse Road No. 2, crossing Central Park, from 79th st. on the east to 81st st. on the west, under jurisdiction of said Department:

Department of Parks, The City of New York, Arsenal Central Park, June 16, 1911.
Hon. William A. Prendergast, *Comptroller,* City of New York:

Sir—In conformity with the requirements of a resolution of the Board of Estimate and Apportionment of January 5 last, I beg to forward herewith for the approval of said Board plans and specifications for paving and otherwise improving the Transverse Road No. 2, crossing Central Park from 79th st. on the east to 81st st. on the west, Manhattan.

This improvement, which is estimated to cost $24,000, will be chargeable against the fund provided by corporate stock designated as C-DP-90.

Respectfully, CHAS. B. STOVER,
Commissioner of Parks, Boroughs of Manhattan and Richmond.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 16, 1911, the Commissioner of Parks, Boroughs of Manhattan and Richmond, requested the approval of plans, specifications and estimated cost of $24,000 for paving and otherwise improving the transverse road crossing Central Park, from 79th street on the east to 81st street on the west, Borough of Manhattan.

In the 1910 Corporate Stock Budget an authorization of $25,000 was made to cover the cost of repaving this road. The fund entitled "C-DP-90, repaving 79th street transverse road across Central Park," is practically intact.

The 79th street transverse road is paved with trap blocks. The pavement has been in use many years and is in bad condition. It is so greatly depressed in the middle that the sewer manhole heads in some places project as much as six inches, thereby forming obstructions dangerous to traffic. The conditions makes a new pavement necessary.

The pavement proposed to lay is similar to some that have been laid with very satisfactory results in the Borough of The Bronx. It is to have a base of broken stone four inches in thickness, thoroughly compacted with a ten-ton road roller. On the base is to be laid a wearing surface of "asphaltic mixture" containing bituminous ingredients mixed with sand or gravel. The surface mixture is to be spread to such a depth that when thoroughly compacted by rolling it will have a thickness of not less than two inches over the entire area of the roadway.

The contract also provides for new sidewalks and the resetting and renewal of curbstones, etc.

A guaranty bond of 20 per cent. of the moneys accruing to the contractor for the completed roadway pavement for a period of five years is provided for in the contract. It is also provided that 5 per cent. of the amount in cash shall be retained for a term of five years as a further guarantee that the pavement shall be kept in good order for that period.

The estimate of cost is reasonable and the specifications as submitted are satisfactory.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves of the plans and specifications as submitted and the estimate of cost, twenty-four thousand dollars ($24,000), for setting and resetting curbstones, paving with asphaltic mixture the roadway and with rock asphalt the sidewalks, repairing the drainage and otherwise improving the transverse road, number two (2), crossing Central Park, from 79th street on the east to 81st street on the west, in the Borough of Manhattan, City of New York, under the jurisdiction of the Department of Parks, Boroughs of Manhattan and Richmond.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Fire Department requesting, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($3,200) for an extension of the Fire Department fire alarm telegraph circuits to permit the establishment of fire alarm boxes at 84th 86th and 88th streets and East End avenue, Manhattan:

Fire Department of The City of New York, Office of the Commissioner, June 28, 1911.

Hon. Wm. A. Prendergast, *Comptroller:*

Sir—Forwarded herewith for the approval of the Board of Estimate and Apportionment are specifications and plans for an extension of the underground systems of the Fire Department fire alarm telegraph circuits. This work is part of a new system and is to be provided under C-FD-3B, "For purpose of providing means for the installation of a new fire alarm system in the Borough of Manhattan."

The estimated cost of this improvement is $3,200.

The completion of this work will permit the establishment of three fire alarm boxes as called for by resolution adopted by the Board of Aldermen at meeting June 13, 1911, in the matter of placing fire alarm boxes at 84th, 86th and 88th streets and East End avenue. Respectfully, JOS. JOHNSON, Fire Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 28, 1911, the Fire Commissioner requested the approval of plans, specifications and estimated cost of $3,200 for an extension of the Fire Department fire alarm telegraph circuits, to permit the establishment of three fire alarm boxes at East 84th, East 86th and East 88th streets and East End avenue, Borough of Manhattan.

At a meeting of the Board of Aldermen on June 13, 1911, the following resolution was adopted:

"Resolved, That fire alarm or call boxes be placed at once at 84th, 86th and 88th streets and East End avenue, respectively, and it be so recommended to the Fire Commissioner."

The plans and specifications call for the installation of three service boxes two feet below the pavement on East End avenue, at 84th, 86th and 88th streets, respectively, to be connected by two lines of three-inch pipe with the present service box at East End avenue and 82d street. They also provide for installing and making pipe connections to fire alarm box posts. The posts and service box covers are to be furnished by the Fire Department.

The plans and specifications are similar to others recently approved by this Board.

The work is designed to become part of the new fire alarm telegraph system of Manhattan, and is to be charged to the Corporate Stock Fund entitled "C-FD-No. 3B, for purpose of providing means for the installation of a new fire alarm system in the Borough of Manhattan." There is an unencumbered balance in the account for the purpose.

I recommend the approval of the plans, specifications and estimate of cost by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted on June 3, 1910, hereby approves the plans, specifications and estimate of cost, three thousand two hundred dollars ($3,200), for an extension of the Fire Department fire alarm telegraph circuits, to permit the establishment of fire alarm boxes at 84th, 86th and 88th streets and East End avenue, Borough of Manhattan.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen, requesting an issue of $15,053.61 special revenue bonds, to be used by the President of the Borough of Brooklyn, for the purpose of paying salaries of employees and for equipment and maintenance of Municipal Bath, at Coney Island, together with a report of the Comptroller recommending approval of and concurrence in said resolution, and a schedule for said fund; also a report of the Committee on Salaries and Grades, recommending the establishment in the office of the President of the Borough of Brooklyn of the grade of position of Life Saver, at $3 per diem for four incumbents, to be employed at the Municipal Bath at Coney Island:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of fifteen thousand and fifty-three dollars and sixty-one cents ($15,053.61), the proceeds whereof to be used by the President of the Borough of Brooklyn for the purpose of paying salaries of employees on municipal bath at Coney Island.

Adopted by the Board of Aldermen June 20, 1911; three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor July 3, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Board of Aldermen adopted a resolution requesting $15,053.61 in special revenue bonds, to be expended by the President of the Borough of Brooklyn for the purpose of paying the salaries of employees in the Municipal Bath at Coney Island. In connection therewith we report as follows:

The request involves provision for employees, on a per annum basis, as follows:

First Floor—Office:			
Female Cashiers	4 at	$750	$3,000 00
Female Key Clerks	2 at	750	1,500 00
Male Key Clerks	4	900	3,600 00
Room for Valuables:			
Female Property Clerks	4 at	750	3,000 00
Male Property Clerks	4 at	900	3,600 00
In Charge of Entrances, Aisles and Exits:			
Female Attendants	7 at	750	5,250 00
Male Attendants	16 at	900	14,400 00
Second Floor:			
Female Attendants	11 at	750	8,250 00
Third Floor—Room for Valuables:			
Male Property Clerks	6 at	900	5,400 00
For Aisles and Exits:			
Male Attendants	11 at	900	9,900 00
Watchmen	2 at	900	1,800 00
Housesmith			1,200 00
Life Savers (4 at $2.50 a day)			3,650 00
			$64,550 00

It is stated that the bath will be open about two months, requiring approximately $11,000 for salaries and wages.

The President of the Borough of Brooklyn states that he requested funds for both salaries and maintenance, and that the $15,053.61 is to cover the following estimate:

Salaries	$11,058 33
Equipping two hospital rooms with cots, furniture, etc., at $100 each	200 00
Two surf boats, at $125 each	250 00
Furnishing and installing stakes and life lines	975 00
Telephone for six months	30 00
10,000 rubber key rings	400 00
Janitors' supplies	250 00
Sidewalk between building line and front of bath	630 00
Proposed change in drainage, etc	560 28
Miscellaneous—for possible contingencies	1,000 00
	$15,353 61

I recommend therefore, the adoption of the attached resolution approving of the amount requested for the compensation of employees aand general maintenance, and approving a schedule for the fund. Respectfully,

WM. A. PRENDERGAST, Comptroller.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Board of Aldermen adopted a resolution requesting $15,053.61 in special revenue bonds, to be expended by the President of the Borough of Brooklyn for the purpose of paying the salaries of employees in the Municipal Bath at Coney Island. In connection therewith we report as follows:

The request involves provision for employees, on a per annum basis, as follows:

First Floor—Office:		
Female Cashiers	4 at $750	$3,000 00
Female Key Clerks	2 at 750	1,500 00
Male Key Clerks	4 at 900	3,600 00
Room for Valuables:		
Female Property Clerks	4 at 750	3,000 00
Male Property Clerks	4 at 900	3,600 00
In Charge of Entrances, Aisles and Exits:		
Female Attendants	7 at 750	5,250 00
Male Attendants	16 at 900	14,400 00
Second Floor:		
Female Attendants	11 at 750	8,250 00
Third Floor—Room for Valuables:		
Male Property Clerks	6 at 900	5,400 00
For Aisles and Exits:		
Male Attendants	11 at 900	9,900 00
Watchmen	2 at 900	1,800 00
Housesmith		1,200 00
Life Savers (4 at $2.50 a day)		3,650 00
		$64,550 00

It is planned to open the bath-house about July 15, for a period of two months. The Borough President has found that it will not be necessary to establish the various grades of positions included in the request of the Acting Borough President. However, it will be necessary to establish the position of Life Saver. This position was included in the Acting Borough President's request, at $2.50 per day. Since that request was made it has been ascertained that it will not be possible to obtain the services of reliable and efficient Life Savers at that rate. It is requested that the grade of Life Saver at $3 per day be established.

We recommend the adoption of the attached resolution recommending the establishment of the position of Life Saver at $3 per day for four incumbents.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the office of the President of the Borough of Brooklyn, of the position, in addition to those heretofore established, as follows:

Title.	Rate Per Diem.	Number of Incumbents.
Life Saver	$3 00	4

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 20, 1911, requesting an issue of special revenue bonds in the sum of fifteen thousand and fifty-three dollars and sixty-one cents ($15,053.61), the proceeds whereof to be used by the President of the Borough of Brooklyn for the purposes of paying salaries of employees on Municipal Bath at Coney Island be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, for the purpose of providing for the compensation of employees and the equipment and maintenance of the Municipal Bath, Coney Island, the amount to be apportioned to give ten thousand seven hundred and fifty-eight dollars and thirty-three cents ($10,758.33) for salaries and four thousand two hundred and ninety-five dollars and twenty-eight cents ($4,295.28) for equipment and maintenance, and for the purpose of providing means therefor the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding fifteen thousand and fifty-three dollars and sixty-one cents ($15,053.61), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen, and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules of salaries paid from other than Budget funds in the office of the President of the Borough of Brooklyn for the year 1911, as follows:

President of the Borough of Brooklyn.

Bureau of Public Buildings and Offices, Maintenance, Coney Island Bath—Salaries, Special Revenue Bond Force:

Female Cashiers	4 at	$750 00
Female Key Clerks	2 at	750 00
Male Key Clerks	4 at	900 00
Female Property Clerks	4 at	750 00
Male Property Clerks	4 at	900 00
Female Attendants	7 at	750 00
Male Attendants	16 at	900 00
Female Attendants	11 at	750 00
Male Property Clerks	6 at	900 00
Male Attendants	11 at	900 00
Watchmen	2 at	900 00
Housesmith	1 at	1,200 00
Life Savers (90 days) a day	4 at	3 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The President of the Borough of Brooklyn presented the following rules governing the operation of the municipal bath at Coney Island:

Municipal Bath Coney Island—Rules for Bathers.

The hours of admittance will be from 8 a. m. to 6 p. m. All bathers shall be out of the water at 7 p. m., and the building will be closed at 7.30 p. m.

A charge of ten (10) cents will be made for the use of room or locker (rooms for women only and lockers for men). An additional ten (10) cents will be charged as a deposit on keys, which will be refunded to the bather if the key is returned the same day.

Regulation suits must be worn by the bathers, excepting that boys under ten (10) years of age may use bathing trunks. Flesh colored trunks and suits prohibited.

Smoking, sleeping or protracted lounging; disorderly conduct, boisterous or profane language prohibited. The eating of lunch in rooms is also prohibited.

Accommodation is provided for the checking of valuables, and The City of New York cannot be held liable for the loss of the property of bathers.

Bathers taking away keys or other property from this bath house are liable to arrest.

Ball playing or other games that interfere with the comfort of the bathers on the beach prohibited.

Bathers are ordered not to strew the beach with papers or other litter, but to place them in the boxes provided for the purpose.

All complaints as to lack of proper attention or courtesy upon the part of any employee should be made known to the manager at once, or in writing to the Superintendent of Public Buildings and Offices, Room 29, Municipal Building, Brooklyn.

HOWARD L. WOODY, Superintendent of Public Buildings and Offices.

Which were approved by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending the establishment in the office of the President of the Borough of The Bronx of the position of Foreman of Automobile Enginemen at $1,350 per annum for one incumbent:

(On March 16, 1911, the request of the President of the Borough of The Bronx for the establishment of the above position was referred to said committee.)

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 28, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On March 8, 1911, the President of the Borough of The Bronx requested the establishment in his office, pursuant to the provisions of section 56 of the Greater New York Charter, of the position of Foreman of Automobile Enginemen at $1,350 per annum for one incumbent. In connection therewith we report as follows:

The position is proposed for William H. McCormick, Automobile Engineman for the President at $1,200 per annum. McCormick was appointed on July 20, 1908, as an Automobile Engineman at $4 a day. It is stated that he worked 365 days in the year, giving a per annum total of $1,460, until January 1, 1911, when he was placed at the present rate. The President states the following:

"McCormick is now performing the duties of Foreman. It is necessary to have a Foreman who is a thorough mechanic and can repair cars, as well as direct their repair. He also keeps the stock of oil, cotton-waste, etc., and doles them out as needed upon requisition. He also keeps the cost data of maintenance of the machines in this Department. For this extra work I think it would be very advisable to pay him an extra salary of $150, or $1,350 in all."

It is stated that the $150 for the increase will be available without additional appropriation.

We recommend the adoption of the attached resolution approving the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the office of the President of the Borough of The Bronx of the position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Foreman of Automobile Enginemen	$1,350 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the President of the Borough of The Bronx requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending the establishment in the office of said Borough President of the position of Foreman of Stable and Yards at $2,100 per annum for one incumbent, Charles A. Soteldo.

(On June 8, 1911, the request of the President of The Bronx for the establishment of the above position was referred to the Comptroller.)

City of New York, President of the Borough of The Bronx, 3d avenue and 177th street, June 7, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—Request is hereby respectfully made that the grade of Foreman of Stable and Yards, Bureau of Sewers, at $2,100, be established, for the office of the President of the Borough of The Bronx.

The necessity for having a single head over the stable and yards of the Sewer Bureau, on whom the responsibility of management can be placed, is of extreme importance.

This request is made in order to provide, as the proposed title implies, for a foreman in charge of the stable and yards of the Bureau of Sewers, and it is intended to fill said position, when established, by the appointment of Mr. Charles A. Soteldo, who has for over a year occupied the position of Foreman of Hostlers, in the stable of said Bureau, having been assigned to the work under the general plan of reorganization instituted at the time. His work, so far, has been of the very best, to the extent that the stable building and its appurtenances inside and outside have been so much improved under his management as to suggest the advisability of placing him in charge of the entire yard, viz., the force of employees, tools, implements, etc., forage and supplies, as well as the stable, vehicles, horses, etc.

Mr. Soteldo is now receiving $1,800 per annum as Foreman of Hostlers, and the change involved would represent an increase of but $300, though the benefit derived by the City in the proposed change would be of decided value. Respectfully,

CYRUS C. MILLER, President, Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 29, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 7, 1911, the President of the Borough of The Bronx requested the establishment in his office, pursuant to the provisions of section 56 of the Greater New York Charter, of the position of Foreman of Stable and Yards at $2,100 per annum, for one incumbent. In connection therewith we report as follows:

The request is to provide for a Foreman in Charge of the Yards and Stable of the Bureau of Sewers. The President states the following:

"It is intended to fill the position by the appointment of Mr. Charles S. Soteldo, who for over a year has occupied the position of Foreman of Hostlers in the stable of the Bureau, having been assigned to the work under the general plan of reorganization instituted at the time. His work so far has been of the very best, to the extent that the stable building and its appurtenances, inside and outside, have been so much improved as to suggest the advisability of placing him in charge of the entire yard, as follows: The force of employees, tools, implements, forage and supplies, stable, vehicles, horses, etc.

"Mr. Soteldo is now receiving $1,800 per annum as Foreman of Hostlers. The change involves only an increase of $300 per annum, while the benefit to be derived by the City will be of decided value."

The President further states that Mr. Soteldo has been accustomed to the training and care of horses all his life, and was for several years the purchasing agent in the Fire Department of The City of New York, where his duties extended to the purchase of all forage, requiring a knowledge as to the different qualities of hay, oats, etc., and the purchase of horses. In addition to this experience, it was his duty to pass upon all stable supplies, repairs to vehicles, etc.

We recommend approval of the establishment of the position for Mr. Soteldo by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the office of the President of the Borough of The Bronx of the position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Foreman of Stable and Yards (for Charles A. Soteldo)..	$2,100 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the President of the Borough of The Bronx relative to, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in the office of said Borough President of the following grades of positions:

	Per Annum.	Incumbents.
Commissioner of Public Works	$5,500 00	1
Assistant Commissioner of Public Works	4,500 00	1

(On September 30, 1910, the request of the President of The Bronx for the establishment of the above grades was referred to said committee.)

The City of New York, Office of the President of the Borough of The Bronx, Municipal Building, Crotona Park, September 22, 1910.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—Request is hereby respectfully made for the establishment of the following-named grades in the office of the President of the Borough of The Bronx, viz.:

Commissioner of Public Works, at per annum	$5,500 00
Assistant Commissioner of Public Works, at per annum	4,500 00
General Bookkeeper, at per annum	4,000 00

Respectfully, CYRUS C. MILLER, President, Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On September 22, 1910, the President of the Borough of The Bronx requested the establishment of the grades of positions, as follows:

Commissioner of Public Works	$5,500 per annum
Assistant Commissioner of Public Works	4,500 per annum
General Bookkeeper	4,000 per annum

This request was referred to the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen.

The President of the Borough of The Bronx followed up his request with a further communication dated September 24, 1910, addressed to the members of the Select Committee, giving arguments to support his request. In urging a higher salary for the Commissioner and Assistant Commissioner of Public Works the President said:

"The duties devolving upon the Commissioner of Public Works and the Assistant Commissioner in the administration of the business of this Department, as now constituted, I am well informed are of much greater importance and responsibility than prevailed in said offices during the previous administration, the entire direction of all public works of construction, including regulating, grading, paving, sewers, and maintenance of highways and sewers, as well as all the work of an executive nature incidental thereto, now come under the supervision of these officers, which previously had been performed by the respective Bureau heads of the several divisions of this Department prior to its reorganization.

"It seems, therefore, but just that a higher rate of compensation should be fixed for these officers, their duties requiring extraordinary skill. Further, in comparison with the rates established in the Boroughs of Manhattan and Brooklyn, viz., $7,200 and $6,000 respectively, for Commissioner of Public Works, and $6,000 in Manhattan and $5,000 in Brooklyn for Assistant Commissioner seem to justify the rates proposed for similar duties in The Bronx."

The proposed increases of the Commissioner and Assistant Commissioner of Public Works seems to your Committee to be well justified by the facts stated in the opinion of the Borough President quoted above. The Commissioner of Public Works, Borough of Manhattan, receives $7,200 per annum, or $1,700 more than it is proposed to pay the Commissioner in the Borough of The Bronx. The Assistant Commissioner in Manhattan receives $6,000 per annum, or $1,500 more than it is proposed to pay the Assistant Commissioner in The Bronx. In Brooklyn, the Commissioner and Assistant Commissioner receive respectively $500 per annum more than it is proposed to pay those officials in The Bronx. The duties and responsibilities of the latter are fully as great as those occupying similar positions in the other Boroughs mentioned. Both are men of marked ability who have brought the work of the Bronx President's office to a high standard of efficiency and economy.

The request for the grade of $4,000 per annum for the General Bookkeeper has already been granted.

We recommend that the remaining portions of the President's request of September 22, 1910, be granted by the adoption of the attached resolution.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Department of the President of the Borough of The Bronx, of the grade of positions in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Commissioner of Public Works	$5,500 00	1
Assistant Commissioner of Public Works	4,500 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, returning for reference to the Committee on Standardization of Salaries and Grades the communication from the President of the Borough of Richmond relative to the inequality in the rate of wages paid to the employees in the Bureau of Street Cleaning in said Borough, as compared with those holding similar titles and performing similar work in the other Boroughs.

Which was referred to the Committee on Standardization of Salaries and Grades.

(On May 4, 1911, the above communication was referred to said Committee.)

The Secretary presented the following communication from the Supervisor of the City Record requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in the Board of City Record of the following grades of positions:

	Per Annum.	Incumbents.
Storekeeper	$1,950 00	1
Clerk	750 00	1

(On June 15, 1911, the request of the Supervisor of the City Record for the establishment of the above grades was referred to said Committee.)

The City of New York, Board of City Record, Office of the Supervisor, 13-21 Park Row, June 13, 1911.

Hon. Joseph Haag, *Secretary, Board of Estimate and Apportionment,* 277 Broadway, New York City:

Dear Sir—The Board of Estimate and Apportionment is respectfully requested to recommend to the Board of Aldermen, in accordance with the provisions of section 56, Greater New York Charter, the establishment of the following grades of positions in the office of the Supervisor of the City Record in addition to those already existing therein:

	Incumbent.	Salary.
Storekeeper	1	$1,950 00
Clerk	1	750 00

Respectfully submitted,

DAVID FERGUSON, Supervisor of the City Record.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 28, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 13, 1911, the Supervisor of the City Record requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grades of positions of Storekeeper at $1,950 and Clerk at $750 per annum, for one incumbent each. In connection therewith we report as follows:

The grade of Storekeeper at $1,950 is proposed to increase Washington H. Hettler, the present incumbent, $150 per annum. Mr. Hettler was appointed in 1885, and has been at the rate of $1,800 for seven years. The Supervisor states that his work has increased greatly, and that he highly merits the promotion.

The grade of Clerk at $750 per annum is established for one incumbent. The additional grade is for the appointment of another Clerk from the Civil Service list. The Supervisor states that the two Clerks are needed for the new system in the office.

We recommend the adoption of the attached resolution recommending to the Board of Aldermen the establishment of the grades requested. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Board of City Record of the grades of positions, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Storekeeper	$1,950 00	1
Clerk	750 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, The Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Fire Commissioner, requesting the establishment of the position of Chief Medical Officer with salary at the rate of $6,000 per annum, in accordancce with chapter 392 of the Laws of 1911, together with a report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, to whom this application was referred June 20, 1911, recommending the establishment in the Fire Department of the position of Chief Medical Officer with salary at the rate of $3,600 per annum for one incumbent:

Fire Department, of The City of New York, office of the Commissioner, June 22, 1911.

Hon. William J. Gaynor, *Mayor, and Chairman Board of Estimate and Apportionment:*

Sir—The Legislature at its present session, has amended section 740, of the Greater New York Charter, by providing that one of the Medical Officers of the Department (who ranks as Chief of Battalion at $3,300 per annum), shall be appointed Chief Medical Officer, with salary of not more than $6,000 per annum.

I have, therefore, the honor to request, that the position of Chief Medical Officer be established in this Department, with compensation at the rate of $6,000 per annum, for one incumbent. Respectfully, JOS. JOHNSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 22, 1911, the Commissioner of the Fire Department requested the establishment in his Department of the position of Chief Medical Officer, at $6,000 per annum, for one incumbent. In connection therewith we report as follows:

Chapter 392, Laws of 1911, amending section 740 of the Greater New York Charter, which became a law on June 21, 1911, provides as follows:

"Section 740. The rank and salaries of officers of the Fire Department shall be as follows: * * * Battalion Chiefs, whose annual salary shall be not more than three thousand three hundred dollars; Medical Officers, whose rank and salary shall be the same as that of Battalion Chiefs, one of whom shall be appointed Chief Medical Officer, whose annual salary shall be not more than six thousand dollars. * * *"

There are eleven Medical Officers in the Department, at the rate of $3,300 per annum, and distributed as follows: Manhattan, 4; The Bronx, 1; Richmond, 1; Brooklyn, 3; Queens, 2. To comply with the provisions of the law, the Commissioner proposed to appoint the Chief Medical Officer, to have general supervision of the medical work of the Department, and requests the rate of $6,000 per annum as the maximum amount fixed by the law. It seems that $3,600 would be a reasonable compensation for the position.

We recommend that the request be approved for one incumbent, at the $3,600 rate, by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Fire Department of the position in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Chief Medical Officer	$3,600 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Fire Department relative to, and report of the Select Commmittee, consisting of the Comptroller and the President of the Board of Aldermen, recommending the establishment in the said Department of the following grades of positions:

	Per Annum.	Incumbents.
Cable Tester	$1,200 00	1
Cable Splicer	1,200 00	2

(On May 4, 1911, the request of the Fire Commissioner for the establishment of the above grades and for the grades of Assistant Electrical Engineer at $3,000, and Draftsman at $1,200, was referred to said Committee.)

Headquarters Fire Department, City of New York, office of the Fire Commissioner, April 27, 1911.

Hon. William J. Gaynor, *Mayor, and Chairman Board of Estimate and Apportionment,* City Hall, New York City:

Sir—Your honorable Board is respectfully requested to establish the following grades of positions in the Fire Department:

Title.	Per Annum.	Incumbents.
Assistant Electrical Engineer	$3,000 00	1
Draftsmen	1,200 00	3
Cable Tester	1,200 00	1
Cable Splicers	1,200 00	2

The following grades of positions were established by resolution of January 24th, 1911:

Title.	Per Annum.	Incumbents.
Cable Testers	$1,200 00	2
Assistant Electrical Engineers	1,800 00	2

The grade of position of Stenographer and Typewriter at $1,950 per annum already exists unlimited.

These statements will make clear the request to follow for the modification of our corporate stock schedule.

It is,, therefore, requested that the corporate stock schedule of the Fire Department be modified by adding the following:

Title.	Per Annum.	Incumbents.
Assistant Electrical Engineer	$3,000 00	1
Assistant Electrical Engineers	1,800 00	2
Cable Testers	1,200 00	3
Cable Splicers	1,200 00	2
Stenographer and Typewriter	1,050 00	1
Draftsmen	1,200 00	3

The Assistant Electrical Engineer at $3,000, three Draftsmen at $1,200, one Cable Tester at $1,200, two Cable Splicers at $1,200 and one Stenoggrapher and Typewriter at $1,050 are to be employed in the work of underground construction of the Fire Alarm Telegraph in the Borough of Brooklyn, for which $140,000 has been appropriated in C-FD-22.

Before detailed specifications can be prepared for executing this work, it is necessary to prepare plans of cable distribution. Employees above-named are absolutely necessary before this money can be expended for its designated purpose.

The two Cable Testers at $1,200, and two Assistant Electrical Engineers at $1,800, are to be employed in connection with the establishment of the new Fire Alarm System in the Borough of Manhattan, for which $200,000 has been appropriated in C-FD-3B. Respectfully, R. WALDO, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 29, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On April 27, 1911, the Fire Commissioner requested the establishment in his Department, pursuant to the provisions of section 56 of the Greater New York Charter, of the folllowing grades of positions:

Title.	Rate Per Annum.	Number of Incumbents.
Assistant Electrical Engineer	$3,000 00	1
Draftsman	1,200 00	3
Cable Tester	1,200 00	1
Cable Splicers	1,200 00	2

The establishment is proposed for incumbents for the construction of underground electrical conductor in the Borough of Brooklyn. Corporate stock to the amount of $150,000 has been authorized for the work. The Commissioner states that the Cable Tester and the Cable Splicers are urgently needed for work on cable distribution, etc., in connection with the installation of the underground system. It appears from examination that there is no need at this time for the grades of Assistant Electrical Engineer and Draftsman.

We recommend that establishment for the Cable Tester and the Cable Splicers, at the requested rates, be approved by the adoption of the attached resolution.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Fire Department of the grades of positions, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Cable Tester	$1,200 00	1
Cable Splicer	1,200 00	2

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary was directed to transmit a copy of the report of the Select Committee as above to the Fire Commissioner.

The Secretary presented a report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending that the petition of the Engineers of Steamers and the Firemen in the Fire Department, for increases in salaries be referred to the Committee on Standardization of Salaries and Grades, which was referred to the Committee on Standardization of Salaries and Grades, consisting of the Comptroller, the President of the Borough of Manhattan and the President of the Borough of Brooklyn.

(On June 22, 1911, the above petition was referred to said Select Committee.)

The Secretary presented the following communications from the Department of Correction relative to, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending the establishment in said Department of the following grades of positions:

	Per Annum.	Incumbents.
Mate	$900 00	4
Cook	720 00	8

(On March 16 and 30, 1911, the request of the Commissioner of Correction for the establishment of the above grades and the grades of Deputy Commissioner at $5,000, Secretary of the Department at $3,500 and General Bookkeeper and Auditor at $4,000, was referred to said committee.)

Department of Correction of The City of New York, 26th Street and East River, March 7, 1911.

To the Honorable Board of Estimate and Apportionment:

Sirs—We, the undersigned mates, employed in the Correction Department, respectfully request and petition for an interview in regard to an increase in our salary, as we find it very difficult to support our families and give our children the proper education which they should require to fit them through the various walks in life.

Hoping this meets with the approval of your honorable body, we remain,

Yours respectfully,

MICHAEL J. BURKE, DANIEL J. McHENRY, MAURICE P. SULLIVAN, JAMES H. LANTRY,

March 7, 1911.

Mr. Michael J. Burke, *Steamboat Bureau, Department of Correction:*

Dear Sir—The letters signed by the Mates of this Department, stating that an increase in salary was desired, has been received. In answer, I would state that the proposed increase meets with my approval. I would suggest that the question be placed before the Board of Estimate and Apportionment.

Respectfully, PATRICK A. WHITNEY, Commissioner.

Department of Correction of The City of New York, 148 East 20th Street, New York, March 22, 1911.

Joseph Haag, Esq., *Secretary, Board of Estimate and Apportionment,* New York City:

Dear Sir—I would respectfully request the Honorable the Board of Estimate and Apportionment to establish the following grades of positions in the Department of Correction, in addition to those already existing therein:

	Per Annum.	Incumbent.
Deputy Commissioner, at	$5,000	1

The position of Deputy Commissioner is a very responsible one, and the salary paid to the present incumbent does not compare with salaries of similar positions in other departments.

	Per Annum.	Incumbent.
Secretary of the Department	$3,500	1

The incumbent of this position is a good and faithful employee, and it is intended to equalize his salary with those paid in other similar positions.

	Per Annum.	Incumbent.
General Bookkeeper and Auditor	$4,000	1

This position is a very important one; the present incumbent is very competent, and is justly entitled to the increase. The amount asked for is very modest, indeed, and is well warranted by the services rendered.

The work of the Department of Correction is much greater than it was when the old grades were established, and there is now a tendency to still further increase the functions and responsibilities of the Department. I feel, therefore, that these grades should be established for these very deserving employees.

	Per Annum.	Incumbent.
Mates, at	$900	4

The increase from $800 to $900 per annum in salaries of Mates, is to equalize the pay of these employees with that paid to Mates in the Departments of Docks and Ferries, and of Public Charities.

	Per Annum.	Incumbent.
Cooks	$720 00	8

The establishment of the grade of Cook at $720 per annum is essential, as the Department finds it very hard to secure good reliable cooks for lower salaries.

Respectfully submitted, PATRICK A. WHITNEY, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On March 22, 1911, the Commissioner of Correction requested the establishment, pursuant to the provsions of section 56 of the Greater New York Charter of the following grades of positions in the Department of Correction:

Title.	Rate Per Annum.	Number of Incumbents.
Deputy Commissioner	$5,000 00	1
Secretary of the Department	3,500 00	1
General Bookkeeper and Auditor	4,000 00	1
Mate	900 00	4
Cook	720 00	8

In connection therewith we report as follows:

The grades for Deputy Commissioner and Secretary of the Department are proposed for salary increases which were requested in the departmental estimate for 1911. The increases were considered by the Budget Committee and were not recommended for approval. No additional reasons have been presented for the increases at this time. We recommend, therefore, that these items in the request be not approved.

The grade of General Bookkeeper and Auditor, at $4,000 per annum, was proposed for John P. Dreyer. Since the date of the request, Mr. Dreyer has died. We therefore recommend that the increased rate be not approved.

The establishment of the $900 grade for four Mates is to enable the Commissioner to equalize the compensation of the employees with the rates for Mates in the Department of Docks and Ferries and Public Charities.

The Commissioner states that the establishment of the grade of Cook, at $720, is necessary, for the reason that he finds it almost impossible to secure reliable Cooks at less than that rate. The Cooks in the Department of Charities receive less than $720, but are provided with board and washing. In the Department of Correction, the Cooks, with one exception, go to their homes at night. Each of the eight incumbents does all the cooking in one of the institutions, or on one of the Department boats. In the Department of Charities the Cooks have assistants.

We recommend the adoption of the attached resolution approving the request to the extent of the proposed grades for the Mates and Cooks. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Department of Correction of the grades of positions, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Mate	$900 00	4
Cook	720 00	8

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary was directed to transmit a copy of the report of the Select Committee, as above to the Commissioner of Correction.

The Secretary presented the following report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending the establishment of the grades of position of Attendance Officer in the Department of Education, at $900, $1,050, $1,350 and $1,500 per annum, for an unlimited number of incumbents:

(On March 30, 1911, a resolution of the Board of Education relative to the establishment of grades for Attendance Officers and approval of a schedule of salaries, was referred to said Committee.)

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 28, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On March 2, 1911, the Board of Estimate and Apportionment referred back to the Board of Education a request for the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grades of Senior Attendance Officer, at the rate of $720 per annum with the suggestion that it be modified to include all the other grades in the schedule which have not been established. On March 22, 1911, the Board of Education withdrew the request for the $720 grade and asked for establishment of grades at $1,350 and $1,500 per annum, and for approval of a schedule of salaries for Attendance Officers as follows:

First year	$900 00
Second year	1,050 00
Third year	1,200 00
Fourth year	1,200 00
Fifth year	1,200 00
Sixth year	1,200 00
Seventh year	1,350 00
Eighth year	1,350 00
Ninth year	1,350 00
Tenth and succeeding years	1,500 00

Of the five grades in the schedules, only that of $1,200 per annum has been established.

An additional grade of $750 per annum has been established and it is proposed to use it for Senior Attendance officers instead of $720 grade, the request for which has been withdrawn. Grades at $600, $900 and $1,050 were fixed in 1902 by the Board of Estimate and Apportionment, pursuant to the provisions of chapter 436 of the Laws of 1902. This establishment was for "Attendance Officers in Truant Schools," and the establishment now involved does not cover truant schools. The Attendance Officers are under the immediate direction of the City Superintendent of Schools, who assigns them by districts. It, therefore, becomes necessary to establish the grades in the schedule of $900 and $1,050 per annum.

It appears that there is no precedent for approval by your Board of the schedule as a whole. Salary increases at stated intervals are not provided for the City employees, and no reason is apparent at this time to justfy an exception in the case of Attendance Officers.

We recommend the establishment of the four grades of $900, $1,050, $1,350 and $1,500 per annum, at which rates incumbents are now being paid, be approved by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Department of Education of the grades of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Attendance Officer	$900 00	Unlimited
Attendance Officer	1,050 00	Unlimited
Attendance Officer	1,350 00	Unlimited
Attendance Officer	1,500 00	Unlimited

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary was directed to transmit a copy of the report of the Select Committee, as above to the Board of Education.

The Secretary presented the following communication from the Department of Parks, Boroughs of Manhattan and Richmond requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending the establishment in said Department of the grade of position of Mechanical Engineer, at $2,100 per annum for one incumbent:

(On June 1, 1911, the request of the Commissioner of Parks, Boroughs of Manhattan and Richmond, for the establishment of the above grade was referred to said committee.)

The City of New York, Department of Parks, Boroughs of Manhattan and Richmond, Arsenal, Central Park, May 26, 1911.

To the Honorable, the Board of Estimate and Apportionment, The City of New York:

Gentlemen—I have the honor to request the establishment by your honorable Board, of the following grade in this Department, Boroughs of Manhattan and Richmond:

Mechanical Engineer, per annum, $2,100.

This request is made in order that the remuneration provided for this position in this Department may correspond more adequately with that of the salary paid to employees in other departments doing similar work. Yours truly,

CHAS. B. STOVER, Commissioner of Parks, Boroughs of Manhattan and Richmond.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 26, 1911, the Commissioner of Parks, Boroughs of Manhattan and Richmond, requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Mechanical Engineer, at $2,100 per annum, for one incumbent. In connection therewith we report as follows:

The grade is asked for to increase the compensation of Frank A. Koch, who has received no increase since his appointment as a Mechanical Engineer on July 2, 1898, at $1,500 per annum.

The rates paid for similar positions in other City departments are from $1,800 to $4,000 per annum. The Chief Engineer states that Mr. Koch is a valuable employee, and that he highly merits the increase.

We recommend the adoption of the attached resolution approving of the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved. That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Department of Parks, Boroughs of Manhattan and Richmond, of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Mechanical Engineer	$2,100 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Parks, Boroughs of Manhattan and Richmond requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen recommending, the establishment in said Department of the grade of position of Supervisory Attendant, at $900 per annum, for one incumbent:

(On May 25, 1911, the request of the Commissioner of Parks, Boroughs of Manhattan and Richmond, for the establishment of the above grade was referred to said committee.)

The City of New York, Department of Parks, Boroughs of Manhattan and Richmond, Arsenal, Central Park, May 16, 1911.

To the Honorable, the Board of Estimate and Apportionment, The City of New York:

Gentlemen—I have the honor to request the establishment by your honorable Board, under section 56 of the Greater New York Charter, of the position of Supervisory Attendant for this Department, Boroughs of Manhattan and Richmond, at $900 per annum, one incumbent.

This request is made at the instigation and in accordance with the request of the Comptroller's office. Respectfully,

CHAS. B. STOVER, Commissioner of Parks, Boroughs of Manhattan and Richmond.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 29, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 16, 1911, the Commissioner of Parks, Boroughs of Manhattan and Richmond, requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Supervisory Attendant, at $900 per annum, for one incumbent. In connection therewith we report as follows:

The request was made at the suggestion of the Comptroller for the following reasons:

On June 14, 1897, Miss Mary Kenny was appointed as a Cottage Attendant, at $75 per month, and still is on the payroll under the title. Miss Kenny is in charge of the Female Cottage Attendants in the Department, and is responsible for the condition of the comfort stations. Her work is of a supervisory nature, and for that reason her compensation for February and March, 1911, was withheld in the Department of Finance. Payment subsequently was made upon the agreement with the Commissioner that request would be made for the establishment of a proper title.

We recommend the adoption of the attached resolution approving the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Department of Parks, Boroughs of Manhattan and Richmond, of the grade of position in addition to those heretofore established, as follows

Title.	Rate Per Annum.	Number of Incumbents.
Supervisory Attendant	$900 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Parks, Boroughs of Manhattan and Richmond, requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in said Department of the following grades of positions:

	Per Annum.	Incumbent.
Director of Menagerie	$1,200 00	1
Keeper of Menagerie	1,500 00	1

(On June 8, 1911, the request of the Commissioner of Parks, Boroughs of Manhattan and Richmond, for the establishment of the above grades was referred to said Committee.)

The City of New York, Department of Parks, Boroughs of Manhattan and Richmond, Arsenal, Central Park, June 5, 1911.

To the Honorable, the Board of Estimate and Apportionment, The City of New York:

Gentlemen—In accordance with a communication of even date, addressed to your honorable Board, I have the honor to request the establishment of the following grades in the Department of Parks, Boroughs of Manhattan and Richmond:

Director of Menageries	$1,200 00 per annum
Keeper of Menagerie	1,500 00 per annum

Respectfully,

CHAS. B. STOVER, Commissioner of Parks, Boroughs of Manhattan and Richmond.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 29, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 5, 1911, the Commissioner of Parks, Boroughs of Manhattan and Richmond, requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grades of positions of Director of Menagerie at $1,200 and Keeper of Menagerie at $1,500 per annum, for one incumbent each. In connection therewith, we report as follows:

The establishment is proposed to enable the Commissioner to reorganize the menagerie force in accordance with recommendations made by the Commissioner of Accounts.

The grade of Director of Menagerie, at $1,200, is for the present incumbent, who receives a compensation of $3,000 per annum, but who, by reason of ill health, is unable properly to fill the position, and is to be decreased to the $1,200 grade.

The grade of Keeper of Menagerie, at $1,500, is proposed for William Snyder, who was appointed in January, 1888, and for several years has been in charge of the force of keepers at a compensation of $1,200 per annum.

The Commissioner states that he proposes to effect the reorganization proposed by the Commissioner of Accounts without entailing any additional cost to the City.

We recommend the adoption of the attached resolution recommending to the Board of Aldermen the establishment of the grades requested. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Department of Parks, Boroughs of Manhattan and Richmond, of the grades of positions, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Director of Menagerie,	$1,200 00	1
Keeper of Menagerie	1,500 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, The Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Street Cleaning requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in said Department of the grade of position of Chief Bookkeeper at $3,500 per annum, for one incumbent:

(On June 15, 1911, the request of the Commissioner of Street Cleaning for the establishment of the above grades was referred to said Committee.)

Department of Street Cleaning of the City of New York, 13-21 Park Row, New York, May 31, 1911.

Hon. JOSEPH HAAG, *Secretary, Board of Estimate and Apportionment:*

Sir—The Board of Estimate and Apportionment is respectfully requested to recommend to the Board of Aldermen, pursuant to the provisions of section 56 of the Greater New York Charter, the establishment of the grade of position of Chief Bookkeeper in the Department of Street Cleaning, in addition to those heretofore established, with salary at the rate of $3,500 per annum for one incumbent, and that the grade of Chief Bookkeeper at $3,000 per annum be abolished.

Respectfully, WM. H. EDWARDS, Commissioner of Street Cleaning.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 29, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 31, 1911, the Commissioner of Street Cleaning requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of Chief Bookkeeper at $3,500 per annum, for one incumbent. In connection therewith, we report as follows:

The grade is proposed to increase the compensation of Mr. Joseph S. McCann, the present incumbent at $3,000 per annum. Mr. McCann was appointed on June 20, 1890, and has received no increase in nine years. The Commissioner states that the business of the office has increased greatly and that the incumbent has many added responsibilities. The departmental estimate for the year 1911 included the $3,500 rate for the position. The Budget Committee recommended that it be not approved for the reason that the grade had not been established.

Mr. McCann prepares the yearly estimate for the Department and attends to all transfers and modifications during the year. He also is in charge of the bookkeeping and cost accounting in the Department.

It is stated that no additional appropriation will be required for the increase.

We recommend the adoption of the attached resolution approving of the establishment of the grade requested. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Department of Street Cleaning of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Chief Bookkeeper	$3,500 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Street Cleaning requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in said Department of the grade of position of Automobile Engineman at $1,500 per aannum for one incumbent:

(On June 15, 1911, the request of the Commissioner of Street Cleaning for the establishment of the above grade was referred to said Committee.)

Department of Street Cleaning of The City of New York, 13-21 Park Row, New York, May 31, 1911.

Hon. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Sir—The Board of Estimate and Apportionment is respectfully requested to recommend to the Board of Aldermen, pursuant to the provisions of section 56 of the Greater New York Charter, the establishment of the grade of position of Automobile Engineman in the Department of Street Cleaning, in aaddition to those heretofore established, with salary at the rate of $1,500 per annum, for one incumbent.

The Automobile Engineman is for the use of the Commissioner of Street Cleaning.

Respectfully, WM. H. EDWARDS, Commissioner of Street Cleaning.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 29, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 31, 1911, the Commissioner of Street Cleaning requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Automobile Engineman at $1,500 per annum, for one incumbent. In connection therewith we report as follows:

The grade is proposed to increase Robert C. Gibbons, the Automobile Engineman who operates the Commissioner's car, from $1,200 to $1,500 per annum. The Commissioner states that the incumbent, in addition to being a very competent driver, is required to work many hours overtime without pay, and that he is a thorough mechanic and saves the City considerable money by caring for and repairing cars in the department.

Automobile Enginemen are employed in the following City Departments at the rate of $1,500 per annum:

Department of Docks and Ferries, Department of Bridges, Fire Department, Department of Water Supply, President Borough of Manhattan, President Borough of Brooklyn.

The increase will entail no additional cost to the City, as the Commissioner states that the $300 will be provided by transfer within budget appropriations.

We recommend the adoption of the attached resolution recommending to the Board of Aldermen the establishment of the grade requested. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Department of Street Cleaning of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Automobile Engineman	$1,500 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Health requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in said Department of grade of position of Stenographer and Typewriter at $1,200 per annum for one incumbent:

(On June 8, 1911, the request of the Department of Health for the establishment of above grade was referred to said Committee.)

Department of Health, City of New York, Office of the Secretary, New York, June 5, 1911.

Hon. JOSEPH HAAG, *Secretary, Board of Estimate and Apportionment,* 280 Broadway:

Sir—At a meeting of the Board of Health of the Department of Health, held May 31, 1911, the following resolution was adopted:

Resolved, That the Board of Estimate and Apportionment, in accordance with the provisions of section 56 of the Greater New York Charter, be and is hereby respectfully requested to recommend to the Board of Aldermen the establishment of the grade of the position of Stenographer and Typewriter in the Department of Health (in addition to those already existing therein), with salary at the rate of twelve hundred dollars ($1,200) per annum for one incumbent, detailed to the office of the Commissioner.

A true copy,, EUGENE W. SCHEFFER, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 29, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 31, 1911, the Board of Health requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Stenographer and Typewriter, at $1,200 per annum, for an additional incumbent. In connection therewith we report as follows:

The establishment is proposed to increase the compensation of Miss Mary H. Jillson, a Stenographer and Typewriter, from $1,050 to $1,200 per annum. Miss Jillson was appointed on November 27, 1904, at $600 per annum. On January 1, 1906, her salary was increased to $750; on July 1, 1906, to $900, and on December 15, 1909, to the present rate. Miss Jillson is in the office of the Commissioner. It is stated that no additional appropriation will be necessary for the increase.

We recommend that the request be approved by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Department of Health of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Stenographer and Typewriter............................	$1,200 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Docks and Ferries requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in said Department of the grade of position of Chainman and Rodman, at $1,200 per annum, for 18 incumbents:

(On Febraury 2, 1911, the request of the Dock Commissioner for the establishment of above grade was referred to said Committee.)

Department of Docks and Ferries, City of New York, Pier "A," North River, New York, January 23, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, and Chairman of the Board of Estimate and Apportionment:*

Sir—In the position of Chainman and Rodman in this Department, two grades have already been established, one at $900 per annum, and the other at $1,080 per annum. At the time of the establishment of these grades for the position the Engineering classification of the Municipal Civil Service Commission contained the positions of Leveler and Transitman at higher grades. Levelers received pay at the rate of $1,200 per annum, or $1,250 per annum, and Transitmen at the rate of $1,500 per annum, or $1,800 per annum. Since this classification of grades, the position of Leveler has been eliminated by the Municipal Civil Service Commission. Therefore there is no intermediate grade for the Engineering staff between Chainman and Rodman, at $1,080 per annum, and Transitman at $1,500 per annum.

The effect is that the Chainmen and Rodmen are frequently called upon to do work of a higher grade than that which is ordinarily implied by the title.

In view of the elimination of the title of Leveler, it is impossible to allow these men any higher salary without promotion to the position of Transitman, at $1,500.

I therefore respectfully request that a resolution be adopted recommending to the Board of Aldermen the establishment of the position of Chainman and Rodman for this Department with salary at the rate of $1,200 per annum.

Yours respectfully, CALVIN TOMKINS, Commissioner of Docks.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 29, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On January 25, 1911, the Commissioner of Docks requested the establishment in the Department of Docks and Ferries, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Chainman and Rodman, at $1,200 per annum. In connection therewith, we report as follows:

The Commissioner states that on account of the position of Leveler having been eliminated by the Municipal Civil Service Commission, there is no intermediate grade, in the Bureau of Engineering, between Chainman and Rodman at $1,080 per annum, and Transitman at $1,500 per annum. For that reason, promotions cannot be made, unless to the position of Transitman, at $1,500 per annum.

The $1,200 grade is proposed for eighteen incumbents, as follows:

Baxter, Ralph H., Chainman and Rodman, appointed June 21, 1906, at $1,080.

Birmingham, John T., Chainman and Rodman, appointed Sounder September 16, 1898; made Chainman and Rodman June 28, 1901, at $1,080.

Crowley, Daniel A., Chainman and Rodman, appointed Marine Sounder May 3, 1905, at $18 per week; made Chainman and Rodman September 24, 1906, at $1,080.

Darby, James C., Chainman, appointed Chainman January 25, 1894; increased to $900 April 29, 1902; increased to $1,080 May 27, 1904.

Dikeman, James W., Chainman, appointed Chainman November 30, 1880, increased to $1,080 June 1, 1904.

Hayes, Mark T., Rodman, appointed Rodman November 10, 1905, at $1,080.

Lamber, John R., Rodman, appointed Rodman November 5, 1906, at $1,080.

Lynch, Thomas F., Chainman and Rodman, appointed Dock Builder July 20, 1888; made Laborer June 16, 1899; made Sounder March 29, 1901, at 25c. an hour; made Chainman and Rodman July 11, 1901; increased to $1,080 July 15, 1904.

Malmquist, Edward A., Chainman and Rodman, appointed Chainman and Rodman June 21, 1906, at $1,080.

Morton, Willis A., Chainman and Rodman, appointed Chainman and Rodman, at $1,080, June 21, 1906.

Moss, Frank, Chainman and Rodman, made Chainman and Rodman from Sounder, August 21, 1899; increased to $1,080 May 27, 1904.

Quinn, James P., Chainman and Rodman, appointed Dock Laborer May 12, 1904; made Marine Sounder June 26, 1906, at $18 per week; made Chainman and Rodman December 15, 1909, at $1,080.

Strittmatter, August, Chainman and Rodman, appointed Marine Sounder September 3, 1901, at 25c. an hour; June 30, 1902, at $18 per week; January 1, 1909, made Chainman and Rodman at $900; increased to $1,080 on April 1, 1909.

Sullivan, Daniel, Chainman and Rodman, appointed Boatman July 9, 1891; made Marine Sounder November 2, 1900, at $18 per week; made Chainman and Rodman June 28, 1901, at $1,080.

Sullivan, William J. F., Chainman and Rodman, appointed Sounder June 15, 1895; made Chainman and Rodman June 28, 1901, at $1,080; decreased to $900, April 29, 1902; increased to $1,080, April 4, 1904.

Zinner, Alex. J., Chainman and Rodman, appointed Chainman and Rodman June 21, 1906, at $1,080.

Schultz, Charles M., Chainman and Rodman, appointed Chainman and Rodman August 19, 1907, at $1,080.

Lange, Gottlieb, Chainman and Rodman, appointed Laborer August 7, 1893; made Marine Sounder December 23, 1897, at $18 per week; made Chainman and Rodman June 28, 1901; salary increased to $1,080 May 7, 1904.

The Commissioner states the following

Ten of these men are constantly engaged on work of a higher class than that called for by their titles, namely, the two on construction, one doing draughting, and seven doing the work of Transitmen, the remainder are capable of doing better work or are not required outside their grade, or are very old and faithful employees and very efficient in their grade.

The salaries of these men have not been increased for many years, although their expenses must have greatly increased with the general advance in prices. It is to be supposed that the men who are capable of better work will at some time pass the examination and be promoted to the position of Transitman; but even for those who cannot, it seems to me that an advance in salary is only common justice, and I therefore beg to suggest for your consideration the advisability of establishing the grade of $1,200 per annum for all of the present 18 incumbents.

We recommend the adoption of the attached resolution approving the request.

Respectfully, WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHELL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Department of Docks and Ferries of the grade of position in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Chainman and Rodman	$1,200 00	18

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Deputy Register of Kings County requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in the office of said Register of Kings County of the grade of position of Executive Clerk, at $1,200 per annum for one incumbent:

(On May 4, 1911, the request of the Deputy Register of Kings County for the establishment of above grade was referred to said Committee.)

Office of the Register of Kings County Hall of Records, Borough of Brooklyn, New York City, April 29, 1911.

The Honorable Board of Estimate and Apportionment, New York City:

Dear Sirs—I desire to establish the position of Executive Clerk, at an annual salary of $1,200 per annum in this office, as such position is necessary.

As the establishment of this grade will not involve any additional expense to the City, I respectfully ask that the following modification be made in the Budget schedule lines for the current year.

To insert a line reading, Executive Clerk, $1,200. To change the line reading, 14 Clerks, at $1,200, so as to read 13 Clerks, at $1,200.

Awaiting your favorable action, believe me. Yours very truly,

JAMES S. REGAN, Deputy Register.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 29, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On April 29, 1911, the Deputy Register of Kings County requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Executive Clerk, at $1,200 per annum. In connection therewith, we report as follows:

The establishment is proposed to change the title of Felix G. Kernan, a Clerk, at the $1,200 rate, who has been in the service since June 15, 1906. The Register states that the new title is asked for to conform to the incumbent's work. Mr. Kernan makes up the payrolls and has charge of the correspondence of the office. No change in compensation is involved.

We recommend approval of request by the adoption of the attached resolution.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the office of the Register of Kings County of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Executive Clerk	$1,200 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in said Department of the grade of position of Typewriter Copyist, at $750 per annum for an unlimited number of incumbents:

(On June 1, 1911, the request of the Commissioner of Water Supply, Gas and Electricity for the establishment of the above grade was referred to said Committee.)

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, May 26, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—The minimum rate of pay established in this Department for the position of Typewriter Copyist is $900 per annum. I would prefer that a smaller rate, $750 per annum, be established for the beginners, thus giving an opportunity for subsequent advancement, and I therefore recommend that the Board of Estimate and Apportionment request the establishment by the Board of Aldermen of the rate of $750 per annum for Typewriter Copyists, not limiting the number of incumbents.

Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 26, 1911, the Commissioner of Water Supply, Gas and Electricity requested the establishment in his Department, pursuant to the provisions of section 56 of the Charter, of the grade of position of Typewriter Copyist, at $750 per annum, for an unlimited number of incumbents.

The minimum grade of Typewriter Copyist in the Department is $900 per annum. The Commissioner states that in his opinion the rate is too high for new incumbents, and therefore he proposes the $750 grade.

We recommend the adoption of the attached resolution approving the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Department of Water Supply, Gas and Electricity of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Typewriter Copyist	$750 00	Unlimited.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in said Board of the grade of position of Librarian at $2,500 per annum for one incumbent.

(On June 22, 1911, the resolution of the Board of Aldermen requesting the establishment of the above grade was referred to said Committee.)

In the Board of Aldermen.

Resolved, That the Board of Estimate and Apportionment be and hereby is requested to establish the grade of Librarian in the office of the City Clerk and Clerk of the Board of Aldermen, with compensation at the rate of $2,500 per annum.

Adopted by the Board of Aldermen June 13, 1911, a majority of all the members elected voting in favor thereof. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 26, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 13, 1911, the Board of Aldermen adopted a resolution requesting the establishment of the grade of Librarian in the office of the City Clerk and Clerk of the Board of Aldermen, with compensation at the rate of $2,500 per annum. In connection therewith, we report as follows:

The request involves an increase of $500 per annum in the compensation of Philip Baer, Librarian, Board of Aldermen and City Clerk. Mr. Baer has held the position since January 17, 1895. He has charge of the library in the City Hall, and is responsible for the care of 9,000 volumes of manuscripts and printed records of the National, State and City governments. In addition, he is required to index the ordinances and resolutions adopted by the Board of Aldermen and approved by the Mayor. He is frequently called upon to assist the clerical force in the Marriage Bureau.

The City Clerk states that Mr. Baer is a faithful and competent official, and entitled to the increase.

We recommend the adoption of the attached resolution approving of the requests.

Respectfuly,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Board of Aldermen of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Librarian	$2,500 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communications from the County Judge and Surrogate of Richmond County requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in the County Court and Surrogate's Court of Richmond County of the grade of position of Confidential Clerk at $1,800 per annum for one incumbent.

(On June 15 and 22, 1911, the request of the County Judge and Surrogate of Richmond County for the establishment of the above grade was referred to said Committee.)

County of Richmond, Surrogate's Office, Richmond, N. Y., June 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—Mr. Thomas F. Curley is a Clerk in the Surrogate's Court of Richmond County at a salary of $1,650. He is a competent stenographer and typewriter, and his salary is certainly inadequate. Another Clerk holding substantially the same position gets $1,800.

I beg to ask you to increase Mr. Curley's salary to $1,800.

Yours respectfully, SIDNEY F. RAWSON, County Judge and Surrogate.

County of Richmond, Surrogate's Office, Richmond, N. Y., June 19, 1911.

Hon. WILLIAM J. GAYNOR, *Chairman, Board of Estimate and Apportionment,* City Hall, Borough of Manhattan, N. Y.:

Dear Sir—I respectfully request that the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Charter of The City of New York, recommend to the Board of Aldermen an increase in the salary for the following grade of position heretofore established for the County Court and Surrogate's Court of Richmond County, to wit:

Confidential Clerk, $1,650 to $1,800 per annum, for one incumbent.

No additional appropriation for the current year will be necessary, as there is an approximate unexpended balance in the Salary Account of this Department of $200.

The increase asked for is only $150 beyond that heretofore received by the person now holding the position.

The duties which are performed by the present incumbent, aside from being of a confidential nature, are of a general character, and involve a familiarity with the whole range of Surrogate practice. His nine years' service in this Court have made him indispensable as an Assistant, and I am of the opinion that his application for an increase of salary is meritorious and just. Respectfully yours,

SIDNEY F. RAWSON, County Judge and Surrogate of Richmond County.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 19, 1911, the County Judge and Surrogate of Richmond County requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Confidential Clerk, at $1,800 per annum, for one incumbent. In connection therewith, we report as follows:

The grade is requested for Thomas F. Curley, who has been Confidential Clerk in the Court since April 14, 1902. His compensation is $1,650 per annum, and the County Judge and Surrogate states that his work, in addition to its confidential nature, calls for intimate knowledge of all the details of the Court. He also states that Mr. Curley's nine years of service have made him "indispensable as an assistant." Another Clerk, holding substantially a similar position in the Court, receives $1,800 per annum.

We recommend that the request be approved by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the County Court and Surrogate's Court, Richmond County of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Confidential Clerk	$1,800 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Surrogate of Queens County, requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in the office of said Surrogate of the grade of position of Copyist at $900 per annum for one incumbent:

(On June 1, 1911, the request of the Surrogate of Queens County for the establishment of the above grade was referred to said Committee.)

Office of the Surrogate, Queens County, N. Y., Jamaica, May 1, 1911.

To the Board of Estimate and Apportionment, New York City, N. Y.:

Gentlemen—Pursuant to chapter 56 of the Greater New York Charter, as amended, request is herewith made to the Board of Estimate and Apportionment to fix the salary of Copyist in the office of the Surrogate of Queens County at $900 per annum; one incumbent. Yours respectfully, DANIEL NOBLE, Surrogate.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 1, 1911, the Surrogate of Queens County requested the establishment in his office, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Copyist, at $900 per annum, for one incumbent. In connection therewith we report as follows:

The establishment is to increase the compensation of William J. Mahoney, Copyist, appointed on January 1, 1910, at $720 per annum, the present rate. Another Copyist on the same work receives $1,200 per annum. The average compensation for the position of Copyist in other county offices is $1,000. The Surrogate states that Mr. Mahoney is a competent and willing employee, frequently working overtime to keep up the work of the office.

We recommend the adoption of the attached resolution approving the request. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the office of the Surrogate, Queens County, of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Copyist	$900 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Chief City Magistrate, Second Division, requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in the City Magistrates' Courts, Second Division, the grade of position of City Magistrate, at $7,000 per annum, for 16 incumbents:

(On March 2, 1911, the request of the Chief City Magistrate, Second Division, that the salaries of the City Magistrates, Second Division, be fixed at $7,000 per annum, was referred to said Committee.)

Office of Chief City Magistrate, Board of City Magistrates, Second Division, City of New York, Borough Hall, Brooklyn, February 27, 1911.

Joseph Haag, Esq., *Secretary, Board of Estimate and Apportionment,* City of New York:

Dear Sir—Application is hereby made under section 56 of the Charter of Greater New York to fix the salary of the City Magistrates in the Second Division of The City of New York, at the rate of seven thousand dollars per annum, which will be equal to the amount now paid to the City Magistrates of the First Division in said City.

I am informed that it was contemplated under the provisions of chapter 659 of the laws of 1910, which made it permissible for your honorable Board to equalize the Magistrates' salaries. Respectfully yours,

OTTO KEMPNER, Chief City Magistrate, Second Division, City of New York.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 29, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On February 27, 1911, the Chief City Magistrate of the City Magistrates' Courts, Second Division, comprising Brooklyn, Queens and Richmond, requested that the salaries of the City Magistrates of those Courts be equalized with the salaries paid the City Magistrates, First Division, comprising Manhattan and The Bronx. In connection therewith we report as follows:

The sixteen City Magistrates in the First Division receive compensation at the rate of $7,000 per annum each. There are sixteen City Magistrates in the Second Division. The ten Magistrates in Brooklyn receive $6,000 per annum each, while four Magistrates in Queens and two Magistrates in Richmond receive $5,000 per annum each.

The duties of the Magistrates in the two Divisions are identical. They are appointed under their actions governed by the same law. Although the number of prisoners araigned in the Courts in the First Division exceeds the number arraigned in the Second Division, the requirements for the daily opening and closing of the sessions of the Courts are similar.

There are eleven Courts in the First Division and fifteen in the Second Division. The Magistrates in the First Division serve on the bench on an average twenty-two days a month. The Magistrates in the Second Division average twenty-eight days of service every month, owing to the four extra Courts in the Division. A Magistrate in the Second Division frequently sits in two Courts on the same day.

Chapter 659, Laws of 1910, "An Act in Relation to the Inferior Courts of Criminal Jurisdiction in The City of New York," provides that "the Board of Aldermen, upon the recommendation of the Board of Estimate and Apportionment, is hereby authorized to equalize the salaries of the Associate Justices of the Court of Special Sessions and of the City Magistrates of the First and Second Divisions."

The salaries of the Justices of the Court of Special Sessions, in Brooklyn, Queens and Richmond have been equalized with the compensation paid the Justices of the same Court in Manhattan and The Bronx.

In view of the facts herein stated it would appear reasonable that the request be approved. We recommend therefore the adoption of the attached resolution approving of the request. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the City Magistrates Courts, Second Division, of the grade of position, in addition to those heretofore established, as follows.

Title.	Rate Per Annum.	Number of Incumbents.
City Magistrate	$7,000 00	16

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Chief Justice of the Court of Special Sessions requesting the establishment of the following position in said Court:

	Per Annum.	Incumbent.
Clerk, Part II	$5,000 00	1
Deputy Clerk, Part II	4,000 00	1
Court Stenographer, Part II	2,500 00	1

—together with a report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending the establishment of positions, as follows:

	Per Annum.	Incumbent.
Clerk of Court, Brooklyn	$4,000 00	1
Deputy Clerk, Brooklyn	3,500 00	1

—and further recommending that the request of the Chief Justice of the Court of Special Sessions in so far as it relates to the establishment of the grade of Court Stenographer at $2,500 per annum be referred to the Budget Committee for consideration in the preparation of the 1912 Budget:

(On April 20, 1911, the request of the Chief Justice of the Court of Special Sessions for the establishment of the above grades was referred to said Committee.)

Court of Special Sessions of The City of New York, April 17, 1911.

To the Honorable, the Board of Estimate and Apportionment of The City of New York, 277 Broadway, City:

Dear Sirs—Application is hereby made, under section 56 of the Greater New York Charter, to have the salary of Clerk of Part II. of the Court of Special Sessions of The City of New York fixed at $5,000 per annum for one incumbent; and the salary of Deputy Clerk of Part Two of the Court of Special Sessions of The City of New York fixed at $4,000 per annum for one incumbent; and also to have the salary of Court Stenographer of Part II. of the Court of Special Sessions of The City of New York fixed at $2,500 per annum for one incumbent. Respectfully,

ISAAC FRANKLIN RUSSELL, Chief Justice.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On April 17, 1911, the Chief Justice of the Court of Special Sessions requested the establishment in the Court, pursuant to the provisions of section 56 of the Greater New York Charter, of the following grades of positions:

	Rate Per Annum.	Number of Incumbents.
Clerk	$5,000 00	1
Deputy Clerk	4,000 00	1
Court Stenographer	2,500 00	1

In connection therewith we report as follows:

Joseph L. Kerrigan is Clerk in Part II., Brooklyn. He was appointed on February 1, 1898, at $3,000, the present rate, and it is proposed to promote him to the $5,000 grade requested. During the year 1898, 1,344 cases were disposed of in the court, against 6,400 cases in 1910. The fines in 1898 amounted to $975. In 1910 they amounted to $24,000.

Mr. Kerrigan's services include general charge of systems of records, bookkeeping accounts, records of judgments, cases on appeal, and court orders. He issues all warrants and attachments and supervises the work of the clerical force. It seems that establishment for $4,000, or for an increase of $1,000 per annum, would be reasonable.

John J. Dorman, in the position of Deputy Clerk in Part II., Brooklyn, has been in the Court for the last eleven years, and has received no increase during that period. It is proposed to increase him from $2,500 to $4,000 grade asked for. Mr. Dorman has charge of the court calendars, collects all fines, prepares the minutes of each case disposed of, makes out all the commitments, and is in charge of the clerical force during the absence of the Clerk. The Deputy Clerk in Part I., Manhattan, receives $4,000 per annum. It seems that establishment at $3,500, or for an increase of $1,000 per annum, would be reasonable.

George M. Demin has been Court Stenographer in Part II. since 1906, at $2,000 per annum. It is proposed to promote him to the $2,500 grade requested. We recommend that the item be referred to the Budget Committee for consideration in the preparation of the 1912 Budget.

We recommend the adoption of the attached resolution approving of establishment for the Clerk, at $4,000, and the Deputy Clerk at $3,500 per annum.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the Court of Special Sessions, of the grades of positions, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Clerk of Court, Brooklyn	$4,000 00	1
Deputy Clerk, Brooklyn	3,500 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The item in re the establishment of the grade of position of Court Stenographer, Part II., at $2,500 per annum, was referred to the Budget Committee, consisting of the Comptroller, the President of the Borough of Manhattan and the President of the Board of Aldermen.

The Secretary presented the following communication from the Clerk of the City Court of New York requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in said Court of the grade of position of Stenographer and Typewriter at $1,800 per annum for one incumbent:

(On June 8, 1911, a communication from the Clerk of the City Court relative to the establishment of the above grade was referred to said Committee.)

City Court of The City of New York, New York, June 5, 1911.

Joseph Haag, *Secretary, Board of Estimate and Apportionment, 277* Broadway:

Dear Sir—Pursuant to the provisions of chapter 173 of the Laws of 1911, the Justices of the City Court of The City of New York are empowered to appoint one Stenographer and Typewriter. The Chief Justice directs me respectfully to request the Board of Estimate and Apportionment, pursuant to section 56 of the Charter, to recommend to the Board of Aldermen that the salary of the said position be fixed at $1,800 per annum. Yours respectfully,

THOMAS F. SMITH, Clerk of the City Court.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 5, 1911, the Chief Justice of the City Court requested that the salary of a Stenographer and Typewriter, an additional employee authorized by chapter 173, Laws of 1911, be fixed at the rate of $1,800 per annum, pursuant to the provisions of section 56 of the Greater New York Charter. In connection therewith we report as follows:

Chapter 173 of the Laws of 1911, amends the Code of Civil Procedure relating to the City Court, and provides for the appointment by the Justices of "a Stenographer and Typewriter Operator for the purpose of copying their minutes and opinions, and doing such confidential work which may be required by said justices or the Clerk of the Court."

The act also provides that "the Stenographer and Typewriter Operator is entitled to a salary fixed and to be paid as prescribed by law."

The Chief Justice states that there are ten Justices of the Court, and that the only Stenographers at present employed are Court Stenographers, who are too busy at their regular duties to render any extra services. The Chief Justice also states that in his opinion compensation at the rate of $1,800 per annum would be reasonable and fair for the character of the work to be required of a competent incumbent.

We recommend the adoption of the attached resolution approving the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the City Court of New York of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Stenographer and Typewriter........................	$1,800 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Acting President of the Borough of Brooklyn requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in the office of the President of the Borough of Brooklyn of the grade of position of Inspector of Regulating, Grading and Paving at $1,800 per annum for an unlimited number of incumbents:

(On June 22, 1911, the request of the Acting President of the Borough of Brooklyn for the establishment of the above grade was referred to said Committee.)

The City of New York, Office of the President of the Borough of Brooklyn, Brooklyn, June 19, 1911.

Hon. JOSEPH HAAG, *Secretary, Board of Estimate and Apportionment,* 277 Broadway, New York City:

Dear Sir—In conformity with the provisions of section 56 of the Charter, I would respectfully request that you prepare a resolution for adoption by the Board of Estimate and Apportionment recommending to the Board of Aldermen the establishment of the position of Inspector of Regulating, Grading and Paving in this Department, at $1,800 per annum, number of incumbents unlimited. Yours truly,

L. H. POUNDS, Commissioner of Public Works and Acting President, Borough of Brooklyn.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 19, 1911, the Acting President of the Borough of Brooklyn requested the establishment in his office, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Inspector of Regulating, Grading and Paving, at $1,800 per annum, for an unlimited number of incumbents. In connection therewith we report as follows:

It is stated that there are a number of Inspectors of Regulating, Grading and Paving who act as Supervising Inspectors, and that the establishment is for conformity with their work. The incumbents are to be selected from a Civil Service promotion list. The maximum grade for the position in the office is $1,650 per annum. It is proposed at present to appoint six incumbents at the $1,800 grade. The Inspectors are paid from assessment funds.

We recommend the adoption of the attached resolution approving the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the office of the President of the Borough of Brooklyn of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Inspector of Regulating, Grading and Paving............	$1,800 00	Unlimited.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, Queens and Richmond—15.

Negative—The President of the Borough of The Bronx—1.

The Secretary presented the following communication from the Commissioner of Docks relative to, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending that, in pursuance of chapter 301 of the Laws of 1911, the rates of compensation of certain positions in the Department of Docks and Ferries be fixed as follows:

	Per Annum.
Commissioner of Docks, at..	$7,500 00
First Deputy Commissioner, at..	5,000 00
Second Deputy Commissioner, at...	5,000 00

(On June 15, 1911, a communication from the Commissioner of Docks, requesting that his salary be fixed at $7,500 and that the First and Second Deputy Commissioners of Docks at $6,000 per annum, respectively, in pursuance of chapter 301, Laws of 1911, was referred to said Committee.)

Department of Docks and Ferries, City of New York, Pier "A," North River, New York, June 12, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, and Chairman of the Board of Estimate and Apportionment:*

Sir—An act has been passed by the Legislature this session and has been approved by the Mayor and the Governor, which reads as follows:

"An Act to amend the Greater New York Charter, relative to the number of deputies in the department of docks and ferries.

"The People of theState of New York, represented in the Senate and Assembly, do enact as follows:

"Section 1. Section eight hundred and sixteen of the Greater New York charter, as re-enacted by chapter four hundred and sixty-six of the laws of nineteen hundred and one, as amended by chapter seven hundred and twenty-four of the laws of nineteen hundred and one, and as amended by chapter six hundred and seventy-nine of the laws of nineteen hundred and seven is hereby amended so as to read as follows:

Commissioner of Docks, Deputy Commissioners, Appointment and Salaries.

"Section 816. The head of the department of docks and ferries shall be called the commissioner of docks. He shall be a resident of the city of New York, and shall be appointed by the mayor. The said commissioner shall have the power to appoint and at pleasure remove two deputies, to be known as first deputy and second deputy. The salary of the said commissioner and said deputies shall be fixed by the board of estimate and apportionment of the city of New York. Pending action by the said board, the salary of said first deputy shall be four thousand five hundred dollars a year, payable monthly. In the absence or inability to act of the commissioner, said first deputy shall possess all the powers and perform all the duties of the commissioner. In the absence or inability to act of the commissioner and the first deputy, the said second deputy shall possess all the powers and perform all the duties of the commissioner. The commissioner shall define the duties of the deputy commissioners and may delegate to either of them any of his powers.

"Section 2. This act shall take effect immediately."

I beg to recommend that the salary of the Commissioner of Docks be fixed at the rate of $7,500 per annum, the salary of the First Deputy at $6,000, and the salary of the Second Deputy at $6,000 per annum.

The salary of the Commissioner remains as it is at the present time.

The salary of the present deputy is $4,500 and my reasons for recommending that the salary of each of the two Deputies be fixed at $6,000 per annum are as follows:

The majority of the First and Second Deputy Commissioners of the City receive this amount.

Prior to January 1, 1902, the department was administered by three Commissioners, and since then there has been a single-headed commission, with one Deputy, to take care of the entire five boroughs. Since the department has been under a single-headed commission, the work, especially in the boroughs outside of Manhattan, has incrased many-fold, and there is immediate necessity for the appointment of an additional Deputy, which is instanced by the fact that during the year 1910, the present Deputy was unable to take any vacation, and at the present time the Commissioner and only Deputy Commissioner are so closely confined to the routine duties of the Department that they are unable to give that attention to the larger needs of the Port that is absolutely necessary, especially in view of the possibility of larger improvements being planned and undertaken in the near future.

Considering the large amount of work and the responsibility which will be thrown upon the Deputy Commissioners of this department, in my opinion the salary of $6,000 per annum is only a fair compensation to pay them for their services.

I respectfully request that action be taken on this matter immediately as the summer vacation time is approaching and in the absence of the only Deputy Commissioner this department now has, the Commissioner is called upon to spend a large amount of his time in signing papers, holding trials and performing other duties which the Commissioner or his Deputy are called upon by law to do, when the Commissioner's attention might otherwise be employed to better advantage to the City's interests. Yours respectfully.

CALVIN TOMKINS. Commissioner of Docks.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a request, on June 12, 1911, of the Commissioner of Docks that his salary be fixed at $7,500 per annum, and the salaries of the First Deputy and the Second Deputy Commissioners be fixed at $6,000 per annum each, we report as follows:

Chapter 301 of the Laws of 1911, provides for the appointment of two Deputy Commissioners for the Department of Docks and Ferries, to be known as First Deputy and Second Deputy. It further provides that the salary of the Commissioner of Docks and the salaries of the Deputy Commissioners shall be fixed by the Board of Estimate and Apportionment. Pending action by the Board it is stipulated that the salary of the First Deputy shall be $4,500 per annum, payable monthly.

The present compensation of the Commissioner is $7,500 per annum. He requests that the rate be fixed in compliance with chapter 301, Laws of 1911.

It is proposed to appoint Benjamin F. Cresson, Jr., of 839 West End avenue, Manhattan, First Deputy Commissioner, and William J. Barney of 1187 Lexington avenue, Manhattan, Second Deputy Commissioner.

Mr. Cresson is the present Deputy Commissioner. He was appointed on January 17, 1910, at $4,500 per annum. Mr. Barney is the Secretary of the Department. He was appointed on January 17, 1910, at $4,000 per annum. The rates for Deputy Commissioners in other City departments are as follows:

Correction	$4,000 00
Bridges	4,500 00
Public Charities	5,000 00
Street Cleaning	5,000 00
Fire	5,000 00
Parks	5,000 00
Police	6,000 00

Water Supply, Gas and Electricity, Manhattan	6,000 00
Water Supply, Gas and Electricity, The Bronx	4,000 00
Water Supply, Gas and Electricity, Brooklyn	5,500 00
Water Supply, Gas and Electricity, Queens	4,000 00
Water Supply, Gas and Electricity, Richmond	3,000 00

The Commissioner of Docks is almost exclusively engaged on the problems of port reorganization, such as the development and carrying out administrative and engineering plans to decrease congestion in the harbor.

In the absence of the Commissioner, the present Deputy becomes Deputy and Acting Commissioner. He is then responsible for the administration and proper conduct of the Department, and presides at trials. The usual duties of the Deputy are to pass upon the construction and maintenance of piers and wharves along the entire City's waterfront, and to adjust disputes relative to docking and berthing facilities. He also has jurisdiction over all matters pertaining to the operation and maintenance of the Municipal Ferries. In addition, he is required to assist the Commissioner in the various plans of port reorganization and port improvement, such as the Riverside Drive Improvement, the Manhattan West Side Terminal, the South Brooklyn Improvement, etc.

The appointment of the Second Deputy Commissioner is proposed so that the First Deputy Commissioner may have more time to assist the Commissioner in port reorganization and development, and to assume charge of routine matters of engineering requiring administrative action, and the administrative problems of the Bureau of Ferries.

It is further proposed that the Second Deputy Commissioner shall relieve the First Deputy Commissioner of such routine administration as approval of payrolls, vouchers and handling of Department stores, contracts, etc. Matters requiring administrative decision, such as berthing and docking facilities, the municipal plant in West 57th street, are to be referred to the Second Deputy.

The Department of Docks and Ferries is one of the largest in the City. It has jurisdiction in the five Boroughs, controlling the construction and maintenance of piers and docks along 444 miles of waterfront, and the maintenance and operation of the Municipal Ferries.

We are of the opinion that the rate of $5,000 per annum for each of the First and Second Deputy Commissioners would be reasonable.

We recommend, therefore, the adoption of the attached resolution granting the request to the extent of $5,000 per annum for each Deputy.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of chapter 301 of the Laws of 1911, the Board of Estimate and Apportionment hereby fixes rates of compensation of positions in the Department of Docks and Ferries as follows:

	Per Annum.
Commissioner of Docks	$7,500 00
First Deputy Commissioner	5,000 00
Second Deputy Commissioner	5.000 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary was directed to transmit a copy of the report of the Select Committee as above to the Commissioner of Docks.

The Secretary presented the following communication from the Department of Health requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in said Department of the grade of position of Clerk at $3,000 per annum for one incumbent:

(On February 2, 1911, the request of the Department of Health for the establishment of the above grade was referred to said Committee.)

Department of Health, City of New York, Southwest Corner 55th Street and 6th Avenue, Borough of Manhattan, Office of the Secretary, New York, January 27, 1911.

Hon. JOSEPH HAAG, *Secretary, Board of Estimate and Apportionment,* 277 Broadway:

Sir—At a meeting of the Board of Health of the Department of Health, held January 24, 1911, the following resolution was adopted:

Resolved, That the Board of Estimate and Apportionment be and is hereby respectfully requested to approve of the establishment of an additional grade of the position of Clerk in the Department of Health, and recommend to the Board of Aldermen, in accordance with the provisions of section 56 of chapter 466 of the Laws of 1901, that the salary of said grade be fixed at the rate of $3,000 per annum.

A true copy, EUGENE W. SCHEFFER, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 28, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On January 27, 1911, the Board of Health requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the additional grade of position of Clerk in the Department of Health at the rate of $3,000 per annum. In connection therewith we report as follows:

The grade is asked for to increase the salary of George P. Foulk from $2,550 to $3,000 per annum. Foulk was appointed as a Law Clerk on October 28, 1890, at $1,400 per annum. On December 1, 1901, his salary was increased to $1,500; on May 1, 1902, to $1,650, and on January 12, 1906, to the present rate, when his title also was changed to Clerk.

The Commissioner states that for several years previous to 1902 an Assistant Corporation Counsel was assigned to the Department of Health at $5,000 per annum. Foulk assisted this legal adviser, and since 1902 he has done the work formerly done by himself and the $5,000 Assistant Corporation Counsel. The work is stated to have doubled in the last ten years. Foulk prepares all papers in legal and criminal actions, and advises the Commissioner and the Board of Health on all legal matters. It is stated that his opinions are seldom reversed.

It is proposed to provide for the increase by transfer within the appropriation.

We recommend that the request be approved by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the Department of Health of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Clerk	$3,000 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the President of the Borough of Richmond requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, th eestablishment in the office of said Borough President of the position of Chemist at $1,500 per annum for one incumbent:

(On June 8, 1911, the request of the President of the Borough of Richmond for the establishment of the above position was referred to said Committee.)

Office of the President of the Borough of Richmond, Borough Hall, New Brighton, New York City, June 2, 1911.

Board of Estimate and Apportionment, 277 Broadway, New York City:

Gentlemen—We would ask for the establishment of the position of Chemist at a salary of $1,500 per annum.

We frequently need the services of a Chemist, but shall need them all the time in connection with the Sewage Testing Station, for the establishment of which we have made application and for which we hope to receive appropriation.

Yours very truly, GEORGE CROMWELL, President of the Borough.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 2, 1911, the President of the Borough of Richmond requested the establishment in his office, pursuant to the provisions of section 56 of the Greater New York Charter, of the position of Chemist, at $1,500 per annum. In connection therewith we report as follows:

In the Corporate Stock Budget for 1911 the Corporate Stock Budget Committee has recommended an authorization of $30,000 for the establishment of an experimental plant for making sewerage tests at New Brighton, Borough of Richmond. The President states that the Chemist is to be engaged permanently in connection with the testing plant. It appears that the proposed rate is reasonable.

We recommend the approval of the request by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the office of the President of the Borough of Richmond of the position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Chemist	$1,500 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Fire Department requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in the said Department of the grade of position of Inspector of Blasting, at $1,500 per annum, for two incumbents:

(On April 27, 1911, the request of the Fire Commissioner for the establishment of the above grade was referred to said Committee.)

Fire Department of The City of New York, Office of the Commissioner, April 19, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, and Chairman, Board of Estimate and Apportionment:*

Sir—Referring to my application of March 25, 1911, for the establishment in this Department of the position of "Inspector of Blasting," for two incumbents, at $1,500 per annum, I have the honor to request that the number of proposed incumbents be increased to four at said rate of compensation. The establishment of the position for four incumbents will not increase the total appropriation made to this Department for the current year.

To provide the necessary funds, it is proposed to eliminate the position of Superintendent of Buildings, at $3,000 per annum, in the Bureau of Repairs and Supplies, Boroughs of Manhattan, The Bronx and Richmond, and two positions of Oil Surveyor, at $1,500 per annum, in the Bureau of Combustibles of said Boroughs, which are now vacant. Respectfully, R. WALDO, Fire Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On April 24, 1911, the Fire Commissioner requested the establishment in his Department, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Inspector of Blasting, at $1,500 per annum, for two additional incumbents. In connection therewith we report as follows:

The request is supplemental to one made on March 25, 1911, for the establishment of the position of Inspector of Blasting, at $1,500 per annum, for two incumbents, and which was approved by this Board on May 4, 1911. It is stated that the services of the additional incumbents are necessary in the Bureau of Combustibles for the inspection of depositories of blasting explosives and the supervision of blasting operations. The yearly departmental cost will not be increased by the establishment, as the necessary funds are to be provided by the elimination of two positions of Oil Surveyors, at $1,500 each per annum, in the Bureau of Combustibles, Manhattan, The Bronx and Richmond.

We recommend that the request be approved by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Alderment; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the Fire Department of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Inspector of Blasting	$1,500 00	2

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Street Cleaning requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment of the grade of position of Supervisor of Juvenile Leagues, at $1,200 per annum, for one incumbent, Reuben S. Simons:

(On April 20, 1911, the request of the Commissioner of Street Cleaning for the establishment of the above grade was referred to said Committee.)

Department of Street Cleaning of The City of New York, 13-21 Park Row, New York, April 11, 1911.

Hon. William J. Gaynor, *Mayor, Chairman Board of Estimate and Apportionment,* City of New York:

Sir—I desire to establish in the Department of Street Cleaning a new position, namely, Supervisor of Juvenile Leagues, exempt class, at a salary fo $1,200 per annum. Mr. Reuben S. Simons is at present carrying on the work of supervising the juvenile leagues, but in the recent examination classifying the Assistant Foreman, Second Grade, it was impossible for Mr. Simons to qualify, owing to the fact that he has become blind in the service of the Department, to which he was appointed in 1890. He is unable to perform the duties of a Sweeper, Driver, Stableman or Hostler on account of his blindness, and I desire to have him continue the work which he has been carrying on for the last ten or twelve years, as it deals with the education of the public school children in matters pertaining to the Sanitary Code and rules of this Department and teaches them to take a pride in their neighborhood conditions. Through the school children the parents are reached as they could be in no other way.

I therefore request that your Board establish in this Department the position of Supervisor of Juvenile Leagues, exempt class, and that your Board recommend to the Board of Aldermen, pursuant to section 56 of the Charter,, that the salary of said position be fixed at $1,200 per annum. Respectfully.

WM. H. EDWARDS, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On April 11, 1911, the Commissioner of Street Cleaning requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Supervisor of Juvenile Leagues, at $1,200 per annum. In connection therewith we report as follows:

The grade is proposed for Reuben S. Simons, who has been in the Department since 1890. Until recently his title was Assistant Section Foreman. Early in 1911 it was decided to classify the Assistant Foremen. In an examination it was found impossible for Mr. Simons to qualify, for the reason that he had become blind in the service of the Department.

Mr. Simons has been supervising the Juvenile Leagues for the last ten years with great success, and the Commissioner proposes to have the work go on under his supervision.

The work being done by Mr. Simons has been highly commended by the press and the public, and his success has led to many other cities becoming interested in juvenile leagues.

We recommend the adoption of the attached resolution approving the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the Department of Street Cleaning of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Supervisor of Juvenile Leagues	$1,200 00	1 For Reuben S. Simons.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Sheriff of Queens County requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in the office of said Sheriff of the grade of position of Warden at $2,000 per annum for one incumbent:

(On March 30, 1911, the request of the Sheriff of Queens County for the establishment of the above grade at $3,000 per annum was referred to said Committee.)

Office of the Sheriff, Queens County, County Court House, Long Island City, March 21, 1911.

The Honorable Board of Estimate and Apportionment, New York City, N. Y.:

Gentlemen—As Sheriff of the County of Queens, I most respectfully request the establishment of the grade of Warden of the Queens County Jail, at a salary of $3,000 per annum.

In support of this request, I beg to offer the following reasons:

First—I believe that persons holding positions of similar character and performing the same duties exactly, should receive a compensation on an equalization basis. I find that the Warden of the Kings County Jail, and as well the Warden of the Ludlow Street Jail, receive $3,000 per annum, and they alone have under their jurisdiction civil prisoners. In addition to taking care of civil prisoners, the Warden of the Queens County Jail has under his jurisdiction, control and supervision all the criminal prisoners of Queens County detained either before or after conviction.

I might state that there has been incarcerated in the Queens County Jail, prisoners of a very desperate character. Only here recently, in the last jail delivery from Sing Sing Prison, was prisoners formerly incarcerated in this institution, pending their trial and conviction, and in another instance, and here only recently, a prisoner previously convicted of burglary and sentenced to life imprisonment at the State Prison at Sing Sing, and subsequently transferred to Dannemora Prison, attempted to kill the Warden and other officials of that institution, and he too, was also incarceraed in the Queens County Jail, pending his trial and conviction.

I may also say that a recent act of the legislature, known as the Criminal Inferior Court Bill which made it mandatory on my part to install the system, known as the Bertillon or Finger Print System, the installation of which involved an additional and more serious responsibility upon the Warden.

Statistics show that, while the Warden of the Ludlow Street Jail has under his daily supervision about thirty prisoners, and the Warden of the Raymond Street Jail about fifteen, the Warden of the County Jail of Queens County has under his daily supervision an average of about one hundred twenty-five prisoners, both male and female, civil and criminal included.

I believe statistics will show that we received over two thousand prisoners during the year, ending September 30, 1910, and we discharged approximately, that year, about the same number, which is far in excess of either of the two institutions referred to herein.

Second—The present incumbent has been the Warden of the Queens County Jail for the past four years, and previous to that he was connected with this department for at least eight years, making a total of twelve years of service in this department, with an excellent record. I feel that the incumbent is entitled to the compensation asked for herein, as I know he is capable in every respect and positively know that he would receive the recommendations of my four predecessors under whom he has worked. I am doubly sure that his services warrant the said compensation, for I understand that he took a competitive Civil Service Examination for his present position as Warden, receiving a rating of some 98 per cent. I really believe he is more conscientious in the performance of his duties than the average city employee, for since I have been Sheriff I can safely say that I have found the Warden most attentive in his duties, performing the duties of the office at all times. In fact, the Warden's services to this department are of such a valuable nature that there are many times, not alone myself, but my predecessors, I have been told, have been obliged to call upon him for his advice in the execution of almost every criminal or civil mandate of any nature. I can frankly state from the recommendations of my predecessors that the statements which I make bear true also in the term of their office.

Believing that your honorable Board is in favor of the equalization of salaries of city employees doing work of similar character and nature, and feeling that the facts above mentioned warrant this recommendation, I sincerely trust that the same will meet with your unanimous approval. Very respectfully,

THOS. M. QUINN, Sheriff of Queens County.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On March 21, 1911, the Sheriff of Queens County requested the establishment in his office, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Warden at $3,000 per annum for one incumbent. In connection therewith we report as follows:

The establishment is requested to increase the compensation of Henry O. Schleth, the present incumbent, at $1,200 per annum. The Wardens of the County jails in the counties of New York and Kings are at the rate of $3,000 per annum. Only civil prisoners are confined in the County jails of New York and Kings County. In the New York County jail the daily average number of prisons is eighteen, and in the Kings County jail the average is sixteen. The average for the Queens County jail is 120, including both criminal and civil prisoners.

Mr. Schleth has been Warden for the last four years. Formerly he was connected with the Sheriff's office in different positions for eight years, giving twelve years in the office. It seems that establishment at $2,000 per annum, or for an increase of $800 would be reasonable.

We recommend, therefore, the adoption of the attached resolution approving of the $2,000 grade. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the office of the Sheriff of Queens County of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Warden	$2,000 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the County Clerk of New York County requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending that the Board, pursuant to chapter 290 of the Laws of 1911, approve of the positions and rates of compensation in the office of said County Clerk, as follows:

	Per Annum.	Incumbents.
Superintendent of Indexing and Recording	$3,500 00	1
Assistant Superintendent of Indexing and Recording	2,500 00	1
Docket Comparing Clerk	1,500 00	4
Searcher	1,500 00	3
Docket Clerk	1,500 00	4
Bookbinder	1,200 00	1
Index Clerk	1,000 00	15
Laborer	720 00	3

(On June 15, 1911, a communication from the County Clerk of New York County relative to the establishment of the above positions was referred to said Committee.)

County Clerk's Office, County of New York, New County Court House, New York, June 12, 1911.

Honorable Board of Estimate and Apportionment, City of New York:

Gentlemen—Enclosed herewith I hand you certified copy of chapter 290, Laws of 1911, which became a law with the approval of the Governor, the same to take effect September 1, 1911.

You will note that this act makes a radical change in the method of procedure relating to the filing of instruments and the keeping of records and docket books in this office.

Not only does it change the method of filing and the keeping of the books, but it compels the office to make these changes in the docket books for ten (10) years back (see the last lines of section 1245, paragraph 1).

In order to comply with the provisions of this act an additional number of Clerks will be necessary for this office, to go back ten (10) years and open a new set of books, in accordance with this act.

Also, the staff will have to be increased in order to keep up the current work of the office, in accordance with this act.

I give you below a list of clerks for this office, which I have gone over carefully, and with due regard to the expenditure of the County's money, and trust that you will give same your favorable consideration.

In accordance with the terms of this act, I submit these positions to you, with the salaries therefor, and ask that you designate and establish such positions in this office:

1 Superintendent of Indexing and Recording	at	$4,500 per annum.
1 Assistant Superintendent of Indexing and Recording	at	2,500 per annum.
4 Docket Comparing Clerks, at $2,000 each		8,000 per annum.
3 Searchers, at $1,800 each		5,400 per annum.
4 Docket Clerks, at $1,500 each		6,000 per annum.
1 Bookbinder	at	1,200 per annum.

15 Index Clerks, at $1,000 each	15,000 per annum.
3 Laborers, at $720 each	2,160 per annum.
Furniture	$1,500 00
Supplies	500 00

Reasons.

1. Docket Comparing Clerks.—This is one of the most essential parts of the work, as upon their reliability rests the responsibility of the County Clerk in regard to the accuracy of the redocketing of these judgments, and the satisfaction or assignment of the same.

2. Searchers.—One provision of this bill directs the County Clerk, upon the filing of any paper in an action where no number has been given, to go back, search the indices and collect all the papers together under one number. This search may cover fourteen (14) different kinds of indices, for a period of from one (1) to five (5) years.

3. Docket Clerks.—A fair estimate of the number of judgments for ten (10) years would be 300,000, and as they will average two and one-half (2½) names to the judgment, this amount has to be doubled, making about 700,000 judgments to be redocketed from the surname to the Christian name.

4. Bookbinder.—It will be necessary to keep these books in shape, and the servises of one (1) Bookbinder are required.

5. Index Clerks.—All those actions which have been numbered since October 1, 1910, to the number of 24,416, will have to be reindexed from the surname to the Christian name.

6. Laborers.—The docket books of this office are in constant requisition by the public, and it will be necessary for the books to be carried back and forwards from one room to another, whenever the public may make a demand for a book, or books, to be produced, and at the most careful estimate it will require three (3) laborers to accomplish this.

As you will note from this bill, the carrying out of these changes is mandatory upon the County Clerk of this County, and in accordance therewith I must commence this work on September 1, 1911.

Section 188, subdivision 7 of the Greater New York Charter gives the Comptroller of this City power to sell revenue bonds to pay the expenses made necessary by this bill.

I have written the Comptroller a similar letter, asking him, under the terms of the above section, to sell revenue bonds to the amount of $16,920, the amount necessary to pay the salaries and expenses from September 1 to December 31, 1911, inclusive. Respectfully yours,

WM. F. SCHNEIDER, County Clerk, New York County.

Senate No. 1030, Chap. 290.

An act to amend the code of civil procedure, in relation to current docket books, became a law June 7, 1911, with the approval of the Governor, passed, three-fifths being present.

The people of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Section 1245 of the code of civil procedure is hereby amended to read as follows:

Section 1245. Certain clerks to keep docket books. Each County Clerk, and the Clerk of the City Court of The City of New York, must keep one or more books, ruled in columns, convenient for making the entries prescribed in the next section; in which he must docket, in its regular order, and according to its priority, each judgment which he is required by this article to docket. The expense of procuring new books when necessary is a county charge. The judgment dockets kept by the County Clerk of New York County must hereafter have separate volumes for each letter of the alphabet, and each judgment docket book shall have its letter, and the year or years plainly marked on its back and cover and on every page. A judgment docket shall contain the names of those judgment debtors whose last name begins with the letter marked on the back of the volume. Each volume kept by the County Clerk of said County shall also have a marginal page index showing each letter of the alphabet in order. A page of the judgment docket shall contain the names of those judgment debtors whose first name begins with the letter or whose first initial is the letter marked on the marginal index for that page; except that there shall be at the back of each volume blank pages not indexed which shall contain the names of those judgment debtors whose first names are unknown or fictitious. And there must be a separate volume which shall contain the names of those judgment debtors that are corporations, a joint stock company, a copartnership or a person or persons doing business under a firm name or style, in which shall be entered the full names thereof indexed according to the first names or the first names following prefixes or initials where there are such. And there must be prepared and kept separate volumes for judgment dockets, lettered, indexed and markd as hereinbefore provided in which there shall be entered in the same manner, in their regular order and according to their priority and as soon as it may be practicable to have it done, the names of judgment debtors against whom judgments have been docketed within ten years of the time of the making of the entry in such volumes.

Section 2. After section 1245 of the code of civil procedure, there shall be inserted a new section, to be numbered 1245-a, and to be as follows:

Section 1245-a. Current docket books. The County Clerk of New York County must keep one or more books to be known as current docket books. Each half-page of space in each book shall be consecutively numbered and shall be devoted to one action. On this half-page the Clerk shall enter the title of the action, with the names of the plaintiffs and defendants in full, and in chronological order a brief description of each paper as it is filed, together with the date of filing thereof, also the verdict, report or decision, if any, rendered in the action as of the date of the rendering thereof, also all orders and judgments in the action. All interlocutory and provisional proceedings, and proceedings supplementary to execution, shall be entered on the same half-page of the docket as the action out of which they arise, except in actions where the entries are so voluminous as to require one or more additional half-pages of space; in which case the entries shall be continued under the same number upon other pages of that or a subsequent docket book, reference thereto being entered at the end of the first and all additional half-pages. There shall be kept an alphabetical index in which all the actions entered in such current docket books during any year shall be indexed under that year according to the last names of the plaintiffs, to be so indexed in separate volumes for each letter of the alphabet, each of such volumes having a marginal page index for the first names of the plaintiffs so indexed, in the same manner provided for judgment docket books in section 1245, and there shall be kept a separate alphabetical index which shall contain the names of plaintiffs that are corporations, a joint stock company, a copartnership or a person or persons doing business under a firm name or style, in which shall be entered the full name of the corporation, joint stock company, copartnership or person or persons doing business under a firm name or style, indexed according to the first names or initials or first names following prefixes or initials where there are such, in the same manner as provided in said section; and in every case the serial number of the action shall be entered opposite the name indexed. Within three days after a summons, writ or other original process is served in an action in the supreme court, New York County, the attorney or party causing the same to be served shall file said process with proof of service in the office of the clerk who has custody of the records of the court in which the action is brought. The said clerk shall, upon receipt thereof, stamp the same with a certain number to be one of the series for that year, and enter in the current docket book, on the half-page bearing the same number, the names of the parties as they appear on said process, and the name and address of the attorney who issued the same. And the attorney or party causing such summons, writ or original process to be served shall, upon demand, give to the party so served, or to the attorney of such party, the number so stamped by the clerk, stamped or indorsed upon a paper with the title of the action, and the name and address of the attorney or party who made or caused the service to be made. All papers in the action shall bear the same number as the summonses, writ or other original process, which number shall constitute a part of the title of such action. All original papers in the action, with proof or admission of their service, not later than the day after their service, shall be filed with or mailed to the clerk who stamped the number on the summons, writ or other original process. All papers to be hereafter filed with the Clerk of New York County must be flat and filed flat. The word "action" as used in this section shall mean "action or special proceeding." Whenever a paper pertaining to any action begun prior to the passage of this act is filed in the office of the clerk who has custody of the records of the court in which the action is pending the clerk shall upon receipt of such paper stamp the same with a certain number, to be one of a series for the year in which such action was brought, and shall enter in a current docket book prepared for that year the names of the parties to the action and the name and address of the attorney who filed the paper, in the same manner as if such paper were the original summons, writ or other process in such action; and the clerk shall as soon as practicable thereafter stamp or indorse that number upon every paper in that action theretofore filed in his office and shall enter such papers, as they are so numbered, in such docket book in the same manner as if such docketing had been begun with the first paper in such action. And all such entries in such docket books of actions begun prior to the passage of this act shall be indexed in separate volumes for each letter of the alphabet, and for corporations, a joint stock company, a copartnership or a person or persons doing business under a firm name or style, in the same manner as actions begun after the passage of this act are hereinbefore directed to be indexed. Whenever an action is transferred to another court, or the place of trial changed, the clerk to whom the papers in such action are delivered shall enter in the current docket book copies of all entries theretofore made in said action, and shall continue to make subsequent entries in the same manner as if the process had originally been filed with him. All papers numbered and docketed as herein directed shall be filed together; and on the entry of final judgment in any action all the papers in that action shall be arranged in the order of the dates on which they were filed and shall be fastened or bound together flat with the judgment roll and so filed. The County Clerk of New York County shall appoint, subject to the rules of the State Civil Service Commission, such subordinates as may be necessary for the work required to be done in his office under the provisions of this act, and shall designate the positions and fix the compensation of such subordinates, subject to the approval of the Board of Estimate and Apportionment of The City of New York; and the Comptroller of The City of New York shall issue and sell revenue bonds to an amount sufficient to provide for the payment of the salaries of such subordinates during the year 1911, which shall be a charge against the County of New York, and an amount sufficient to pay and discharge the bonds so issued shall be included in the budget made by said Board of Estimate and Apportionment for the year 1912.

Section 3. This act shall take effect September 1, 1911.

State of New York, Office of the Secretary of State, ss.:

I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom, and the whole of said original law.

Given under my hand and the seal of office of the Secretary of State, at the City of Albany, this 9th day of June, in the year 1911.

[SEAL.] JOSE PIDGEON, Second Deputy Secretary of State.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 12, 1911, the County Clerk of New York County requested the establishment of the following positions in his office, pursuant to the provisions of chapter 290 of the Laws of 1911:

Title.	Rate Per Annum.	Number of Incumbents.
Superintendent of Indexing and Recording	$4,500 00	1
Assistant Superintendent of Indexing and Recording	2,500 00	1
Docket Comparing Clerk	2,000 00	4
Searcher	1,800 00	3
Docket Clerk	1,500 00	4
Bookbinder	1,200 00	1
Index Clerk	1,000 00	15
Laborer	720 00	3

In connection therewith we report as follows:

Chapter 290 of the Laws of 1911 was drawn by the Bar Association of The City of New York, after consultation with the County Clerk for changes in the docketing of judgments and the recording of legal papers, to simplify the work of legal searchers in the County Clerk's office. It is stated that the Bar Association also was advised in drafting the bill by the Presiding Justice of the First Judicial District and the Commissioner of Records. The law becomes operative on September 1, 1911.

The County Clerk outlines the increased work made necessary by provisions of the new statute, as follows:

"The Judgment Dockets kept by the County Clerk of New York County must hereafter have separate volumes for each letter of the alphabet," etc.

This section of the new law means that this office will have to open a new set of books to the number of about 200, and not only must the current work of the office be started September 1, 1911, under this new system, and kept up to date, which entails a material increase in the work as now done, but this office will have to go back ten years, to and including the year 1901, and open an entirely new set of books from that period up to and including August 31, 1911. This means that 1,000,000 entries, or more, will have to be made to bring this up to date.

"A Judgment Docket shall contain the names of those Judgment Debtors," etc.

In opening this new set of books the system is radically changed, as follows: Prior to January 1, 1911, a Judgment, say, against James Taylor was entered indiscriminately in the "T" Judgment Docket Book. Under this new law it is mandatory upon the office to enter a judgment, or judgments, against James Taylor in the "T" Docket Judgment Book under Page "J" and on Page "J" it must be entered in the "Ta" column.

"Except that there shall be, at the back of each volume, blank pages not indexed," etc.

This section is interpreted as follows: A judgment comes in, say against A. Smith; it will have to be docketed on Page "A" in the "S" Book, in the "Sm" Column, and will then have to be redocketed in the back of the book, where fictitious, or unknown, names are docketed.

"And there must be a separate volume, which shall contain the names of those Judgment Debtors that are Corporations," etc.

Under this section there must be kept a separate volume for Corporations, which must be indexed and docketed similar to the above, instead of the present system, in which Judgments are entered indiscriminately. This work must be guaranteed by the County Clerk, for which correctness he is responsible to litigants, under his bond, and it must be compared, after being docketed, by men of large experience, who are careful and accurate in their work. Supposing that an Index Clerk transcribed a Judgment from the old book into the new, and left out a single line, which might mean a difference of thousands of dollars; unless this error was detected by the Docket Comparing Clerks before a certified search was issued by the County Clerk, certifying the correctness of this matter, the litigants to whom an injury was done could recover damages from the County Clerk. The redocketing of a Judgment does not mean solely the Judgment itself, but the transfer, assignment, satisfaction, partial satisfaction, or the issuing of an execution, or the return of an execution, must also be noted for entry in the new Docket. Any omission or error in transcribing same, not detected, would make the County Clerk liable for damages. I quote the celebrated case of Schlesinger vs. Bernstein et al., docketed July 21, 1906. In this case there are about one hundred defendants, and an omission or error of any one item in the transcribing of this Judgment would make the County Clerk liable for damages.

In this particular case it would take one man more than two weeks to transcribe correctly this old Judgment into the new book. In comparing it will be necessary for the Docket Comparing Clerks to go over their work several times before they can certify to the County Clerk that the work has been done correctly.

Section 1245a—"The County Clerk of New York County must keep one (1) or more books, known as Current Docket Books," etc.

This section concurs with what this office has been doing since January 1, 1911, with the exception that the Index to the Current Docket Book must be kept in the same manner as the Judgment Docket Books, as quoted above, which will add materially to the indexing work of the office.

"Within three (3) days after a Summons, Writ, or other Original Process served in an action in the Supreme Court," etc.

Under this section all actions commenced in the Supreme Court, whether a Notice of Issue, or Summons and Complaint, must be filed within three (3) days in the County Clerk's Office. Under the old law litigants could file their Notice of Issue with the Calendar Clerk of the Supreme Court, and need never file any papers affecting the case in the County Clerk's Office. As all such actions must be filed in the County Clerk's office immediately, as above stated, it will increase the work of this office in that department at least 25 per cent.

"Whenever a paper pertaining to any action begun prior to the passage of this Act, is filed in the Office of the Clerk," etc.

The effect of this section of the Act is that in actions now pending, if commenced prior to September 1, 1911, whenever a paper is filed after September 1, 1911, the County Clerk must direct his searchers to go back to the commencement of said action, in many cases covering fourteen different styles of indices, or from fifty to sixty books, and gather together all the papers in said action, reindex them in the current Docket Book, giving the case a number and file all the papers together under said number on one bundle. Many undetermined cases are now pending in this Court, which were commenced as far back as 1896. The usual period for a case pending is from one to five years. The average number of years to be searched by the Searchers of this office will be about four years. Under the Searchers the County Clerk will have to be responsible, upon his bond, to litigants for the correctness and accuracy of the work of the men appointed to do this work.

The statute provides for the appointment of incumbents and the fixing of compensation as follows:

"The County Clerk of New York county shall appoint, subject to the rules of the state civil service commission, such subordinates as may be necessary for the work required to be done in his office under the provisions of this act, and shall designate the positions and fix the compensation of such subordinate, subject to the approval of the board of estimate and apportionment of the city of New York."

The County Clerk states that the request is based on the lowest possible estimate for the additional work.

The following changes in the rates of compensation for three items in the request are reasonable.

	Rates Requested.	Rates Recommended.
Superintendent of Indexing and Recording	$4,500 00	$3,500 00
Docket Comparing Clerks (4)	2,000 00	1,500 00
Searchers (3)	1,800 00	1,500 00

We recommend the adoption of the attached resolution granting the request, with the reduced rates for the three items, as above.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of chapter 290 of the Laws of 1911, hereby approves of positions and rates of compensation in the office of the County Clerk of the County of New York, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Superintendent of Indexing and Recording	$3,500 00	1
Assistant Superintendent of Indexing and Recording	2,500 00	1
Docket Comparing Clerk	1,500 00	4
Searcher	1,500 00	3
Docket Clerk	1,500 00	4
Bookbinder	1,200 00	1
Index Clerk	1,000 00	15
Laborer	720 00	3

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in the office of the City Clerk of the grade of position of Clerk at $3,500 per annum for one incumbent:

(On May 13, 1910, resolution of the Board of Aldermen requesting the establishment of the above grade at $4,000 per annum was referred to said Committee.)

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 3, 1910, the Board of Aldermen adopted a resolution requesting the establishment of the grade of position of Clerk in the office of the City Clerk, at $4,000 per annum. In connection therewith we report as follows:

The grade is requested for Joseph V. Sculley, in charge of the City Clerk's office in Brooklyn. Mr. Sculley has been in the municipal service thirty-one years. He was appointed in 1873 as a copyist, at $1,000 per annum, in the old City of Brooklyn. In 1882 his compensation was increased to $1,500; in 1891 to $1,750; in 1893, to $2,000; in 1895, to $2,500; and in 1907 to $2,650, the present rate.

The City Clerk states that Mr. Sculley is deserving of promotion for long service, efficiency and experience, and on account of increased work in the office under his supervision.

It seems that establishment for $3,500, or for an increase of $850 per annum, would be reasonable.

We recommend the adoption of the attached resolution approving of the $3,500 grade. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the office of the City Clerk of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Clerk	$3,500 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen, communication from the City Clerk relative to, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in the office of the City Clerk of the position of Clerk in Charge of Permit for Electric Signs at $1,500 per annum for one incumbent:

(On April 20, 1911, the resolution of the Board of Aldermen requesting the establishment of the above position at $1,800 per annum was referred to said Committee.)

In the Board of Aldermen.

Resolved, That the Board of Estimate and Apportionment be and hereby is requested to establish the grade of position of Clerk in Charge of Permits for Electric Signs, in the office of the City Clerk in the Borough of Brooklyn, with compensation at the rate of eighteen hundred dollars ($1,800) per annum.

Adopted by the Board of Aldermen April 11, 1911, a majority of all the members elected voting in favor thereof. P. J. SCULLY, Clerk.

The City of New York, Office of the City Clerk, City Hall, New York, April 19, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—Referring to resolution passed by the Board of Aldermen at its stated meeting held on Tuesday, April 11, containing the request to establish the grade of position of Clerk in Charge of Permits for Electric Signs, in the Borough of Brooklyn, I beg to state that Jonas Litt, to whom it refers has been an attachee of that office since January 1, 1908, and during that time has been a very conscientious and industrious clerk, and is worthy of your favorable consideration.

Yours respectfully, P. J. SCULLY, City Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics.

To the Board of Estimate and Apportionment:

Gentlemen—On April 11, 1911, the Board of Aldermen adopted a resolution requesting the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Clerk in Charge of Permits for Electric Signs, at $1,800 per annum, in the office of the City Clerk, in the Borough of Brooklyn. In connection therewith we report as follows:

The grade is requested for Jonas Litt, who was appointed on January, 1, 1908, as a Custodian, at the rate of $1,252 per annum. The City Clerk states that Mr. Litt, in addition to his regular work as Clerk in charge of electric sign permits, keeps the accounts of the office. He also states that the incumbent is highly efficient, and that he is keeping up with steadily increasing work.

It seems that establishment for $1,500, or for an increase of $248 per annum, would be reasonable.

We recommend the adoption of the attached resolution approving the $1,500 grade for one incumbent Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the office of the City Clerk of the position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Clerk in Charge of Permits for Electric Signs...........	$1,500 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Court of General Sessions requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in said Court of the grade of position of Deputy Clerk at $4,000 per annum for one incumbent:

(On June 22, 1911, a communication from the Judges of the Court of General Sessions, requesting the establishment of the above grade, was referred to said Committee.)

Court of General Sessions of the Peace, County of New York, Clerk's Office, June 16, 1911.

Board of Estimate and Apportionment, New York City:

Gentlemen—Under the provisions of chapter 412 of the Laws of 1907, the Judges of the Court of General Sessions were authorized to appoint "not more than eleven Deputy Clerks," and the Comptroller was authorized to pay such Deputy Clerks such salaries "as is now provided by law."

Upon June 28, 1907, the Board of Estimate and Apportionment recommended to the Board of Aldermen that the salary of Deputy Clerks of the Court of General Sessions be fixed at the sum of $4,000 per annum, which recommendation was subsequently approved and adopted by the Board of Aldermen.

Mr. Richard Tone Pettit was, under date of April 6, 1908, transferred from the position of Assistant Special Deputy Clerk of the Supreme Court to the position of Deputy Clerk of the Court of General Sessions, with salary at the rate of $3,000 per annum. At the time of his transfer, he was not eligible to the salary of $4,000 per annum, under the State Civil Service rules, but since has become eligible to receive that rate of compensation. His duties as Deputy Clerk in this court are identical with the duties of all other Deputy Clerks in said court; and it is the desire of the Judges of the Court of General Sessions that his compensation be fixed at the same amount received by the other Deputy Clerks, to wit, $4,000.

Request is, therefore, made upon the Board of Estimate and Apportionment that recommendation be made to the Board of Aldermen for the fixing of the salaries of the Deputy Clerks of this court at $4,000 per annum, for eleven incumbents, and that the salary schedule supporting the appropriation for said court for the year 1911 be modified by eliminating the items "Deputy Clerks, 10 at $4,000—$40,000, Deputy Clerk, $3,000," and substituting in place thereof, "Deputy Clerks, 11 at $4,000—$44,000," thereby reducing the unassigned balance from $2,100 to $1,100. This additional grade and modification of salary schedule will not increase the amount appropriated for the court for the year 1911. Very respectfully yours,

THOMAS C. O'SULLIVAN, JAMES T. MALONE, OTTA A. ROSALSKY, EDWARD SWANN, JOSEPH F. MULQUEEN, Judges of the Court of General Sessions.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 16, 1911, the Judges of the Court of General Sessions requested the establishment of the grade of position of Deputy Clerk at $4,000 per annum, for an additional incumbent. In connection therewith we report as follows:

Chapter 412 of the Laws of 1907 provides that the Judges of the Court of General Sessions may appoint "not more than eleven Deputy Clerks." There are ten Deputies at $4,000 per annum each. The additional grade is proposed for Richard Tone Pettit, who was transferred on April 6, 1908, from the position of Assistant Deputy Clerk of the Supreme Court to the position of Deputy Clerk of the Court of General Sessions, at the rate of $3,000 per annum. Mr. Pettit was not then eligible under the State Civil Service Rules for the $4,000 rate. He has become eligible and it is therefore proposed to promote him to the grade. His duties are similar to those of the other Deputy Clerks of the Court. The funds for the increase are available in an unassigned balance.

We recommend the adoption of the attached resolution approving the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the Court of General Sessions of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Deputy Clerk	$4,000 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Brooklyn Disciplinary Training School for Boys requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in said school of the grade of position of Investigator at $900 per annum, for one incumbent:

(On June 22, 1911, the request of the Superintendent of the Brooklyn Disciplinary Training School for the establishment of the above grade was referred to said committee.)

The Brooklyn Disciplinary Training School for Boys, Superintendent's Office, 18th Avenue between 56th and 58th Streets, Borough of Brooklyn, N. Y., June 17, 1911.

JOSEPH HAAG, Esq., *Secretary, Board of Estimate and Apportionment,* 277 Broadway, New York City:

Dear Sir—At a regular meeting of the Board of Managers of this institution, held on June 6, 1911, it was unanimously agreed to increase the salary of our Investigator from $720 per annum to $900 per annum. I respectfully petition your honorable Board of Estimate and Apportionment to change our Budget Schedule No. 1298 under the title of Salaries and Wages, by abolishing the position of Cleaner at $180 per annum and transferring that sum to the position of Investigator, thus making the salary of Investigator $900 per annum. I also request that the said position be established in accordance with the provisions of section 56 of the Greater New York Charter.

This increase has been allowed for meritorious services and also for the reason that the salary is entirely too low for the services performed and is not in proportion to the salaries paid for similar work in other institutions.

Trusting this petition will meet with the approval of your honorable Board, I beg to remain. Yours very respectfully,

ROSCOE V. WOLFE, Superintendent.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 17, 1911, the Superintendent of the Brooklyn Disciplinary Training School for Boys requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter of the grade of position of Investigator, at $900 per annum.

The new grade is for the purpose of increasing the compensation of Ludwig Antonius $180 per annum, the necessary funds to be supplied by the elimination of the position of Cleaner at the same rate. The Superintendent states that Mr. Antonius' services merit the increase. His work is similar to that of Truant Officers in the Department of Education at from $900 to $1,500 per annum, according to length of service.

We recommend that the request be approved by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the Brooklyn Disciplinary Training School for Boys, of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Investigator	$900 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending that the communications from the New York Per Diem Men's Civil Service Association and the New York Civil Service Association relative to equalizing the wages of Park Department Foremen in the Boroughs of Brooklyn and Queens, be referred to the Commissioner of Parks, Boroughs of Brooklyn and Queens, for such action as he may deem necessary and proper, as the matter is one for departmental administration.

Which was referred to the Commissioner of Parks for the Boroughs of Brooklyn and Queens, and the Secretary directed to transmit copies thereof to the above-named associations.

(On February 9 and 23, and May 4, 1911, the above communications were referred to said committee.)

The Secretary presented a report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, refrring to a resolution of the Board of Aldermen requesting the establishment of the grades of positions of Gardener-in-charge at $115 a month and Gardener at $90 a month, in all boroughs, the compensation to be paid semi-monthly, also to a communication from William Dilm, Secretary of a Special Committee of Gardeners of Greater New York, and suggesting that they be referred to the Commissioners of Parks for such action as they may deem necessary and proper.

Which was referred to the Commissioners of Parks of the different boroughs and the Secretary directed to transmit a copy thereof to William Dilm, Secretary, etc.

(On June 15, 1911, the resolution of the Board of Aldermen, as above, was referred to the said committee.)

The Secretary presented the following report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, returning requests from various departments for the establishment of positions and grades of positions with the recommendation that they be not approved for the reason that the information furnished the committee does not seem to justify the granting of the requests:

Which was ordered filed, and the Secretary directed to notify the departments interested.

(At various meetings of the Board these matters were referred to said committee.)

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—We return herewith the following requests for the establishment of new positions and grades with the recommendation that they be not approved, for the reason that information furnished to the committee does not seem to justify the establishment of the positions or grades requested:

Date of Reference, Board of Estimate and Apportionment Meeting.	Department.	Position.	
June 22, 1911	Education	Deputy Superintendent of School Supplies	$2,200 00
		Clerk	3,500 00
		Examiner	3,500 00
June 15, 1911	Parks, Manhattan and Richmond	Architect	3,600 00
Apr. 13, 1911	President, Brooklyn	Inspector of Sewer Construction, per diem.	5 00
June 22, 1911	Street Cleaning	Stenographer	2,000 00
June 22, 1911	Communication from Blacksmiths' Helpers' Union of New York City and Vicinity, requesting that the compensation of Blacksmiths' Helpers in all City departments be increased from $3 to $3.50 a day.		

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The Secretary presented the following report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, returning applications from various departments, etc., for the establishment of positions and grades, and recommending that they be returned to the various heads of departments, etc., to be included in the departmental estimates for 1912:

In accordance with the recommendations contained in the report, the Secretary was directed to return the applications to the departments interested.

(At various meetings of the Board these matters were referred to said Committee.)

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—We transmit herewith the following applications for the establishment of grades or positions, or both, and recommend that they be returned to the various department heads to be included in the departmental estimates for 1912:

Date of Reference, Board of Estimate and Apportionment Meeting.	Department.	Position.
April 27, 1911............	City Court of N. Y.......	Communication from Joseph Rollins, requesting equalization of salaries of Interpreters so that they may receive $2,500 instead of $2,000.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President of the Board of Aldermen; Select Committee.

The Secretary presented the following communication from the Board of Assessors requesting, and report to Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment of grades of position of Clerk at $2,250 for four incumbents and of Stenographer at $1,800 for one incumbent, in said office:

Office, Board of Assessors, 320 Broadway, New York, June 20, 1911.

Hon. W. J. Gaynor, *Chairman, Board of Estimate and Apportionment,* 277 Broadway, New York City:

Sir—The Board of Assessors respectfully requests the establishment in the office of the Board of Assessors of the following grades of positions:

	Incumbents.
Clerk, at $2,250 per annum	4
Stenographer, at $1,800 per annum	1

The three Clerks it is proposed to promote to the $2,250 per annum grade are James M. Clancy, Thomas J. Higgins, and Hiram A. Faron.

Mr. Clancy was appointed 1898; his present salary is $2,100 per annum. He has charge of all claims for damages alleged to have been caused by a change in the grade of streets in all boroughs. The Board feels that his position (the office title of which is "Change of Grade Clerk") is one of responsibility.

Mr. Higgins was appointed 1899; his present salary is $1,950 per annum. After the area of assessment, rates, etc., have been determined by the Board of Assessors, Mr. Higgins has supervision of all assessments in Manhattan, Brooklyn and The Bronx. He is called on to explain to owners and attorneys much detail in connection with individual assessments.

Mr. Faron was appointed 1898; his present salary is $1,950 per annum. He has charge of all Richmond and Queens assessment lists after the area, rates, etc. have been determined by the Board of Assessors. He is called on to explain to owners and attorneys much detail in connection with the individual assessments.

The two clerks it is proposed to promote to the $2,100 per annum grade are William M. Bostwick and Ernest Spitzer.

Mr. Bostwick was appointed in 1894; his present salary is $1,950 per annum. He is a computer of assessments. His long experience and acquaintance with assessment matters generally make him a most useful man in the office.

Mr. Spitzer was appointed in 1901; his present salary is $1,950 per annum. He has charge of the records, financial accounts and statistics of the office. Also all advertising of assessment lists. In addition he is qualified as a Stenographer and Typewriter and is frequently called on to do stenographic work in the office, taking the place of the regular stenographer in vacation time and at such times as one Stenographer is unable to keep his work up to date.

Arthur H. Parry, the Stenographer was transferred to this office from the Board of Water Supply in 1906; his salary at present is $1,650 per annum. The office of the Board of Assessors prior to February, 1910, had a Stenographer at a salary of $2,250 per annum. whose duties consisted of the taking of testimony and keeping of papers in connection with claims for damages brought under special acts of the Legislature. Since the resignation of the above Stenographer, Mr. Parry has taken all testimony submitted in these special matters. The position of Stenographer at $2,250 per annum was stricken from the Budget for 1911.

The Board in requesting the establishment of the above grades of positions would most respectfully call the attention of your Board to the present condition of the office, compared with its condition at any time, between January 1, 1898 and January 1, 1910. Without going into details, it may be said the records show from the years 1900 to 1909, inclusive, the average amount of unapportioned assessment lists, totaled $3,121,000 annually. Interest on this sum or the use of this sum by the Street Improvement Fund was absolutely lost to the City.

On June 9, 1911, there was in the office of the Board of Assessors, less than $100,000 of unapportioned assessment lists (14) all of which were regulating and grading lists affected by claims for damages.

The Board of Assessors fells that all of the above promotions requested are well merited and most respectfully ask favorable consideration by your honorable body. Respectfully submitted, THOMAS J. DRENNAN, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Board of Assessors requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the following grades of positions:

Title.	Rate Per Annum.	Number of Incumbents.
Clerk	$2,250 00	4
Stenographer	1,800 00	1

In connection therewith we report as follows:

The $2,250 grade of Clerk is proposed to increase the compensation of James M. Clancy, Thomas J. Higgins and Hiram A. Faron and Ernest Spitzer.

Mr. Clancy was appointed in 1898, and is at $2,100 per annum. He has charge of all claims for damages alleged to have been caused by a change in the grade of streets in all Boroughs. The Board states that his position is one of responsibility, and that his work merits the increase.

Mr. Higgins was appointed in 1899, and is at $1,950 per annum. After the area of assessment, rates, etc., have been determined by the Board of Assessors, Mr. Higgins has supervision of all assessments in Manhattan, Brooklyn and The Bronx. He is called on to explain to owners and attorneys detail in connection with individual assessments.

Mr. Faron was appointed in 1898, and is at $1,950 per annum. He has charge of all Richmond and Queens assessment lists after the area, rates, etc., have been determined by the Board of Assessors. He is called on to explain to owners and attorneys detail in connection with the individual assessments.

Mr. Spitzer was appointed in 1901, and is at $1,950 per annum. He has charge of the records, financial accounts and statistics of the office; and also of all advertising of assessment lists. In addition he is qualified as a Stenographer and Typewriter and is frequently called on to do stenographic work.

The $1,800 grade of Stenographer is proposed to increase Arthur H. Parry, at $1,650 per annum. Mr. Parry was transferred from the Board of Water Supply in 1906. The office of the Board of Assessors, prior to February, 1910, had a Stenographer at $2,250 per annum, whose duties consisted of the taking of testimony and keeping of papers in connection with claims for damages brought under special acts of the Legislature. Since the resignation of the above Stenographer, Mr. Parry has taken all testimony submitted in these special matters. The position of Stenographer at $2,250 per annum was stricken from the Budget for 1911.

The Board of Assessors states the following:

"In requesting the establishment of the above grades of positions we would most respectfully call the attention of your Board to the present condition of the office compared with its condition at any time between January 1, 1898, and January 1, 1910, Without going into details, it may be said the records show from the years 1900 to 1909, inclusive, the average amount of unappropriated assessment lists totaled $3,121,000 annually. Interest on this sum or use of this sum by the Street Improvement Fund was absolutely lost to the City.

"On June 9, 1911, there was in the office of the Board of Assessors less than $100,000 of unapportioned assessment lists, all of which were regulating and grading lists affected by claims for damages.

"The Board of Assessors feels that all of the above promotions requested are well merited and most respectfully ask favorable consideration by your honorable body."

The Secretary states that the request for Stenographer, at $1,800, should be for Stenographer and Typewriter at the same rate. The latter title is in conformity with the rules of the Municipal Civil Service Commission.

We recommend the adoption of the attached resolution approving of the request as noted above. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the office of the Board of Assessors of the grades of positions, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Clerk	$2,250 00	4
Stenographer and Typewriter	1,800 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a report of Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, returning for filing the request of the Commissioner of Docks for the establishment of grade of position of Assistant Superintendent of Ferries at $3,600, said request having been verbally withdrawn by the Commissioner of Docks.

Which was ordered filed and the Secretary directed to return the request to the Department of Docks and Ferries.

The Secretary presented a report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, returning, for filing the request of the Commissioner of Docks for the establishment of two rates of pay for Painters and Letterers, viz., $4 and $4.50 per diem, said request having been verbally withdrawn by the Commissioner of Docks.

Which was ordered filed and the Secretary directed to return the request to the Department of Docks and Ferries.

The Secretary presented the following resolutions of the Board of Aldermen, requesting, and report of Comptroller recommending, issues of special revenue bonds as follows: $375 for the purpose of paying the salary of a Nurse in the Cumberland Street Hospital, Brooklyn, and $750 for paying salaries of two Trained Nurses in Metropolitan Hospital, Blackwells Island, at the rate of $750 per annum, each, from July 1 to December 31, 1911, Department of Public Charities, and approval of schedule for said funds.

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of three hundred and seventy-five dollars ($375), the proceeds whereof to be used by the Department of Public Charities for the purpose of paying salary of Nurse, at Cumberland Street Hospital, Brooklyn, from July 1, 1911.

Adopted by the Board of Aldermen, June 20, 1911, three-fourths of all the members, voting in favor thereof.

Approved by the Mayor, June 27, 1911. P. J. SCULLY, Clerk.

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of seven hundred and fifty dollars ($750), the proceeds whereof to be used by the Department of Public Charities for the purpose of paying salaries of two Trained Nurses, at the rate of $750 each per annum, from July 1 to December 31, 1911.

Adopted by the Board of Aldermen, June 13, 1911, three-fourths of all the members, voting in favor thereof.

Received from his Honor the Mayor, June 27, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of The Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 13 and June 20, 1911, the Board of Aldermen adopted resolutions requesting the issue of special revenue bonds in the sums of $750 and $375, respectively, the proceeds to be used by the Department of Charities to pay the salaries of three Trained Nurses for the six months beginning July 1, 1911, at the rate of $750 per annum. In connection therewith I report as follows:

The Commissioner states that the Nurses are to be employed in social service work, visiting the homes of patients who have left the Department institutions, for the purpose of supplementing the medical treatment they have received. A similar service is maintained with satisfactory results at Harlem and Gouverneur Hospitals. Of the three additional Nurses, one is for the Cumberland Street Hospital, Brooklyn, and two for the Metropolitan Hospital, Blackwells Island.

I recommend the adoption of the attached resolutions granting the requests and approving schedule for the funds. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 20, 1911, and approved by the Mayor June 27, 1911, requesting an issue of special revenue bonds in the sum of three hundred and seventy-five dollars ($375), the proceeds whereof to be used by the Department of Public Charities for the payment of the salary of a Trained Nurse, at the Cumberland Street Hospital, Borough of Brooklyn, for the six months beginning July 1, 1911, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding three hundred and seventy-five dollars ($375), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 13, 1911, requesting an issue of special revenue bonds in the sum of seven hundred and fifty dollars ($750), the proceeds whereof to be used by the Department of Public Charities for the payment of the salaries of two Trained Nurses at Metropolitan Hospital, Blackwells Island, for the six months beginning July 1, 1911, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding seven hundred and fifty dollars ($750), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of schedule for employees of the Department of Public Charities paid from special revenue bonds for the year 1911, as follows:

Department of Public Charities.

Institutions, Manhattan and The Bronx, Metropolitan Hospital—

Wages, Regular Employees, Special Revenue Bond Force:

Trained Nurses, 2 at, per annum	$750 00

Institutions, Brooklyn and Queens, Cumberland Street Hospital—

Wages, Regular Employees, Special Revenue Bond Force:

Trained Nurse, 1 at, per annum	$750 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Comptroller recommending, the issue of $7,500 special revenue bonds (subdivision 8, section 188 of the Charter), for the purchase of two automobiles for the Department of Bridges:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of seven thousand five hundred dollars ($7,500), the proceeds whereof to be used by the Department of Bridges for the purpose of purchasing two automobiles.

Adopted by the Board of Aldermen June 27, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor July 5, 1911. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 27, 1911, the Board of Aldermen adopted a resolution requesting special revenue bonds to the amount of $7,500 to provide for the purchase of two automobiles for the Department of Bridges. In connection therewith, I report as follows:

The Commissioner states that there are five automobiles in the Department. Four have been in service for five years, and the other for three years. As a result, the Commissioner states that all the machines are so worn that repairs cost an "almost prohibitive sum." He therefore proposes to purchase two new high-grade machines as soon as the requested appropriation is available.

The attached resolution, if adopted, will grant the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 27, 1911, and approved by the Mayor July 5, 1911, requesting an issue of special revenue bonds in the sum of seven thousand five hundred dollars ($7,500), the proceeds whereof to be used by the Department of Bridges for the purpose of purchasing two automobiles, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding seven thousand five hundred dollars ($7,500), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following report of the Comptroller, certifying three claims of Thomas Dwyer, pursuant to section 246 of the Charter, in the sum of $33,603.81, for labor and material furnished in and about the College of The City of New York:

City of New York, Department of Finance, Comptroller's Office, July 3, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—Under and pursuant to the provisions of section 246 of the Charter I hereby certify that three claims have been presented by Thomas Dwyer for $42,560.55; $4,659.55 and for various items of interest, alleged to be due for labor and material furnished in and about the College of The City of New York; that such claims, according to the opinion of Acting Corporation Counsel G. L. Sterling, are illegal and invalid as against TheCity of New York, but, notwithstanding, in my judgment, it is equitable and proper for the City to pay a portion of said claims, inasmuch as the City has received value for the same; and that $33,603.81 is the amount which should be paid in full satisfaction thereof. Respectfully,

WM. A. PRENDERGAST, Comptroller.

City of New York, Department of Finance, Comptroller's Office, July 3, 1911.

In the matter of Claims 58,614, 58,615 and 58,617 of Thomas Dwyer for various amounts alleged to be due for work at the College of The City of New York.

Hon. WILLIAM A. PRENDERGAST, *Comptroller:*

Sir—Thomas Dwyer has presented three claims for various amounts for work in and about the College of The City of New York at St. Nicholas terrace, 140th street, Amsterdam avenue and 138th street, in the Borough of Manhattan.

Claim No. 58,614 *for* $42,560.55.*

The first item of this claim is for $5,791.94 with interest from December 17, 1907, a balance alleged to be due under the first modification of a contract dated March 11, 1904, for mason, steel, iron, roofing, carpenter and electric work, known as Nos. 9,885 and 14,204, the modification bearing date the 4th of May, 1905.

The second item of this claim is for $5,741.94 with interest thereon from September 12, 1907, alleged to be due on the second modification of said contract, said modification bearing date May 4, 1905.

The third item is for $158.69 with interest from September 11, 1907, alleged to be due on the third modification of said contract, said modification bearing date July 18, 1905.

The fourth item is for $2,501.71 with interest thereon from December 17, 1907, alleged to be due on the fifth modification of said contract, said modification bearing date November 1, 1905.

The fifth item is for $3,015.69 with interest from December 16, 1907, the alleged value of certain extra labor performed and materials furnished.

The sixth item is for $4,474.13 with interest thereon from September 11, 1907, alleged to be due on a contract dated May 12, 1905, for labor and materials furnished for the erection of an additional story to the Chemical Building of the College of The City of New York.

The seventh item is for $845.29 with interest from April 16, 1908, alleged to be due upon the first modification of a contract for furnishing marble, mason, steel, iron, roofing, carpenter and electrical work for the building of said College, the said contract, dated May 10, 1905, was numbered 12,737 and 14,203, and known as the second contract, the modification bearing date July 18, 1905.

The eighth item is for $6,356.60 with interest from January 19, 1908, alleged to be due on the second modification of said second contract, said modification bearing date November 1, 1905.

---

*Should be $42,460.55.

The ninth item is for $926.80 with interest from June 20, 1908, alleged to be due on the third modification of the second contract, said modification bearing date July 14, 1906.

The tenth item is for $288 with interest from January 21, 1908, alleged to be due under the fourth modification of the second contract, said modification bearing date November 17, 1906.

The eleventh item is for $901.20 with interest from June 20, 1908, alleged to be due under the fifth modification of the second contract, said modification bearing date the 10th of July, 1907.

The twelfth item is for $313.26 with interest from April 24, 1908, alleged to be due under the sixth modification of the second contract, said modification bearing date July 30, 1907.

The thirteenth item is for $11,145.30 with interest from June 22, 1908, alleged to be due for labor and material furnished in addition to the second contract and the various modifications thereof.

Claim No. 58,615 *for* $4,659.55.

The items of this claim are stated to be as follows:

1. Sweeping and cleaning floors, walls, dusting and moving furniture, moving cases and boxes and furnishing necessary equipment therefor, etc., at the buildings of the College of The City of New York from October 4, 1906, to February 25, 1907, for which itemized bills were submitted on April 1, 1907, to the Board of Trustees of the College of The City of New York	$3,644 30
2. For furnishing material and performing labor for the erection of certain partitions at said buildings	*72 25
3. For furnishing material and performing labor in erecting an inclined platform on the Convent avenue entrance of the main building of the College of The City of New York and platform, steps and rail in gymnasium	170 00
4. For furnishing material and performing labor in the erection of certain shelving for the buildings of the College of The City of New York	125 00
	$4,659 55

Also interest on said sums from the time when they respectively became due, viz.: $3,644.30 from February 25, 1907; $720.25 from January 20, 1906; on $170 from October 10, 1906, and on $125 from October 10, 1906.

Claim No. 58,617 *for Interest.*

This claim is for interest on various amounts stated as follows:

1. Interest at the rate of 6 per cent. per annum on the sum of $109,834 from June 22, 1908, to January 29, 1909, said sum being an amount earned by and payable to me under my contract with The City of New York by the Board of Trustees of the College of The City of New York for marble, mason, steel, iron, roofing, carpenter and electric work for the buildings of the College of The City of New York, St. Nicholas terrace, 140th street, Amsterdam avenue and 138th street, Borough of Manhattan, City of New York, said contract being known and designated as the second contract dated May 10, 1905, for the sum of $880,660, and numbered 12,737 and 14,203, said sum of $109,834 being the sum earned by and payable to me under the aforesaid contract and wrongfully retained by The City of New York between said dates aforesaid.

2. And also interest at the rate of 6 per cent. per annum on the sum of $139,769 from January 29, 1909, to April 23, 1909, said sum being the sum earned by and payable to me under the aforesaid contract and wrongfully retained by The City of New York between said dates aforesaid.

3. Also interest at the rate of 6 per cent. on the sum of $20,000 from April 23, 1909, to June 14, 1909, said sum being the sum earned by and payable to me under the aforesaid contract and wrongfully retained by The City of New York between said dates aforesaid.

An action having been instituted for the recovery of the amounts claimed the papers in the case were transmitted to the Corporation Counsel for his information in conducting the defense.

In reference thereto a communication, dated June 30, 1911, was addressed to you by Acting Corporation Counsel G. L. Sterling. It was stated therein in part: "The plaintiff, Thomas Dwyer, entered into two contracts with The City of New York for the erection of buildings for the City College. The first contract was dated

---

*Should be $720.25.

March 11, 1904, and the second May 10, 1905. The contract dated March 11, 1904, was for the furnishing of all material and performing all work necessary or proper for completing the mason, steel, iron roofing and electric work of the buildings of the College of The City of New York, according to the plans and specifications, and the contract let on May 10, 1905, known as the 'second contract,' provided for additional mason, iron and marble work, carpenter work, elevators, electric and other work for the buildings of the College of The City of New York. The estimated cost of the first contract was $1,625,000, and the estimated cost of the second contract was $880,660. After the contractor entered upon the performance of his work, it was found necessary from time to time to modify and supplement the original contracts, and, to that end, the Trustees of the City College entered into several supplemental or modifid contracts, eliminating certain work and adding other work. The claim of plaintiff is divided into twenty-one items, as follows:

Complaint.			
No. 5	1.	Balance on the original contract due but unpaid............	$1,700 44
No. 7	2.	Balance due on the first modification of Contract No. 1....	5,791 94
No. 8	3.	Balance due on second modification of Contract No. 1......	5,741 94
No. 9	4.	Balance due on third modification of Contract No. 1........	158 69
No. 10	5.	Balance due on fourth modification of Contract No. 1......	2,501 71
No. 12	6.	Balance due on sixth modification of Contract No. 1......	4,474 13
No. 18	7.	Balance due on first modification of Contract No. 2........	845 29
No. 19	8.	Balance due on second modification of Contract No. 2......	6,356 60
No. 20	9.	Balance due on third modification of Contract No. 2......	†2,926 80
No. 21	10.	Balance due on fourth modification of Contract No. 2......	288 00
No. 22	11.	Balance due on fifth modification of Contract No. 2......	901 20
No. 23	12.	Balance due on sixth modification of Contract No. 2......	313 26
No. 6	13.	Interest on $232,000 from Dec. 12, 1907, to Feb. 25, 1908..	2,668 00
No. 66	14.	Interest on $32,000 from Feb. 25, 1908, to May 15, 1909....	2,346 67
No. 6	15.	Interest on $10,000 from Jan. 29, 1909, to May 15, 1909......	178 33
No. 6	16.	Interest on this interest to date.	
No. 11	17.	Extra work on oral orders under first contract............	3,015 69
No. 24	18.	Extra work on oral orders under second contract..........	11,176 70
No. 27	19.	Unpaid balance on sweeping contract (written order by President Finley), consisting of the furnishing of brooms, pans, etc., and performing the work of sweeping the buildings of the College of The City of New York......	3,644 30
No. 30	20.	Extra work, consisting of the erection of certain partitions in the sub-freshman building at the College of The City of New York	720 25
No. 33	21.	Extra work, consisting of the installation of certain shelving in the buildings of the College of The City of New York and the furnishing of certain platforms...............	295 00

In each case where the original contracts were modified or supplemented by additional contracts, it was at the instance of the Board of Trustees of the City College, which board was of the opinion that it was necessary, in order to properly carry out the contracts, to have certain additional work performed and certain work called for by the contracts eliminated. The architect attempted to agree with the contractor on the amounts which should be allowed the City for the work eliminated and which should be charged for the additional or extra work found necessary. After the contracts were completed, a question arose as to the authority of the Board of Trustees to make the modified contracts, and also whether or not the work performed and materials furnished were of the value claimed. The architects made an examination of the value of the materials furnished and work performed under the supplemental and modified agreements, and reported that the fair and reasonable value of same, including an item of $1,700.44 due on original Contract No. 1, is $30,000. Since that time, however, they have gone over the matter a second time and checked up the cost data, and have decided that there was an error in the first statement, and that the value of the work and materials is $26,100. Certain other work was performed and materials furnished under oral orders and the amount claimed for this item is $18,820.04. After an examination by the architects of the work performed under all oral orders, they state that an allowance of $5,569.95 would be fair. In addition to these items, it appears that the contractor, at the request of the President of the City College and in pursuance of written orders issued by him, kept the College buildings swept and cleaned for a period of about one year, and the amount claimed for this work is $3,644.30, and it was agreed that an allowance of $3,644.30 should be made therefor. A balance of $1,700.44, due on original Contract No. 1, was never paid, although admittedly due, and that amount with interest thereon the architects report should be allowed, amounting in all to $1,896.19, of which amount the principal $1,700.44 is included in the allowance of $26,100. I am informed that a list of items allowed by the architects, at what they consider the fair and reasonable value of the work performed, including the amount due for sweeping and the amount due on original contract which was withheld and which should have been paid, is as follows:

---

†Should be $926.80.

Balance due on original Contract No. 1	$1,700 44
Interest due thereon	195 75
Balance due on modified and supplemental contracts	24,399 56
Balance due for sweeping and cleaning City College	3,644 30
Extra work due for partitions in sub-freshmen's room and shelving, etc.	1,015 00
Amount due for work performed on verbal orders for which a claim of $14,192.39 was made	4,544 95
Total	$35,500 00

The oral contracts or orders and the alleged contract made for the work of sweeping, which work was performed on the written order of the President of the College, were not properly made and are not a legal charge against the City. The work ordered on supplemental and modified agreements eliminating certain work called for by the original contracts and adding other work, was, in my opinion, not properly contracted for. In all these cases, however, it is admitted by the Trustees of the City College, the architects, and your office that the work and materials claimed to have been performed and furnished were performed and furnished, and that the contractors should be paid the fair and reasonable value therefor. Under the circumstances, these items would necessarily have to be paid under section 246 of the Charter. The item of $1,700.44, which is due under original Contract No. 1, was contracted for in compliance with the provisions of the Charter, and that amount, plus interest, making in all $1,896.19, should be paid as a legal claim. Under the circumstances, I advise that the entire claim be adjusted at what you believe to be the fair and reasonable value, and I understand that the contractor will accept in full payment the sum of $35,500, without interest or costs, and that your office is of the opinion that an adjustment of the entire claim at that sum would be proper, and that the City would be paying only the fair and reasnoable value for all the work performed.

Under date of June 5, 1911, a report was made upon these claims by Chandler Withington, Principal Assistant Engineer, employed in this Department, in which he made the following recommendation: "Considering the claim as presented, irrespective of the legal questions, I estimate that $35,500 would be a fair and reasonable settlement for all the claims. This figure is based on the following calculation:

Balance on Contract No. 1	$1,700 44
Balance on modification of Contracts Nos. 1 and 2.	24,399 56
Balance on sweeping	3,644 30
Extra work, partitions on sub-freshmen's building	720 00
Extra work, shelving	295 00
Extra work (verbal orders) under No. 1 and No. 2 Contracts	4,544 95
Interest on $1,700.44 from Nov. 6, 1909, to June 15, 1911	195 75
	$35,500 00

From the investigations that have been made and from the above-mentioned opinion of the Acting Corporation Counsel, it appears that the following allowances should be made to this claimant in accordance with the provisions of section 246 of the Charter:

Balance on modification of first and second contracts	$24,399 56
Balance on sweeping	3,644 30
Extra work, partitions on sub-freshmen's building	720 00
Extra work, shelving	295 00
Extra work, under first and second contracts	4,544 95
	$33,603 81

It is, therefore, respectfully recommended that the certificate prescribed in said section 246 of the Charter be issued in favor of Thomas Dwyer in the sum of $33,603.81 in full payment of the above-mentioned claims Nos. 58,614, 58,615 and 58,617.

Respectfully, JAS. L. HANCE, Auditor of Accounts.

Approved: Albert S. Hadlock, Chief, Division of Law and Adjustment.

Approved July 5, 1911: Wm. A. Prendergast, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to section 246 of the Charter, the Board of Estimate and Apportionment hereby determines that the City has received a benefit from Thomas Dwyer and is justly and equitably obligated to pay to him, without interest, the sum of $33,603.81 for labor and material furnished in and about the College of the City of New York; that the said sum shall be paid in full satisfaction of three claims which have been presented by him for $42,560.55, for $4,659.55, and for various items of interest alleged to be due for such labor and material, and shall be paid only upon the execution by said Thomas Dwyer of a full release in favor of the City in such form as shall be approved by the Corporation Counsel, and also upon the discontinuance of the action which has been instituted for a recovery of the amounts claimed, and that the Comptroller is hereby authorized to pay the said sum of $33,603.81 out of the Bond Account "College of the City of New York, New Site and Buildings."

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following report of the Comptroller certifying, pursuant to section 246 of the Charter, the claims of Andrew J. Maguire for $250, salary as Supervisor of Janitors in the Department of Education for the month of July, 1910, and of John S. Bannon, Frank T. Bergan and Thomas H. Dibbins, for salary as Assistant Supervisors of Janitors for the months of May and July, 1910, in the sum of $416.66 each:

City of New York, Department of Finance, Comptroller's Office, July 3, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—Under and pursuant to the provisions of section 246 of the Charter, I hereby certify that claims have been presented by Andrew J. Maguire, as Supervisor of Janitors in the Department of Education, for $250, alleged to be due him as salary for the month of July, 1910, and by John S. Bannon, Frank T. Bergan and Thomas H. Dibbins, as Assistant Supervisors of Janitors, for $416.66, alleged to be due to each of them as salary for the months of May and July, 1910; that such claims, according to the opinion of Acting Corporation Counsel G. L. Sterling, are illegal and invalid as against The City of New York, but, notwithstanding, in my judgment, it is equitable and proper for the City to pay said claims, inasmuch as the City has received value for the same, and that the amounts which should be paid are as follows:

Andrew J. Maguire, Supervisor of Janitors, July, 1910..................	$250 00
John S. Bannon, Assistant Supervisor of Janitors, May and July, 1910..	416 66
Frank T. Bergan, Assistant Supervisor of Janitors, May and July, 1910..	416 66
Thomas H. Dibbins, Assistant Supervisor of Janitors, May and July, 1910	416 66

Respectfully, WM. A. PRENDERGAST, Comptroller.

City of New York, Department of Finance, Comptroller's Office, July 3, 1911.

In the matter of the applications made by Andrew J. Maguire, John S. Bannon, Frank T. Bergan and Thomas H. Dibbins for the adjustment by the Board of Estimate and Apportionment, under section 246 of the Charter, of their claims for various amounts alleged to be due them as Supervisor and Assistant Supervisors of Janitors in the Department of Education.

Hon. William A. Prendergast, *Comptroller:*

Sir—Under date of May 25, 1911, a report was made by me upon these applications. In accordance with the recommendation therein contained the papers in reference thereto were transmitted to the Corporation Counsel with a rquest for his opinion as to whether or not the claims were a proper subject for certification to the Board of Estimate and Apportionment for adjustment under section 246 of the Charter.

In reply to such request, a communication dated July 1, 1911, was addressed to you by Acting Corporation Counsel G. L. Sterling, in which he stated in part: "I think that section 246 was designed to meet such cases as these under discussion. It distinctly empowers the Board of Estimate and Apportionment to authorize by a unanimous vote the payment of claims based upon justice when the City has received a benefit for which it is under no legal obligation to pay. In the cases of Messrs. Maguire, Bergan, Bannon and Dibbins we find that they were appointed to their respective positions, that they rendered services, but that they were not paid because the public authorities failed legally to fix their compensation. Such a state of facts places the City under a moral obligation to pay even if it is not legally obligated. The only claims, as I read the statute, which may not be allowed, are those which are barred by lapse of time and those which arise out of appointments violating the Civil Service Law. Since the salaries sought by the four applicants are not outlawed, and since each applicant was legally appointed, their claims are not prohibited by the two inhibitions of the statute. Indeed, the very provision which excludes from the benefits of the statute those claims based upon appointments which contravene the Civil Service Law, seems implicitly to authorize the settlement of those based upon appointments which accord with it. The constitutionality of the statute was recently upheld by the Appellate Division, Second Department, in the case of Dady vs. Prendergast, and I am, therefore, aware of no reason preventing you from certifying to the Board of Estimate and Apportionment the claims which have been filed with you for that purpose."

It would appear from the opinion of the Acting Corporation Counsel that these claimants are entitled to the equitable adjustment of their claims. It is, therefore, respectfully recommended that your certificate be issued, as prescribed in section 246 of the Charter, in favor of these claimants in the following amounts:

Andrew J. Maguire, Supervisor of Janitors, July, 1910, $250.
John S. Bannon, Assistant Supervisor of Janitors, May and July, 1910, $416.66.
Frank T. Bergan, Assistant Supervisor of Janitors, May and July, 1910, $416.66.
Thomas H. Dibbins, Assistant Supervisor of Janitors, May and July, 1910, $416.66.

Respectfully, JOS. L. HANCE, Auditor of Accounts.

Approved, July 3, 1911: ALBERT E. HADLOCK, Chief of the Division of Law and Adjustment.

Approved, July 5, 1911: WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to section 246 of the Charter, the Board of Estimate and Apportionment hereby determines that the City has received a benefit from Andrew J. Maguire, Supervisor of Janitors in the Department of Education, and from John S. Bannon, Frank T. Bergan and Thomas H. Dibbins, Assistant Supervisors of Janitors in the said Department, and is justly and equitably obligated to pay them for their services, without interest, the amounts and for the periods stated below, namely:

Andrew J. Maguire, Supervisor of Janitors; July, 1910	$250 00
John S. Bannon, Asst. Supervisor of Janitors; May and July, 1910	416 66
Frank T. Bergan, Asst. Supervisor of Janitors; May and July, 1910	416 66
Thomas H. Dibbins, Asst. Supervisor of Janitors; May and July, 1910	416 66

—that the said sums shall be paid them in full satisfaction of the claims which they have presented for such services and shall be paid only upon the execution by each of them of a full release in favor of the City in such form as shall be approved by the Corporation Counsel, and that the Comptroller is hereby authorized to pay the said sums out of the Revenue Bond Fund for Claims, Back Salaries R-C1-3.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a communication from the Flatbush Board of Trade of Brooklyn, protesting the erection in City Hall Park, Manhattan, of the proposed new Court House.

Which was referred to the Court House Board.

The Secretary presented the following communication from Mr. Reon Barnes, relative to the proposed contract with the Urban Water Supply Company, together with a report of the committee consisting of the Comptroller and the Chief Engineer of the Board, to whom this communication was referred June 29, 1911, stating that this proposed contract was reported to the Board, and was referred back to the Commissioner of Water Supply, Gas and Electricity, with a request for a specific recommendation, and that there is now nothing pending before the Board:

Reon Barnes, 45 Broadway, New York, June 26, 1911.

Hon. William J. Gaynor, *Mayor,* City of New York:

Dear Sir—I trust you received the communication which I had the honor to address to you on the 1st inst., touching somewhat upon water supply matters generally, but more particularly and urgently with respect to the offer of the Urban Water Supply Company to furnish to the City in the Borough of Queens, water at $55 per million; all as more definitely set out in the contract which was approved by the Commissioner of Water Supply and by him sent to the Board of Estimate and Apportionment for its consent, in August, 1910. Since the date last above-mentioned some suggestions have been made tending to modify by making more clear the intent of the respective parties, and have been embodied in the proposed contract.

The only remaining objection to the making of the contract (if indeed it shall be dignified as such), is that presented by the Commissioner, to wit: "The making of this contract would simply make an additional private water company for the City to purchase."

This company did not derive its corporate existence from the Department of Water Supply; on the contrary, the Woodside Water Company was incorporated under the Laws of the State of New York in 1892, and its successor, the Urban Water Supply Company, is a going concern with admittedly one of the best plants in the City.

In view of the fact that the vacation period usually availed of by the Board of Estimate and Apportionment in the past is near, and if we be not chargeable with impatience, may I respectfully bespeak your good offices in the premises to the end that the matter be disposed of at the regular meeting of the Board of Estimate and Apportionment this week? Yours truly, REON BARNES.

Board of Estimate and Apportionment, City of New York, July 3, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—At the meeting of the Board of Estimate and Apportionment held on June 29, 1911, a communication was presented from Mr. Reon Barnes requesting the Board to take action on a proposed contract with the Urban Water Supply Company for furnishing an additional supply of water in the First Ward of the Borough of Queens, which communication was referred to the Comptroller and the Chief Engineer of the Board.

Mr. Barnes in writing his letter appears to be under the impression that the proposed contract with the Urban Water Supply Company is now pending before the Board. This, however, is not the case. The same committee to which Mr. Barnes' letter was referred submitted to the Board of Estimate and Apportionment at its meeting held on April 27, 1911, a report dealing with this proposed contract, advising the Board that the contract as originally drawn had been changed in a number of particulars, and referring to a communication of the Commissioner of Water Supply, Gas and Electricity upon the general subject of the acquisition of private water companies and recommending in conclusion that the entire matter be referred back to the Commissioner of Water Supply, Gas and Electricity with the modified form of contract. The committee further recommended that the Commissioner be requested to advise the Board whether, in view of the circumstances outlined in the report, he still believed it to be advisable to enter into the proposed contract with the Urban Water Supply Company. On May 18, 1911, there was again referred to the same committee, a communication from the Commissioner of Water Supply relating to the general question of the acquisition of private water companies, and asking that the committee, to which had been referred his previous communication, be requested to submit a report in order that he might be advised as to the policy of the Board in this matter. On June 8, 1911, the committee submitted a report stating that certain information which had been requested had not yet been received, and that as soon as the necessary data should have been collected, its report would be submitted. This has now been done, and a report is to be presented to the Board on July 6 for reference to the Commissioner of Water Supply. Whether the Board agrees or disagrees with the report of the committee on the future policy of the City with respect to private water companies, the Commissioner of Water Supply will be in a position to make a final recommendation as to the contract with the Urban Water Supply Company, the form of which as modified is acceptable to your committee, but, as has been herein explained, there is nothing relating to this contract now before the Board. Respectfully,

WM. A. PRENDERGAST, Comptroller; NELSON P. LEWIS, Chief Engineer, Board of Estimate and Apportionment.

The report of the committee was approved by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a report of the Comptroller, the President of the Borough of Richmond and the Chief Engineer of the Board, to whom was referred, on April 27, 1911, a communication presented by Mr. Daniel F. Kiely offering to sell to the City the plants and franchise of the South Shore Water Works Company of Staten Island.

Which was laid over one week.

The Secretary presented a report of the Comptroller and the Chief Engineer of the Board, to whom were referred on June 15, 1911, specifications submitted by the Commissioner of Water Supply, Gas and Electricity for Flaming Arc Lamps to be installed where deemed advisable in public buildings of the City.

Which was laid over one week.

The Secretary presented a report of the Committee consisting of the Comptroller and the Chief Engineer of the Board, to whom was referred on October 21, 1910, a communication from the Commissioner of Water Supply, Gas and Electricity relative to the acquisition of private water companies, in which he recommended that a special appropriation be made to conduct an investigation to determine the value of these private companies, etc.

Which was laid over one week.

The Secretary presented the following report of Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending the establishment in the office of the President of the Borough of Manhattan, the position of Consulting Engineer of Sewers at $6,000 per annum:

(On June 29, 1911, the request of the President of the Borough of Manhattan for the establishment of the above position was referred to said Committee.)

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 6, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 29, 1911, the President of the Borough of Manhattan requested the establishment in his office, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Consulting Engineer of Sewers, at $6,000 per annum, for one incumbent. In connection therewith we report as follows:

The President states that in effecting a partial reorganization of the Bureau of Sewers, and in carrying on at the same time the survey for a proposed new system for the southern part of Manhattan, for which funds have been appropriated, he finds it necessary to reserve the present Chief Engineer of the Bureau, Horace Loomis, more particularly for the consulting side of the work.

The President also states the following:

"The establishment of the new grade of position at the same compensation now paid the Chief Engineer, will permit me to appoint a Chief Engineer, who will be able to give his entire time to the executive and outside branch of the work, and at the same time retain the services of Mr. Loomis, who, because of his experience of nearly forty years in the engineering branch of the public service, will be well nigh indispensable to the proper carrying out of the plans we have in view."

We recommend that the request be approved by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen, Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the office of the President of the Borough of Manhattan of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Consulting Engineer of Sewers	$6,000 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the College of The City of New York requesting, and report of the Comptroller recommending, the transfer of $300 from No. 1284 to No. 1283, supporting the appropriation made to said college for the year 1911:

The College of The City of New York, Office of the Board of Trustees, St. Nicholas Terrace and 139th Street, June 23, 1911.

To the Honorable Board of Estimate and Apportionment of The City of New York:

Gentlemen—Application is herewith made to your Honorable Board for the transfer of $300 from the appropriation entitled, "Repairs and Replacements by Contract or Open Order, 1284," to the appropriation, "Repairs and Replacements by Departmental Labor, 1283." This transfer is required to purchase materials for mechanics employed by the college to make repairs to the operating plant.

Yours respectfully, JAS. W. HYDE, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 23, 1911, the Secretary of the College of The City of New York requested the transfer of $300 within 1911 appropriations for the college. The debit account is No. 1284, Repairs and Replacements by Contract or Open Order, and the credit, No. 1283, Repairs and Replacements by Departmental Labor. The Budget allowance for No. 1284 is $5,850 and for No. 1283 $3,160.17. The transfer is for the purchase of materials to be used by the mechanics in the employ of the college to make repairs which would otherwise be made under contract.

I recommend that the request be granted by the adoption of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the transfer of funds appropriated to the College of The City of New York for the year 1911 as follows:

From

1284. Repairs and Replacements by Contract or Open Order	$300 00

To

1283. Repairs and Replacements by Departmental Labor	$300 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Comptroller, an issue of $1,500 special revenue bonds (subdivision 8, section 188 of the Charter), to be used by the Commissioner of Records, Kings County, for the purchase and installation of steel map and filing cases, and for making such necessary alterations in old steel cases now in said office as may be required, for the storage, care and preservation of maps and records of Kings County:

In the Board of Aldermen.

Resolved, That, in pursuance to the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of one thousand five hundred dollars ($1,500), the proceeds whereof to be used by the Commissioner of Records of the County of Kings for the purchase and installation of steel map and filing cases and for making such necessary alterations in old steel cases now in said office as may be required, for the storage, care and preservation of maps and records of Kings County.

The purchase, installation and alteration of said cases are to be made with the approval and under the supervision of the President of the Borough of Brooklyn.

Adopted by the Board of Aldermen, April 25, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor, May 9, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On April 25, 1911, the Board of Aldermen adopted the following resolution:

"Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of one thousand, five hundred dollars ($1,500), the proceeds whereof to be used by the Commissioner of Records of the County of Kings for the purchase and installation of steel map and filing cases, and for making such necessary alterations in old steel cases now in said office as may be required, for the storage, care and preservation of maps and records of Kings County. The purchase, installation and alteration of said cases are to be made with the approval and under the supervision of the President of the Borough of Brooklyn."

On June 6, 1911, the Board of Aldermen adopted the following resolution:

"Resolved, That, pursuant to the provisions of section 419 of the Charter of The City of New York, the Board of Aldermen, deeming it for the public interest, hereby authorizes and empowers the Commissioner of Records of the County of Kings to purchase, in open market, instead of by contract at public letting, for the storage, care and preservation of maps and records, five steel map and filing cases, to be installed in his office, and to make such necessary alterations in old steel cases now in said office, as may be required, at a cost not to exceed the sum of one thousand, five hundred dollars ($1,500)."

Examination by the Department of Finance shows that the following work is necessary in the office of the Commissioner of Records of the County of Kings:

Construct and install one combination metal case for old filed maps, also for maps, plans and drawings. The case to be 15 feet 3 inches long, 7 feet 8½ inches high and 2 feet 10 inches deep, with 224 pigeonholes for maps, and 56 drawers for plans, etc.

Install doors for pigeon hole compartments and locking divice for drawers.

Construct and install one combination plan and book-case, 38 inches wide, 6 feet, 8 inches high, and 21 inches deep.

The present book case to be moved to another position and fitted into place, with such alterations as are necessary.

Metal backs to be fitted to three cases already installed.

Provide means for locking four filing cases (total length about 12 feet, height about 6 feet).

Alter map tubes and drawers underneath the same by removing 143 tubes (the lower 11 rows), and four drawers underneath, and install in place thereof nine drawers, 5½ feet long, 3¼ inches high, and 26 inches deep (from front to back).

Install locking device on remaining map tubes, new drawers and drawers of case adjoining thereto on the right containing cupboards and drawers.

Alter present closets (together about 2¾ feet wide and 6 feet high), and install in place thereof, one tier of book rollers, 1½ feet wide, similar in construction and design to those now in position in the book cases adjoining; and install steel curtain in front of same, of similar construction and design as those already in position; install underneath said book roller case one drawer 1½ feet wide and 8 inches high, to conform with drawers in adjoining cases.

Construct and install in remaining space of present closets (about 14 inches in width and 6 feet in height), a closet with sheet steel door, said closet to begin at present base and to be the full height of present closets.

Construct and install one steel drawer for table of same size and similar in every way to present drawer, to be placed directly under present drawer.

Make minor adjustments to present furniture.

The $1,500 asked for is a moderate sum to allow for this work.

I recommend, therefore, the authorization of this amount, pursuant to the request of the Board of Aldermen, by the adoption of the attached resolution.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on April 25, 1911, requesting an issue of special revenue bonds in the sum of one thousand five hundred dollars ($1,500), the proceeds whereof to be used by the Commissioner of Records of the County of Kings for the purchase and installation of steel map and filing cases and for making such necessary alterations in old steel cases now in said office as may be required for the storage, care and preservation of maps and records of Kings County, the purchase, installation and alteration of said cases to be made with the approval and under the supervision of the President of the Borough of Brooklyn, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter to issue special revenue bonds of The City of New York to an amount not exceeding one thousand five hundred dollars ($1,500), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Education requesting, and report of the Comptroller, recommending, transfer of $3,158.40 within the special school fund for the year 1909, and $2,475 within the special school fund for the year 1910, the said transfers for each year representing adjustments within the total appropriations for repairs and replacements:

Resolved, That the Board of Estimate and Apportionment be, and it is hereby, respeectfully requested to approve the following transfers:

From the Special School Fund for the year 1909, and from the item contained therein, entitled "Repairs and Replacements by Contract or Open Order, General Repairs, No. 885, Borough of Brooklyn," which item is in excess of its requirements	$3,158 40
To the item also, contained within the Special School Fund for the year 1909, entitled "Repairs and Replacements by Contract or Open Order, Furniture and Repairs of, No. 890, Borough of Manhattan," which item is insufficient for its purposes	3,158 40

—and

From the Special School Fund for the year 1910, and from the items contained therein entitled as follows:

Repairs and Replacements by Contract or Open Order, Pianos and Repairs of, No. 1019, Borough of Queens	$100 00
Pianos and Repairs of, No. 1019, Borough of Queens	75 00
Furniture and Repairs of, No. 1012, Borough of The Bronx	100 00
Furniture and Repairs of, No. 1012, Borough of The Bronx	2,200 00

—which items are in excess of their requirements.

To the items also contained within the Special School Fund, for the year 1910, as follows:

Repairs and Replacements by Contract or Open Order, Pianos and Repairs of, No. 1016, Borough of Manhattan	$100 00
Pianos and Repairs of, No. 1018, Borough of Brooklyn	75 00
Furniture and Repairs of, No. 1013, Borough of Brooklyn	100 00
Electrical Installation and Repairs, No. 1028, Borough of Brooklyn	2,200 00

A true copy of resolution adopted by the Board of Education on June 14, 1911.

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 14, 1911, the Board of Education requested Special School Fund transfers, as follows:

For the year 1909—

From	
885. General Repairs, Borough of Brooklyn	$3,158 40
To	
890. Furniture and Repairs of, Borough of Manhattan	$3,158 40

For the year 1910—

From	
1019. Pianos and Repairs of, Borough of Queens	$175 00
1012. Furniture and Repairs of, Borough of The Bronx	2,300 00
	$2,475 00
To	
1016. Pianos and Repairs of, Borough of Manhattan	$100 00
1018. Pianos and Repairs of, Borough of Brooklyn	75 00
1013. Furniture and Repairs of, Borough of Brooklyn	100 00
1028. Electrical Installation and Repairs, Borough of Brooklyn	2,200 00
	$2,475 00

The proposed transfers for each year represent readjustments within the total appropriations for Repairs and Replacements, which allowances are segregated in the budget by boroughs into items for general repairs, furniture and repairs of, pianos and repairs, etc. The actual liabilities as of June 29, 1911, in the several credit accounts are stated by the Auditor of the Board of Education to be as follows:

Liabilities to be Liquidated.

890. Furniture and Repairs of, Borough of Manhattan, 1909:	
Geo. W. Benham, furniture, Public School 10	$3,289 70
1016. Pianos and Repairs of, Borough of Manhattan:	
W. W. Kimball & Co., De Witt Clinton High School	$90 00
Aeolian Company, various	12 50
	$102 50
1018. Pianos and Repairs of, Borough of Brooklyn, 1910:	
Sohmer & Co., Curtis High School	10 00
Goetz & Co., Public School 127	3 00
M. P. Moller, Teachers' Training School	27 08
Goetz & Co., various	34 50
	$74 58
1013. Furniture and Repairs of, Borough of Brooklyn, 1910:	
Chas. G. Webber, Public School 91	$11 00
Jos. Maier, Public School 16	12 75
Jos. Maier, Public School 11	3 00
Jos. Maier, Public School 41	1 00
Jos. Maier, Public School 59	8 50
L. E. Atherton, Public School 45	23 00
E. Lampert & Son, Public School 136	2 00
P. W. Taylor, Public School 78	3 00
Jos. Maier, Public School 20	1 50
P. W. Taylor, office	2 50
Z. Hermannsen, various	23 01
Richmond School Furniture Company, storehouse	9 00
	$100 26
1028. Electrical Installation and Repairs, Borough of Brooklyn, 1910:

W. R. Ostrander, shop	3 90
Sales Department, E. P. Gleason Company, Public School 140	10 00
Sales Department, E. P. Gleason Company, Public School 143	4 50
Sales Department, E. P. Gleason Company, Public School 126	6 00
Sales Department, E. P. Gleason Company, C. H. S.	9 50

The Standard Electric Time Company, E. D. H. S.	1 52
Hundh Electric Company, Public School 147	80
H. W. Johns-Manville Company, shop	1 50
Hammacher, Schlemmer & Co., various	43 66
German American Electric Company, Public School 43	4 80
Apex Electric Company, E. D. H. S.	260 00
C. M. O'Connor, Public School 45	493 70
Apex Electric Company, Public School 33	215 00
N. Y. Construction Company, shop	575 00
Apex Electric Company, office	315 00
Commercial Construction Company, Public School 149	264 00
	$2,212 38

There are ample balances in the debit accounts for the transfers.

I recommend that the request be granted by the adopttion of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the transfer of funds appropriated to the Department of Education for the year 1909, as follows:

From

885. Repairs and Replacements by Contract or Open Order, General Repairs, Borough of Brooklyn	$3,158 40

To

890. Repairs and Replacements by Contract or Open Order, Furniture and Repairs of, Borough of Manhattan	$3,158 40

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the transfer of funds appropriated to the Department of Education for the year 1910, as follows:

From

Repairs and Replacements by Contract or Open Order for 1910—

1019. Pianos and Repairs of, Borough of Queens	$175 00
1012. Furniture and Repairs of, Borough of The Bronx	2,300 00

To

Repairs and Replacements by Contract or Open Order for 1910—

1016. Pianos and Repairs of, Borough of Manhattan	$100 00
1018. Pianos and Repairs of, Borough of Brooklyn	75 00
1013. Furniture and Repairs of, Borough of Brooklyn	100 00
1028. Electrical Installation and Repairs, Borough of Brooklyn	2,200 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Education requesting, and report of the Comptroller recommending, transfer of $28.62, within the Special School Fund for 1910, from "No. 1012—Repairs and Replacements, Furniture, Borough of The Bronx," to "No. 1064—Water, Borough of Queens."

Resolved, That the Board of Estimate and Apportionment be, and it is hereby, respectfully requested to transfer the sum of twenty-eight dollars and sixty-two cents ($28.62) from the Special School Fund for the year 1910, and from the item contained therein entitled "Repairs and Replacements by Contract or Open Order, Furniture and Repairs of, No. 1012, Borough of The Bronx," which item is in excess of its requirements, to the item also contained within the Special School Fund for the year 1910, entitled "Water, No. 1064, Borough of Queens," which item is insufficient for its purposes.

A true copy of resolution, adopted by the Board of Education on June 14, 1911.
A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 14, 1911, the Board of Education requested the transfer of $28.62 within the Special School Fund for 1910, from No. 1012, Repairs and Replacements, Furniture, Borough of The Bronx, to No. 1064, Water, Borough of Queens.

The expenditures for water for public schools in Queens, during 1908 and 1909 amounted to approximately $6,200 a year. The appropriation for 1910 was $5,000, and there have been credit transfers in the sum of $1,242.79. The $28.62 is to cover bills for which no funds are available.

The balance in No. 1012 permits of the transfer.

I recommend, therefore, that the request be granted by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Board of Education for the year 1910, as follows:

From

1012. Repairs and Replacements by Contract or Open Order, Furniture and Repairs of, Borough of The Bronx	$28 62

To

Special Contract Obligations— 1064. Water, Borough of Queens	$28 62

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller,, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a report of the Select Committee, returning for filing request of the Commissioner of Parks, Boroughs of Manhattan and Richmond, for the establishment of the grade of position of Clerk at $600 per annum, as the same has been withdrawn.

Which was ordered filed, and the Secretary directed to return the communication above referred to to the Commissioner of Parks, Boroughs of Manhattan and Richmond.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Comptroller relative to, an issue of $2,000 special revenue bonds (subdivision 8, section 188 of the Charter), for the purchase of an automobile for the Chief of the Bureau of Licenses, Mayor's office:

(On June 29, 1911, the resolution of the Board of Aldermen requesting the above issue was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of two thousand dollars ($2,000), the proceeds whereof to be used by the Chief of the Bureau of Licenses, Mayor's Office, for the purpose of purchasing an automobile.

Adopted by the Board of Aldermen June 13, 1911, three fourths of all the members voting in favor thereof.

Approved by the Mayor June 26, 1911. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Esetimate and Apportionment:

Gentlemen—On June 13, 1911, the Board of Aldermen adopted a resolution requesting $2,000 in special revenue bonds, to be used by the Chief of the Bureau of Licenses, Mayor's Office, for the purchase of an automobile. The resolution was approved by the Mayor on June 26, 1911. In connection therewith I report as follows:

The Chief of the Bureau of Licenses states that an automobile is necessary for the proper transaction of the duties devolving upon him and his subordinates. He cites the fact that all public dancing halls and moving picture shows in the five Boroughs have to be inspected previous to and subsequent to the granting of licenses and that the licensed places have to be under constant supervision and inspection to prevent violation of laws and ordinances. He also states that nearly all investigations have to be made in the evening and that an automobile would expedite the business of his Bureau.

The attached resolution, if adopted, will grant the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 13, 1911, and approved by the Mayor June 26, 1911, requesting an issue of special revenue bonds in the sum of two thousand dollars ($2,000), the proceeds whereof to be used by the Chief of the Bureau of Licenses, Mayor's Office, for the purpose of purchasing an automobile, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding two thousand dollars ($2,000), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Bridges requesting, and report of the Comptroller recommending, approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($6,500) for furnishing and erecting one duplex two-stage motor-driven air compressor at Williamsburg Bridge, Borough of Brooklyn:

Department of Bridges, City of New York, 13-21 Park Row, Manhattan, New York, June 22, 1911.

Hon. WILL AM A. PRENDERGAST, *Comptroller,* City of New York:

Dear Sir—Pursuant to a resolution adopted by the Board of Estimate and Apportionment on January 5, 1911, I transmit herewith, for your examination and report to the said Board, plans, specifications and estimate of cost of the proposed contract for furnishing and erecting one duplex two-stage motor-driven air compressor at the Williamsburg Bridge, in the Borough of Brooklyn.

The estimated cost of the proposed contract is $6,500, and the location of the compressor is shown on Drawing 6842.

This compressor is needed in order to proceed with the work of the reinforcement of the main span of the Williamsburg Bridge. A contract has recently been let for the reinforcement of the end spans of the bridge, and it is desired to proceed with the work on the main spans at an early date. After the reinforcment work is completed the compressor will remain as part of the permanent equipment of the bridge.

The proposed contract is chargeable to the fund of the Department of Bridges, entitled "C-DB-42A, Williamsburg Bridge, Strengthening Structure," which fund was duly authorized by resolution of the Board of Estimate and Apportionment adopted June 3, 1910, and by resolution of the Board of Aldermen adopted June 28, 1910.

The balance remaining in this fund unencumbered on June 1, 1911, after providing for the contract for the strengthening of the end spans, bids for which were opened on June 1, 1911, was $127,172.86. Yours truly,

ARTHUR J. O'KEEFFE, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 3, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 22, 1911, the Commissioner of Bridges requested the approval of plans, specifications and estimated cost of $6,500 for furnishing and erecting one duplex, two-stage, motor-driven air compressor at the Williamsburg Bridge, in the Borough of Brooklyn.

The contract provides for the supplying, delivery and erection of one complete and successfully operating horizontal, double-acting, direct-connected, motor-driven, duplex air compressor, and the supplying and erecting of all piping, valves, fittings and hangers to connect compressor, separator and bridge pipe line in the bridge yard at Kent avenue, between South 5th and South 6th streets, Borough of Brooklyn.

The compressor is to be used in connection with the work of strengthening and reinforcing the river span of the Williamsburg Bridge. The work to be done by departtmental labor. The cost is to be charged to the Corporate Stock Fund entitled "C-DB-42A, Williamsburg Bridge, Strengthening Structure."

The specifications appear to be complete and satisfactory, and in such form as to give fair and reasonable competition. The estimated cost of $6,500 also appears to be reasonable.

I submit for adoption the attached resolution approving the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves the plans, specifications and estimate of cost, six thousand five hundred dollars ($6,500) for furnishing and erecting one duplex, two-stage, motor-driven air compressor at the Williamsburg Bridge, in the Borough of Brooklyn, under the jurisdiction of the Department of Bridges.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Bridges requesting, and report of the Comptroller recommending, approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($180,000) for constructing the westerly subway and the Bayard street retaining wall on the Manhattan plaza of the Manhattan Bridge:

Department of Bridges, City of New York, 13-21 Park Row, Manhattan, New York, June 17, 1911.

Hon. William A. Prendergast, *Comptroller,* City of New York:

Dear Sir—Pursuant to a resolution adopted by the Board of Estimate and Apportionment on January 5, 1911, I transmit herewith, for your examination and report to the said Board, plans, specifications and estimate of cost of the proposed contract for constructing the westerly subway and the Bayard street retaining wall on the Manhattan plaza of the Manhattan Bridge. The plans are shown on twelve drawings numbered 38-90 to 38-101, inclusive, and bear the general title "City of New York, Department of Bridges, Manhattan Bridge, Manhattan Plaza."

The estimated cost of the proposed contract is $180,000. The work of this proposed contract will complete the connection of the existing Canal street subway with the tracks on the bridge, and is chargeable to the funds of the Department of Bridges, entitled "C-DB-43, Manhattan Bridge, Manhattan Terminal; Subway and Surface Construction and Track Work," and "C-DB-44, Manhattan Bridge, Manhattan Terminal; Masonry, Grading, etc., at New Bayard, Canal and Forsyth Streets." The estimated amount chargeable to the first-mentioned fund is $120,000, and to the second-mentioned fund is $60,000.

These funds were duly authorized by resolutions of the Board of Estimate and Apportionment adopted June 3, 1910, and January 26, 1911, and by resolutions of the Board of Aldermen adopted July 5, 1910, and February 7, 1911. Yours truly,

ARTHUR J. O'KEEFFE, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 3, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 17, 1911, the Commissioner of Bridges requested the approval of plans, specifications and estimated cost of $180,000 for constructing the westerly subway and the Bayard street wall on the Manhattan plaza of the Manhattan Bridge.

The contract provides for the completion of the existing subway on the bridge property by building up the present retaining walls with reinforced concrete and constructing a roof of steel beams and concrete, waterproofing the sides and roof, and con structing a concrete floor; from the southerly end of the above work for a distance of about 67 feet a new subway is to be constructed with concrete floor, sides and roof of steel and concrete. From the portal of the new subway to the abutment at Division street the contract calls for the erection of two concrete reaining walls with granite coping. The laying of the track work complete from the bridge abutment to the present portal at Canal street is specified. The contract also provides for the construction of a granite-faced retaining wall, including granite stairway, from the abutment at Division street to a point near Chrystie street, and the adjacent concrete sidewalk on Bayard street.

The Manhattan plaza will probably be used for a trolley terminal, so that the Brooklyn trolley cars may cross the Manhattan Bridge, before the entire improvements are completed. No plan for this temporary service has been agreed upon, but all the work specified, which is a part of the general development of the Manhattan plaza of the Manhattan Bridge, should be completed before the plaza is used for a temporary terminal. It is proposed to pay the cost of the work out of the Corporate Stock Funds entitled "C-D B-44, Manhattan Bridge-Manhattan Terminal, Masonry, Grading, etc., at New Bayard, Canal and Forsyth Streets," and "C-D B-43, Manhattan Bridge-Manhattan Terminal, Subway and Surface Construction and Track Work."

The plans and specifications appear to be complete and satisfactory and the estimate of cost ($180,000) reasonable.

I recommend, therefore, the adoption of the attached resolution granting the request. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves the plans, specifications and estimate of cost, one hundred and eighty thousand dollars, ($180,000) for constructing the westerly subway and the Bayard street retaining wall on the Manhattan plaza of the Manhattan Bridge, under the jurisdiction of the Department of Bridges.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting an issue of $72,000 special revenue bonds (subdivision 8, section 188 of the Charter), the proceeds to be used by the Commissioner of Street Cleaning for the purpose of hiring street cleaning machines under a contract with the Emerson Contracting Company:

(On May 25, 1911, the Board adopted a resolution, on the recommendation of the Committee appointed to investigate a flushing system, recommending that the Board of Aldermen adopt a resolution requesting the Board of Estimate and Apportionment to authorize the issue of special revenue bonds for the above purpose.)

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of seventy-two thousand dollars ($72,000), the proceeds whereof to be used by the Commissioner of Street Cleaning for the purpose of hiring street cleaning machines under a contract with the Emerson Contracting Company.

Adopted by the Board of Aldermen June 20, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor July 3, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen June 20, 1911, requesting an issue of special revenue bonds of The City of New York in the sum of seventy-two thousand dollars ($72,000), the proceeds whereof to be used by the Commissioner of Street Cleaning for hiring street cleaning machines under a contract with the Emerson Contracting Company, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York, to an amount not exceeding seventy-two thousand dollars ($72,000), redeemable from the tax levy of the year succeeding the year of their issue, the proceeds whereof to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a request that the salary of the Reading Clerk of the Board be equalized with that of the Stenographer to the Board, namely, $3,500:

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment of the grade of position of Clerk in the office of the Board of Estimate and Apportionment, in addition to those already existing therein, with salary at the rate of three thousand five hundred dollars ($3,500) per annum for one incumbent.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby fixes the salary of James C. Deering, Clerk in the office of the Secretary of the Board of Estimate and Apportionment at the rate of thirty-five hundred dollars ($3,500) per annum, to take effect upon the establishment of the grade of said position as above, pursuant to resolution adopted by the Board of Estimate and Apportionment July 6, 1911.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following matters, not upon the Calendar for this day, were considered by unanimous consent:

The Comptroller presented resolutions of the Board of Aldermen requesting issues of special revenue bonds (subdivision 8, section 188 of the Charter), as follows: (1) $5,000 for payment of charges for automobile hire incurred by the Department of Taxes and Assessments; (2) $18,000 for payment of salaries of Temporary Clerks in Department of Taxes and Assessments during 1911; (3) $45,645 for the employment of an additional force and for increases in salaries of the present force of the Department of Taxes and Assessments, together with a report recommending approval of and concurrence in said resolutions, and also the approval of a salary schedule in re Item 2:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of five thousand dollars ($5,000), the proceeds whereof to be used by the Department of Taxes and Assessments for the purpose of hiring automobiles and other means of conveyance during 1911.

Adopted by the Board of Aldermen June 27, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor July 5, 1911. P. J. SCULLY, Clerk.

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of eighteen thousand dollars ($18,000), the proceeds whereof to be used by the Department of Taxes and Assessments for the purpose for hire of temporary Clerks during 1911.

Adopted by the Board of Aldermen June 27, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor July 5, 1911. P. J. SCULLY, Clerk.

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of forty-five thousand six hundred and forty-five dollars ($45,645), the proceeds whereof to be used by the Department of Taxes and Assessments for the purpose of paying increases in salaries in said Department, and further to provide for employment of thirteen additional Deputy Tax Commissioners at $2,400 each per annum.

Adopted by the Board of Aldermen June 27, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor July 5, 1911. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 6, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 27, 1911, the Board of Aldermen adopted three resolutions requesting your Board to authorize the Comptroller to issue special revenue bonds to the aggregate amount of $68,645 for the Department of Taxes and Assessments. In connection therewith, I report:

The purpose of the issues of bonds is as follows:

$18,000 for the hiring of temporary Clerks.

$5,000 for the hire of automobiles.

$45,645 to provide for additional Deputy Tax Commissioners and to further provide for increases in salaries to existing force.

In support of the request the Commissioners on June 15 stated:

"This request is made, first, to meet the extraordinary emergency presented by the probable enactment of Assembly Bill 2321, introduced by Assemblyman Shortt, heretofore passed by the Legislature and now in the hands of the Mayor, awaiting his approval. This bill provides for the payment of taxes semi-annually on the first days of May and November. It provides for the completion of the assessments and the opening of the books of Annual Record for public inspection on the first day of October instead of the second Monday of January. Should the bill be signed it will be necessary for the Tax Department to make a new assessment by October 1.

"Ordinarily the Deputies and Clerks receive their vacations in the months of July and August. During those months they perform the duty of extending the taxes. If an assessment must be made by October 1, the pressure of work upon the Deputies will be very severe, and as to clerical labor will be more than the Department, as now manned, can accomplish. Temporary Clerks must be employed to assist in the clerical labor, and for this purpose $18,000 is requested. The Charter provides that Deputy Tax Commissioners must personally visit every parcel of assessable property and make oath that they have made this personal inspection. That this may be done in the short time, it will be necessary to hire automobiles and other means of conveyance. For this purpose $5,000 is requested.

"Prior to consolidation, Assessors in the Borough of Brooklyn were paid $3,000 a year, and the Deputy Tax Commissioners in the old City of New York were paid $2,700. Since consolidation, the salaries have been reduced to a point that is entirely disproportionate to the duties of the office. Deputies have been appointed for some years at $1,800 a year, in spite of the fact that the cost of living has greatly increased. Each year the Deputies are held to a stricter accountability and the labors are increased. We believe that no Deputy should be paid less than $2,400 at the commencement of his service, and that his salary should be increased with increased efficiency and a longer term of service. Of the special revenue bond issue requested $23,295 is for the purpose of increasing the salaries of Deputy Tax Commissioners so that the lowest ordinary grade shall receive $2,400 a year, and others in proportion. The Deputy Tax Commissioners have always been required to assess a larger number of parcels and a larger territory than should be imposed on any one man. With the increase in population and consequent increase in the number of buildings and number of separately assessed parcels the duties yearly become more onerous and a larger force is a necessity. We, therefore, ask for $22,350 for the employment of thirteen additional Deputies at $2,400 a year, with a sufficient number of Clerks.

"The changes in salary proposed to be made are more fully explained and described in the application for the establishment of new grades, pursuant to section 56, now before the Board of Estimate."

It would appear that the additional force and temporary Clerks are necessary for the reasons stated by the Commissioners. The Assembly Bill referred to has been made a law.

It seems reasonable to assume that the item for automobile hire will be necessary under the circumstances.

The Comptroller has submitted to your Board a separate report with reference to the necessary modification of the schedule supporting the Budget appropriation for salaries based upon favorable action by your Board on the special revenue bond issue for $45,645 for increases and new force, in which a complete analysis is made of the changes involved.

I transmit for your consideration four resolutions: (1) Concurring with the resolution of the Board of Aldermen providing $5,000 for automobile hire; (2) $18,000 for the payment of salaries to temporary Clerks; (3) $45,645 to provide for new force and for salary increases for the last six months of 1911; (4) establishing schedule of salaries for the account providing for temporary Clerks.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 27, 1911, and approved by the Mayor July 5, 1911, requesting an issue of special revenue bonds amounting to five thousand dollars ($5,000) to provide means for the payment of charges for automobile hire incurred by the Department of Taxes and Assessments, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding five thousand dollars ($5,000), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen June 27, 1911, and approved by the Mayor July 5, 1911, requesting an issue of special revenue bonds amounting to eighteen thousand dollars ($18,000) to provide means for the payment of salaries of temporary Clerks to be employed in the Department of Taxes and Assessments during the year 1911, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding eighteen thousand dollars ($18,000), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 27, 1911, and approved by the Mayor July 5, 1911, requesting an issue of special revenue bonds amounting to forty-five thousand, six hundred and forty-five dollars ($45,645) to provide means for the employment of additional force and to further provide for increases in salaries in present force of the Department of Taxes and Assessments, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding forty-five thousand six hundred and forty-five dollars ($45,645), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the following schedule of salaries of the special revenue appropriation for the Department of Taxes and Assessments for 1911:

Department of Taxes and Assessments.

Salaries, Temporary Employees, Revenue Bond Force:

Clerks at $1,200 (120 months)	$12,000 00
Clerks at $900 (30 months)	2,250 00
Clerks at $750 (60 months)	3,750 00
	$18,000 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Comptroller presented a communication from the Public Service Commission, in the First District, submitting for approval proposed contracts for the construction of sections 6, 7, 8, 10 and 11 of the Lexington avenue subway, and requesting the Board to prescribe the limit to the amount of bonds available to meet the requirements of said contracts and to authorize their issue.

Which was referred to the Comptroller.

The Comptroller presented a communication from the Central Federated Union of Greater New York relative to the observance of the law in regard to the employment of labor on proposed subways, etc.

Which was referred to the Public Service Commission for the First District.

The Comptroller presented a communication from Coughlan & Tuttle, attorneys-at-law, representing owners of property in South Brooklyn and urging, before final arrangements are made on contracts for new subways, that work be started on Triborough system;

—and a

Petition of property owners and representatives of the most important sections of Brooklyn affected by the new Brooklyn Rapid Transit subway system protesting the Atlantic avenue route.

Which were referred to the Committee of The Whole.

The President of the Borough of Manhattan moved that when the Board adjourns, it adjourn to meet Monday, July 10, 1911, at 10.30 o'clock a. m., which motion was adopted.

On motion of the Comptroller, the Board adjourned to meet Monday, July 10, 1911, at 10.30 o'clock a. m. JOSEPH HAAG, Secretary.

BOARD OF ESTIMATE AND APPORTIONMENT

Minutes of Meeting of Board of Estimate and Apportionment, Called for Monday, July 10, 1911, at Room 16, City Hall.

FINANCIAL AND FRANCHISE MATTERS.

At the meeting of the Board held July 6, 1911, an adjournment was taken until this day.

Owing to the absence of a quorum no meeting was held.

JOSEPH HAAG, Secretary.

BOARD OF ESTIMATE AND APPORTIONMENT

Minutes of Meeting of Board of Estimate and Apportionment, Held in Room 16, City Hall, Thursday, July 13, 1911, at 10.30 a. m.

FINANCIAL AND FRANCHISE MATTERS.

The Board met in pursuance of the following call:

City of New York, Office of the Mayor, July 10, 1911.

In pursuance of the provisions of section 226 of the Greater New York Charter, the Board of Estimate and Apportionment requests the Mayor to call a meeting of said Board on Tuesday, July 13, 1911, at 10.30 o'clock a. m.

W. J. GAYNOR, Mayor; WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; ALFRED E. STEERS, President, Borough of Brooklyn; CYRUS C. MILLER, President, Borough of The Bronx; LAWRENCE GRESSER, President, Borough of Queens; GEORGE CROMWELL, President, Borough of Richmond.

Present—William J. Gaynor, Mayor; William A. Prendergast, Comptroller; John Purroy Mitchel, President, Board of Aldermen; George McAneny, President, Borough of Manhattan; Alfred E. Steers, President, Borough of Brooklyn; Cyrus C. Miller, President, Borough of The Bronx; Lawrence Gresser, President, Borough of Queens, and George Cromwell, President, Borough of Richmond.

The Mayor, Hon. William J. Gaynor, presided.

The minutes (Financial and Franchise Matters) of the meeting held June 30, 1911, were approved as printed in the City Record, July 11, 1911.

FRANCHISE MATTERS.

Rapid Transit Railway. Battery, East River, Atlantic Avenue Route.

Consideration of the communication dated June 30, 1911, from the Public Service Commission for the First District, transmitting resolutions adopted by said Commission as to route and general plan of construction for a proposed rapid transit railway, beginning at a point under Battery Park, Borough of Manhattan, and extending under the park and ferry or waterfront property to the East River; thence under the East River to a point at or near Atlantic avenue, Borough of Brooklyn, extended with the pier-head line; thence under and along Atlantic avenue to a point in said avenue, about 150 feet east of the easterly line of Court street, Borough of Brooklyn, where a connection can be made with section 11-D of the Fourth Avenue Subway; and requesting the approval and consent of this Board thereto.

This communication was presented to the Board at the meeting of July 6, 1911, and by resolution duly adopted, this day was fixed as the date for consideration and the communication referred to the Franchise Committee.

An affidavit of publication was received from the City Record.

Hon. Edward M. Grout appeared on behalf of Abraham & Straus and other property owners and protested against the proposed railway on Atlantic avenue.

Hon. Milo R. Maltbie, Commissioner, Public Service Commission for the First District, appeared in favor.

No one else desiring to be heard, the Chair declared the consideration concluded.

The matter was then laid over until the next meeting of the Board (Monday, July 17, 1911).

FINANCIAL MATTERS.

The following transfers of appropriations were made upon the recommendation of the Comptroller:

$62,500 within the appropriation made to the Department of Water Supply, Gas and Electricity for the year 1911.

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13 to 21 Park Row, City of New York, June 13, 1911.

The Honorable, the Board of Estimate and Apportionment, City of New York:

Gentlemen—In order to meet the requirements of this Department, I would respectfully request the transfer to and from the following funds of the Appropriation Accounts authorized for this Department for the year 1911:

From

Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Lamps and Lighting—
643. Lighting Public Buildings, 1911.................................. $62,500 00

To

Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Lamps and Lighting—
642. Street and Park Lighting, 1911.................................. $42,500 00

To

Borough of Brooklyn, Bureau of Lamps and Lighting—
664. Street and Park Lighting, 1911.................................. $5,000 00

To

Borough of Queens, Bureau of Lamps and Lighting—
683. Street and Park Lighting, 1911.................................. $9,000 00

To

Borough of Queens, Bureau of Lamps and Lighting—
676. Repairs and Replacements by Contract or Open Order, 1911........ $6,000 00

Yours very truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 13, 1911, the Commissioner of Water Supply, Gas and Electricity requested transfers aggregating $62,500 within the appropriations made for the several Bureaus of Lamps and Lighting in his Department, for the year 1911. In connection therewith I report as follows:

The only debit transfer is from No. 643—Lighting Public Buildings, Boroughs of Manhattan and The Bronx. The transfer of the $62,500 from this account is possible for the reason that the 1911 contract for lighting public buildings shows a saving of more than $70,000 below the cost of similar service at the 1910 rates.

The proposed credit transfers, and the reason therefor, are as follows:

To No. 642. Street and Park Lighting—Boroughs of Manhattan and The Bronx—$42,500. Required for additional street lighting, $25,000, and for the purchase of new lamp posts, $17,500.

To No. 664. Street and Park Lighting—Borough of Brooklyn—$5,000. Required for additional lighting of Ocean Parkway and other streets.

To No. 683. Street and Park Lighting—Borough of Queens—$9,000. Required for necessary additional lighting.

To No. 676. Repairs and Replacements by Contract or Open Order—Borough of Queens—$6,000. Required for necessary repairs to and replacement of lamps in that Borough.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Department of Water Supply, Gas and Electricity for the year 1911, as follows:

From

Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Lamps and Lighting—
643. Lighting Public Buildings.. $62,500 00

To

Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Lamps and Lighting—
642. Street and Park Lighting.. $42,500 00
Heat, Light and Power, Borough of Brooklyn, Bureau of Lamps and Lighting—
664. Street and Park Lighting.. $5,000 00
Heat, Light and Power, Borough of Queens, Bureau of Lamps and Lighting—
676. Repairs and Replacements by Contract or Open Order........... $6,000 00
Heat, Light and Power, Borough of Queens, Bureau of Lamps and Lighting—
683. Street and Park Lighting.. $9,000 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

$300 within the appropriation made to the Department of Parks, The Bronx, for the year 1911.

The City of New York, Department of Parks, Office of Commissioner for the Borough of The Bronx, Zbrowski Mansion, Claremont Park, June 26, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, and Chairman of the Board of Estimate and Apportionment,* City Hall, New York City:

Sir—The unencumbered balance, Administration Contingencies, 1911, Code No. 1128, on this date is $124.55.

A special payroll for the services of a Temporary Stenographer for the month of June ($87.50) is to be deducted from this amount, leaving a net balance of $37.05, which amount is insufficient for the balance of this year. Therefore, application is respectfully made for a transfer of three hundred dollars ($300) from the appropriation for the year 1911, entitled 1136, Maintenance, Parks and Boulevards, General Supplies, 1911, to the appropriation entitled 1128, Administration Contingencies, 1911.

Submitting this application for the approval of your honorable Board, I remain,

Respectfully,

T. J. HIGGINS, Commissioner of Parks, Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 26, 1911, the Commissioner of Parks, Borough of The Bronx, requested a transfer of $300 within appropriation to the Department for the year 1911. In connection therewith I report as follows:

The proposed transfer is from Maintenance, Parks and Boulevards, No. 1136, General Supplies, to Administration, No. 1128, Contingencies. The appropriation for No. 1128 was $1,000. On June 26, 1911, the balance in the account was $124.55. A payroll for a temporary Stenographer for June, amounting to $87.50, is to be deducted, leaving a net balance of $37.05. The Commissioner states that the $1,000 has been expended largely in purchases made necessary by the installation of a new system in the office.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the transfer of funds appropriated to the Department of Parks, Borough of The Bronx, for the year 1911, as follows:

Department of Parks, Bronx.

From

Maintenance, Parks and Boulevards—
1136. General Supplies $300 00

To

Administration—
1128. Contingencies $300 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

$1,207.22 within the appropriation made to the Department of Education for the year 1910.

$844.05 within the appropriation made to the Department of Education for the year 1909.

Board of Education, Park avenue and 59th street, New York, June 29, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—I have the honor to transmit herewith certified copies of resolutions adopted by the Board of Education at a meeting held on the 28th inst., as follows:

1. Relative to the transfer of $844.05 within the Special School Fund for the year 1909, and the transfer of $1,207.22 within the Special School Fund for the year 1910.
2. Relative to the transfer of $10 within the Special School Fund for the year 1911.

Respectfully yours, A. E. PALMER, Secretary, Board of Education.

Resolved, That the Board of Estimate and Apportionment be, and it is hereby respectfully requested to approve the following transfers:

From the Special School Fund for the year 1909 and from the item contained therein entitled "General Supplies, No. 881, for Evening Lectures, Board of Education," which item is in excess of its requirements $844.05.

To the item also contained within the Special School Fund for the year 1909, entitled "Water, No. 927, Borough of Brooklyn," which item is insufficient for its purposes $844.05, and

From the Special School Fund for the year 1910 and from the item contained therein entitled "General Supplies, No. 1003, Evening Lectures, Board of Education," which item is in excess of its requirements $1,207.22.

To the item also contained within the Special School Fund for the year 1910 entitled "Water, No. 1063, Borough of Brooklyn," which item is insufficient for its purposes, $1,207.22.

A true copy of resolution adopted by the Board of Education June 28, 1911.

A. E. PALMER, Secretary, Board of Education.

The City of New York, Department of Finance, Comptroller's Office, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 29, 1911, the Board of Education requested transfers of $844.05 and $1,207.22, respectively, within the Special School Fund appropriations for the years 1909 and 1910, for the purpose of liquidating claims of the German American Improvement Company for water supplied to Public School 149, Sutter avenue, Vermont and Wyona streets, Borough of Brooklyn. In connection therewith I report as follows:

This company owns the water mains which supply the school. The water consumed in the building is metered, the charges therefor aggregating $1,377.11 for 1909 and $1,407.22 for 1910. Owing to the meters being out of order, there was considerable delay in adjusting the claims, which accounts for their not having been vouchered at an earlier date.

The budget allowance for Water, Borough of Brooklyn, for 1909 (No. 927), was $200. There was a credit transfer of $333.06, and the total amount of $533.06 was applied to the claim of the German American Improvement Company, amounting to $1,377.11 for the year. It is proposed to transfer the $844.05 from the allowance for General Supplies, Evening Lectures (No. 881), to cover the remaining liability.

The charge for water for 1910 aggregates $1,407.22. The budget allowance of $200 is available. It is proposed to cover the remaining $1,207.22 by transfer from No. 1003, General Supplies, Evening Lectures, 1910.

Existing balances permit of the transfers.

I recommend that the request be granted by the adoption of the attached resolutions.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of Section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves transfers of funds appropriated to the Department of Education for the year 1910, as follows:

From

Special School Fund—

1003. General Supplies, Evening Lectures	$1,207 22

To

Special School Fund—

1063. Water, Borough of Brooklyn	$1,207 22

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves transfer of funds appropriated to the Department of Education for the year 1909, as follows:

From

Special School Fund—

881. General Supplies, Evening Lectures	$844 05

To

Special School Fund—

927. Water, Borough of Brooklyn	$844 05

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens, and Richmond—16.

$4,250 within the appropriation made to the Department of Water Supply, Gas and Electricity for the year 1911.

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, June 20, 1911.

The Honorable, the Board of Estimate and Apportionment, City of New York:

Gentlemen—In order to meet the requirements of this Department, I would respectfully request the transfer to and from of the following funds of the Appropriation Accounts authorized for this Department for the year 1911.

From

643. Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Lamps and Lighting, Lighting Public Buildings	$1,750 00
665. Heat, Light and Power, Borough of Brooklyn, Bureau of Lamps and Lighting, Lighting Public Buildings	2,500 00

To

633. Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Lamps and Lighting, General Supplies	$400 00
635. Heat, Light and Power, Boroughs of Manhattan and The Bronx, Apparatus, Machinery, Vehicles, Harness, etc., including Care and Storage	700 00
636. Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Lamps and Lighting, Purchase of Furniture and Fittings	700 00
648. Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Electrical Inspection, General Supplies	200 00
649. Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Electrical Inspection, Purchase of Furniture and Fittings	450 00
652. Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Electrical Inspection, Contingencies	800 00

662. Heat, Light and Power, Borough of Brooklyn, Bureau of Lamps and Lighting, Contingencies	300 00
673. Heat, Light and Power, Borough of Brooklyn, Bureau of Electrical Inspection, Contingencies	350 00
681. Heat, Light and Power, Borough of Queens, Bureau of Lamps and Lighting, Contingencies	350 00

Yours very truly, HENRY S. THOMPSON, Commissioner.

City of New York, Department of Finance, Comptroller's Office, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Commssioner of Water Supply, Gas and Electricity requested transfers aggregating $4,250 within the appropriations to the Bureau of Lamps and Lighting and Electrical Inspection in his Department for the year 1911. In connection therewith I report as follows:

The debit transfers are for $1,750 from No. 643, Lighting Public Buildings, Manhattan and The Bronx, and $2,500 from No. 665, Lighting Public Buildings, Brooklyn. These transfers are possible for the reason that certain lighting contracts for 1911 have been made at a lower unit rate than was paid by the City in 1910.

The credit transfers are for nine accounts, in amounts from $200 to $800. One item is for $700 to the Bureau of Lamps and Lighting, Manhattan and The Bronx, No. 635, Apparatus, Machinery—Vehicles, Harness, etc., for the purchase of electrical apparatus for use in inspecting trolley and street lighting systems. The balance available for this purpose is stated to be $217.05. The estimated cost of the apparatus is $840, for one calibrating set at $250; four Bristol meters, at $60 each, and ten current transformers, at $35 each.

It is also proposed to transfer $700 to No. 636, Purchase of Furniture and Fittings, for furniture for the several divisions of the Bureau. The request is based on the following estimate:

1 drawing table	$31 80
2 flat top desks	38 00
1 catalogue case	25 00
1 table	19 00
3 revolving chairs	29 75
1 typewriter's desk	25 00
1 typewriter's chair	7 00
1 desk	20 00
1 chair	6 00
6 vertical files	140 00
3 bookcases	150 00
Filing cases	85 00
Steel lockers	115 00
	$691 55

The transfers to the other accounts are to replenish appropriations which have been found to be insufficient for ice, rubber stamps, carfares and other contingencies, and general supplies.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves transfers of funds appropriated to the Department of Water Supply, Gas and Electricity, for the year 1911, as follows:

From

632. Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Lamps and Lighting, Lighting Public Buildings	$1,750 00
665. Heat, Light and Power, Borough of Brooklyn, Bureau of Lamps and Lighting, Lighting Public Buildings	2,500 00

To

633. Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Lamps and Lighting, General Supplies	$400 00
635. Heat, Light and Power, Boroughs of Manhattan and The Bronx, Apparatus—Machinery, Vehicles, Harness, etc., including Care and Storage	700 00

636. Heat, Light and Power, Boroughs of Manhattan and The Bronx. Bureau of Lamps and Lighting, Purchase of Furniture and Fittings	700 00
648. Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Electrical Inspection, General Supplies	200 00
649. Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Electrical Inspection, Purchase of Furniture and Fittings	450 00
652. Heat, Light and Power, Boroughs of Manhattan and The Bronx, Bureau of Electrical Inspection, Contingencies	800 00
662. Heat, Light and Power, Borough of Brooklyn, Bureau of Lamps and Lighting, Contingencies	300 00
673. Heat, Light and Power, Borough of Brooklyn, Bureau of Electrical Inspection, Contingencies	350 00
681. Heat, Light and Power, Borough of Queens, Bureau of Lamps and Lighting, Contingencies	350 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

$400 within the appropriation made to the Fire Department for the year 1911.

Fire Department of The City of New York, Office of the Commissioner, New York, June 29, 1911.

Hon. William J. Gaynor, *Mayor, and Chairman, Board of Estimate and Apportionment:*

Sir—I have the honor to request that the Board of Estimate and Apportionment authorize the following transfer from appropriation for the Purchase of Horses, made to this Department for the current year.

This money will not be required for the purchase of horses.

From

Account No. 992, Purchase of Horses	$400 00

To

Account No. 995, Telephone Service	$400 00

This transfer is necessary owing to the reason that the contracts cover a greater amount than was allowed by the Board of Estimate in the annual Budget.

Respectfully, JOS. JOHNSON, Fire Commissioner.

City of New York, Department of Finance, Comptroller's Office, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 29, 1911, the Commissioner of the Fire Department requested the transfer of $400 within the appropriations to the Department for the year 1911. In connection therewith I report as follows:

The transfer is from No. 992, Purchase of Horses, The Bronx, to No. 995, Telephone Service, The Bronx.

The appropriations for No. 992 was $4,000, and no liabilities have been incurred. The appropriation for No. 995 was $2,000. Contracts for telephone service in The Bronx with the New York Telephone Company calling for an expenditure of $2,323.87, cannot be executed because of inadequate appropriation.

I recommend that the request be approved by the adoption of the attached resolution.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves transfer of funds appropriated to the Fire Department for the year 1911, as follows:

From

Fire Department, Administration, Borough of The Bronx—

992. Purchase of Horses	$400 00

To

995. Telephone Service	$400 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Chief of the Bureau of Licenses, Mayor's Office, relative to the establishment of the position of Automobile Engineman for said Bureau:

Mayor's Office, Bureau of Licenses, City Hall, New York, July 7, 1911.

Board of Estimate and Apportionment, 277 Broadway, City:

Dear Sirs—I have your letter of July 3, returning my application of June 29 for the establishment of position of Chauffeur for this Bureau.

Inasmuch as this Department has just been given an automobile, it seems to me that an exception might be made in the case of this application and that the position of Chauffeur ought to be created, otherwise we will be in the position of having an automobile without any regular Chauffeur.

Respectfully, JAMES G. WALLACE, Jr., Chief of Bureau.

The following resolution was offered:

Resolved, That, in accordance with the provisions of section 56 of the Greater New York Charter, the Board of Estimate and Apportionment hereby recommends to the Board of Aldermen the establishment of the following position, in the Bureau of Licenses, Mayor's office:

Title.	Rate Per Annum.	Number of Incumbents.
Automobile Engineman................................	$1,200 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

Consideration of the communication from the Corporation Counsel, in response to resolution adopted by the Board on April 6, 1911, requesting that information be furnished the Board in regard to the present status of the suit started by The City of New York against the New York Central and Hudson River Railroad Company for $231,750, with interest, claimed to be due for the past use and occupation of certain lands and lands under water between 60th and 72d streets, west of 11th avenue, Borough of Manhattan, was laid over.

The Secretary presented a communication from the Secretary of the 11th Avenue Track Removal Association on the subject.

(At the meeting held June 15, 1911, the Corporation Counsel was requested to advise the Board by its next meeting, June 22, 1911, exactly what rights are left the City as the result of the decision of the Court of Appeals in the injunction suit brought by the Railroad Company to restrain the City from interfering with its tracks, etc., and what courses are left open to it, if any.)

(On June 22, 1911, the above matter was laid over for one week at the request of the Corporation Counsel.)

(On June 29, and again on July 6, 1911, the matter was laid over for one week.)

The Secretary presented a communication from the President of the Borough of The Bronx, submitting resolution to rescind the action of the Board on July 6, 1911, in recommending the establishment in the office of the President of the Borough of Brooklyn of the grade of position of Inspector of Regulating, Grading and Paving at $1,800 per annum for an unlimited number of incumbents.

Which was referred to the President of the Borough of The Bronx and the President of the Borough of Brooklyn, and the resolution adopted July 6, 1911, referred to therein, was withdrawn from the consideration of the Board of Aldermen.

The Secretary presented communications as follows:

From the President of the Borough of Richmond, rescinding request presented to the Board at the meeting of February 9, 1911, and referred to the Corporate Stock

Budget Committee, for the issue of $1,500 corporate stock to provide for the purchase of an easement in land traversed by the sewer from the Sea View Hospital, and that the Board now request the Corporation Counsel to proceed with the application for the appointment of Commissioners of Estimate and Assessment for the condemning of this easement;

From the Commissioner of Street Cleaning, requesting an issue of $43,500 corporate stock (section 546 of the Charter) for the purpose of constructing a storehouse under the Williamsburg Bridge in Manhattan to serve as the office of the Property Clerk of the Department, and to pave the yard and build a wall around said property;

(2) From Reese D. Alsop (member of the Brooklyn Committee of Public Health, Morris Douw Ferris and John W. Crandall, and from Frederick W. Starr—urging appropriations to the Departments of Health and Public Charities for additional hospital facilities for tuberculosis patients.

Which were referred to the Corporate Stock Budget Committee, consisting of the Comptroller, the President of the Board of Aldermen and the President of the Borough of Manhattan.

The Secretary presented the following communication from the President of the Borough of Richmond, submitting the following resolution for the consideration of the Board:

"Resolved, That the Comptroller be authorized during the months of July, August and September, 1911, to pass finally upon contract plans for work to be carried out with the proceeds of corporate stock issues, rather than wait for final authorization by the Board of Estimate and Apportionment on report from the Comptroller."

The City of New York, Office of the President of the Borough of Richmond, Borough Hall, New Brighton, New York City, July 6, 1911.

Board of Estimate and Apportionment, 277 Broadway, N. Y. City:

Gentlemen—I beg to submit the following proposed resolution for consideration at the next meeting of the Board of Estimate and Apportionment, to be held July 13, 1911:

Resolved, That the Comptroller be authorized during the months of July, August and September, 1911, to pass finally upon contract plans for work to be carried out with the proceeds of corporate stock issues, rather than wait for final authorization by the Board of Estimate and Apportionment on report from the Comptroller.

Yours very truly, GEORGE CROMWELL, President of the Borough.

At the suggestion of the Comptroller, the proposed resolution was modified by striking therefrom the word "July" and the following resolution was offered:

Resolved, That the Comptroller be authorized during the months of August and September, 1911, to pass finally upon contract plans for work to be carried out with the proceeds of corporate stock issue, rather than wait for final authorization by the Board of Estimate and Apportionment on report from the Comptroller.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a communication from the Commissioner of Bridges, submitting for consideration and action by the Board, pursuant to resolution adopted June 15, 1911, bid of the Otis Elevator Company for $582,000 for furnishing and installing elevators in the Municipal Building.

The communication and bid were returned to the Commissioner of Bridges for readvertising.

The Secretary presented a communication from Henry S. Wood relative to his proposition for building new subways.

Which was referred to the Committee of the Whole.

The Secretary presented the following communication from the Comptroller, requesting that the salary schedules supporting the appropriation made in the Budget for the year 1911, for the Department of Finance, be modified in order to provide for the appointment of an additional Examiner at $1,200 per annum, of a Law Clerk at $1,200 per annum, and that the provision for a Clerk at $2,250 per annum in the schedule of Revenue, Taxes, Assessments and Arrears, Miscellaneous, Account No. 32, authorized by the Board on June 29, 1911, be made to take effect as of February 15, 1911.

City of New York, Department of Finance, Comptroller's Office, July 10, 1911.

The Honorable Board of Estimate and Apportionment:

Gentlemen—Request is hereby made that the Budget schedule lines supporting the salaries' appropriations, as made to the Department of Finance for the year 1911, be modified in order to provide for the following changes:

First—For the appointment of an additional Examiner in the Law and Adjustment Division, at $1,200 per annum.

Second—For the employment of an additional Law Clerk at $1,200 per annum, in the Law and Adjustment Division.

Third—To provide that the provision for a Clerk at $2,250 per annum in the schedule of Revenue, Taxes, Assessments and Arrears, Miscellaneous, Account No. 32, as authorized by Board of Estimate and Apportionment resolution dated June 29, 1911, be made to take effect as of February 15, 1911.

This is in accordance with my request of June 17, 1911, but through inadvertance the date—February 15, 1911—was omitted from the resolution.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the following modifications of the schedules of salaries supporting the appropriation made to the Department of Finance for the year 1911, entitled and as follows:

Executive Division—

25. Salaries:

Deputy Comptrollers, 2 at $7,500	$15,000 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented reports, as follows:

Report of the Comptroller, the President of the Borough of Richmond and the Chief Engineer of the Board, to whom was referred, on April 27, 1911, a communication presented by Mr. Daniel F. Kiely offering to sell to the City the plants and franchise of the South Shore Water Works Company of Staten Island;

(On July 6, 1911, the above matter was laid over for one week.)

Report of the Comptroller and the Chief Engineer of the Board, to whom were referred on June 15, 1911, specifications submitted by the Commissioner of Water Supply, Gas and Electricity for flaming arc lamps to be installed where deemed advisable in public buildings of the City;

(On July 6, 1911, the above matter was laid over for one week.)

Report of the Committee, consisting of the Comptroller and the Chief Engineer of the Board, to whom was referred on October 21, 1910, a communication from the Commissioner of Water Supply, Gas and Electricity relative to the acquisition of private water companies, in which he recommended that a special appropriation be made to conduct an investigation to determine the value of these private companies, etc.

(On July 6, 1911, the above matter was laid over for one week.)

Which were laid over one week.

The Secretary presented the following communication from the Commissioner of Street Cleaning requesting the revision of the schedules of salaries and wages for the year 1911, necessitating the transfer of $2,800, together with a report of the Comptroller recommending that said request be disapproved, as the proposed transfer is from Wages to Salaries, which is contrary to the resolutions governing the 1911 Budget:

Department of Street Cleaning of The City of New York, 13-21 Park Row, New York, June 19, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment,* The City of New York:

Sir—I have to request that a further revision of schedule and transfer within the appropriation for 1911 amounting to the sum of twenty-eight hundred dollars ($2,800) be allowed this Department for the year 1911, as follows:

From

Administration, Borough of Manhattan, Division of Sweeping—	
889. Wages, Reglar Employees	$1,400 00
Administration, Borough of Manhattan, Division of Final Disposition—	
894. Wages, Regular Employees	700 00
Administration, Borough of Brooklyn, Division of Sweeping—	
915. Wages, Regular Employees	700 00
	$2,800 00

To

General Administration, Office of the Commissioner—	
861. Salaries	$700 00
Administration, Borough of Manhattan, Office of the Deputy Commissioner—	
884. Salaries	700 00
Administration, Borough of Brooklyn, Office of the Deputy Commismisioner—	
910. Salaries	700 00
Administration, Borough of The Bronx, Office of the Deputy Commissioner—	
935. Salaries	700 00
	$2,800 00

The reason for the above transfers is to enable me to employ four Chauffeurs to supplement the regular force, as the adoption of the night system of removing ashes and garbage requires extra supervision on the part of the administrative officers and it has become necessary to make additional use of the automobile service day and night. Respectfully, WM. H. EDWARDS, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 19, 1911, the Commissioner of Street Cleaning requested a revision of schedules of salaries and wages, necessitating a transfer of $2,800, within appropriations to this Department for the year 1911. In connection therewith I report as follows:

It is proposed to transfer the $2,800 from Schedules Nos. 889, 894 and 915, sup- 19, 1911, for the revision of schedules of Salaries and Wages Nos. 889, 894, 915, 861, 884, 910 and 935, supporting appropriations for salaries.

The proposed transfer from wages to salaries is contrary to the resolutions governing the 1911 Budget.

I recommend, therefore, that the request be not approved. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the request of the Commissioner of Street Cleaning dated June 19, 1911, for the revision of schedules of Salaries and Wages Nos. 889, 894, 915, 861, 884, 910 and 935 for the year 1911, involving the transfer of twenty-eight hundred dollars ($2,800) within said accounts, be and the same is hereby disapproved.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The matter was ordered filed and the Secretary was directed to transmit a copy of the report of the Comptroller to the Commissioner of Street Cleaning.

The Secretary presented the following report of the Comptroller, recommending the adoption of a resolution making effective as of January 1, 1911, the modification of three wage schedules, Nos. 1667, 1692 and 1703, for temporary employees in the office of the President of the Borough of Manhattan, instead of June 12, 1911, as per resolution adopted by the Board on June 15, 1911:

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 15, 1911, the Board of Estimate and Apportionment approved modification of three wage schedules for temporary employees, in the office of the President of the Borough of Manhattan. The revision was made effective as of June 12, 1911. The change was for payment of additional amounts due Mechanics and Laborers since January 1, 1911, for working seven days a week instead of the six days provided for in the schedule.

I recommend the adoption of the attached resolution making the revision effective as of January 1. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Office of the President of the Borough of Manhattan, for the year 1911, to take effect as of January 1, 1911, as follows:

President of the Borough of Manhattan.

	$20,760 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Acting President of the Borough of Brooklyn requesting, and report of Comptroller relative to the modification of Salary Schedule No. 1769, supporting the appropriation made in the Budget for the year 1911 for the office of the President of the Borough of Brooklyn, providing for the promotion of a Messenger at $1,050 per annum to a Clerkship at $1,200 per annum;

The City of New York, Office of the President of the Borough of Brooklyn, Brooklyn, June 22, 1911.

Hon. William A. Prendergast, *Comptroller:*

Dear Sir—I respectfully request that you recommend to the Board of Estimate and Apportionment the adoption of a resolution modifying salary schedule No. 1769, Bureau of Highways, as follows:

Eliminate line 1, "1 Messenger at $1,050," and substitute therefor "1 Clerk at $1,200."

This request is made for the purpose of promoting Percival Purcell at present employed as Messenger to the position of Clerk, in our Bureau of Highways.

I would thank you to give this matter early consideration.

Yours very truly, L. H. POUNDS, Acting Borough President.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 22, 1911, the Acting President of the Borough of Brooklyn requested modification of the salary schedule for the Bureau of Highways, Administration, No. 1769, in his office for the year 1911. In connection therewith I report as follows:

The request is for the promotion of Percival Purcell from the position of Messenger at $1,050 per annum to Clerk at $1,200. Mr. Purcell was appointed on May 29, 1906, as Automobile Engineman at $3 a day. On January 27, 1909, he was promoted to Messenger at the present rate. The $150 necessary for the increase is to be transferred from an unassigned balance.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
1769.	Clerk, at $1,200	......	$1,200 00	......	$600 00
	Messenger, $1,050	$1,050 00	......	$525 00	......
	Unassigned balance	150 00	......	75 00	......
		$1,200 00	$1,200 00	$600 00	$600 00

The attached resolution, if adopted, will grant request. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the office of the President of the Borough of Brooklyn, to take effect as of July 1, 1911, as follows:

Bureau of Highways, Administration—

1769. Salaries:

Superintendent	$5,000 00
Chief Clerk	3,000 00
Supervisor of Complaints	2,550 00
Clerks, 3 at $2,100	6,300 00
Clerk	1,800 00
Clerk	1,500 00
Clerk	1,200 00

Clerk	900 00
Cashier	1,200 00
Stenographer and Typewriter	1,200 00
Stenographer and Typewriter	1,050 00
Automobile Engineman	1,200 00
Unassigned balance	45 00
	$26,945 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the President of the Borough of Brooklyn requesting, and report of the Comptroller relative to, the modification of salary schedule No. 1765, supporting the appropriation made in the Budget for the year 1911 for the office of said Borough President, providing for a Consulting Engineer at $7,200 per annum and for the increase in salary of the Secretary to the Commissioner of Public Works from $3,000 to $3,300, and of the Confidential Stenographer to the President from $1,500 to $1,800 per annum:

June 28, 1911.

Hon. William A. Prendergast, *Comptroller,* City of New York:

Dear Sir—I respectfully request that you prepare a resolution for adoption by the Board of Estimate and Apportionment modifying salary schedule No. 1765, General Administration, President of the Borough, as per schedule attached.

This modification is for the purpose of changing the salaries of the Consulting Engineer, Secretary to Commissioner of Public Works and Confidential Stenographer in accordance with grade recently established, also provides for the increase of 1 Clerk from $1,800 to $1,950.

I would further request that this matter be given early consideration, changes to date from July 1, 1911. Yours very truly,

ALFRED E. STEERS, President, Borough of Brooklyn.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 6, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a request of the President of the Borough of Brooklyn, under date of June 28, 1911, for modification of the salary schedule for General Administration in his office for 1911, I report as follows:

The request provides for the salary of George W. Tillson, the new Consulting Engineer, at $7,200 per annum, instead of the $8,000 paid the former incumbent. It is also proposed to increase James M. Power, Secretary to the Commissioner of Public Works, from $3,000 to $3,300; Harry Ball, Confidential Stenographer to the President, from $1,500 to $1,800, and William Rutter, Clerk, from $1,800 to $1,950 per annum. The $50 balance between these increases and the $800 decrease on the salary of the Consulting Engineer is to be added to an unassigned balance.

The grades of Consulting Engineer, Secretary to the Commissioner of Public Works and Confidential Stenographer, for the proposed rates were approved for establishment by the Board of Estimate and Apportionment on June 13, 1911, and the rates were fixed by the Board of Aldermen on June 20 and 27, 1911. The establishment was for the incumbents mentioned.

It does not appear from an examination of the records in the Department of Finance that the grade of Clerk at $1,950 per annum has been established, pursuant to the provisions of section 56 of the Charter. Pending establishment, therefore, it is not possible to grant this item in the request.

The following schedule shows the recommended changes in detail:

		Schedule Transfer		Cash Transfer.	
No.	Schedule Line.	Decrease.	Increase.	Decrease.	Increase.
1765.	Consulting Engineer, 1, at $8,000	$8,000 00	....	$4,000 00	....
	Consulting Engineer, at $7,200	....	$7,200 00	....	$3,600 00

No.	Schedule Line.	Schedule Transfer. Decrease.	Schedule Transfer. Increase.	Cash Transfer. Decrease.	Cash Transfer. Increase.
	Secretary to Commissioner of Public Works, 1 at $3,000..	3,000 00	......	1,500 00	......
	Secretary to Commissioner of Public Works, at $3,300....	....	3,300 00	....	1,650 00
	Stenographers and Typewriters, 5 at $1,500.........	1,500 00	....	750 00	....
	Confidential Stenographer, at $1,800	....	1,800 00	....	900 00
	Balance unassigned	....	200 00	....	100 00
		$12,500 00	$12,500 00	$6,250 00	$6,250 00

The attached resolution, if adopted, will grant the request, with the exception of the Clerk at $1,950 per annum. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the office of the President of the Borough of Brooklyn for the year 1911, as follows:

President, Borough of Brooklyn.

General Administration—

1765. Salaries:

Borough President	$7,500 00
Commissioner of Public Works	6,000 00
Assistant Commissioner of Public Works	5,000 00
Consulting Engineer	7,200 00
Assistant Engineer	3,000 00
Secretary of the Borough	3,500 00
Secretary to the President	4,000 00
Secretary to the Commissioner	3,300 00
Chief Clerk	3,000 00
Bookkeeper	3,000 00
Bookkeeper	1,800 00
Executive Clerk	2,400 00
Confidential Inspector	2,100 00
Stenographer to Local Boards	2,100 00
Stenographers and Typewriters, 4 at $1,500	6,000 00
Confidential Stenographer	1,800 00
Stenographer and Typewriter	1,200 00
Clerks, 2 at $2,100	4,200 00
Clerks, 3 at $1,800	5,400 00
Clerk	1,650 00
Clerks, 2 at $1,200	2,400 00
Clerks, 2 at $1,500	3,000 00
Clerk	1,050 00
Clerks, 2 at $750	1,500 00
Clerk	600 00
Clerk	540 00
Automobile Engineman	1,500 00
Automobile Engineman	1,200 00
Messenger	1,050 00
Unassigned balance	725 00
	$87,715 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Bridges requesting, and report of the Comptroller recommending, approval of the schedules, as revised, for employees of said Department, for the Engineering Construction force, to be effective as of July 1, 1911, providing for certain changes in the schedules, to facilitate the audit of the weekly payrolls:

Department of Bridges, City of New York, 13-21 Park Row, Manhattan, N. Y., June 28, 1911.

Hon. William A. Prendergast, *Comptroller,* The City of New York, 280 Broadway, New York, N. Y.:

Sir—I have to request a modification of the schedule for the Construction Division of this Department, as follows:

Construction Division.

Wages, Regular Employees—Drop line item now reading Riveters, 8 at $5 per day, 276 days; Painters, 49 at $4 per day, 276 days.

Wages, Temporary Employees—Drop line item now reading Bridge Painters, at $4 per day, 20,000 days.

Proposed Schedule for Manhattan Bridge and Queensboro Bridge Divisions.

Wages, Regular Employees, Corporate Stock Force—Add line item Riveters, 8 at $5 per day, 276 days; Painters, 49 at $4 per day, 276 days.

Wages, Temporary Employees, Corporate Stock Force—Add line item Painters and Bridge Painters, at $4 per day, 20,000 days.

The employees herewith transferred from the Construction Division to the Manhattan Bridge and Queensboro Bridge Divisions were not provided for in the proposed authorization of $200,000, for salaries and wages for the Construction Division of this Department, requested at the recent hearing before the Corporate Stock Budget Committee. The 8 Riveters will be carried on the Tax Levy Budget Schedule in 1912, and the Painters and the Temporary Employees will be dropped from the Construction Division when the painting of the Manhattan and Queensboro Bridges is completed.

Early action would be appreciated by this Department. Copy of revised schedule herewith. Respectfully, ARTHUR J. O'KEEFFE, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 28, 1911, the Commissioner of Bridges requested modification of two schedules for Wages of Regular Employees and Wages of Temporary Employees, of the Construction Division in his Department for 1911. In connection therewith I report as follows:

It is proposed to drop 8 Riveters at $5 for 276 days and 49 Painters at $4 for 276 days from the schedule for Wages, Regular Employees, and to drop the line item Painters and Bridge Painters at $4 (20,000 days) from the schedule for Wages, Temporary Employees.

The employees dropped are to be provided for in additional schedules for the Manhattan Bridge and Queensboro Bridge Divisions. No changes are proposed in the number of incumbents, rate of compensation or number of days allowed in any class of employees.

The proposed schedule changes will facilitate the audit in the Department of Finance of weekly payrolls chargeable to corporate stock funds.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for employees of the Department of Bridges paid from other than budgetary accounts for the year 1911, to be effective as of July 1, 1911, as follows:

Department of Bridges.

Engineering Construction Force—

Salaries, Regular Employees:

Consulting Engineers, 3 at	$7,500 00
Assistant Engineer, 1 at	$6,000 00
Assistant Engineers, 2 at	5,000 00
Assistant Engineers, 3 at	4,000 00

Assistant Engineer, 1 at	3,500 00
Assistant Engineers, 3 at	3,000 00
Assistant Engineers, 3 at	2,700 00
Assistant Engineers, 5 at	2,400 00
Assistant Engineers, 7 at	2,100 00
Assistant Engineers, 9 at	1,800 00
Electrical Engineer, 1 at	1,200 00
Transitmen, 11 at	1,800 00
Transitman, 1 at	1,500 00
Structural Steel Draftsmen, 10 at	1,800 00
Architectural Draftsman, 1 at	1,800 00
Leveler, 1 at	1,350 00
Leveler, 1 at	1,200 00
Toolmen, 2 at	1,200 00
Steel Inspector, 1 at	1,650 00
Clerk, 1 at	1,500 00
Rodmen, 5 at	1,200 00
Axemen, 5 at	900 00
Axeman (312 days), 1 at a day	4 50
Inspector of Masonry (312 days), 1 at per day	5 00

Salaries, Temporary Employees:

Inspectors of Masonry (1,000 days), at per day	5 00

Wages, Regular Employees:

Watchman (365 days), 1 at per day	3 00
Watchmen (365 days), 2 at per day	2 50
Foreman Stone Mason (276 days), 1 at per day	4 00
Laborers (312 days), 2 at per day	3 00
Laborer (365 days), 1 at per day	2 50
Laborers (312 days), 5 at per day	2 50

Manhattan Bridge and Queensboro Bridge.

Construction Force—

Wages, Regular Employees:

Riveters (276 days), 8 at per day	5 00
Bridge Painters (276 days), 49 at per day	4 00

Wages, Temporary Employees:

Painters and Bridge Painters (20,000 days), at per day	4 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller recommending, the modification of salary schedules Nos. 473 and 503, supporting the appropriation made in the Budget for the year 1911, for said Department, to be effective as of July 1, 1911, providing for the increase in salary of an Assistant Engineer, from $4,000 to $5,000 per annum, and for the elimination of a Leveler, at $1,500 per annum, involving the transfer of $375:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, June 26, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—An effort was made last year to provide in the appropriations for this year an increase in the salary of the Borough Engineer for the Boroughs of Manhattan and The Bronx, from $4,000 to $5,000 per annum. The increase desired was not provided for in the salary schedule nor in the appropriation properly chargeable. There has been a saving by the elimination of unnecessary positions in another account, and I should like to use part of that money by transfer to make this promotion. The Chief Engineer has highly recommended this Engineer, saying that he is one of the most efficient men in this or any other of our municipal Departments, unexcelled in his constant attention to and untiring efforts in the prosecution of his work and zeal in the discharge of his duties.

I therefore respectfully request that the Board of Estimate and Apportionment approve a modification of the enclosed salary schedules supporting accounts Nos.

473 and 503, and that they also transfer the sum of $375 from account No. 503 to account No. 473, each of 1911. Yours truly,

HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 26, 1911, the Commissioner of Water Supply, Gas and Electricity requested modification of a budgetary part allowance and a regular salary schedule in his Department for 1911, involving a transfer of $375. In connection therewith I report as follows:

In No. 473, Office of Borough Engineer, Boroughs of Manhattan and The Bronx, Salaries, Maintenance and Construction Force, it is proposed to increase the salary of Henry B. Machen, an Assistant Engineer, from $4,000 to $5,000 per annum.

Mr. Machen was appointed as Assistant Engineer on August 31, 1905, at $2,400 per annum. On May 1, 1906, he was increased to $2,700; on April 1, 1907, to $3,000; and June 1, 1909, to the present rate. Since his appointment he has been in charge of the construction, operation and maintenance of the High Pressure Fire Service System. At present he is Borough Engineer for the Boroughs of Manhattan and The Bronx.

The Commissioner states that Mr. Machen is highly recommended for the increase by the Chief Engineer of the Department.

Mr. Machen's salary is pro-rated three-fourths against Budget funds and one-fourth against corporate stock funds. The requested increase of $1,000, therefore, would add $750 to the present budgetary part allowance and if effective, as of July 1, 1911, will require a credit transfer of $375 to No. 473.

In No. 503, Distribution, Maintenance of Croton and Bronx Systems, Salaries, Maintenance Force, it is proposed to drop a Leveler, at $1,500, and use a portion of the saving for the required credit transfer to No. 473. As a schedule transfer of only $750 is required the balance is to be set up in Schedule No. 503 as accrued balance of transfer to No. 473, $250, and the remaining $500 scheduled as an unassigned balance.

The necessary schedule and cash transfers in detail are as follows:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
473.	Assistant Engineer, 1 at $4,000	$3,000 00	....	$1,500 00	....
	Assistant Engineer, at $5,000..	....	$3,750 00	....	$1,875 00
503	Leveler, 1 at $1,500..........	1,500 00	....	750 00	....
	Accrued balance of transfer to No. 473	....	250 00	....	125 00
	Unassigned balance	....	500 00	....	250 00
		$4,500 00	$4,500 00	$2,250 00	$2,250 00

I recommend the adoption of the attached resolutions granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Department of Water Supply, Gas and Electricity, to be effective as of July 1, 1911, as follows

Department of Water Supply, Gas and Electricity.

Water Supply, Boroughs of Manhattan and The Bronx, Administration, Office of Borough Engineer—

473. Salaries, Maintenance and Construction Force:

Assistant Engineer	1 at	$5,000 00
Assistant Engineer	1 at	3,000 00
Stenographer and Typewriter	1 at	1,350 00

Budgetary part allowance, $5,175.

Water Supply, Boroughs of Manhattan and The Bronx, Distribution, Maintenance of Croton and Bronx Systems—

503. Salaries, Maintenance Force:

Assistant Engineer	$3,000 00
Inspector	1,800 00
Inspector	1,350 00
Accrued balance of transfer to No. 473	250 00
Unassigned balance	500 00
	$6,900 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Department of Water Supply, Gas and Electricity for the year 1911, as follows:

From

Water, Supply, Boroughs of Manhattan and The Bronx, Distribution, Maintenance of Croton and Bronx Systems—

503. Salaries, Maintenance Force $375 00

To

Water Supply, Boroughs of Manhattan and The Bronx, Administration, Office of Borough Engineer—

473. Salaries, Maintenance and Construction Force........ $375 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communications from the Department of Water Supply, Gas and Electricity, requesting, and report of the Comptroller relative to, the modification of schedules of employees of said Department, Engineering Bureau, for the year 1911, to be effective as of July 1, 1911, with the exception of the line—"Assistant Engineers, 4 at $3,000," which shall take effect as of May 23, 1911, providing for the addition of an Assistant Engineer at $3,000 and two Draftsmen at $1,500 per annum each; the elimination of a Draftsman at $1,350 per annum, for increases in salary of two Rodmen, one from $900 to $1,050 per annum and the other from $960 to $1,050 per annum.

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, June 5, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—On account of the great amount of work to be done in the Designing Division of the Engineering Bureau it is necessary to have two more Draftsmen, whom I wish to appoint at a salary of $1,500 each.

There is a vacancy in the corporate stock salary schedule of the Engineering Bureau for one Draftsman at $1,350, and I desire to fill that vacancy with one of the $1,500 appointments.

To provide for these appointments a modification of the schedule is necessary, and I request that the Board of Estimate and Apportionment approve the modification for the two lines for Draftsmen that now read "10 at $1,500" and "4 at $1,350" so that they will read "12 at $1,500"; "3 at $1,350." Yours truly,

HENRY S. THOMPSON, Commissioner.

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, June 26, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—The schedule for "Salaries, Regular Employees, Engineering Bureau, Corporate Stock Force," contain provision for 13 Rodmen at $1,050 each per annum; 1 Rodman at $960 per annum; 1 Rodman at $900 per annum, as well as for other at other rates.

I desire to promote to the $1,050 rate two men now receiving—one, $960 per annum, and the other $900 per annum, and respectfully request that the Board of Estimate and Apportionment modify the schedule above named so that the line reading "13 Rodmen at $1,050 per annum" will read "15 Rodmen at $1,050 per annum," omitting from the schedule the two lines which read "one at $960 and one at $900."

Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, June 30, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—In compliance with the judgment of the Court I reinstated on May 23, an Assistant Engineer at a salary of $3,000 per annum, which will be paid out of the corporate stock funds of this Department.

The following schedule for the corporate stock force contains no provision for the payment of this Engineer, and I respectfully request that the Board of Estimate and Apportionment approve the enclosed modification of the salary schedule.

Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 3, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 5, 26 and 30, 1911, the Commissioner of Water Supply, Gas and Electricity requested modification of a schedule for the salaries of regular employees for the Corporate Stock Force of the Engineering Bureau, in his Department for 1911. In connection therewith, I report as follows:

It is proposed to add an Assistant Engineer at $3,000 and two Draftsmen at $1,500 per annum each, and drop one Draftsman at $1,350. The Commissioner states that the additional Draftsmen are needed on account of a great amount of work to be done in the Designing Division of the Engineering Bureau. He also states that a vacancy in the position of Draftsman at $1,350, permits of the dropping of one incumbent. The Assistant Engineer was reinstated on May 23, 1911, pursuant to a Court order.

It is also proposed to increase the salaries of James W. Woods, appointed as Rodman, at $900, on April 6, 1906, and Michael J. Kearney, appointed as Rodman, at $960, on May 3, 1906, to $1,050 each.

The schedule transfers in detail are as follows:

Line Items.	Schedule Transfer.	
	Decrease.	Increase.
Engineering Bureau, Corporate Stock Force—		
Salaries, Regular Employees:		
Draftsmen, 10 at $1,500	....	$3,000 00
Draftsmen, 4 at $1,350	$1,350 00	....
Assistant Engineers, 3 at $3,000	....	3,000 00
Rodmen, 13 at $1,050	....	2,100 00
Rodman, 1 at $960	960 00	....
Rodman, 1 at $900	900 00	....
	$3,210 00	$8,100 00

On June 8, 1911, a modification was approved by your Board decreasing the schedule total by $400, or $100 more than the present requested increase in the salaries of Rodmen.

The attached resolution, if adopted, will grant the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for employees of the Department of Water Supply, Gas and Electricity paid from other than budgetary accounts for the year 1911, to be effective as of July 1, 1911, with the exception of the line:

Assistant Engineers .... 4 at $3,000 00

—which shall take effect as of May 23, as follows:

Department of Water Supply, Gas and Electricity.

Engineering Bureau—

Salaries, Regular Employees, Corporate Stock Force:

Consulting Engineer	1 at	$5,000 00
Division Engineer	1 at	5,000 00
Division Engineer	1 at	4,500 00
Assistant Engineers	2 at	4,800 00
Assistant Engineer	1 at	3,500 00
Assistant Engineer	1 at	3,250 00
Assistant Engineers	4 at	3,000 00
Assistant Engineers	2 at	2,800 00
Assistant Engineer	1 at	2,700 00
Assistant Engineers	2 at	2,550 00

Clerk	1 at	600 00
Clerks	3 at	300 00
Expert File Clerks	2 at	750 00
Purchasing Agent	1 at	2,000 00
Keeper	1 at	1,500 00
General Inspector	1 at	3,000 00
Inspectors	28 at	1,800 00
Inspectors	4 at	1,500 00
Inspectors	2 at	1,350 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Health requesting, and report of the Comptroller recommending, approval of the schedules as revised for said Department Laboratories, Research and Vaccine, Antitoxin and Vaccine Force, for the year 1911; providing for the addition of a Laborer at $600 per annum:

Department of Health, City of New York, Southwest Corner of 55th street and 6th avenue, Borough of Manhattan, Office of the Secretary, New York, June 28, 1911.

Hon. JOSEPH HAAG, *Secretary, Board of Estimate and Apportionment,* 277 Broadway:

Sir—At a meeting of the Board of Health of the Department of Health, held June 27, 1911, the following resolution was adopted:

Resolved, That the Board of Estimate and Apportionment be and it is hereby respectfully requested to approve of the following further modifications of schedules for employees of the Department of Health paid from other than budgetry funds: Laboratories, Research and Vaccine, Antitoxin and Vaccine Force, Wages of Temporary Employees;

Change item, "Laborers, 3 at $600" to read "Laborers, 4 at $600."

ENGENE W. SCHEFFER, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 27, 1911, the Board of Health requested modification of the non-budgetary schedules of salaries and wages for the special and trust funds entitled "Antitoxin Fund" and "Vaccine Fund," in the Department of Health for the year 1911.

The only change is the addition of a Laborer at $600 per annum to the temporary force employed in the Research and Vaccine Laboratories.

The following table shows the line item change:

Schedule Line.	Schedule Transfer.	
	Decrease.	Increase.
Laborers, 3 at $600	......	$600 00

I recommend the adoption of the attached resolution approving the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves schedules of salaries and wages, as revised, for the special and trust funds, entitled "Antitoxin Fund" and "Vaccine Fund," in the Department of Health for the year 1911, as follows:

Department of Health.

Laboratories, Research and Vaccine, Antitoxin and Vaccine Force—

Salaries:	
Assistant Director, Bacteriological Laboratories	$2,100 00
Veterinarian	1,500 00
Wages, Temporary Employees:	
Laboratory Assistant	900 00
Laboratory Assistants, 4 at	750 00
Laborer	780 00
Laborers, 2 at	720 00
Laborers, 4 at	600 00
Laborers, 3 at	480 00
Helpers, 4 at	600 00
Helpers, 6 at	480 00
Helpers, 2 at	420 00

Helpers, 4 at	360 00
Helpers, 4 at	300 00
Helper	264 00
Helpers, 2 at	120 00
Carpenter	720 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Board of Education requesting, and report o the Comptroller recommending, approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications, as amended, and estimates of cost for fire stops in the attics of various schools in the Borough of Manhattan, and for heating and ventilating apparatus, etc., in the new addition to the Boys' High School, Brooklyn, Department of Education:

Department of Education, City of New York, Board of Education, Park Avenue and 59th Street, New York, June 27, 1911.

Hon. W. A. Prendergast, *Comptroller:*

Dear Sir—I beg to advise you of the receipt of a communication from C. B. J. Snyder, Superintendent of School Buildings, under date of June 27, 1911, reading as follows:

"I am forwarding herewith plans and specifications for the following work, for transmission to the Comptroller, to be presented to the Board of Estimate and Apportionment, in accordance with the resolution adopted by that Board on January 5, 1911:

Various, Manhattan—Fire Stops in the Attics.

	Approximate Cost.
Item 1	$1,422 00
Item 2	1,560 00
Item 3	800 00
Item 4	3,960 00
Item 5	2,522 00
Item 6	1,881 00
Item 7	1,580 00

Boys' High School, Brooklyn—Installing Heating and Ventilating Apparatus, and Item 2, Installing Temperature Regulation in New Addition of.

Item 1	$58,000 00
Item 2	5,000 00"

The plans and specifications referred to in the foregoing communication are transmitted herewith. Respectfully yours,

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—The Board of Education, in a communication dated June 27, 1911, requested approval by the Board of Estimate and Apportionment of plans, specifications and estimates of cost for the following work:

Various Public School Buildings, Borough of Manhattan—Fire Stops in Attics.

	Approximate Cost.
Item 1	$1,422 00
Item 2	1,560 00
Item 3	800 00
Item 4	3,960 00
Item 5	2,522 00
Item 6	1,881 00
Item 7	1,580 00

Addition to Boys' High School, Borough of Brooklyn.

Item 1, Installing heating and ventilating apparatus	$58,000 00
Item 2, Installing temperature regulation	5,000 00

An examination of these plans and specifications shows that fire stops are to be constructed in the attics of 78 school buildings. These fire stops consist of cross partitions of plaster board or galvanized sheet metal, provided with doors of metal where necessary. Wooden ladders to the attics are to be replaced with iron ladders, and at Public School 49 the side walls of the bridge connecting the two buildings are to be covered with metal. The work specified when completed will, in the event of fire, serve to retard its spread through the attics of the various buildings, thereby affording better fire protection than exists at present.

The specifications as presented to the Finance Department required a slight modification to paragraph 1, page 10, in order to make clear the meaning. This has been agreed to by the Department of Education, so that the plans and specifications in their present form are satisfactory and the estimates of cost are reasonable.

There is a sufficient balance in funds previously authorized by the Board of Estimate and Apportionment to pay the cost of this work.

At the Boys' High School, Borough of Brooklyn, the general construction of the addition is now under way, and it is necessary to have the heating and ventilating work proceed at the same time. The plans and specifications call for the installation in the addition of heating and ventilation by means of the single duct plenum system such as now exists in the old portion of the building.

The specifications as presented required that the work be completed in 60 days. This time is too short for the completion of the contract and at the request of the Department of Finance the Department of Education altered the specifications so as to allow 100 days for the completion of the work.

In their present form the plans and specifications are satisfactory and the estimates of cost reasonable.

Funds for this work were authorized by the Board of Estimate and Apportionment June 3, 1910.

I submit for adoption the resolution appended hereto. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted June 3, 1910, hereby approves the plans, specifications, as amended, and estimates of cost for the following work under the jurisdiction of the Department of Education:

For fire stops in the attics of various schools in the Borough of Manhattan, as follows:

Item 1. Estimated cost, one thousand four hundred and twenty-two dollars ($1,422).

Item 2. Estimated cost, one thousand five hundred and sixty dollars ($1,560).

Item 3. Estimated cost, eight hundred dollars ($800).

Item 4. Estimated cost, three thousand nine hundred and sixty dollars ($3,960).

Item 5. Estimated cost, two thousand five hundred and twenty-two dollars ($2,522).

Item 6. Estimated cost, one thousand eight hundred and eighty-one dollars ($1,881).

Item 7. Estimated cost, one thousand five hundred and eighty dollars ($1,580).

New addition to Boys' High School, Borough of Brooklyn:

Item 1. Installing heating and ventilating apparatus; estimated cost, fifty-eight thousand dollars ($58,000).

Item 2. Installing temperature regulating; estimated cost, five thousand dollars ($5,000).

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Bridges requesting, and report of the Comptroller recommending, approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($14,000) for furnishing and installing additional electrical feeder cables on the Williamsburgh Bridge, under the jurisdiction of Department of Bridgges:

Department of Bridges, City of New York, 13 to 21 Park Row, Manhattan, N. Y., June 28, 1911.

Hon. William A. Prendergast, *Comptroller, City of New York:*

Dear Sir—Pursuant to a resolution adopted by the Board of Estimate and Apportionment on January 5, 1911, I transmit herewith, for your examination and report to the said Board, plans, specifications and estimate of cost of the proposed contract for Furnishing and Installing Electrical Feeder Cables on the Williamsburgh Bridge. The plans are shown on two drawings, numbered 5124 and 5125, and the estimate of cost of the proposed contract is $14,000.

The proposed contract provides for the placing of additional electrical feeder cables on the bridge for the surface railway on the northerly pair of tracks. The present electrical feeder cables were installed by the City and are a part of the equipment of the bridge. The additional cables, which will also be a part of the equipment of the bridge, are needed in order to provide additional power, so that the railway company can increase its service on the bridge, as it has been directed to do by the Public Service Commission.

The proposed contract is chargeable to the fund of the Department of Bridges, entitled C-DB-39, New East River Bridge Fund, and the balance unincumbered in this fund is $16,158.69.

Yours truly, ARTHUR J. O'KEEFFE, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 8, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 28, 1911, the Commissioner of Bridges requested approval of plans, specifications and estimated cost of $14,000 for furnishing and installing electrical feeder cables on the Williamsburgh Bridge.

The contract provides for furnishing and installing about 2,750 feet of lead covered cable, about 11,020 feet of weatherproof cable, taps, supports, insulators, switches, etc., on the Williamsburgh Bridge.

The additional electrical feeder cables are needed to provide additional power, so that the Railway Company can increase its service on the bridge, as it has been directd to do by the Public Service Commission.

The cost of the work is to be charged against the Corporate Stock Fund entitled, "C-DB-39, New East River Bridge Fund." There is sufficient balance in the fund to pay for the proposed work.

The plans and specifications appear to be complete and satisfactory and the estimate of cost reasonable.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves the plans, specifications and estimate of cost, fourteen thousand dollars ($14,000), for furnishing and installing additional electrical feeder cables on the Williamsburgh Bridge, under the jurisdiction of the Department of Bridges.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Fire Department requesting, and report of the Comptroller recommending, approval, pursuant to resolution adopted June 3, 1910, of the specifications for two gas-electric chassis to be used as tractors for water towers by said Department, at a cost not to exceed $5,200 each:

Fire Department of The City of New York, Office of the Commissioner, June 24, 1911.

Hon. William A. Prendergast, *Comptroller of The City of New York:*

Sir—I have the honor to request approval of the attached specifications for gas-electric chassis and request authority to purchase, at public letting, two apparatus of this type to be used as tractors for water towers. The cost, estimated at $5,500 each, is to be charged against corporate stock issue, accounts 10-A and 10-B, Purchase of New Apparatus.

Respectfully, JOS. JOHNSON, Fire Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 8, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 24, 1911, the Fire Commissioner requested approval of the specifications and estimate of cost, $5,500 each, of two gas-electric chassis to be used as tractors for water towers.

On February 27, 1911, former Fire Commissioner Waldo requested the Board of Aldermen to authorize him to purchase a similar tractor at a cost not to exceed $5,200 without contract at public letting. Permission was not given and, after public advertisement, on April 7, 1911, one bid of $5,850 was received and accepted.

The specifications upon which the above contract was made were the same as that now submitted for approval except that the contractor was required to supply an extra wheel with 3-horsepower motor, the cost of which was stated by the Commissioner to be $650.

The City has therefore purchased a similar tractor at a cost of $5,200, and there seems no good reason why a higher estimate of cost should now be approved.

While the contract will be awarded at public letting, only one legitimate bid can be received. The specifications do not call for a patented article, but there is at present only one firm supplying tractors of the type specified.

It is proposed to charge the cost of one tractor to the Corporate Stock Fund entitled "C-FD-10A, Fire Department, New Apparatus, Boroughs of Manhattan, The Bronx and Richmond," and the other to the Corporate Stock Fund "C-FD-10B, Fire Department, New Apparatus, Boroughs of Brooklyn and Queens."

There are unencumbered balances in each fund sufficient for the purpose.

I recommend that the specifications be approved upon the condition that the cost of the tractor shall not exceed $5,200 each.

A resolution is hereto attached which, if adopted will carry out the above recommendation. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, purusant to its resolution adopted June 3, 1910, hereby approves the specifications for two gas-electric chassis to be used as tractors for water towers by the Fire Department, the cost not to exceed five thousand two hundred dollars ($5,200) each.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the President of the Borough of Queens requesting, and report of the Comptroller recommending, approval of the modification of specifications for dredging a channel at the mouth of the 5th avenue sewer, College Point, to allow payment to the Contractor for material dredged or removed, to a depth not greater than one foot below the line specified by the engineer, or shown on the plan, as requested by the President of the Borough of Queens:

The City of New York, Office of the President of the Borough of Queens, Long Island City, June 20, 1911.

William A. Prendergast, *Esq., Comptroller, City of New York,* New York, N. Y.:

Sir—Pursuant to your report of March 8, 1911, the Board of Estimate and Apportionment did, by resolution, at their meeting of March 16, 1911, approve and concur in resolution of the Boarl of Aldermen of October 18, 1910, authorizing an issue of special revenue bonds in an amount not exceeding $3,000, proceeds whereof to be used for the purpose of abating a public nuisance by dredging a channel at the mouth of the 5th avenue sewer, College Point, concurrent therewith the Board approved the plans and specifications transmitted to your office in connection with this work. Bids were solicited through the usual legal procedure, to be opened in this office on May 19, 1911, with a negative result.

Our records show that two reputable concerns applied for and received copies of the specifications, which our Engineer suggests might have been too stringent in regard to excavation, that in his opinion the same should be modified, and to that end we enclose copy of proposed amended specifications for your consideration.

Yours respectfully,

LAWRENCE GRESSER, President of the Borough of Queens.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In a communication to the Comptroller under date of June 20, 1911, the President of the Borough of Queens states that the letting of a contract for dredging a channel at the south of the 5th avenue sewer, College Point, bids for which were to be received through the usual legal procedure, had failed to meet with satisfactory results.

No tenders were received on May 19, 1911, the date advertised for the opening of the bids. It is the opinion of the Engineers in charge that the failure of contractors to bid was that the specifications were too stringently drawn with regard to the limits or fixed lines to which they would be confined in the matter of dredging.

The specifications as originally drawn provide that payment will only be made for material removed down to fixed lines as shown on the plan.

It is customary in dredging contracts to allow payment for all material taken out to a depth not greater than one foot below the depth specified or directed to be made by the Engineer.

It is now proposed to modify the specifications so that a permitted excess of one foot below the fixed line may be allowed. This being in accordance with usual engineering and contracting methods I see no reason why the change should not be made.

The cost of the dredging is to be paid from special revenue bonds.

I recommend, therefore, the adoption of the attached resolution providing for the modification, to allow payment to contractor for material dredged or removed from a depth not greater than one foot below the line specified by the Engineer, or shown on the plan. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of modification of specifications for dredging a channel at the mouth of the 5th avenue sewer, College Point, under the jurisdiction of the President, Borough of Queens, to allow payment to contractor for material dredged or removed, to a depth not greater than one (1) foot below the line specified by the Engineer, or shown on the plan.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Board of Education requesting, and report of the Comptroller recommending, approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($10,535) for installing electric equipment in new Public School No. 168, Brooklyn:

Department of Education, City of New York, Board of Education, Park avenue and 59th street, New York, June 30, 1911.

Hon. W. A. Prendergast, *Comptroller:*

Dear Sir—I beg to advise you of the receipt of a communication from Mr. C. B. J. Snyder, Superintendent of School Buildings, under date of June 30, 1911, reading as follows:

"I am forwarding herewith plans and specifications for installing electric equipment in new Public School 168, Borough of Brooklyn, for transmission to the Comptroller, to be presented to the Board of Estimate and Apportionment, in compliance with the resolution adopted by that Board on January 5, 1911.

"The plans and speecifications have been approved by the Department of Water Supply, Gas and Electricity, as noted on same.

"The above have just been returned by the said Department.

"Approximate cost, $10,535."

The plans and specifications mentioned in the foregoing communication are transmitted herewith. Respectfully yours,

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—The Board of Education, in a communication dated June 30, 1911, requested approval by the Board of Estimate and Apportionment of plans, specifications and estimate of cost ($10,535), for installing electric equipment in new Public School 168, Borough of Brooklyn.

These plans and specifications cover the installation of a wiring system for power and electric lighting, fixtures for electric and gas lighting, call-bell system, fire alarm connection and interior telephone system. They are satisfactory and bear the approval of the Department of Water Supply, Gas and Electricity. The estimate of cost is reasonable. There is a sufficient balance to pay the cost of this work in the fund authorized for this purpose by the Board of Estimate and Apportionment on June 3, 1910.

I submit for adoption the resolution appended hereto.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted June 3, 1910, hereby approves the plans, specifications and estimate of cost, ten thousand five hundred and thirty-five dollars ($10,535), for installing electric equipment in new Public School 168, Borough of Brooklyn, under the jurisdiction of the Department of Education.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Commissioner of Public Works, Borough of Richmond requesting, and report of the Comptroller recommending, approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($9,000) for alterations and additions to the County Clerk's Office, Borough of Richmond, providing the cost of rearranging the old steam heating system and connecting same with new system, amounting to $250, be charged to other than a corporate stock account:

The City of New York, Office of the President of the Borough of Richmond, Borough Hall, New Brighton, New York City, May 26, 1911.

Hon. William A. Prendergast, *Comptroller,* 280 Broadway, New York:

Dear Sir—In accordance with resolution of the Board of Estimate and Apportionment, we send you herewith for approval contract form and set of drawings for the mason, carpenter, painting, roofing and other work in connection with the alterations and additions to the County Clerk's Office, Borough of Richmond; all of which have been approved by the Art Commission of New York, as has also the form of contract by Corporation Counsel.

We would ask for the earliest possible examination and favorable report to the Board of Estimate and Apportionment so that we may proceed to enter into a contract for the work. Yours respectfully,

LOUIS L. TRIBUS, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 3, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 26, 1911, the Commissioner of Public Works of the Borough of Richmond requested approval of plans and specifications for alterations and additions to the County Clerk's Office, Borough of Richmond.

The plans and specifications provide for building a two-story extension (45 feet by 20 feet 6 inches) to the County Clerk's Office building at Richmond, Staten Island, Borough of Richmond, and certain alterations to the steam heating plant of the present building.

The walls and piers are to be built of the best quality hard, well-burned rose brick. The sills to windows, keystones and water table are to be of bluestone, and the entire surface of cellar, first and second floors are to be finished with a three-inch course of concrete. The walls and partitions are to be finished with a hard finish of Diamond Mill plaster of paris.

The rear or northerly wall of the present building is to be carried through roof to act as a fire wall between the old and new building. The windows on the rear or northerly wall of the present building are to be cut down and changed to doorways to provide entrance into the new extension. The northerly end of the proposed extension on the first and second floors is to be divided by partitions from private offices and toilets for men and women. A sectional steam heating boiler is to be placed in the cellar of the new extension of sufficient size to supply heat for the new extension and the present building and the present heating system in the old building is to be rearranged and corrected to the new system. Extensions are to be piped for gas and wired for electricity to be furnished from a street service. The specifications also call for steel filing cases and steel roller book shelves, to be placed in the first and second stories of the extension. It is proposed to charge the cost to the corporate stock fund C-PR-5a, for the Construction of an Addition to the Building now occupied by the County Clerk at Richmond, Borough of Richmond.

The plans and specifications appear to be complete and satisfactory and the estimate of cost, $9,000, reasonable, but the rearrangement of the steam pipes of the present building, at an estimated cost of $250, should be paid for from an account other than corporate stock.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves the plans, specifications and estimate of cost, nine thousand dollars ($9,000), for alterations and additions to the County Clerk's office, Borough of Richmond, under the direction of the President, Borough of Richmond, with the expressed understanding that the cost, to the amount of two hundred and fifty dollars ($250) of rearranging the old steam heating system and connecting same to the new heating system, will be charged against a fund other than corporate stock.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communications from the Fire Department requesting, and report of the Comptroller recommending, that the resolutions adopted May 18, 1911, approving of the specifications and estimates of cost for two additional automobile hose wagons, six chassis to be fitted to high pressure hose wagons and for three power propelled auto attachments to be fitted to steam fire engines, for the use of the said Department, be rescinded:

Fire Department of The City of New York, Office of the Commissioner, June 23, 1911.

Hon. William A. Prendergast, *Comptroller of The City of New York:*

Sir—I have the honor to request that the following resolution adopted by the Board of Estimate and Apportionment, at meeting held May 18, 1911, be rescinded as I do not intend to use the money at present:

"Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted June 3, 1910, hereby approves the specifications and estimate of cost, four thousand two hundred dollars ($4,200) each, for two additional automobile hose wagons for the use of the Fire Department."

Respectfully, JOS. JOHNSON, Fire Commissioner.

Fire Department of The City of New York, Office of the Commissioner, June 23, 1911.

Hon. William A. Prendergast, *Comptroller of The City of New York:*

Sir—I have the honor to request that the resolution adopted by the Board of Estimate and Apportionment, at meeting held on May 18, 1911, approving the specifications and estimates of cost for "Six chassis to be fitted to high pressure hose wagons, estimated cost three thousand dollars ($3,000) each, and three power propelled auto attachments to be fitted to steam fire engines, estimated cost six thousand dollars ($6,000) each," be rescinded, as I do not intend to use the money for this purpose. Respectfully, JOS. JOHNSON, Fire Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 23, 1911, the Fire Commissioner requested the Board of Estimate and Apportionment to rescind its resolutions adopted May 18, 1911, approving the specifications and estimates of cost for two additional automobile hose wagons ($4,200 each), six chassis, to be fitted to high pressure hose wagons ($3,000 each), and three power-propelled auto attachments to be fitted to steam fire engines ($6,000 each).

The Commissioner wishes to use the funds available for other apparatus which he considers immediately necessary.

I recommend that his requests be granted by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Estimate and Apportionment May 18, 1911, which reads as follows:

"Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted June 3, 1910, hereby approves the specifications and estimate of cost, four thousand two hundred dollars ($4,200) each, for two additional automobile hose wagons for the use of the Fire Department."

—be, and the same is hereby rescinded.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Estimate and Apportionment May 18, 1911, which reads as follows:

"Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted June 3, 1910, hereby approves the specifications and estimates of cost for the following apparatus for the Fire Department:

"Six chassis, to be fitted to high pressure hose wagons, estimated cost, three thousand dollars ($3,000) each, and three power-propelled auto attachments, to be fitted to steam fire engines, estimated cost, six thousand dollars ($6,000) each."

—be, and the same is hereby rescinded.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Chief City Magistrate, Second Division, requesting, and report of the Comptroller recommending, the issue of $1,500 special revenue bonds (chapter 659, Laws of 1910), for a law library, furniture and equipment for library, courtroom and offices of the Chief Magistrate and rooms of the Board of City Magistrates, Second Division:

(On June 8, 1911, the communication from the Chief City Magistrate above mentioned was referred to the Comptroller.)

Office of Chief City Magistrate, Board of City Magistrates, Second Division, City of New York, Borough Hall, Brooklyn, June 6, 1911.

To the Honorable, the Board of Estimate and Apportionment, 277 Broadway, New York City:

Gentlemen—On March 9, 1911, your honorable Board adopted a resolution authorizing an issue of special revenue bonds to an amount not to exceed $1,500, for the purchase of a law library for the City Magistrates' Courts of the First Division.

In behalf of the Magistrates of the Second Division I hereby make application for the adoption of a similar resolution, providing for an issue of special revenue bonds in the amount of $1,500. The Magistrates of the Second Division have the same urgent need for a central library that has been shown to exist in Manhattan, and therefore I respectfully request that an appropriation for that purpose be made.

It is not intended to use the entire fund of $1,500 for the purchase of books, but a portion of the money will be required for furniture and equipment. On May 1, 1911, the offices of the Chief City Magistrate and the Board of City Magistrates of the Second Division were removed to the Temple Bar Building, 44 Court street, Brooklyn, but no provision has been made to equip the rooms with necessary furniture. We are without the facilities required for properly accommodating the public and for fitting up a library and court room. The sum of $1,500 would enable us to meet all requirements by completely furnishing the library, the Chief Magistrate's Office and the rooms of the Board of City Magistrates. Yours respectfully,

OTTO KEMPNER, Chief City Magistrate, Second Division.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 6, 1911, the Chief City Magistrate of the City Magistrates' Court, Second Division, covering Brooklyn, Queens and Richmond, requested $1,500 in special revenue bonds for a law library, furniture and equipment for the library, courtroom and office of the Chief Magistrate and the rooms of the Board of City Magistrates, in 44 Court street, Brooklyn. In connection therewith I report as follows:

The Chief Magistrate states that it is proposed to establish a central library for the use of the Magistrates and that it will be necessary to spend $500 in the purchase of the following law books and court report:

Appellate Division Reports, Hun's Reports, New York Criminal Reports, Bishop's Criminal Law, Russell on Crimes, Archibald's Criminal Pleadings, Abbott's Trial Brief, Black's Law Dictionary, Moore on Extradition, Brightley's Digest, Beal's Cases, Rosco's Criminal Evidence, Abbott's Cyclopedic Digest, Mikell's Cases, Phipson's Manual, Cyc, 36 volumes; Underhill's Criminal Evidence, Wigmore on Evidence, Miscellaneous Reports.

It is estimated that the furniture and equipment for the library, courtroom and offices of the Chief Magistrate and rooms of the Board of City Magistrate will cost $1,054, estimated as follows:

3 flat-top desks and chairs at $25	$75 00
3 desks and chairs at $42.50	127 50
1 bench and rail (estimated)	125 00
2 No. 2 T steel oak tops for cabinet at $4	8 00
2 No. 124 C Unit Steel Globe files at $24	48 00
2 No. 541 steel upright vertical letter files, at $35	70 00
4 benches at $12.50	50 00
1 Globe cabinet safe with compartments	97 00
1 globe cabinet safe with units	150 00
30 bookcases at $2.75	82 50
6 tops at $1.75	10 50
6 bases at $1.75	10 50
1 Globe cabinet, No. 1322, with fittings	30 00
3 large oak tables at $20	60 00
4 card units 4 by 6 at $23	92 00
Indexes for above	10 00
Base and top	8 00
	$1,054 00

It is proposed to establish the library in the offices of the Chief Magistrate, where it will be convenient for the Magistrates to consult authorities and confer upon the interpretation of laws. It is stated that the library is needed for differences of opinions on questions of law and evidence.

Section 115 of chapter 659 of the Laws of 1910, entitled "An Act in Relation to the Inferior Courts of Criminal Jurisdiction in The City of New York," provides as follows:

"It shall be the duty of the City of New York and its several officers charged with duties in that behalf to supply and pay for whatever may be necessary for the transaction of the business of the said City Magistrates and to supply all proper courthouses and accommodations, books, stationery, furniture, and such law books as may be certified by the Chief Magistrate in either division to be necessary for the use of the Magistrates' Court."

I recommend that the request be approved by the adoption of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of chapter 659, Laws of 1910, entitled "An Act in Relation to the Inferior Courts of Criminal Jurisdiction in The City of New York," the Board of Estimate and Apportionment hereby approves of an issue of special revenue bonds to an amount not to exceed one thousand five hundred dollars ($1,500) for a law library, furniture and equipment for library, courtroom and offices of the Chief Magistrate and rooms of the Board of City Magistrates, Second Division.

and for the purpose of providing means therefor, the Comptroller be and is hereby authorized to issue special revenue bonds of The City of New York as provided by chapter 659, Laws of 1910, to an amount not to exceed one thousand five hundred dollars ($1,500), redeemable from the tax levy of the year succeeding their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting an issue of $59,585.50 special revenue bonds (subdivision 8, section 188 of the Charter), for the continuance of the operations of the Bureau of Street Cleaning of the Borough of Queens for the year 1911, together with a report of the Comptroller, to whom, on April 20, 1911, this application was referred, recommending an issue of $59,192.81 for this purpose; also recommending approval of a schedule for said fund:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of fifty-nine thousand five hundred and eighty-five dollars and fifty cents ($59,585.50), the proceeds whereof to be used by the President, Borough of Queens, for the purpose of providing means for the continuance of the operations of the Bureau of Street Cleaning, Borough of Queens, during 1911, at the present ratio.

Adopted by the Board of Aldermen March 28, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor April 11, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 5, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On March 28, 1911, the Board of Aldermen adopted a resolution requesting special revenue bonds to the amount of $59,585, the proceeds to be used by the President, Borough of Queens, for the purpose of providing means for the continuance of the operations of the Bureau of Street Cleaning, Borough of Queens, during 1911, at the present rate. In connection therewith I report as follows:

The Superintendent of the Bureau states that with the amount asked for, in addition to the Budget appropriation, the Bureau can be operated in a fairly satisfactory manner. If the amount is not authorized, he states the force of Laborers and Sweepers will have to be decreased, with corresponding loss in the efficiency of the service. He further states that the danger to the health of residents of congested districts, and particularly of residents along the seashore during the summer months, would follow any decrease of the laboring force.

The following table shows the mileage of improved streets in the Borough of Queens from 1904 to 1911, inclusive:

	Miles.
1904	53.68
1905	62.39
1906	64.89
1907	69.45
1908	70.96
1909	78.54
1910	82.04
1911	85.01

This table is exclusive of 75 miles of paved gutters.

The following table shows the work being done at present in street cleaning:

	Miles.
Swept twice daily	16.2
Swept six times a week	34.7
Swept four times a week	5.6
Swept three times a week	7.9
Swept twice weekly	8.1

Swept once a week	6.8
Swept every two weeks	1.6
Swept every three weeks	2.3
Total miles swept	83.2
Total miles unswept	1.9
	85.1

The record of Bureau collections, as listed on the books of the Bureau from 1905 to 1910, inclusive, is as follows:

	Ashes.	Sweepings.	Rubbish,	Garbage.	Totals.
1905	39,433¼	28,134¼	6,637¾	10,922	85,127¼
1906	55,491¾	35,466¾	12,451½	18,392	121,802
1907	76,489¾	35,959¾	16,081¼	22,604	151,134¾
1908	93,368¾	47,447	21,471½	28,144	190,701¼
1909	85,595½	44,877	18,683¾	28,366	177,502¼
1910	96,950	45,772¾	23,180¼	31,255¾	197,158¾

The record of private collections, also from the books of the bureau, is as follows:

	Ashes.	Rubbish.	Garbage.	Totals.
1905	1,900½	507¼	2,398½	4,806¼
1906	226¾	494¼	484¾	1,205¾
1907	926	2,160½	1,156½	4,243
1908	2,301	4,339	4,527¼	11,167¼
1909	445½	2,604¾	2,222½	5,272¾
1910	682¾	1,894⅜	3,209¾	5,786⅞

The Superintendent of the Bureau states that the totals in the above tables are correct for the years 1909 and 1910, while he has reason to doubt the correctness of the totals for the previous years, particularly those of the year 1908.

Garbage and ashes collections throughout the Borough of Queens are as follows:

Three Times a Week—Long Island City, Astoria, Dutch Kills, Ravenswood, Steinway, Hunters Point, Blissville, Woodside, Winfield, Corona, Elmhurst, East Elmhurst, Maspeth, Middle Village, Glendale, Ridgewood, Ridgewood Heights, Garmania Heights, Flushing, College Point, Whitestone, Bayside, Malba, Rockaway, Far Rockaway, Rockaway Park, Arverne, Hammel's, and Belle Harbor.

Twice a Week—Broadway-Flushing, Douglaston Manor, Douglaston, Little Neck, Jamaica, Richmond Hill, Woodhaven, Brooklyn Hills, Brooklyn Manor, Morris Park, Hollis, Springfield and Rosedale.

Once a Week—Laurelton.

The Superintendent of the Bureau states that it is proposed to make daily collections during the summer months in Rockaway, Far Rockaway, Rockaway Park, Arverne, Hammells and Belle Harbor. These places had daily collections during the summer months in 1910.

The increasing demands on the Bureau is shown partly by the following table of new buildings:

1906	4,070
1907	3,929
1908	3,896
1909	4,758
1910	4,138
1911 (four months)	2,232

The President of the Borough gives the following estimates of the population of Queens:

January, 1908	238,000
January, 1909	264,000
January, 1910	284,000
January, 1911	300,000

The present force of laborers and sweepers, and hired teams, horses and carts is stated to be as follows:

Laborers and Sweepers, at $2.50 per diem	182

Teams and Trucks, at $6 per diem (with driver)	40
Horses and Carts, at $3.50 per diem (with driver)	104
Teams and Sweepers, at $6 per diem (with driver)	7
Horses and Sprinklers, at $3.50 per diem (with driver)	7

The following table shows the amount necessary to carry the present force for the year:

Laborers and Sweepers.

Budget provision	$102,652 50
Expended to June 12, 1911 (138 days)	58,541 30
Balance on hand	44,111 20
Amount necessary to carry force from June 12, 1911 (174 days)	79,170 00
Amount of revenue bonds required	$35,058 80

Hired Teams, Horses and Carts.

Budget provision	$160,000 00
Expended to June 12, 1911 (138 days)	75,053 01
Balance on hand	$84,946 99
Amount necessary to carry force from June 12, 1911 (174 days)	109,081 00
Amount of revenue bonds required	$24,134 01

The total amount of revenue bonds required, therefore, is $59,192.81.

The proposed increases are under two appropriate accounts: No. 1,864, Wages, Temporary Employees, Laborers and Sweepers, and No. 1,865, Hired Teams, Horses and Carts. With the proposed increases, the accounts would stand for the year as follows:

1864. Wages, Temporary Employees, Laborers and Sweepers:

Budget provision	$102,652 50
Proposed revenue bond issue	35,058 80
	$137,711 30

The expenditures under this account for the year 1910 were as follows:

Budget	$90,101 87	
Revenue Bonds	26,620 49	
		$116,722 36

1865. Hired Teams, Horses and Carts:

Budget provision	$160,000 00
Proposed revenue bond issue	24,134 01
	$184,134 01

The expenditures under this account for the year 1910 were as follows:

Budget	$144,739 00	
Revenue bonds	24,229 28	
		$168,968 28

The budget provision for the Bureau of Street Cleaning in Richmond for the year 1911, is $225,307. Estimated on a population of 90,000, this gives $2.50 per capita. The per capita for Queens, estimated on a population of 300,000 and gross appropriation of $337,446, is $1.12. With the budget appropriation increased by $59,192.81 in special revenue bonds, the per capita in Queens would be $1.32.

I recommend the adoption of the attached resolutions granting the request to the extent of $59,192.81, and approving a schedule for the fund.

Respectfully, WM. A. PRENDERAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on March 28, 1911, requesting an issue of special revenue bonds in the sum of fifty-nine thousand five hundred and eighty-five dollars and fifty cents ($59,585.50), to be used by the President of the Borough of Queens for the purpose of providing means for the continuance of the operations of the Bureau of Street Cleaning, Borough of Queens, during 1911, at the present ratio, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment to the extent of fifty-nine thousand one hundred and ninety-two dollars and eighty-one cents ($59,192.81), and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding fifty-nine thousand one hundred and ninety-two dollars and eighty-one cents ($59,192.81), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for the office of the President of the Borough of Queens for the year 1911 as follows:

President of the Borough of Queens.

Bureau of Street Cleaning, Sweeping, Carting and Final Disposition, Revenue Bond Force—

Wages, Temporary Employees:	
Laborers and Sweepers, at $2.50 per diem (14,023 days)	$35,058 80
Hired Teams, Horses and Carts, Revenue Bond Force—	
Wages, Temporary Employees:	
Drivers with horse and sprinkler, at $3.50 per day Drivers with horse and cart, at $3.50 per day Drivers with team and truck, at $6 per day Drivers with team and sweeper, at $6 per day	$24,134 01

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Board of Education requesting, and report of the Corporate Stock Budget Committee recommending, that the resolution adopted June 10, 1910, which amended resolution adopted March 26, 1909, relative to the issue of $958,089.65 corporate stock for interior construction and equipment of school buildings and additions thereto, etc., be further amended by transferring the sum of $11,466 of the available balance for heating and ventilation for Public School 162, Brooklyn, to similar equipment items for which the funds allowed have been inadequate:

(On June 22, 1911, the request of the Board of Education for the above amendment was referred to said Committee.)

Board of Education, Park Avenue and 59th Street, New York, June 16, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—I have the honor to transmit herewith a certified copy of a report and resolution adopted by the Board of Education at a meeting held on the 14th inst., relative to amending resolutions adopted by the Board of Estimate and Apportionment on March 19 and 26, 1909, and amended June 10, 1910, authorizing the issue of corporate stock to an amount not exceeding $967,764.18, to provide means for the interior construction of public school buildings and additions thereto. Respectfully yours,

A. E. PALMER, Secretary, Board of Education.

To the Board of Education:

The Committee on Finance respectfully reports that it is in receipt of the following communication:

"June 2, 1911.

"Hon. John Greene, *Chairman, Committee on Finance:*

"Dear Sir—I have the honor to advise you that at a meeting of the Committee on Buildings held on May 29, 1911, it was ordered that the Committee on Finance be informed that it has been found that the funds allowed for the following work are inadequate for the purposes:

Work.	Appropriation.	Estimated Cost.	Amount Required.
"Public School 19, Brooklyn—			
Furniture	$11,625 00	$14,870 00	$3,255 00
"Public School 95, Manhattan—			
Furniture	22,875 00	25,991 00	3,116 00
"Public School 165, Brooklyn—			
Furniture	13,125 00	15,620 00	2,495 00
Temperature regulation	....	....	2,600 00

"It was further ordered that the Committee on Finance be informed that there are unexpended balances, as hereinafter stated, which are no longer required for the following work, and which it is desired to have made available for the purposes above mentioned:

"Public School 162, Brooklyn, heating and ventilating apparatus	$12,995 96
"Public School 17, Manhattan, interior equipment	8,748 35

"Respectfully yours,

"A EMERSON PALMER, Secretary, Board of Education."

Therefore, be it

Resolved, That the Board of Estimate and Apportionment be and it is hereby respectfully requested to amend the resolution adopted by it on March 19 and 26, 1909, and amended on June 10, 1910, authorizing the Comptroller to issue corporate stock of The City of New York to an amount not exceeding $967,764.18, to provide means for the interior construction and equipment of public school buildings and additions thereto, by striking therefrom the figures $45,000 for the heating and ventilating apparatus, Public School 162, Borough of Brooklyn, and inserting in place thereof the figures $34,534, and by inserting the figures $3,255 for Public School 19, Borough of Brooklyn; $3,116 for Public School 95, Borough of Manhattan; $2,495 for Public School 165, Borough of Brooklyn, and $2,600 for Public School 165, Borough of Brooklyn, for the purpose of furniture work and temperature regulation in the above-mentioned schools.

A true copy of report and resolution adopted by the Board of Education on June 14, 1911. A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 3, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 14, 1911, the Board of Education requested amendment of a resolution adopted by the Board of Estimate and Apportionment on June 10, 1910, authorizing the issue of corporate stock of The City of New York to an amount not exceeding $967,764.18, to provide means for the interior construction and equipment of public school buildings and additions thereto, etc. In connection therewith we report as follows:

The amount authorized was $958,089.65, instead of $967,764.18, as stated in the request.

Item 2, Equipment of Buildings, Borough of Brooklyn, in the resolution provided $46,000 for heating and ventilation, Public School 162. This account has an available balance of $12,995.96. It is proposed to transfer $11,466 of the amount to similar equipment items, for which the funds allowed have been inadequate, as follows:

Work.	Appropriation.	Estimated Cost.	Amount Required.
P. S. 19, Brooklyn—			
Furniture	$11,625 00	$14,870 00	$3,255 00
P. S. 95, Manhattan—			
Furniture	22,875 00	25,991 00	3,116 00
P. S. 165, Brooklyn—			
Furniture	13,125 00	15,620 00	2,495 00
Temperature regulation	....	....	2,600 00
			$11,466 00

We recommend that the request be granted by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That the following resolution adopted by the Board of Estimate and Apportionment on June 10, 1910:

"Resolved, That the following resolution adopted by the Board of Estimate and Apportionment March 26, 1909:

"'Resolved, That, pursuant to the provisions of section 169 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to the amount of eight hundred thousand dollars ($800,000), to provide means for the payment of awards and costs in sundry school site proceedings; for the discharge of sundry liabilities for equipment work already performed and in course of performance; for new work incidental to the completion of school buildings now under construction, etc., and the Comptroller be and is hereby authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding eight hundred thousand dollars ($800,000), in addition to the sum of two hundred thousand dollars ($200,000), authorized March 19, 1909, the proceeds whereof to be applied to the purposes aforesaid; the total sum of one million dollars ($1,000,000) to be expended in the manner and amounts described hereunder:'"

	$958,089 65

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a report of the Commissioner of Water Supply, Gas and Electricity, referring to the petition of the South Side Board of Trade of Brooklyn, relative to the validity of the franchise of the Edison Electric Illuminating Company in so far as it affects their operation in that section of Brooklyn and recommending that a municipal electric light and power plant be constructed and operated in the 30th Ward of Brooklyn in view of the excess rates charged which affects the City as well as the private consumer, stating that a municipal plant for obvious reasons would not be successful, but that it would be wise perhaps to instruct the Corporation Counsel to draft and present to the legislature a bill amending the laws of the law of 1905 by fixing the rate for electric current the same as in the Boroughs of Manhattan and The Bronx.

The Secretary was instructed to ascertain if the Corporation Counsel had rendered an opinion on the subject and if not to request that he forward one to the Board.

(On June 22, 1911, the above petition was referred to the Commissioner of Water Supply, Gas and Electricity.)

The Secretary presented the following communication from the Department of Education requesting the transfer of $10 within the appropriation for the year 1911, together with a report of the Comptroller recommending that said request be disapproved, as the proposed transfer is to provide $250 for a proposed grade of Deputy Superintendent of School Supplies at $2,200 per annum, the establishment of which grade was denied by the Board on July 6, 1911:

Department of Education, City of New York, Park avenue and 59th street, New York, June 24, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—It appears that as the result of action taken by the Board of Education at its meeting on the 14th instant in reference to promotions, etc., in the Bureau of Supplies (if the same is effectuated), there will be a deficit of $10 in Appropriation No. 1212, Office of the Superintendent of School Supplies, Salaries. Appropriation No. 1214, Office of the Superintendent of School Buildings, Salaries, is, however, in excess of its requirements, and the Bureau of Buildings has signified its consent to a transfer of $10 to Appropriation No. 1212. This matter was brought to the attention of the Committee on Supplies at its meeting on Thursday evening, and I was asked to forward a request for the transfer of $10, as above indicated. A report in reference to this transfer will be presented to the Board of Education for ratification at its meeting to be held on June 28. Yours very truly,

EGERTON L. WINTHROP, President, Board of Education.

City of New York, Department of Finance, Comptroller's Office, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 28, 1911, the Board of Education requested the transfer of $10 from the 1911 account No. 1214, Office of the Superintendent of School Buildings, Salaries, to No. 1212, Office of the Superintendent of School Supplies.

The $10 was to be transferred to provide $250 for a proposed grade of Deputy Superintendent of School Supplies, at $2,200 per annum. The request for the establishment of the grade was denied by the Board of Estimate and Apportionment on July 6, 1911.

I recommend, therefore, that the request be not approved.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the request of the Board of Education contained in a communication dated June 24, 1911, for the transfer of ten dollars ($10) from account No. 1214, Office of the Superintendent of School Buildings, Salaries, to account No. 1212, Office of the Superintendent of School Supplies, Salaries, for the year 1911, be and the same is hereby disapproved.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board fo Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Acting President of the Borough of Queens requesting, and report of the Comptroller recommending, approval of the schedules as revised, for the Office of the President of the Borough of Queens, for the year 1911, Bureau of Sewers, Street Improvement Force, by substituting a Rodman at $1,200 per annum for one at $1,050 per annum, to take effect as of June 9, 1911:

The City of New York, Offices Commissioner of Public Works of the Borough of Queens, Long Island City, June 23, 1911.

Hon. William J. Gaynor, *Mayor and Chairman, Board of Estimate and Apportionment:*

Dear Sir—Referring to resolution adopted by your honorable Board on June 1, 1911, establishing a schedule of engineering positions for employment in the Bureau of Sewers, this Department, on assessment work, we beg to ask for a revision as follows:

Present schedule—

Salaries, Regular Employees, Street Improvement Force:

Transitmen, 3 at	$1,500 00
Rodmen, 4 at	1,050 00
Mechanical Draftsman, 1 at	1,800 00
Topograhpical Draftsmen, 3 at	1,500 00
Topographical Draftsmen, 2 at	1,350 00
Topographical Draftsmen, 6 at	1,200 00
Inspectors of Sewer Construction, with knowledge of steel and concrete, 12 at	1,500 00
Inspectors of Sewer Construction (per diem), 20 at	4 00

Proposed schedule—

Salaries, Regular Employees, Street Improvement Force:

Transitmen, 3 at	$1,500 00
Rodman, 1 at	1,200 00
Rodmen, 3 at	1,050 00
Mechanical Draftsman, 1 at	1,800 00
Topograhpical Draftsmen, 3 at	1,500 00
Topographical Draftsmen, 2 at	1,350 00
Topographical Draftsmen, 6 at	1,200 00
Inspectors of Sewer Construction, with knowledge of steel and concrete, 12 at	1,500 00
Inspectors of Sewer Construction (per diem), 20 at	4 00

This modification is desired for the reason that on the preferred list of Rodmen at $1,200 per annum, the name of John O'Neil appeared, who has had considerable experience on sewer construction and it was desired to obtain his services in this Borough and he has been appointed at a salary of $1,200 per annum.

Respectfully, WALTER H. BUNN, Acting President, Borough of Queens.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 23, 1911, the Acting President of the Borough of Queens requested modification of the non-budgetary schedule for the wages of regular employees of the Street Improvement Force, in the Bureau of Sewers for the year 1911. In connection therewith I report as follows:

It is proposed to strike out a Rodman, at $1,050 per annum, and add one at $1,200. The position at $1,050 is vacant, and on June 9, 1911, an incumbent at the $1,200 rate was appointed from a Civil Service eligible list.

The following table shows the schedule changes in detail:

Line Number.	Schedule Transfer. Increase.	Schedule Transfer. Decrease.
Street Improvement Force—		
Salaries, Regular Employees:		
Rodmen, 4 at $1,050	....	$1,050 00
Rodman, at $1,200	$1,200 00	....

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the office of the President of the Borough of Queens, for the year 1911, to take effect as of June 9, 1911, as follows:

President of the Borough of Queens.

Bureau of Sewers, Street Improvement Force—

Salaries, Regular Employees:

Transitmen	3 at	$1,500 00
Rodman	1 at	1,200 00
Rodmen	3 at	1,050 00
Mechanical Draftsman	1 at	1,800 00
Topographical Draftsmen	3 at	1,500 00
Topographical Draftsmen	2 at	1,350 00
Topographical Draftsmen	6 at	1,200 00
Inspectors of Sewer Construction with knowledge of steel and concrete	12 at	1,500 00
Inspectors of Sewer Construction, per diem	20 at	4 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Bridges requesting, and report of the Comptroller relative to, the modification of salary schedules Nos. 91 and 126, supporting the appropriation made in the Budget for the year 1911, for said Department, providing for the increase in compensation of a Foreman Riveter from $1,800 to $2,100 per annum, and the elimination of a Bridge Tender at $900 per annum, involving the transfer of $150:

Department of Bridges, City of New York, 13-21 Park Row, Manhattan, July 3, 1911.

Hon. William A. Prendergast, *Comptroller, The City of New York,* 280 Broadway, New York, N. Y.:

Sir—I have to request a modification of the schedules supporting the Budget appropriation for the Department of Bridges for the year 1911, and involving a transfer of $300 effective as of July 1, 1911, as follows:

From

Bridges over Newtown Creek and in the Borough of Queens—	
Drop line item,	
91. Wages, Regular Employees:	
Bridge Tenders, 54 at $900	$48,600 00
Queensboro Bridge—	
Drop line item,	
126. Wages, Regular Employees:	
Foreman Riveter, 1 at	$1,800 00

To

Bridges over Newtown Creek and in the Borough of Queens—

Add line item to read,

91. Wages, Regular Employees:	
Bridge Tenders, 53 at $900	$47,700 00
Unassigned	600 00

Queensboro Bridge—

Add line item to read,

126. Wages, Regular Employees:	
Foreman Riveter, 1 at	$2,100 00

This request is made so that the pay of a Foreman Riveter on the Queensboro Bridge may be equalized with that of Foreman Riveter on the New York and Brooklyn Bridge. It is necessary that men of skill and efficiency be employed on the important bridges.

Copy of revised schedules affected herewith. Respectfully,

ARTHUR J. O'KEEFFE, Commissioner.

City of New York, Department of Finance, Comptroller's Office, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 3, 1911, the Commissioner of Bridges requested modification of two schedules for the wages of regular employees in his Department for 1911, involving a cash transfer of $150. In connection therewith I report as follows:

It is proposed to increase the compensation of a Foreman Riveter on the Queensboro Bridge from $1,800 to $2,100 per annum. The increase is to be provided for by dropping a Bridge Tender at $900 in the schedule for Bridges over Newtown Creek and in the Borough of Queens.

The Commissioner states the increase is to equalize the compensation of Foreman Riveters on the Queensboro and the New York and Brooklyn Bridges.

The following table shows the schedule changes in detail:

Code No.		Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
91.	Bridge Tenders, 54 at $900...	$900 00	......	$450 00	......
	Balance unassigned	......	$600 00	......	$300 00
126.	Foreman Riveters, 2 at $1,800.	1,800 00	......	900 00	......
	Foreman Riveter at $2,100....	......	2,100 00	......	1,050 00
		$2,700 00	$2,700 00	$1,350 00	$1,350 00

The attached resolutions, if adopted, will grant the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules as revised of the Department of Bridges, to become effective as of July 1, 1911, for the year 1911, as follows:

Department of Bridges.

Bridges over Newtown Creek and in the Borough of Queens—

91. Wages, Regular Employees:	
General Foreman	$2,000 00
Foreman Painter and Rigger	1,800 00

Laborer, 1 at $3 per day (365 days)	1,095 00
Laborers, 2 at $3 per day (303 days)	1,818 00
Laborers, 6 at $2.50 per day (365 days)	5,475 00
Laborers, 13 at $2.50 per day (303 days)	9,847 50
Unassigned balance	62 00
	$50,692 40

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves transfer of funds appropriated to the Department of Bridges for the year 1911, as follows:

From

Bridges over Newtown Creek and in the Borough of Queens—

91. Wages, Regular Employees	$150 00

To

Queensboro Bridge—

126. Wages, Regular Employees	$150 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Bridges requesting, and report of the Comptroller relative to, the revision of schedules for employees of said Department for the year 1911, Williamsburg Bridge Division, providing for the increase in compensation of a Foreman Riveter from $1,800 to $2,000 per annum:

Department of Bridges, City of New York, 13-21 Park Row, Manhattan, July 3, 1911.

Hon. William A. Prendergast, *Comptroller, The City of New York,* 280 Broadway, New York, N. Y.:

Sir—I have to request a modification of the schedule of Wages, Regular Employees, Williamsburg Bridge Division of the Department of Bridges, for the year 1911, which schedule was adopted by the Board of Estimate and Apportionment on March 30, 1911, effective as of July 1, 1911, as follows:

Drop line item reading:	
Foremen Riveters, 2 at	$1,800 00
Add line items to read:	
Foreman Riveter, 1 at	$2,100 00
Foreman Riveter, 1 at	1,800 00

This request is made so that the salary of one man in responsible charge may be equalized with that of men holding similar positions on the other large East River bridges.

Copy of revised schedule herewith. Respectfully,

ARTHUR J. O'KEEFFE, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 3, 1911, the Commissioner of Bridges requested modification of the non-budgetary schedule for the wages of regular employees in the Williamsburg Bridge Division for the year 1911. In connection therewith, I report as follows:

It is proposed to increase the compensation of a Foreman Riveter from $1,800 to $2,000 per annum. The Commissioner states that the increase is for equalization with the compensation paid to incumbents in similar positions on the other East River bridges.

The attached resolution, if adopted, will grant the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves the schedule, as revised, for the employees of the Department of Bridges, paid from other than budgetary funds, to be effective as of July 1, 1911, for the year 1911, as follows:

Department of Bridges.

Williamsburg Bridge Division—

Wages, Regular Employees:

Foreman Laborer, 1 at	$2,400 00
Foreman Laborer, 1 at	2,150 00
Foreman Laborer, 1 at	1,200 00
Foreman Riveter, 1 at	2,100 00
Foreman Riveter, 1 at	1,800 00
Foremen Carpenters, 2 at	1,500 00
Foremen Painters, 3 at	1,500 00
Foreman Brick Mason, 1 at	1,800 00
Foremen Linemen, 2 at	1,500 00
Riveters, 27, at, a day (276 days)	5 00
Stonecutter, 1, at, a day (276 days)	5 00
Riggers, 2, at, a day (276 days)	3 75
Housesmiths, 2, at, a day (276 days)	5 00
Bridge Mechanics, 2, at, a day (276 days)	5 00
Blacksmiths, 2, at, a day (276 days)	4 50
Ship Carpenter, 1, at, a day (276 days)	5 00
Carpenters, 10, at, a day (276 days)	5 00
Wiremen, 4, at, a day (365 days)	4 50
Wiremen, 4, at, a day (276 days)	4 50
Inspectors of Electric Lighting and Conductors, 2, at, a day (365 days)	4 50
Inspector of Masonry, 1, at, a day (276 days)	5 00
Pavers, 6, at, a day (276 days)	5 00
Rammers, 2, at, a day (276 days)	4 00
Blacksmith's Helper, 1, at, a week (52 weeks)	25 00
Blacksmith's Helpers, 2, at, a day (276 days)	3 00
Decorator, 1, at, a day (276 days)	4 50
Painters and Bridge Painters, 35, at, a day (276 days)	4 00
Watchmen, 5, at, a day (365 days)	2 50
Cleaners, 3, at, a day (365 days)	2 00
Attendants, 6, at, a day (365 days)	2 50
Laborers, 4, at, a day (365 days)	3 00
Laborers, 2, at, a day (312 days)	3 00
Laborers, 12, at, a day (365 days)	2 50
Laborers, 23, at, a day (312 days)	2 50
Brick Mason (Layer), 1, at, a day (276 days)	5 60

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Parks, Borough of The Bronx, requesting, and report of the Comptroller recommending, approval of the schedules, as revised, for said Department for the year 1911, Corporate Stock Accounts C-DP-311C and C-DP-312B, providing for additional time for foremen, etc.:

The City of New York, Department of Parks, Office of Commissioner for the Borough of The Bronx, Zbrowski Mansion, Claremont Park, June 28, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller,* 280 Broadway, New York City:

Sir—Kindly have revised the schedule on the following Corporate Stock Fund accounts:

C-DP-311C. Department of Parks, Borough of The Bronx, Improvement of Easterly and Westerly portion of Crotona Park. Add to Foreman, at $1,200, one-half month; add to double teams, at $4.50, 18 days.

Schedule as revised—

Foreman (2½ months)	at	$1,200 00
Gardeners (10 months)	at	900 00
Laborers (260 days)	at	2 50
Double teams (68 days)	at	4 50

C-DP-312B. Department of Parks, Borough of The Bronx. Road to connect Bronx Park system with roads in Botanical Garden. Add to Foreman, at $1,200, 28 days; add to Steam Roller Engineman, at $4.50, 18 days; add to Stokers, at $3, 18 days; Blasters, at $4, 10 days.

Schedule as revised—

Foremen (6 months, 28 days)	at	$1,200 00
Laborers (2,340 days)	at	2 50
Steam Roller Engineman (84 days)	at	4 50
Stokers (74 days)	at	3 00
Blasters (46 days)	at	4 00
Double teams (156 days)	at	4 50

Yours truly, T. J. HIGGINS, Commissioner of Parks.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a request of the Commissioner of Parks, Borough of The Bronx, under date of June 28, 1911, for modification of the corporate stock schedules, C-DP-311C, Improvement of Easterly and Westerly Portions of Crotona Park, and C-DP-312B, Road to Connect Bronx Park System with Roads in Botanical Gardens, I report as follows:

In No. 311C it is proposed to add a foremen at $1,200 per annum, for one-half month, and double teams at $4.50 per day for 18 days. In No. 312B additional days are asked for as follows:

Foreman, at, per annum (28 days)	$1,200 00
Steam Roller Engineman, at, per day (18 days)	4 50
Stokers. at, per day (18 days)	3 00
Blasters, at, per day (10 days)	4 00

edules for these improvements were based upon an estimate of the Chief Engineer. The Commissioner states that it was impossible at the time to estimate the exact number of days necessary to complete the work, for the reason that the nature of the excavation could not be determined.

Now that the improvements are well under way and the percentages of earth and rock excavation are known, the Commissioner states that with the additional time requested he can complete the work.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules as revised for the Department of Parks, Borough of The Bronx, for the year 1911, as follows:

Department of Parks, The Bronx.

Improvement of Easterly and Westerly Portions of Crotona Park—

C-DP-311C.	Foreman, at, per annum (2½ months)	$1,200 00
	Gardeners, at, per annum (10 months)	900 00

	Laborers, at, per diem (260 days)	2 50
	Double Teams, at, per diem (68 days)	4 50
	Road to Connect Bronx Park System with Roads in Botanical Garden—	
C-DP-312B.	Foreman, at, per annum (7 months)	$1,200 00
	Laborers, at, per diem (2,340 days)	2 50
	Steam Roller Engineman, at, per diem (84 days)	4 50
	Stokers, at, per diem (74 days)	3 00
	Blasters, at, per diem (46 days)	4 00
	Double Teams, at, per diem (156 days)	4 50

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Commissioner of Water Supply, Gas and Electricity submitting estimate of amounts required to be appropriated during 1911 (section 242 of the Charter) for the maintenance, extension and improvement of the water supply system, Borough of Brooklyn, and report of the Comptroller recommending that the additional sum of $950,141 be set aside and appropriated from the water revenues received in the Borough of Brooklyn during said year for this purpose, and that appropriations for salaries, for salaries of temporary employees, for wages regular employees, and for wages temporary employees be administered in accordance with the schedules approved by this Board:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, March 14, 1911.

Joseph Haag, Esq., *Secretary, Board of Estimate and Apportionment:*

Dear Sir—Herewith is transmitted an estimate of the amounts required to be apprpopriated, in pursuance of section 242 of the Charter, for the maintenance, extension and improvement of the water supply system of the Borough of Brooklyn.

A provisional allowance, estimated to be sufficient for the Department's needs for a period of three months, was made in December, and that amount, as well as the additional sums afterward requested for various purposes, is included.

Yours truly, HENRY S. THOMPSON, Commissioner.

Water Supply, All Boroughs, Administration, Office of Chief Engineer, Salaries and Wages.

No comparison between the estimate for 1911 and the appropriation and transfers for 1910 has been made. It is impossible to make such comparison, owing to the reorganization of the Department. The employees here included in the office of the Chief Engineer are charged to various accounts in 1910.

Schedule of Salaries.	Estimate for 1911.		
Title of Position.	Rate.	No. of Employees.	Amount.
Chief Engineer (part salary)	$10,000 00	1	$2,222 22
Consulting Engineer (⅜ salary)	4,000 00	1	1,500 00

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On March 14, 1911, the Commissioner of Water Supply, Gas and Electricity submitted his estimate for appropriations from the Brooklyn water revenues, pursuant to the provisions of section 242 of the Greater New York Charter, for the maintenance, extension and improvement of the water supply system of the

Borough of Brooklyn during 1911. A preliminary report on the estimate was submitted to your Board on April 4, 1911. I now report finally as follows:

The total of the estimates, as originally submitted was $2,403,226.82. On April 28, 1911, an additional appropriation of $3,900 was asked for, to provide for certain contingent expenses of the Bureau of Water Registrar, making the total $2,407,126.80. Of this amount, $1,285,150 has already been appropriated. An additional appropriation of $950,141 is herewith recommended, making a total allowance for 1911 of $2,235,291.

For the purposes of this report the estimate has been segregated into seventy-nine separate items. For the original detailed estimate no distinction was made between the requirement for the wages of regular and temporary employees, and all employees receiving compensation at an annual rate were provided for in salary schedules. For this reason the amounts requested as noted in the report differ from the items appearing in the Commissioner's estimate.

In my preliminary report I stated as follows:

"Owing to the reorganization of the maintenance and construction force, by the establishment of departmental divisions and the prorating of certain divisional payrolls against budget, corporate stock, and special or trust funds, an exact comparison cannot be made at present between the estimated requirements for 1911 and the actual expenditures for 1910."

Certain items for supplies and contingencies charged against budgetary accounts in 1910 are now charged against appropriations from the Brooklyn water revenues.

The total water revenues collected in the Borough of Brooklyn during the calendar years 1904 to 1910, inclusive, were as follows:

Calendar Year.	Collected by Bureau of Water Rates, Department of Water Supply, Gas and Electricity.	Collected by Bureau for Collection of Taxes.	Collected by Bureau for Collection of Assessments and Arrears.	Total Collections.
1904........................	$2,462,483 87	$82,907 11	$130,010 97	$2,675,401 95
1905........................	2,725,444 09	87,024 86	129,198 17	2,941,667 12
1906........................	2,942,102 82	114,523 66	133,463 08	3,190,089 56
1907........................	2,894.289 97	61,634 64	121,469 75	3,077,394 36
1908........................	2,854,007 25	106,615 60	93,864 65	3,054,487 50
1909........................	3,148,058 89	147,972 48	146,421 07	3,442,452 54
1910........................	3,258,114 96	166,966 10	264,419 50	3,689,500 56

It appears, therefore, that the 1911 water revenues should be more than ample to provide for all the estimated maintenance charges.

An examination of the estimated cost of the various items included in the Commissioner's request, compared with the approximate expenditures for similar items in 1910; and an analysis of the annual payroll cost of the existing salaries and wages schedules from the basis of recommendations as follows:

General Classification of Accounts.	Estimated Requirements for 1911.	Additional Appropriations Recommended in this Report.	Total Amount Recommended for 1911.	Approximate Expenditures and Outstanding Liabilities Against 1910 Appropriations.
Salaries and Wages...	$1,338,455 35	$627,071 00	$1,266,521 00	$1,221,074 53
General Supplies......	50,000 00	6,000 00	32,300 00	48,071 84
Purchase of Furniture and Fittings.........	14,391 47	650 00	13,500 00	2,132 26
Maintenance of Automobiles	4,100 00	850 00	2,250 00	1,642 10
Materials for Repairs and Replacements by Departmental Labor.	46,080 00	8,500 00	36,000 00	40,303 09

General Classification of Accounts.	Estimated Requirements for 1911.	Additional Appropriations Recommended in this Report.	Total Amount Recommended for 1911.	Approximate Expenditures and Outstanding Liabilities Against 1910 Appropriations.
Repairs and Replacements by Contract or Open Order.........	82,660 00	37,160 00	68,360 00	84,021 23
Apparatus, Machinery, Vehicles, Harness, etc.	6,700 00	50 00	5,350 00	3,695 41
Purchase of Auto-truck	2,000 00	2,000 00	2,000 00	....
Forage, Shoeing and Boarding Horses....	15,110 00	3,710 00	12,710 00	11,093 24
Purchase of Horses....	1,200 00	100 00	700 00	335 00
Hired Teams, Horses and Carts...........	15,790 00	5,200 00	12,000 00	9,641 00
Telephone Service.....	7,500 00	3,500 00	7,000 00	6,860 87
Taxes	45,000 00	37,500 00	45,000 00	39,086 14
Fuel	556,960 00	160,300 00	531,450 00	489,442 67
Fire Hydrant Rentals and Water Purchased	205,150 00	55,000 00	188,150 00	205,989 16
Contingencies	16,030 00	2,550 00	12,000 00	11,700 68
	$2,407,126 82	$950,141 00	$2,235,291 00	$2,175,089 22

The expenditures for 1908 and 1909, respectively, were $2,046,363 and $2,120,903. The increased cost for 1911 is offset by the increase in the amount of water pumped and the higher wages for laborers and mechanics.

The annual payroll cost of $1,307,168.15, on the basis of the existing schedules, prorated; the actual payroll charges from January 1 to May 31, 1911, together with estimated payroll requirements for the balance of 1911; and the total estimated payroll charges for the entire year are detailed in the following table:

Salaries and Wages.

Code No.	Title of Accounts.	Annual Payroll Cost of Existing Schedules as Prorated 1911.	Estimated Payrolls June 1, to December 31, on Schedule Basis 1911.	Actual Payroll Expenditures January 1, to May 31, 1911.	Total Estimated Requirements on Schedule Basis 1911.

		$1,307,168 15	$768,616 86	$500,924 97	$1,269,541 83

For 1911 there is a considerable increase in the wages paid to certain classes of Mechanics, in some instances amounting to $2 a day for each employee. The Enginemen in charge of pumping stations have been increased from $4.50 a day to $1,750 per annum. The force of the Water Registrar has also been greatly enlarged to meet the additional requirements of improved methods of accounting.

The allowances for the several salaries and wages accounts are detailed in the following table:

STATEMENT "B."

Salaries and Wages.

Code No.	Title of Account.	Departmental Estimate, 1911.	Recommended Allowance, 1911.	Already Appropriated, 1911.	Additional Appropriations Recommended, 1911.
	General Administration.				
S-208.	Salaries, Chief Engineer	$7,422 22	$7,163 00	$3,000 00	$4,163 00

Code No.	Title of Account.	Department-at Estimate, 1911.	Recommended Allowance, 1911.	Already Appropriated, 1911.	Additional Appropriations Recommended, 1911.

S-273.	Wages, Temporary Employees	1,935 00	1,200 00	1,000 00	200 00
	Maintenance, Distribution System.				
S 256.	Salaries	19,712 50	23,326 00	12,000 00	11,326 00
S-257.	Wages, Regular Employees	250,675 05	230,000 00	120,000 00	110,000 00

Code No.	Title of Account.	Departmental Estimate, 1911.	Recommended Allowance, 1911.	Already Appropriated, 1911.	Additional Appropriations Recommended, 1911.
S-274.	Wages, Temporary Employees	21,798 00	14,000 00	5,000 00	9,000 00
	Investigation of Water Waste.				
S-275.	Salaries	30,600 00	14,175 00	7,100 00	7,075 00
S-276.	Wages, Regular Employees	25,200 00	14,700 00	5,100 00	9,600 00
S-277.	Wages, Temporary Employees	700 00	500 00	200 00	300 00
		$1,338,455 35	$1,266,521 00	$639,450 00	$627,071 00

These allowances differ from the estimated requirements as follows:

The total amounts estimated for salaries have been recommended. The allowances for wages of regular employees have been slightly reduced below the estimates as a certain amount, due to lost time, will probably accrue during the remainder of the year. Certain of the estimated requirements for wages of temporary employees have also been reduced as the charges thus far made for 1911 against these accounts show that the schedule allowances are probably greater than will be required.

The total amount requested for supplies and contingent expenses in 1911 is $1,068,676.47, compared with estimated expenditures for 1910 of $954,014.69. The recommended allowances for 1911 aggregate $968,770.

No allowances have been made for general supplies or furniture and fittings for the Chief Engineer's office, as these items were in the tax levy Budget estimate. The items of Furniture and Fitting, and Maintenance of Automobiles, for Water Waste Investigations have also been omitted. The large increase in the aggregate of the several accounts for purchase of furniture and fittings is due to allowances already approved for alterations and additional equipment in the several divisions of the Bureau of Water Registrar.

Fuel.

The estimate for fuel amounts to $556,960. Of the sum, $554,800 is for 163,400 tons of coal for pumping stations. The balance is for fuel for use on the watersheds and in the maintenance of the distribution system.

The original estimate for pumping station coal was amended for 150,610 tons, at a cost of $530,110, and the requested allowance therefore has been reduced to $530,000.

The coal consumption at all pumping stations during 1908, 1909 and 1910, including coal delivered to the contractor at Jameco, was as follows:

Year.	Coal Consumed, Gross Tons.	Water Pumped, U. S. Gallons.
1908	98,223.63	102,049,203,929
1909	100,881.44	105,648,366,000
1910	118,894.00	110,998,470,000

The stations at Hook Creek and Baldwins did not begin operating until July 22, 1910, and October 28, 1910, respectively. Had these stations been in operation for the full year an additional 850 tons of coal would have been consumed, giving total requirements for 1910 of 119,744 tons.

The report of the Department for the quarter ending March 31, 1911, shows an increased consumption of coal at all stations over the corresponding quarter of 1910, amounting to two and eight-tenths per cent. On this basis the consumption of coal in 1911 would be approximately 2,364 tons per week, or 122,947 tons per annum.

Additional coal contracts are being prepared which, together with the contracts now in force, provide for the estimated requirements up to May 1, 1912, and full bunkers at all stations on that date, to allow for the necessary coal prior to deliveries under the 1912 contracts. Averaging the bunker capacity of the several stations gives a period to be provided for from January 1, 1910, of approximately 75 weeks.

Including the proposed contracts, the amount of coal available for this period will be as follows:

	Tons.
Coal delivered in 1911 on contracts certified against 1910 appropriations......	25,833
Contracts already awarded in 1911..................................	91,310
Proposed additional contracts	59,300
Total	176,443

On this basis the weekly and annual allowance for the 1911-1912 period would be approximately 2,353 tons per week, or 122,350 tons per annum, against the estimated requirements of 2,364 tons per week and 122,949 tons per annum.

The amount required to be appropriated for the purchase of coal is estimated as follows:

Contracts already certified in 1911................................	$329,300 00
Estimated cost of proposed contracts................................	200,810 00
Total..	$530,110 00

A comparison based on the cost of coal consumed in 1910 shows as follows:

Actual cost of coal consumed in 1910................................	$417,782 00
Add 2.8 per cent. for additional consumption in 1911..................	11,699 99
Total estimated cost in 1911...	$429,480 00
Approximate cost per week in 1911..................................	$8,260 00
Cost for 75 weeks, 1911-1912..	$619,500 00
Deduct cost of coal delivered in 1911 charged to 1910..................	92,209 00
Estimated charge for 1911-1912, based on 1910 prices..................	$527,291 00

As the cost of the coal thus far contracted for in 1911 shows a considerable increase over the prices paid in 1910, the amended request for $530,000 appears to be no greater than the probably needs. The full amount of this request is therefore recommended for allowance.

The total amount requested for repairs and replacements is $82,660. The allowances recommended aggregate $68,360, distributed as follows:

	Estimate.	Recommended.
Repairs at Pumping Stations	$58,300 00	$58,000 00
Repairs on Watersheds	360 00	360 00
Repairs to Distribution System	24,000 00	10,000 00
Total..	$82,660 00	$68,360 00

The original estimate for repairs at pumping stations has been revised, owing to changed conditions. The present needs are stated to be as follows:

In making up the amounts requested in the Water Revenue Budget for 1911 for Maintenance of Pumping Stations, which includes the repairs to engines, boilers, piping, buildings, etc., it was considered that the special work that would be required was the repairs to the No. 2 Worthington 20 m. g. engine, which was known to have a broken water end, and which would have to be completely taken down and rebuilt. It was assumed at that time that $10,000 would be required for this work, and that approximately $15,000 would be required for the miscellaneous work of repairs to engines, boilers and piping.

Since this estimate was made, the following conditions have arisen at Ridgewood:

The No. 2 pump was in such bad condition that it was practically impossible to run it and when run it only delivered about 6 million gallons a day as compared with a nominal capacity of 20 million gallons per day.

In March, the No. 3 Beam engine cracked its shaft and was put entirely out of commission, the repairs for this engine requiring several months.

In January, owing to the crippled condition of the Ridgewood plant, it was necessary to order the contractors for the new plant to work overtime, and to charge this overtime to repairs to the plant, as they were necessitated by the condition of the plant.

Since April it has been necessary to pay the contractors to run one of the new pumps before the completion of the same, likewise, owing to the condition of the plant, this being necessitated specially by the cracking of the shaft of the No. 3 Beam engine.

Under present conditions, the cost of repairs for engines for 1911 may be estimated as follows:

For repairs to No. 2 Worthington engine, to be done under contract......	$15,000 00
For repairs to No. 3 Beam engine..	3,000 00
For overtime work on new pump	2,500 00
For payment for running new pump prior to completion of same.........	5,500 00
General Repairs to engines, boilers, piping, etc.........................	12,000 00
Repairs to buildings	20,000 00
Total..	$58,000 00

The item of $20,000 for general repairs to buildings is to cover the repairs to approximately 30 pumping stations which have had comparatively little in the way of repairs in recent years and are in need of thorough overhauling.

Plans for additions, alterations and repairs to pumping stations, at an estimated cost of $65,000, have already been approved, $45,000 to be charged against corporate stock funds and $20,000 against the appropriation from water revenues.

In view of the existing conditions at the Ridgewood station the entire amount of the amended request has been recommended.

The item for Repairs on Watersheds is to cover minor repairs to buildings and plumbing.

The segregation of the $24,000 requested for Repairs to Distribution System, compared with the amounts charged against the 1910 appropriation, is as follows:

	Estimate, 1911.	Expenditures and Outstanding Liabilities, 1910.
Repairs to pavements..................................	$5,000 00	$4,823 26
Repairs to buildings	3,000 00	161 20
Repairs to small mains..................................	....	564 29
Setting pressure gauges..................................	....	691 00
Painting hydrants	6,000 00	....
Cleaning mains	10,000 00	59,917 00
	$24,000 00	$66,156 75

The item of $59,917 expended in 1910 covers a contract for cleaning small mains, work under which is not yet completed. The $6,000 item in the request is for painting 15,000 hydrants at 40 cents each. It does not appear necessary that all this work should be done in one year. The item for repairing pavements is supported by the 1910 cost for similar work, but the request for repairs to buildings is admitted to be more than will probably be needed. An allowance of $10,000 will probably be ample to provide for repairs and replacements during the year.

The recommended allowances for the several items of supplies and contingent expenses in 1911, together with the amounts already appropriated, and the additional appropriations recommended, are shown in detail in the following table:

Code No	Title of Account.	Departmental Estimate, 1911.	Recommended Allowance, 1911.	Already Appropriated, 1911.	Additional Appropriation Recommended, 1911.

Resolved, That the appropriations hereby made to the Department of Water Supply, Gas and Electricity for Salaries, for Salaries, Temporary Employees, for Wages, Regular Employees and for Wages, Temporary Employees, shall be administered by the Commissioner in accordance with itemized schedules of Salaries, Salaries, Temporary Employees, Wages, Regular Employees, and Wages, Temporary Employees, duly approved by the Board of Estimate and Apportionment.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen, requesting the issue of $12,020 special revenue bonds (subdivision 8, section 188 of the Charter) to provide for the salaries of help in the Central Office, Manhattan, the Kings County Hospital, the New York City Home for Aged and Infirm, Brooklyn and the Cumberland Street Hospital, Department of Public Charities, from July 1 to December 31, 1911, together with a report of the Comptroller, to whom, on June 29, 1911, this application was referred, recommending an issue of $11,520 for this purpose; also recommending approval of schedules for said fund:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of twelve thousand and twenty dollars ($12,020), the proceeds whereof to be used by the Department of Public Charities for the purpose of paying salaries of help in the Central Office, Manhattan, Kings County Hospital, New York City Home for the Aged and Infirm (Brooklyn Division), and the Cumberland Street Hospital from July 1 to December 31, 1911.

Adopted by the Board of Aldermen June 13, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 13, 1911, the Board of Aldermen adopted a resolution requesting special revenue bonds in the sum of $12,020, the proceeds to be used by the Department of Charities for the payment of salaries in several divisions of the department from July 1 to December 31, 1911. In connection therewith I report as follows:

The request involves provision for the following items:

Central Office, Manhattan.	
General Medical Superintendent, increase from $5,000 to $6,000 per annum	$500 00
Kings County Hospital.	
Trained Nurses, 7, increased from $600 to $750 per annum	525 00
Additional Trained Nurses, 10, at $600 per annum	3,000 00
Male Hospital Helpers, 20, at $300 per annum	3,000 00
Female Hospital Helpers, 20, at $240 per annum	2,400 00
Home for Aged and Infirm, Brooklyn.	
Trained Nurse, 1, increased from $600 to $750 per annum	75 00
Male Hospital Helpers, 6, at $300 per annum	900 00
Female Hospital Helpers, 6, at $240 per annum	720 00
Cumberland Street Hospital, Brooklyn.	
Deputy Medical Superintendent, 1, at $1,800 per annum	900 00
	$12,020 00

The grade of General Medical Superintendent at $6,000 per annum has been recommended by the Board of Estimate and Apportionment for establishment, pursuant to the provisions of section 56 of the Greater New York Charter, but the grade has not been fixed by the Board of Aldermen. No action, therefore, can be taken at this time upon this item in the request.

The salary increases are for the following Nurses:

Miss Annie Collimore, in charge of the Tuberculosis Division, Kings County Hospital. Appointed as Pupil Nurse on January 15, 1905, at $120 per annum, and promoted November 15, 1907, to Trained Nurse at $600.

Miss Katherine S. Read, Acting Assistant to the Superintendent of the Training School, Kings County Hospital. Appointed as Pupil Nurse on July 17, 1903, at $120 per annum, and promoted to Trained Nurse on February 1, 1908, at $600.

Miss Lillie O'Sullivan, in charge of the Training of Probationers, and assistant in the Women's Surgical Division, Kings County Hospital. Appointed as Pupil Nurse on July 1, 1905, at $120 per annum, and promoted to Trained Nurse on April 1, 1908, at $600.

Miss Susan E. James, in charge of the Male Medical Division, Kings County Hospital. Appointed as Pupil Nurse on November 1, 1905, at $120 per annum, and promoted on September 1, 1908, to Trained Nurse, at $600.

Miss Maude J. Kean, in charge of the Operating Room, Kings County Hospital. Appointed as Trained Nurse on October 16, 1909, at $600 per annum.

Miss Annie Black, in charge of the Maternity Service, Kings County Hospital. Appointed Pupil Nurse on November 1, 1905, at $120 per annum, and promoted on August 1, 1908, to Trained Nurse, at $600.

Miss Helfrid Olsson, in charge of the Male Surgical Division, Kings County Hospital. Appointed as Pupil Nurse on May 15, 1906, at $120 per annum, and promoted to Trained Nurse on November 5, 1908, at $600.

Miss Martha E. Allen, in charge of the Women's Hospital and Female Neurological Hospital. Appointed as Trained Nurse on March 16, 1908, at the Home for Aged, Brooklyn, at $600 per annum.

The Commissioner states that the salary increases proposed are merited by length of service and the efficiency of the incumbents.

It is stated that the present force of Nurses and Hospital Helpers at the Kings County Hospital and the Home for Aged and Infirm is inadequate for the proper care and supervision of the inmates of the institutions.

It is proposed to transfer the Superintendent of the Cumberland Street Hospital to the Kings County Hospital, without change in compensation. A Deputy Medical Superintendent, at $1,800 per annum, is to be placed in charge of the Cumberland Street Hospital.

The attached resolutions, if adopted, will grant the request to the extent of $11,520, and approve a schedule for the fund.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, the resolution adopted by the Board of Aldermen on June 13, 1911, requesting an issue of special revenue bonds in the sum of twelve thousand and twenty dollars ($12,020), the proceeds whereof to be used by the Department of Public Charities for the purpose of paying salaries of help in the Central Office, Manhattan, Kings County Hospital, New York City Home for the Aged and Infirm (Brooklyn Division), and the Cumberland Street Hospital from July 1 to December 31, 1911, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment to the extent of eleven thousand five hundred and twenty dollars ($11,520), and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding eleven thousand five hundred and twenty dollars ($11,520), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, the Board of Estimate and Apportionment hereby approves of the schedules for the Department of Public Charities for the year 1911, as follows:

Department of Public Charities.

Institutions, Brooklyn and Queens, Kings County Hospital—
Wages, Regular Employees, Special Revenue Bond Force:
Trained Nurses, 10 at $600 per annum.
Wages, Temporary Employees, Special Revenue Bond Force:
Hospital Helpers, at $300 per annum (120 months).
Hospital Helpers, at $240 per annum (120 months).
Salary Increases, Regular Employees, to be paid from Special Revenue Bonds:
Trained Nurses, 7 from $600 to $750.................................... 1,050 00
Home for Aged and Infirm—
Wages, Temporary Employees, Special Revenue Bond Force:
Hospital Helpers, at $300 per annum (36 months).
Hospital Helpers, at $240 per annum (36 months).
Salary Increase, Regular Employees, to be paid from Special Revenue Bonds:
Trained Nurse, 1 from $600 to $750.................................... 150 00

Cumberland Street Hospital—
Salaries, Special Revenue Bond Force:
Deputy Medical Superintendent, at $1,800 per annum.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Board of Education requesting, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($40,000) for installing electric equipment in Washington Irving High School, Manhattan, under the jurisdiction of the Department of Education.

Board of Education, Park Avenue and 59th Street, New York, June 28, 1911.

Hon. W. A. Prendergast, *Comptroller:*

Dear Sir—I beg to advise you of the receipt of a communication from Mr. C. B. J. Snyder, Superintendent of School Buildings, under date of June 27, 1911, reading as follows:

"I am forwarding herewith a preliminary set of plans and specifications for installing electric equipment in Washington Irving High School, Borough of Manhattan, for transmission to the Comptroller, to be presented to the Board of Estimate and Apportionment, in accordance with the resolution adopted by that Board on January 5, 1911.

"The approved set of plans and specifications from the Department of Water Supply, Gas and Electricity will be substituted for the above on Thursday, June 29, 1911.

"Approximate cost, $40,000."

The plans and specifications referred to in the foregoing communication are transmitted herewith.

Respectfully yours, A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 28, 1911, the Board of Education requested approval of plans, specifications and estimated cost of $40,000, for installing electric equipment in Washington Irving High School, Borough of Manhattan.

An examination of the plans and specifications shows that they include the furnishing and installation of all wiring for electric light and power, lighting fixtures, electric bells and gongs, electric program clock and telephones and fire alarms.

The plans and specifications are complete and satisfactory, and have been approved by the Department of Water Supply, Gas and Electricity. The estimate of cost is reasonable.

The cost of the work is to be charged to the corporate stock fund entitled, "C-DE-84, Erection of Washington Irving High School, Manhattan." The appropriation was approved by the Board of Estimate and Apportionment on March 11, 1910. There is a sufficient balance in the fund for the proposed work.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted on June 3, 1910, hereby approves the plans, specifications and estimate of cost, forty thousand dollars ($40,000), for installing electric equipment in Washington Irving High School, Borough of Manhattan, under the jurisdiction of the Department of Education.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Board of Education requesting, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of the specifications for furnishing and delivering new pianos to various schools in the Boroughs of Manhattan, The Bronx, Brooklyn and Queens, Department of Education, at the following estimates of cost:

Item No. 1—Nineteen new upright pianos, $5,035.
Item No. 2—Four new miniature grand pianos, $1,940.
Item No. 3—Eleven new concert grand pianos, $7,300.

Board of Education, Park Avenue and 59th Street, New York, June 6, 1911.

Hon. W. A. PRENDERGAST, *Comptroller:*

Dear Sir—I beg to advise you of the receipt of a communication from Mr. C. B. J. Snyder, Superintendent of School Buildings, under date of June 6, 1911, reading as follows:

"I am forwarding herewith the specifications for furnishing and delivering new pianos to various schools in the Boroughs of Manhattan, The Bronx, Brooklyn and Queens, for transmission to the Comptroller, to be presented to the Board of Estimate and Apportionment in compliance with the resolution adopted by that Board on January 5, 1911.

"Approximate cost—Item 1, $5,035; Item 2, $1,940; Item 3, $7,300."

The specifications referred to in the foregoing communication are transmitted herewith. Respectfully yours, A. E. PALMER, Secretary, Board of Trustees.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 6, 1911, the Board of Education requested the approval of specifications and estimates of cost, Item 1, $5,035; Item 2, $1,940, and Item 3, $7,300, for furnishing and delivering new pianos to various public schools in the Boroughs of Manhattan, The Bronx, Brooklyn and Queens.

The specifications provide for the furnishing and delivering of (Item 1) nineteen new upright pianos, (Item 2) four new miniature grand pianos, and (Item 3) eleven new concert grand pianos to various public schools that are nearing completion or have been completed within the last few years .

The specifications are the same as those used by the Board of Education in 1909 when the last lot of pianos was purchased.

The practice of the Board of Education in purchasing pianos is to make awards to several bidders, after obtaining the approval of the Board of Estimate and Apportionment, and not to award the lot to the lowest bidder. As a result many bids are received, giving a large variety of makes of pianos.

As a protection to the City that the bids are comparable with wholesale prices, a clause in the contract requires each bidder to submit with his bid a statement in the form of an affidavit, executed before a notary public and certified to by a certified public accountant, showing the average prices obtained by the bidder in the wholesale trade, exclusive of sales to his own retail stores, for instruments of like grade, size and quality.

The above statement is to be compiled from wholesale sales during the three months next prior to the date of the bid.

In addition, it has been the practice of the Department of Finance to employ an expert to inspect the pianos offered by the bidders and report on the quality and value of each make of piano offered, prior to the approval of the awards by the Board of Estimate and Apportionment..

The estimates of cost submitted, as compared with the prices paid for similar pianos, are reasonable.

The cost of these pianos is to be charged against the corporate stock funds entitled Sundry Pianos for Use in Schools, C-DE-83A, Manhattan; C-DE-83B, The Bronx; C-DE-83C, Brooklyn, and C-DE-83D, Queens. There are sufficient available balances in the funds for the proposed expenditure.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves the specifications for furnishing and delivering new pianos to various schools in the Boroughs of Manhattan, The Bronx, Brooklyn and Queens, and estimates of cost as follows:

Item 1. Nineteen new upright pianos, five thousand and thirty-five dollars ($5,035).

Item 2. Four new miniature grand pianos, one thousand nine hundred and forty dollars ($1,940).

Item 3. Eleven new concert grand pianos, seven thousand three hundred dollars ($7,300.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Parks, Borough of The Bronx, requesting, and report of the Comptroller recommending, approval of the plans, specifications and estimate of cost ($6,000) for completing the grading and for laying asphalt block pavement on the unpaved portions of the roadway on the southerly side of the Bronx and Pelham parkway, from White Plains road to the bridge over the tracks of the New York, New Haven and Hartford Railroad Company, Borough of The Bronx, provided there be included in the contract and specifications a provision for the retention of a cash fund, etc. This work to be done under the jurisdiction of said Department:

Department of Parks, Borough of The Bronx, Office of Chief Engineer, Zbrowski Mansion, Claremont Park, June 21, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller,* 280 Broadway, New York City:

Sir—Pursuant to resolution adopted by the Board of Estimate and Apportionment June 3, 1910, I submit herewith by order of the Commissioner of Parks for the Borough of The Bronx, plans and specifications:

"For furnishing all the labor and materials for completing the grading and for laying asphalt block pavement on the unpaved portions of the roadway on the southerly side of the Bronx and Pelham parkway, from White Plains road to the bridge over the tracks of the New York, New Haven and Hartford Railroad, Borough of The Bronx."

You will notice that in these specifications I have not arranged to withhold any portion of the final payment, but have required a bond of twenty per cent. of the whole contract. The reason for this is that a portion of this roadway heretofore paved did not require anything except the bond, and we have reason to believe the same parties will have this work and there will be no necessity for withholding any of the final payment.

This work is but a very small part of the entire road, which was paved two years ago, but which we were unable to complete owing to the fact that the New York, Westchester and Boston Railroad was being put through a portion of it, which work has just been completed. Yours truly,

MARTIN SCHENCK, Chief Engineer of Parks, Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 21, 1911, the Chief Engineer of the Department of Parks, Borough of The Bronx, by order of the Commissioner of Parks for the Borough, requested approval of plans, specifications and estimated cost of $6,000 for completing the grading and for laying asphalt block pavement on the unpaved portions of the roadway on the southerly side of the Bronx and Pelham parkway, from White Plains road to the bridge over the tracks of the New York, New Haven and Hartford Railroad Company, Borough of The Bronx.

The Bronx and Pelham parkway has a width of 400 feet and when completed will have three roadways, the main one in the centre and service roads on either side. The roadway on the southerly side, with the exception of two short stretches, where the construction of the New York, Westchester and Boston Railway intervened, was paved with asphalt block pavement during 1910. The present contract is for the paving of these two stretches to make the new asphalt block pavement continuous from White Plains road to the tracks of the New York, New Haven and Hartford Railroad Company.

The contract provides that the contractor shall keep the pavement in good condition for a period of five years and that he shall furnish a guaranty bond of 20 per cent. of the contract price for the faithful performance of the repair obligation.

It does not, however, provide for the retention of any cash fund against which the Commissioner can draw in the event of failure on the part of the contractor to fulfill the repair condition. In my opinion such a fund should be available.

I recommend, therefore, that the contract and specifications be amended to provide that 5 per cent. of the cost of the work be retained for this purpose for a period of five years from the date of the completion of the work.

Otherwise the plans and specifications are satisfactory. The estimate of cost is reasonable.

The resolution hereto attached, if adopted, will carry the foregoing recommendation into effect. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves of the plans, specifications and estimate of cost, six thousand dollars ($6,000), for furnishing all the labor and material for completing the grading and for laying asphalt block pavement on the unpaved portions of the roadway on the southerly side of the Bronx and Pelham parkway, from White Plains road to the bridge over the tracks of the New York, New Haven and Hartford Railroad Company, Borough of The Bronx, under the jurisdiction of the Department of Parks, Borough of The Bronx, provided that there be included in the contract and specifications a provision that five (5) per cent. of the moneys accruing to the contractor under the contract shall be retained and withheld for five (5) years from the date of the completion of the work, the Commissioner to have the right, should the contractor fail to make the necessary repairs, to purchase materials or employ men to make the said repairs and to charge the cost thereof against any sum of money withheld by the City as provided above.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Public Charities requesting, and report of the Comptroller, recommending approval, pursuant to resolution adopted June 3, 1910, of the plans and specifications, as amended, for the erection and equipment of a new laundry building at the City Hospital, Blackwells Island, Department of Public Charities, at an estimated cost of $100,000:

Department of Public Charities of The City of New York, Foot of East 26th Street, June 21, 1911.

Hon. William A. Prendergast, *Comptroller,* 280 Broadway, New York City:

Sir—In accordance with a resolution adopted by the Board of Estimate and Apportionment on January 5, 1911, directing that all City departments, authorized by the Board of Estimate and Apportionment to incur obligations and execute contracts payable out of corporate stock authorized to be issued in the Corporate Stock Budget, adopted June 3, 1910, submit to the Comptroller of The City of New York, for report to the Board of Estimate and Apportionment, all plans, specifications and estimates of cost prior to advertising for bids upon public works, payable out of such coroprate stock, I beg to submit for your consideration the plans and specifications for the following:

All the labor and material required for the erection and equipment of a new laundry building at the City Hospital, Blackwells Island.

This expenditure is chargeable to the Department of Public Charities Building Fund, C-CH-32A, and estimated cost is $100,000.

Trusting that you will take prompt and favorable action on this request, I am,

Respectfully yours, M. J. DRUMMOND, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 21, 1911, the Commissioner of Public Charities requested approval of plans, specifications and estimated cost of $100,000, for furnishing all the labor and material required for the erection and equipment of a new laundry building at the City Hospital, Blackwells Island.

The building is to be about 65 feet long by 59 feet wide, and of three stories and basement. The plans and specifications provide for the erection of a building to match in appearance the kitchen building adjoining. The necessary equipment for laundry purposes is also provided for.

The plans and specifications as submitted were incomplete in several respects, but have been corrected and completed. As amended they appear to be satisfactory. The estimate of cost also appears to be reasonable.

The cost is to be charged to the corporate stock fund C-CH-32A, for the erection and equipment of a new laundry building, City Hospital, Blackwells Island. The appropriation was approved by the Board of Estimate and Apportionment on June 3, 1910.

The total appropriation of $100,000 is available.

I recommend the adoption of the attached resolution approving the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves the plans and specifications (as amended) and the estimate of cost, one hundred thousand dollars ($100,000), for furnishing all the labor and material required for the erection and equipment of a new laundry building at the City Hospital, Blackwells Island, under the jurisdiction of the Department of Public Charities.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmonod—16.

The Secretary presented the following communication from the Board of Trustees of the Bellevue and Allied Hospitals, requesting, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of the plan for tree guards and gratings to be placed around twenty-five trees in front of Pavilions A and B and the Pathological building of new Bellevue Hospital, and that said Board of Trustees be authorized to accept the bid of the Hudson River Iron Works of New York to furnish and set said tree guards and gratings, painted one coat before and after erection, for the sum of $725:

Bellevue and Allied Hospitals, Office of the Board of Trustees, 1st Avenue and 26th Street, New York, June 22, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller, Department of Finance,* 280 Broadway, New York City:

Sir—Enclosed are copies of three estimates received for the construction of tree guards and gratings for twenty-five trees which have been planted in front of Pavilions A and B and the Pathological building of the new Bellevue Hospital. Will you kindly grant authority for the acceptance of the lowest bid. A plan of the guards and gratings is also enclosed. Respectfully,

J. K. PAULDING, Secretary, Board of Trustees.

McKim, Mead & White, 160 5th Avenue, New York, June 20, 1911.

Mr. J. K. PAULDING, *Secretary, Board of Trustees,* Bellevue and Allied Hospitals:

Dear Sir—We send enclosed copies of three separate estimates which we have received for the tree guards and gratings for twenty-five trees in front of Pavilions A and B and Pathological Department, which are based on our three-quarter-inch detail of the same, which we have already sent you. These three estimates are on the basis of finishing the work within two weeks after having received the order therefor. Yours very truly, McKIM, MEAD & WHITE.

John Pirkl Iron Works, 240-246 North 10th Street, 274-284 Union Avenue, Brooklyn, N. Y., June 16, 1911.

Messrs. McKIM, MEAD & WHITE, 160 5th Avenue, New York, N. Y.:

Gentlemen—We will furnish and set at Bellevue Hospital twenty-five (25) tree guards for the sum of two hundred and eighty-five dollars ($285), twenty-five (25) gratings for the sum of four hundred and fifty dollars ($450).

All to be made according to your drawing and to have one coat of paint.

We can do this work within two weeks' time.

Hoping to be favored with your order, we remain, Yours respectfully,

JOHN PIRKL IRON WORKS, G. LEONHARD SCHNEPF, Treasurer.

Hudson River Iron Works, 367 and 369 West 11th Street, New York, June 20, 1911, Re Bellevue Hospital.

Messrs. McKim, Mead & White, *Architects,* 160 5th Avenue, N. Y. City:

Gentlemen—My estimate to furnish and set twenty-five tree guards and gratings, painted one coat before and one coat after erection, as per your three-quarter-inch scale detail drawing, at the above building, amounts to seven hundred and twenty-five dollars ($725).

If the gratings are omitted deduct three hundred and twenty-five dollars ($325) from the above estimate. Yours very truly, CHAS. H. FOX.

Lieberman & Sanford Company, 627 West 57th Street, New York, June 15, 1911, Re Bellevue Hospital.

Messrs. McKim, Mead & White, *Architects,* 160 5th Avenue, New York City:

Dear Sirs—We will be pleased to furnish and set complete for you the following ornamental iron work, painted two (2) shop coats, all as per your three-quarter-inch scale detail.

Twenty-five (25) tree guards for the sum of four hundred and fifty ($450) dollars.

Twenty-five (25) gratings for the sum of six hundred and twenty-five ($625) dollars.

We would agree to complete this work in two (2) weeks and hope that you will be able to give us the order.

We thank you for the inquiry and should be pleased to submit you estimates whenever you are in the market for ornamental iron work. Thanking you, we remain,

Yours very truly,

LIEBERMAN & SANFORD COMPANY, M. Kidd, Vice-President.

City of New York, Department of Finance, Comptroller's Office, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 22, 1911, the Secretary of the Board of Trustees, Bellevue and Allied Hospitals transmitted for approval a plan or drawing for tree guards and gratings to be placed around twenty-five trees in front of Pavilions A and B and the Pathological Building of the new Bellevue Hospital; together with copies of three estimates therefor, and requested that authority be granted for acceptance of the lowest bid.

Fifteen of the trees have been planted on the sidewalk in front of the Pathological Building, at the southeast corner of 29th street and 1st avenue, and ten on the north sidewalk near the foot of East 26th street.

If the trees are to be preserved, the guards should be placed around them at once.

Semicircular spaces have been left in the new cement sidewalks in which the trees have been set out. These ground spaces are to be covered with iron gratings which are designed to prevent children from digging up and playing in the soil around the roots of the trees.

The lowest bid of $725, made by the Hudson River Iron Works, 367 and 369 West 11th street, New York, for furnishing, setting and painting the twenty-five tree guards and gratings, is considered reasonable.

The request for authority to accept this bid in my opinion may properly be granted.

The cost of the work will be chargeable to a corporate stock fund of $9,000 entitled "C-BH-15," Laying Out and Planting Trees at Bellevue Hospital, etc." The appropriation was approved by the Board of Estimate and Apportionment on June 3, 1910.

I recommend the adoption of the resolution hereto attached.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves of the plans and authorizes the Board of Trustees of Bellevue and Allied Hospitals to accept the bid of the Hudson River Iron Works, of 367 and 369 West 11th street, New York, to furnish and set twenty-five tree guards and gratings, painted one coat before and one coat after erection, as per detail drawing approved, for the sum of seven hundred and twenty-five dollars ($725.)

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Alder-

men and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following report of the Comptroller, recommending that the resolution adopted by the Board on May 11, 1911, authorizing the purchase for $4,000 of property on the northerly side of Halsey street, distant easterly 175 feet from the northerly side of Yates (now Sumner) avenue and Halsey street, Brooklyn, for the use of the Fire Department, be rescinded, for the reason that the owner cannot give good title to the property because of certain restrictions, and further recommending that the Board authorize the purchase of property on the northerly side of Marion street, 125 feet westerly from the corner formed by the intersection of the northerly side of Marion street with the westerly side of Reid avenue, for the sum of $2,900, as a substitute site:

City of New York, Department of Finance, Comptroller's Office, July 10, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—At a meeting held May 11, 1911, your Board authorized the purchase, at private sale, at a price not exceeding $4,000, of a piece of property for use of the Fire Departmnt, situated on the northerly side of Halsey street, distant easterly 175 feet from the northerly side of Yates (now Sumner) avenue and Halsey street, in the Borough of Brooklyn.

A search of these premises by the Lawyers' Title Insurance and Trust Company develops the fact that the owner cannot give a good title to the premises because of certain restrictions which the Acting Corporation Counsel decides "constitutes a very substantial objection to the title," and is unable to certify that the title is good and marketable. It is therefore necessary to select another site for use of the Fire Department.

There is available on the northerly side of Marion street, Borough of Brooklyn, a plot of ground 25 feet in width by 100 feet in depth, which, after negotiation by the Comptroller, may be purchased for the sum of $2,900, which I deem reasonable and just.

The Fire Commissioner has approved of the selection of this substitute site.

I therefore recommend that the resolution adopted by your Board under date of May 11, 1911, be rescinded, and further recommend, the price being reasonable and just, that your Board approve of the request of the Fire Commissioner and authorize the Comptroller to enter into contract for the acquisition, at private sale, at a price not exceeding $2,900, of the following described property:

All that certain lot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, City of New York, bounded and described as follows:

Beginning at a point on the northerly side of Marion street distant 125 feet westerly from the corner formed by the intersection of the northerly side of Marion street with the westerly side of Reid avenue; running thence northerly parallel with Reid avenue 100 feet; thence westerly parallel with Marion street 25 feet; thence southerly and again parallel with Reid avenue 100 feet to the northerly side of Marion street; thence easterly along the northerly side of Marion street 25 feet to the point or place of beginning; together with all the right, title and interest, if any, of the party of the first part, of, in and to the street in front thereof to the centre thereof.

Said contract to be submitted to the Corporation Counsel for his approval as to form. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Estimate and Apportionment May 11, 1911, which reads as follows:

> "Resolved, That the Board of Estimate and Apportionment hereby approves of the action of the Commissioner of the Fire Department in the selection of the following described property in the Borough of Brooklyn, for the use of said Department:
>
> "All that certain lot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Brooklyn, City of New York, bounded and described as follows:
>
> "Beginning at a point on the northerly side of Halsey street, distant easterly 175 feet from the northeasterly corner of Yates avenue (now Sumner avenue) and Halsey street, and running thence northerly parallel with Yates avenue (now Sumner avenue) 92 feet 6 inches, more or less, to land late of Rem Lefferts; thence easterly along the said last mentioned land 25 feet 1¼ inches, more or

less; thence southerly and again parallel with Yates avenue (now Sumner avenue) 94 feet 10 inches, more or less, to the northerly side of Halsey street, and running thence westerly along the northerly side of Halsey street 25 feet to the point or place of beginning; together with all the right, title and interest of the party of the first part, of, in and to the street in front thereof to the centre thereof.

—and the Comptroller be and is hereby authorized to enter into a contract for the acquisition of the above described property at private sale, at a price not exceeding four thousand dollars ($4,000), said contract to be approved by the Corporation Counsel as to form."

—be and the same is hereby rescinded.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the selection by the Fire Commissioner of property situated on Marion street and Reid avenue, Borough of Brooklyn, for the use of the Fire Department, bounded and described as follows:

"All that certain lot, piece or parcel of land situate, lying and being in the Borough of Brooklyn, City of New York, bounded and described as follows:

"Beginning at a point on the northerly side of Marion street, distant 125 feet westerly from the corner formed by the intersection of the northerly side of Marion street with the westerly side of Reid avenue; running thence northerly parallel with Reid avenue 100 feet; thence westerly parallel with Marion street 25 feet; thence southerly and again parallel with Reid avenue 100 feet to the northerly side of Marion street; thence easterly along the northerly side of Marion street 25 feet to the point or place of beginning; together with all the right, title and interest, if any, of the party of the first part, of, in and to the street in front thereof to the centre thereof;"

—and authorizes the Comptroller to enter into a contract for the acquisition of said property at private sale, at a price not exceeding two thousand nine hundred dollars ($2,900), said contract to be approved by the Corporation Counsel as to form.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following report of the Comptroller recommending that the resolution adopted June 3, 1910, which authorized the issue of $53,000 corporate stock for the acquisition of a site adjoining Richardson street, north side, 68 feet west of Meeker avenue, Brooklyn, and for the erection of a new building thereon for the use of the Fire Department, be amended by substituting a site on the northerly side of Richardson street, 100 feet west of Leonard street, Brooklyn, and further recommending that the Board authorize the acquisition of said site at private sale for the sum of $5,500:

City of New York, Department of Finance, Comptroller's Office, July 10, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—In consideration of the Corporate Stock Budget for 1910, your Board approved of a resolution authorizing $53,000 for the acquisition of a site and the construction of buildings for the Fire Department, on Richardson street, 68 feet west of Meeker avenue, Borough of Brooklyn, adjoining a plot at the present time owned by the City and assigned for use of the Fire Department.

Efforts have been made to acquire the property, with the result that a satisfactory price cannot be reached between the owners and the City. The lowest price at which the parcel of land can be acquired is $15,000, which price I do not consider reasonable.

Conferences have been held with the Commissioner of the Fire Department with reference to the acquisition of a substitute site equally as desirable for the purposes of the Fire Department. After negotiation, a plot 50 feet by 100 feet on the northerly side of Richardson street, 100 feet west of Leonard street, Borough of Brooklyn, may be acquired for the sum of $5,500, which price I deem reasonable and just.

The Fire Commissioner has approved of this substitute site in place of the one originally suggested.

I, therefore, recommend the acquisition of the premises above referred to and transmit herewith two resolutions—one providing for the amendment of the resotion adopted June 3, 1910, and concurred in by the Board of Aldermen on June 28, 1910; and the second, providing for the acquisition of the above-named property at private sale at a price not exceeding $5,500. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the following resolution adopted by the Board of Estimate and Apportionment on June 3, 1910, and concurred in by the Board of Aldermen on June 28, 1910, as follows:

"Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of Corporate Stock of the City of New York, to an amount not exceeding fifty-three thousand dollars ($53,000), for the purpose of providing means for the acquisition of a site *adjoining Richardson street, north side, 68 feet west of Meeker avenue, Brooklyn, for the erection of a new building on same, and on the north side of Richardson streeet, 68 feet west of Meeker avenue, for use of the Fire Department of the City of New York, for quarters for hook and ladder company, water tower, chemical engine and Deputy Chief,* and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding fifty-three thousand dollars ($53,000), the proceeds whereof to be applied to the purposes aforesaid,"

—be amended, subject to the concurrence of the Board of Aldermen herewith, so as to read:

"Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exceeding fifty-three thousand dollars ($53,000), for the purpose of providing means for the acquisition of a site and the construction of a building for use of the Fire Department, on the *northerly side of Richardson street, 100 feet west of Leonard street, Borough of Brooklyn,* and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of the City of New York in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding fifty-three thousand dollars ($53,000), the proceeds whereof to be applied to the purposes aforesaid."

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the selection of the following described premises for use of the Fire Department:

All that certain lot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Brooklyn, City of New York, bounded and described as follows:

Beginning at a point on the northerly side of Richardson street distant 100 feet westerly from the corner formed by the intersection of the westerly side of Leonard street with the northerly side of Richardson street; running thence northerly and parallel with Leonard street 100 feet; thence westerly and parallel with Richardson street 50 feet; thence southerly and again parallel with Leonard street 100 feet to the northerly side of Richardson street; thence easterly along the northerly side of Richardson street 50 feet to the point or place of beginning; together with all the right, title and interest, if any, of the owner, of, in and to the street in front thereof to the centre thereof.

—and the Comptroller be and is hereby authorized to enter into contract for the acquisition of the above-described property at private sale, at a price not exceeding $5,500, said contract to be submitted to the Corporation Counsel for his approval as to form.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented communications, as follows:

From the Commissioner of Water Supply, Gas and Electricity, requesting the Board to authorize the additional issue of $6,000 special revenue bonds (subdivision 8, section 188 of the Charter), the balance of the amount requested by the Board of Aldermen, on account of which the Board of Estimate and Apportionment authorized the issue of $12,000 special revenue bonds on May 4, 1911, the proceeds to be used by the Department of Water Supply, Gas and Electricity for the payment of wages of employees assigned to the maintenance and construction force of the Engineering Bureau, Boroughs of Manhattan and The Bronx.

(The resolution of the Board of Aldermen requested an issue of $18,000 special revenue bonds for the above purpose and the additional $6,000 is necessary to pay for extra work of Laborers not provided for in the Budget appropriations.)

From the President of the Har Moriah Hospital, requesting the Board to appropriate the sum of $15,000 to be used for the payment by The City of New York for such hospital cases as are admitted to said hospital and accepted as proper charges by the Department of Public Charities.

Which were referred to the Comptroller.

The Secretary presented a communication from certain residents of Riverdale-on-Hudson, requesting that steps be taken to remove the unhealthy conditions caused by the swampy areas in Van Cortlandt Park, The Bronx, lying along Broadway, between 238th and 242d streets and 252d and 258th streets.

Which was referred to the Department of Parks, Borough of The Bronx.

The Secretary presented the following communication from the Acting President of the Borough of Manhattan requesting, and report of the Comptroller recommending, the modification of salary schedules Nos. 1704 and 1705, supporting the appropriation made in the Budget for the year 1911, for the office of the President of the Borough of Manhattan, providing for the elimination of a Messenger at $1,350 and two Clerks, one at $1,800 and the other at $900 per annum, and for the addition of a Stenographer and Typewriter at $1,050 and four Typewriting Copyists at $720 each per annum, involving the transfer of $615:

City of New York, Office of the President of the Borough of Manhattan, City Hall, June 29, 1911.

Joseph Haag, Esq., *Secretary of Board of Estimate and Apportionment,* 277 Broadway
New York City:

Dear Sir—Request is hereby made that the supporting schedules, attached to the Budget of the President of the Borough of Manhattan for the year 1911, be amended so as to read as follows:

Bureau of Buildings, Administration—

1704. Salaries:

Superintendent	$6,000 00
Assistant Superintendent	4,000 00
Secretary to Superintendent	2,500 00
Clerk	2,100 00
Clerks, 4 at $1,800	7,200 00
Clerks, 2 at $1,650	3,300 00
Clerks, 7 at $1,500	10,500 00
Clerks, 2 at $1,350	2,700 00
Clerks, 7 at $1,200	8,400 00
Clerks, 7 at $1,050	7,350 00
Clerk	900 00
Confidential Stenographer	1,800 00
Stenographers and Typewriters, 2 at $1,500	3,000 00
Stenographers and Typewriters, 3 at $1,200	3,600 00
Stenographers and Typewriters, 2 at $1,050	2,100 00
Typewriting Copyists, 12 at $720	8,640 00
Cleaners, 5 at $400	2,000 00
Telephone Operator	900 00
Watchmen, 3 at $600	1,800 00
Automobile Engineman	1,200 00
	$79,990 00

Bureau of Buildings, Field and Inspection Force—

1705. Salaries:

Chief Inspector of Buildings	$5,000 00
Confidential Examiner	1,200 00
Messenger	1,500 00
Messenger	1,350 00
Messengers, 7 at $1,200	8,400 00
Messengers, 6 at $1,050	6,300 00
Assistant Engineer	4,000 00
Assistant Engineers, 2 at $2,550	5,100 00
Assistant Engineers, 4 at $2,400	9,600 00
Assistant Engineers, 6 at $1,800	10,800 00
Inspector	1,650 00
Inspectors of Masonry and Carpentry, 2 at $2,400	4,800 00
Inspectors of Masonry and Carpentry, 50 at $1,500	75,000 00
Inspectors of Masonry and Carpentry, 9 at $1,200	10,800 00
Inspectors of Iron and Steel Construction, 7 at $1,500	10,500 00
Inspectors of Elevators, 12 at $1,500	18,000 00
Inspectors of Elevators, 5 at $1,200	6,000 00
Inspector of Plumbing	1,800 00
Inspectors of Plumbing, 15 at $1,500	22,500 00
Inspectors of Plumbing, 3 at $1,350	4,050 00
Inspectors of Plumbing, 4 at $1,200	4,800 00
Unassigned	120 00
	$213,270 00

The changes made are as follows:

A Messenger at $1,350, a Clerk at $1,800, a Clerk at $900 are eliminated. A Stenographer and Typewriter at $1,050 and four (4) Typewriting Copyists at $720 are added. The added positions aggregate in the amount $120, which is less than the positions which have been eliminated, and which $120 is carried as an unassigned balance.

The purpose of the change is to better care for the large number of complaints which are received in the Bureau of Buildings since the Asch fire.

There is also enclosed form for the necessary transfer of funds.

Very truly yours,

E. V. FROTHINGHAM, Acting President, Borough of Manhattan.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 29, 1911, the President of the Borough of Manhattan requested modification of the salary schedules for the Bureau of Buildings, Administration, No. 1704, and Field and Inspection Force, No. 1705, in his office for the year 1911, and involving cash transfer of $615.

It is proposed to strike out a Messenger, at $1,350 per annum, in No. 1704, and a Clerk, at $1,800, and one at $900 in No. 1705. A Stenographer and Typewriter, at $1,050, and four Typewriting Copyists, at $720 each, are to be added to No. 1704. A balance of $120 is to be scheduled in No. 1705 as unassigned.

The following table shows the changes in detail:

Account No.	Schedule Line.	Schedule Transfer. Decrease.	Schedule Transfer. Increase.	Cash Transfer. Decrease.	Cash Transfer. Increase.
1704.	Clerks, 5 at $1,800	....	$1,800 00	....	$900 00
	Clerks, 2 at $900	....	900 00	....	450 00
	Stenographer and Typewriter, 1 at $1,050	$1,050 00	....	$525 00	....
	Typewriting Copyists, 8 at $720	2,880 00	....	1,440 00	....
1705.	Messengers, 2 at $1,350	1,350 00	....	675 00	....
	Unassigned	120 00	....	60 00	....
		$4,050 00	$4,050 00	$2,025 00	$2,025 00

The President states that "the purpose of the change is to better care for the large number of complaints which are received in the Bureau of Buildings since the Asch fire."

I recommend the adoption of the attached resolutions granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the office of the President of the Borough of Manhattan, for the year 1911, as follows:

President, Borough of Manhattan.

Bureau of Buildings, Administration—

1704. Salaries:

Superintendent	$6,000 00
Assistant Superintendent	4,000 00
Secretary to Superintendent	2,500 00
Clerk	2,100 00
Clerks, 4 at $1,800	7,200 00
Clerks, 2 at $1,650	3,300 00
Clerks, 7 at $1,500	10,500 00
Clerks, 2 at $1,350	2,700 00
Clerks, 7 at $1,200	8,400 00
Clerks, 7 at $1,050	7,350 00
Clerk, 1 at $900	900 00
Confidential Stenographer	1,800 00
Stenographers and Typewriters, 2 at $1,500	3,000 00
Stenographers and Typewriters, 3 at $1,200	3,600 00
Stenographers and Typewriters, 2 at $1,050	2,100 00
Typewriting Copyists, 12 at $720	8,640 00
Cleaners, 5 at $400	2,000 00
Telephone Operator	900 00
Watchmen, 3 at $600	1,800 00
Automobile Engineman	1,200 00
	$79,990 00

Field and Inspection Force—

1705. Salaries:

Chief Inspector of Buildings	$5,000 00
Confidential Examiner	1,200 00
Messenger	1,500 00
Messenger, 1 at $1,350	1,350 00
Messengers, 7 at $1,200	8,400 00
Messengers, 6 at $1,050	6,300 00
Assistant Engineer	4,000 00
Assistant Engineers, 2 at $2,550	5,100 00
Assistant Engineers, 4 at $2,400	9,600 00
Assistant Engineers, 6 at $1,800	10,800 00
Inspector	1,650 00
Inspectors of Masonry and Carpentry, 2 at $2,400	4,800 00
Inspectors of Masonry and Carpentry, 50 at $1,500	75,000 00
Inspectors of Masonry and Carpentry, 9 at $1,200	10,800 00
Inspectors of Iron and Steel Construction, 7 at $1,500	10,500 00
Inspectors of Elevators, 12 at $1,500	18,000 00
Inspectors of Elevators, 5 at $1,200	6,000 00
Inspector of Plumbing	1,800 00
Inspectors of Plumbing, 15 at $1,500	22,500 00
Inspectors of Plumbing, 3 at $1,350	4,050 00
Inspectors of Plumbing, 4 at $1,200	4,800 00
Unassigned	120 00
	$213,270 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the transfer of funds appropriated to the office of the President of the Borough of Manhattan for the year 1911, as follows:

From

Bureau of Buildings, Field and Inspection Force—

1705. Salaries	$615 00

To

Bureau of Buildings, Administration—

1704. Salaries	$615 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment of the grade of position of Bond Clerk at $2,500 per annum, for one incumbent, in the office of the City Clerk:

In the Board of Aldermen.

Resolved, That the City Clerk be and he is hereby requested to designate from among his present staff one who shall be known as the Stock and Bond Clerk of the City Clerk's office, and who shall so act, in addition to such other duties as he may be called upon to perform.

Resolved, That the City Clerk be and he is requested to recommend to the Board of Estimate and Apportionment that the title of the position of Custodian of the City Clerk's office be changed to that of Stock and Bond Clerk, with salary at the rate of twenty-five hundred dollars ($2,500) per annum, for one incumbent, Edmund V. Greene, this title being more in keeping with the duties, in addition to others performed by the present occupant of the position.

Adopted by the Board of Aldermen May 24, 1910, a majority of all the members present voting in favor thereof. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a resolution adopted by the Board of Aldermen May 24, 1910, requesting that the title of the position of Custodian, for one incumbent, in the office of the City Clerk, be changed to that of Stock and Bond Clerk, at $2,500 per annum, we report as follows:

There are two Custodians at $2,000 per annum each in the office of the City Clerk, Edmund V. Greene, one of the Custodians, was appointed in 1898 at his present rate of compensation. He keeps the record of all new issues of stocks and bonds transmitted by the Department of Finance to the City Clerk for the latter's signature and for the affixing of the official seal. He also has to enter in the transfer book all transfers of stocks and bonds.

The City Clerk states that the title of Stock and Bond Clerk, or Bond Clerk, is more in keeping with the duties devolving upon Mr. Greene, who is stated to be an efficient, industrious and deserving subordinate. The City Clerk also states that during the greater part of a year, the number of stocks and bonds transmitted to his office averages 750 a day, six days a week. The transfer of stocks and bonds average 150 a day.

The title of Stock and Bond Clerk has heretofore been considered as applicable only to the Department of Finance. The City Clerk states that the designation of the new position as Bond Clerk in place of Stock and Bond Clerk will meet the purposes of the request.

We recommend that the request be approved by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment in the Office of the City Clerk of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate. Per Annum.	Number of Incumbents.
Bond Clerk	$2,500 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the President of the Borough of Richmond relative to, and report of the Corporate Stock Budget Committee, recommending, approval of the schedule of salaries for the Corporate Stock Force, Bureau of Street Cleaning, Borough of Richmond, and that the resolution adopted February 23, 1911, approving of a schedule for said fund be rescinded:

The City of New York, Office of the President of the Borough of Richmond, Borough Hall, New Brighton, New York City, June 2, 1911.

Hon. WILLIAM A. PRENDERGAST, Hon. JOHN PURROY MITCHEL, Hon. GEORGE MCANENY, *Members of the Corporate Stock Budget Committee, Board of Estimate and Apportionment,* 277 Broadway, New York:

Gentlemen—We would ask that there be established, in connection with the corporate stock issue for uses of our Bureau of Street Cleaning, the grade of Transitman and Computer, at $1,650 per annum, the schedule to be so arranged that the salary of the incumbent of the position could be paid from any of the Corporate Stock Funds for which he might be doing work. Yours respectfully,

GEORGE CROMWELL, President of the Borough.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In connection with a request of the President of the Borough of Richmond, dated June 2, 1911, I report:

On February 23, 1911, your Board adopted a resolution establishing a schedule consisting of one employee, a Transitman and Computer, at $1,650, for the Corporate Stock Fund C-PR-3A. The present request is to permit the payment of the salary for the individual from other corporate stock accounts other than the one for which the schedule is in force.

We recommend the approval of the request in accordance with the resolution transmitted herewith and resolution rescinding present schedule. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the following schedule of salaries for the corporate stock funds of the President of the Borough of Richmond: Bureau of Street Cleaning, Corporate Stock Force, Transitman and Computer, 1 at $1,650; be it further

Resolved, That the Board of Estimate and Apportionment hereby rescinds a resolution adopted February 23, 1911, in which a schedule was adopted for the Corporate Stock Account C-PR-3a, Refuse Destructors, Plans and Specifications.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a report of the Corporate Stock Budget Committee recommending that no action be taken on the request of the Woodlawn Heights Taxpayers' Association that the Board appropriate the sum of $350,000 for the construction of a viaduct at Nereid avenue, Borough of The Bronx, for the reason that the President of The Bronx is of the opinion that the matter should be considered in the Corporate Stock Budget for 1912.

Which was ordered filed and the Secretary directed to transmit a copy thereof to the Woodlawn Heights Taxpayers' Association.

(On June 1, 1911, the above matter was referred to said committee.)

The Secretary presented the following resolution from the Board of Education requesting the establishment of the grade of positions of Junior Draftsman and Draftsman's Helper at $20 per week, each, together with a report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen recommending that the said request be not approved, for the reason that the rearrangement of the salaries of the inspecting and drafting corps in the office of the Superintendent of School Buildings, to the end that they may be put on either an annual or a per diem basis, will be made in the preparation of the departmental estimate for the Budget for the year 1912:

(On June 1, 1911, the above matter was referred to said committee.)

Resolved, That the salaries of the following-named persons be, and they are hereby, fixed as indicated below, subject to action by the Board of Estimate and Apportionment and the Board of Aldermen:

Name and Position.	Present Salary Per Week.	Proposed Salary Per Week.
Arthur Cohn, Junior Draftsman	$17 50	$20 00
Maximillian Komow, Junior Draftsman	17 50	20 00
John F. Hanbury, Junior Draftsman	17 50	20 00
Solomon J. Harris, Junior Draftsman	17 50	20 00
A. B. Lieberman, Draftsman's Helper	17 50	20 00

Resolved, That the Board of Estimate and Apportionment be and it is hereby respectfully requested to recommend to the Board of Aldermen that the grade of Junior Draftsman, with salary at the rate of $20 per week, and the grade of Draftsman's Helper, with salary at the rate of $20 per week, be established for the Department of Education, in addition to the grades now existing, and to include in the resolution to be adopted by it a provision that said salaries shall be paid only upon appointments to said grades being made by the Board of Education.

A true copy of resolutions adopted by the Board of Education on May 24, 1911.

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 24, 1911, the Board of Education requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grades of positions of Junior Draftsman, and of Draftsman's Helper, at $20 per week each. In connection therewith we report as follows:

At a special meeting held by the Board of Estimate and Apportionment on September 1, 1910, to clear the August payrolls which had been withheld by reason of an opinion of the Corporation Counsel that the salaries of all employees in the Department of Education, other than Teachers, must be established under the provisions of section 56 of the Charter, it was recommended that the salaries of Draftsmen be established at weekly rates, in accordance with the practice in the Bureau of Buildings since consolidation. This method was approved as a temporary expedient only, it being understood that the salaries were ultimately to be put upon either an annual or a per diem basis.

As a result of a conference between representatives of the Comptroller and the Superintendent of School Buildings, it was agreed to rearrange the salaries of the inspecting and drafting corps to the end that they may be put upon either an annual or a per diem basis, in conformity with all other City departments. This change is to be made in the preparation of the departmental estimate for 1912.

We recommend, therefore, that the requested establishment of two new grades on a weekly basis be not approved. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the request of the Board of Education, by resolution adopted May 24, 1911, for the establishment of the grades of positions of Junior Draftsman and Draftsman's Helper, with salaries at the rate of twenty dollars ($20) each per week, be and the same is hereby disapproved.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary was directed to transmit a copy of the report of the Select Committee, as above, to the Board of Education.

The Secretary presented the following communications from the Department of Parks, Borough of The Bronx, requesting, and report of the Comptroller recommending, approval, pursuant to resolution adopted June 3, 1910, of the plans and specifications, as amended, and estimate of cost ($19,000), for reconstructing and surfacing with asphaltic mixture the roadway of the Bronx and Pelham parkway, from Williamsbridge road to the White Plains road, Borough of The Bronx, under the jurisdiction of said Department:

The City of New York, Department of Parks, Office of Commissioner for the Borough of The Bronx, Zbrowski Mansion, Claremont Park, May 10, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment*, City Hall, New York City:

Dear Sir—In the statement recently made to your honorable Board, asking that provision be made for the issue of corporate stock for the proposed improvements in the parks and parkways of this Borough, for the present year, the sum of $20,000, it was said, could be used for the continuation of parkway improvements.

Following is an extract from the statement referred to:

"Bronx and Pelham Parkway—Continuation of parkway improvement, include side roads, bridle paths, repaving, etc., $30,000, of which $20,000 could be used in 1911.

"The sum of $750,000 was requested from the Board of Estimate and Apportionment three years ago, for the completion of the roadway and walk system of this parkway, and in the year 1909 the sum of $100,000 was appropriated for the purpose of beginning the general improvement of the parkway, including side roads for traffic purposes, bridle paths, repaving, etc. A considerable part of this has already been expended and plans have been elaborated, and work is now under way for expending the balance. It is very important that this improvement be continued to an early completion, and the amount asked for will enable us to continue this work and get, at least, the main driveway in first-class shape, including resurfacing with asphaltic material."

The $20,000 asked for is necessary for resurfacing that portion of Pelham parkway extending from White Plains road to Williamsbridge road, the only portion of said parkway now requiring an appropriation.

The balance of the parkway is either completed or under way, or otherwise provided for, and if the Park Department can get this $20,000 it can have a magnificent roadway completed before the fall of 1911.

I am particularly anxious to push this to completion, so that the parkway may be put to use, as it is very much needed, and the portion described is the only section upon which I am able to do any work, by reason of lack of funds.

In this special manner I desire to emphasize and call attention to the unusually heavy automobile traffic to which this road is subjected. I venture to say that nowhere within the limits of Greater New York, perhaps, is there a road over which a greater number of automobiles run daily, and particluarly on Sundays and holidays, as it is the outlet to all the surrounding country, and into Connecticut.

I cannot too strongly urge, and I do earnestly request, a prompt consideration for this desired issue of corporate stock. Very truly yours,

T. J. HIGGINS, Commissioner of Parks, Borough of The Bronx.

Department of Parks, Borough of The Bronx, Office of Chief Engineer, Zbrowski Mansion, Claremont Park, May 10, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller,* 280 Broadway, City:

Dear Sir—Pursuant to the resolution adopted by the Board of Estimate and Apportionment June 3, 1910, I submit herewith, by order of the Commissioner of Parks for the Borough of The Bronx, plans and specifications for the following contract, the estimated cost of which is nineteen thousand dollars ($19,000):

"For furnishing all the labor and material for reconstructing and surfacing with Hudson River road gravel, with asphaltic binder, the roadway of the Bronx and Pelham parkway, from the Williamsbridge road to the Eastchester road, in the Borough of The Bronx, in The City of New York."

On the cross section sent herewith no old broken stone is shown, for the reason that on the major portion of the roadway to be reconstructed the old surface is worn down to the Telford foundation. Respectfully submitted,

MARTIN SCHENCK, Chief Engineer of Parks, Borough of The Bronx.

The City of New York, Department of Parks, Office of Commissioner for the Borough of The Bronx, Zbrowski Mansion, Claremont Park, May 31, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller,* 280 Broadway, New York City:

Dear Sir—Pursuant to the resolution adopted by the Board of Estimate and Apportionment June 3, 1910, and by order of the Commissioner of Parks for the Borough Bronx, I submitted to you plans and specifications:

> For furnishing all the labor and material for reconstructing and surfacing with Hudson River road gravel, with asphaltic binder, the roadway of the Bronx and Pelham parkway, from the Williamsbridge road to the Eastchester road, in the Borough of The Bronx, in The City of New York,

—the estimated cost of which was nineteen thousand dollars ($19,000).

These specifications have been changed to meet certain suggestions made by your Engineers, which specifications are now returned to you, with the changes made.

Certain conditions have arisen since the date of first submission of plans and specifications, which render it important that a portion of this road, other than that originally proposed, should be reconstructed. Hence, by order of the Commissioner of Parks for the Borough of The Bronx, I have changed the title so as to read:

"Reconstructing and surfacing with Hudson River road gravel, with asphaltic binder, the roadway of the Bronx and Pelham parkway, from the Williamsbridge road to the White Plains road."

In accordance with these changes, I submit herewith sketch plan showing the changed location.

There will be no change whatever in the cross sections originally sent, nor any other changes in the specifications, except those noted, the major portion of which changes were suggested by your Engineers. Respectfully submitted,

MARTIN SCHENCK, Chief Engineer of Parks, Borough of The Bronx.

P. S.—The original plans and specifications were submitted to you on May 10 of this year.

The City of New York, Department of Parks, Office of Commissioner for the Borough of The Bronx, Zbrowski Mansion, Claremont Park, June 21, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller,* 280 Broadway, New York City:

Sir—Pursuant to resolution adopted by the Board of Estimate and Apportionment June 3, 1910, and by order of the Commissioner of Parks for the Borough of The Bronx, I submit herewith plans and specifications:

"For furnishing all the labor and material for reconstructing and surfacing with asphaltic mixture the roadway of the Bronx and Pelham parkway, from the Williamsbridge road to the White Plains road, in the Borough of The Bronx, in The City of New York."

This matter was referred to you on May 31 of this year, with specification providing for Hudson River gravel and asphaltic binder. Bids were received on the 15th of June, which indicates that the cost will be materially higher than the price which we have heretofore received for such asphaltic material as specified in specifications sent herewith.

The bids received for Hudson River gravel and asphaltic binder were rejected by the Commissioner, who directed me to have specifications made out in accordance with these sent herewith. Under these specifications we have had upwards of 40,000 square yards laid, with a five-year guarantee, and there is no question apparently but what it will prove successful. Respectfully submitted,

MARTIN SCHENCK, Chief Engineer.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 10, 1911, the Commissioner of Parks, Borough of The Bronx, requested approval of plans, specifications and estimated cost of $19,000, for the repaving of the Bronx and Pelham parkway, from the Williamsbridge road to the Eastchester road. The request was amended by the Commissioner on May 31, 1911, and again on June 21, 1911. The amended request is for the approval of plans, specifications and estimate of cost of $19,000 for reconstructing and surfacing with asphaltic mixture the roadway of the Bronx and Pelham parkway from Williamsbridge road to the White Plains road. In connection therewith I report as follows:

The roadway of the Bronx and Pelham parkway within the limits mentioned is in extremely bad condition and should be repaved. It is a main thoroughfare leading to country homes and towns in Westchester County and Connecticut, and is subject to very heavy motor traffic. It is important, therefore, that the roadway should have a smooth and durable pavement.

The proposed pavement is similar to that laid at a very reasonable cost and with excellent results during the years 1909 and 1910 on the Eastern boulevard, The Bronx.

The area to be constructed under this contract is about 22,860 square yards. The estimated cost is $19,000, or at the rate of about 83 cents per square yard.

The roadway has a width of 60 feet. In the centre a space about 40 feet in width has been paved with macadam, the sides being unpaved. It is proposed thoroughly to clean the paved portion, spike or pick it up, so that all existing depressions may be filled to the general trap rock level of the present macadam pavement. The sides are to be rolled or excavated to a depth of five inches below this surface and the space filled with gravel and rolled until a uniform surface of the entire roadway has been obtained.

Upon this surface a coating or wearing course, composed of bituminous ingredients, mixed with sand or gravel (described as asphaltic mixtures) is to be spread and rolled to a thickness, when thoroughly compacted, of not less than two inches over the entire area of the roadway. The specifications as drawn, describing the manner in which the work is to be performed are satisfactory.

Section U, as the contract was originally drawn, provided that the contractor should be paid in full upon the expiration of thirty days after the completion of the work.

At the suggestion of the Department of Finance this section and section W have been amended to provide that 5 per cent. of the cost of the work shall be retained for a period of five years and that in the event of failure on the part of the contractor to keep the roadway in a satisfactory state of repair, the Commissioner of Parks shall have the right to purchase materials or make said repairs and charge the cost against the 5 per cent. to be retained.

Section 29 is also amended to provide for a guaranty bond of 20 per cent. of the contract price for the faithful performance of the said repair condition, for a period of five years instead of one year, as originally provided.

As amended the contract and specifications are satisfactory. The estimate of cost is reasonable.

The cost of the work to be paid from the corporate stock fund approved by the Board of Estimate and Apportionment on June 3, 1910, and entitled "C-DP-334, Construction and Repairing of Drives, etc., under contract, The Bronx—For Completion of Work." There is a sufficient balance in the fund for the proposed work.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves of the plans and specifications, as amended, and estimate of cost, nineteen thousand dollars ($19,000), for furnishing all the labor and material for reconstructing and surfacing with asphaltic mixture the roadway of the Bronx and Pelham parkway, from the Williamsbridge road to the White Plains road, in the Borough of The Bronx, under the jurisdiction of the Department of Parks, Borough of The Bronx.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Alder-

men, and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the report of the Corporate Stock Budget Committee, consisting of the Comptroller, the President of the Board of Aldermen and the President of the Borough of Manhattan, submitting for the consideration of the Board the Corporate Stock Budget for the year 1911.

The following persons appeared and urged that there be incorporated in the Corporate Stock Budget for the year 1911 appropriations as follows:

Patrick A. Whitney, Esq., Commissioner of Correction, for a Reformatory for Male Misdemeanants, on Harts Island; Jacob A. Riis, Esq., for additional playgrounds and for a seaside park; E. L. Bowker, Esq., for a central library in the Borough of Brooklyn; William I. Nichols, Esq., representing the Brooklyn League, appeared in opposition of the site proposed for the central library in Brooklyn.

The Comptroller moved that when the Board adjourns, it adjourn to meet Monday, July 17, 1911, at 10:30 o'clock, a. m., that a calendar be prepared for that day, and that the report of the Corporate Stock Budget Committee be made a special order for that day.

Which was agreed to.

The Secretary presented a resolution of the Board of Aldermen, requesting the Board to close Atlantic avenue from Vesta street to Warwick street, Borough of Brooklyn, between the hours of ten and two on July 29, 1911, for the purpose of holding athletic games, together with a report of the Chief Engineer of the Board, stating that there appears to be no provision in the ordinances or the Charter covering such a case, except the ordinance authorizing the President of the Borough to temporarily close streets and the Charter provision for parades and processions, and recommending that the matter be referred to the President of the Borough of Brooklyn, for such action as he may deem proper to give under the circumstances.

Which were referred to the President of the Borough of Brooklyn.

The following matter, not upon the Calendar for this day, was considered by unanimous consent:

The Comptroller presented the following communication from the Commissioner of the Mayor's Bureau of Weights and Measures reuesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, the establishment in said office of the position of Automobile Engineman, with salary at the rate of $1,200 per annum, for one incumbent:

Mayor's Bureau of Weights and Measures, City Hall, City of New York, June 26, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—Application is herewith made to your honorable Board for the establishment of the following position, in addition to those already existing in this Bureau:

Title.	Rate Per Annum.	Number of Incumbents.
Automobile Engineman	$1,200 00	1

Respectfully, JOHN L. WALSH, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 26, 1911, the Commissioner of Weights and Measures requested the establishment in the Bureau of Weights and Measures, office of the Mayoralty, of the position of Automobile Engineman, at the rate of $1,200 per annum, for one incumbent. In connection therewith we report, as follows:

On June 28, 1911, the Secretary of the Board of Estimate and Apportionment, pursuant to a resolution of the Board, adopted June 22, 1911, returned the request to the Commissioner, with the suggestion that it be submitted in connection with the departmental estimates for the budget for 1912.

It seems that an exception might properly be made on this request, as an appropriation of $3,000 was authorized on June 29, 1911, for the purchase of an automobile for the Commissioner, who states that he cannot make use of the automobile until the position is established.

We recommend the adoption of the attached resolution approving the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the Bureau of Weights and Measures, office of the Mayoralty, of the position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Automobile Engineman	$1,200 00	1

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen, and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

After considering certain public improvement matters, on motion of the Comptroller the Board adjourned to meet Monday, July 17, 1911, at 10.30 o'clock a. m.

JOSEPH HAAG, Secretary.

BOARD OF ESTIMATE AND APPORTIONMENT.

Minutes of Meeting of Board of Estimate and Apportionment, Held in Room 16, City Hall, Monday, July 17, 1911.

FINANCIAL AND FRANCHISE MATTERS.

The Board met in pursuance of an adjournment.

Present—William J. Gaynor, Mayor; William A. Prendergast, Comptroller; John Purroy Mitchel, President, Board of Aldermen; George McAneny, President, Borough of Manhattan; Alfred E. Steers, President, Borough of Brooklyn; Cyrus C. Miller, President, Borough of The Bronx; Lawrence Gresser, President, Borough of Queens, and George Cromwell, President, Borough of Richmond.

The Mayor, Hon. William J. Gaynor, presided.

FRANCHISE MATTERS.

Rapid Transit Railway, Battery-East River-Atlantic Avenue Route.

In the matter of the communication dated June 30, 1911, from the Public Service Commission for the First District, transmitting resolutions adopted by said Commission as to route and general plan of construction for a proposed rapid transit railway beginning at a point under Battery Park, Borough of Manhattan, and extending under the park and ferry or waterfront property to the East River; thence under the East River to a point at or near Atlantic avenue, Borough of Brooklyn, extended with the pierhead line; thence under and along Atlantic avenue to a point in said avenue about 150 feet east of the easterly line of Court street, Borough of Brooklyn, where a connection can be made with Section 11-D of the Fourth avenue subway; and requesting the approval and consent of this Board thereto.

This communication was presented to the Board at the meeting of July 6, 1911, and by resolution duly adopted July 13, 1911, was fixed as the date for consideration and the communication was referred to the Franchise Committee.

At the meeting of July 13, 1911, the consideration was concluded and the matter was laid over until this day.

The matter was laid over until the next meeting (Tuesday, July 18, 1911).

Rapid Transit Railways—Extensions to the Existing System; also Third-tracking and Constructing Additions to the Second, Third and Ninth Avenue Elevated Railroads; and the Completion and Putting in Operation of the Steinway Tunnel.

In the matter of the communication from the Public Service Commission for the First District relative to the construction, maintenance and operation of additional rapid transit railways, and requesting a statement of the position of this Board on the subject.

The President of the Board of Aldermen served notice on the Board that unless a decision was reached in the matter on or before the next meeting of the Board, he would at that time offer for adoption a resolution providing for the award of the extended rapid transit system pursuant to the recommendations of the conference committee.

After disposing of the Public Improvements Calendar, the following Financial Matters were considered:

FINANCIAL MATTERS.

The following transfers of appropriations were made upon the recommendation of the Comptroller:

$82.89 from the General Fund for the Reduction of Taxation for the year 1906, to the appropriation made to the Armory Board for the same year, Account No. 139.

The Armory Board, Basement Suite 6, Hall of Records, New York, May 17, 1911.

Hon. William A. Prendergast, *Comptroller:*

Dear Sir—In the Reconciliation Sheets for December 31, 1909, received from the Department of Finance, the sum of one hundred and sixty-one dollars and forty-two cents ($161.42) was transferred to the General Fund from the account entitled Boroughs of Manhattan and The Bronx, Repairs and Supplies, 1906, 139, 22d Regiment.

This showed an overdraft in the account of fifty-six dollars and ninety-one cents ($56.91). There was an outstanding liability of twenty-five dollars and ninety-eight cents ($25.98), so that it will require a transfer to the credit of the account of eighty-two dollars and eighty-nine cents ($82.89) to close said account.

It is requested, therefore, that the sum of eighty-two dollars and eighty-nine cents ($82.89) be transferred from the General Fund to the account entitled, Boroughs of Manhattan and The Bronx, Repairs and Supplies, 1906, 139, 22d Regiment.

Yours respectfully, C. D. RHINEHART, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 17, 1911, the Secretary of the Armory Board requested the transfer of $82.89 from the General Fund to account No. 139, Twenty-second Regiment for the year 1906. In connection therewith I report as follows:

The requested transfer is to cover an overdraft of $56.91 and an outstanding liability of $25.98 in the account entitled Boroughs of Manhattan and The Bronx, No. 139, Twenty-second Regiment, Repairs and Supplies. The outstanding bills are for glazing work done by Samuel Pollack.

On May 28, 1908, the Board of Estimate and Apportionment transferred $161.42 from No. 139 to the General Fund. This was done in error, as the balance of the account amounted to but $104.51. The overdraft therefore was made, which, with the outstanding liability of $25.98, gives the total deficit of $82.89. As the transfer was made in error it is now proposed to reimburse the account in the amount of the deficit.

I recommend the adoption of the attached resolution recertifying the error and balancing the account. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves transfer of funds to the Armory Board for the year 1906, as follows:

From	
General Fund for the Reduction of Taxation	$82 89
To.	
Boroughs of Manhattan and The Bronx, Repairs and Supplies—	
139. Twenty-second Regiment	$82 89

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

$5,250 within the appropriation made to the Fire Department for the year 1911.

Fire Department of The City of New York, Office of the Commissioner, New York, June 20, 1911.

Hon. William J. Gaynor, *Mayor, and Chairman Board of Estimate and Apportionment:*

Sir—I have the honor to request that the Board of Estimate and Apportionment authorize the following transfers from appropriations for the purchase of horses, made to this Department for the current year:

This money will not be required for the purchase of horses as it is desired to use it for the maintenance of automobile apparatus:

From Account No. 979, Purchase of Horses, to Account No. 978, Maintenance of Automobiles, $3,000.

From Account No. 1005, Purchase of Horses, to Account No. 1004, Maintenance of Automobiles, $250.

From Account No. 1029, Purchase of Horses, to Account No. 1028, Maintenance of Automobiles, $2,000.

These transfers are necessary owing to the purchase of additional automobile apparatus since January 1, the present accounts for Maintenance of Automobiles being about exhausted. Respectfully, JOS. JOHNSON, Fire Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Fire Commissioner requested transfers in the sum of $5,250 within the appropriations to the Fire Department for the year 1911. In connection therewith I report as follows:

The proposed transfers are from accounts for the Purchase of Horses to accounts for the Maintenance of Automobiles, for the reason that automobile apparatus is being substituted for horse-drawn apparatus in the Department.

Since January 1, 1911, the following automobile apparatus has been placed in service: Eleven wagons for Deputy Chiefs, one water tower, four hose wagons, one engine, two delivery wagons, two wagons for Telegraph Bureau and Bureau of Repairs and Supplies. Contracts have also been awarded for three engines and four hook and ladder trucks.

The appropriations for 1911 for the maintenance of automobiles were based upon the estimated expenditure for the six automobiles in use in 1910, and are inadequate to meet the increase in cost due to the addition to the number of auto apparatus. The transfer items are as follows:

From

979. Purchase of Horses, Manhattan	$3,000 00
1005. Purchase of Horses, Richmond	250 00
1029. Purchase of Horses, Brooklyn	2,000 00

To

978. Maintenance of Automobiles, Manhattan	$3,000 00
1004. Maintenance of Automobiles, Richmond	250 00
1028. Maintenance of Automobiles, Brooklyn	2,000 00

The appropriations for Nos. 979, 1005 and 1029 were $20,000, $1,200 and $10,000, respectively, against which no liabilities have been incurred.

The appropriation for No. 978 was $3,000. The liabilities up to June 30, 1911, were $2,969.81, as follows:

Rubber tires and tubes	$984 32
Gasoline	387 93
Repairs	316 55
Auto parts and supplies	1,281 01
	$2,969 81

The appropriation for No. 1004 was $500. Liabilities incurred to June 30, 1911, amount to $499.12, as follows:

Rubber tires and tubes	$297 28
Repairs	10 30
Auto parts and supplies	191 54
	$499 12

The appropriation for No. 1028 was $2,000. The liabilities to June 30, 1911, amounted to $1,996.33, as follows:

Rubber tires and tubes	$1,080 41
Gasoline	235 80
Repairs	159 70
Auto parts and supplies	520 42
	$1,996 33

I recommend that the request be approved by the adoption of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237, of the Greater New York Charter, hereby approves transfers of funds appropriated to the Fire Department for the year 1911, as follows:

From

Administration, Borough of Manhattan—

979. Purchase of Horses	$3,000 00

Administration, Borough of Richmond—	
1005. Purchase of Horses	$250 00
Administration, Borough of Brooklyn—	
1029. Purchase of Horses	2,000 00

To

Administration, Borough of Manhattan—	
978. Maintenance of Automobiles, including Equipment, Care and Storage	$3,000 00
Administration, Borough of Richmond—	
1004. Maintenance of Automobiles, including Equipment, Care and Storage	$250 00
Administration, Borough of Brooklyn—	
1028. Maintenance of Automobiles, including Equipment, Care and Storage	$2,000 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

$68,269 within the appropriation made to the Department of Public Charities for the year 1911.

Department of Public Charities of The City of New York, foot of East 26th Street, New York, June 28, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—In the Budget for 1911, this Department was granted an appropriation entitled:

"808B. Additional allowance for general supplies, subject to the approval of the Board of Estimate and Apportionment as to the

On April 20, 1911, there was transferred from this account to: "793. General Supplies, Richmond," the sum of 34,200 00

—leaving a balance of $165,800 00

In order to meet actual and anticipated deficits in various supply accounts, I respectfully request your honorable Board to authorize transfers from the above mentioned balance ($165,800) to the following appropriation accounts of this Department for the year 1911, to wit:

Manhattan:	
745. General supplies	$48,269 01
747. Repairs and replacements by contract or open order	54,013 29
748. Apparatus, machinery, vehicles, etc., including care and storage	19,517 70
Brooklyn and Queens:	
777. General supplies	20,000 00
778. Materials for repairs and replacements by departmental labor	5,000 00
779. Repairs and replacements by contract or open order	13,000 00
780. Apparatus, machinery, vehicles, etc., including care and storage	2,000 00
781. Maintenance of automobiles, including equipment, care and storage	1,500 00
786. Contingencies	600 00
Richmond:	
796. Apparatus, machinery, vehicles, etc., including care and storage	1,000 00
798. Forage, shoeing and board of horses	400 00
Miscellaneous:	
804. Clothing for insane patients	500 00
Total	$165,800 00

Herewith will be found a supporting schedule showing, for each of the foregoing appropriation accounts:

1. The departmental estimate for 1911.
2. The Budget allowance for 1911.
3. The estimated requirements from June 10 to December 31, 1911.
4. The unencumbered balance on June 10, 1911.
5. The additional funds required.

Trusting that this request will meet with your early and favorable consideration, I am, yours very respectfully,

M. J. DRUMMOND, Commissioner.

Department of Public Charities of The City of New York, foot of East 26th Street, New York, June 28, 1911.

To the Honorable the Board of Estimate and Apportionment:

Gentlemen—On the 10th instant this Department made an application to your honorable Board for the transfer of $165,800 from the appropriation account for 1911 entitled, "808B, Additional Allowance for General Supplies, subject to the approval of the Board of Estimate and Apportionment as to the purposes to which it is to be applied," to sundry other supply accounts.

Included in this application was a request for a transfer of $54,013.29 from No. 808B to No. 747, Repairs and Replacements by Contract or Open Order.

Owing to the protracted period of dry weather which prevailed this spring, the price of forage has advanced materially; hence it is necessary to augment the forage appropriations for Manhattan and Brooklyn $900 and $800 respectively. For that reason I respectfully request permission to modify the application of the 10th instant, as follows:

Amend:	
747. Repairs and replacements by contract or open order, Manhattan, by striking out $54,013.29, and inserting	$52,313 29
Add:	
751. Forage, boarding and shoeing horses, Manhattan	900 00
783. Forage, boarding and shoeing horses, Brooklyn	800 00
	$54,013 29

Respectfully yours, M. J. DRUMMOND, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 10, 1911, the Commissioner of the Department of Charities requested the transfer of $165,800 within the appropriations to his Department for the year 1911. In connection therewith I report as follows:

The appropriations recommended by the Budget Committee for the purchase of general supplies for the year 1911, including meat, groceries, vegetables, drugs, clothing, etc., was $1,265,000 as follows:

Manhattan and The Bronx	$925,000 00
Richmond	40,000 00
Brooklyn and Queens	300,000 00
	$1,265,000 00

The amount was considerably less than the sum requested by the Department. To provide for any deficiency, an additional allowance of $200,000 was granted in the Budget for 1911, the account being entitled "808b, Additional Allowance for General Supplies, subject to the approval of the Board of Estimate and Apportionment as to the purposes to which it is to be applied."

On April 20, 1911, the sum of $34,200 was transferred from this account to No. 793, General Supplies, Richmond, leaving a balance of $165,800. Request is made that this balance be transferred as follows:

Manhattan and The Bronx—	
745. General Supplies	$48,269 01
747. Repairs and Replacements by Contract or Open Order	52,313 29
748. Apparatus—Machinery, Vehicles, etc., including Care and Storage.	19,517 70
751. Forage, Shoeing and Boarding Horses	900 00
Brooklyn and Queens—	
777. General Supplies	20,000 00
778. Materials for Repairs and Replacements by Departmental Labor..	5,000 00
779. Repairs and Replacements by Contract or Open Order	13,000 00
780. Apparatus—Machinery, Vehicles, etc., including Care and Storage.	2,000 00
781. Maintenance of Automobiles, including Equipment, Care and Storage	1,500 00
783. Forage, Shoeing and Boarding Horses	800 00
786. Contingencies	600 00
Richmond—	
796. Apparatus—Machinery, Vehicles, etc., including Care and Storage..	1,000 00
798. Forage, Shoeing and Boarding Horses	400 00
Miscellaneous—	
804. Clothing for Insane Patients	500 00
	$165,800 00

The appropriation of $200,000 having been made to provide for possible deficiencies in the allowances for the purchase of food supplies, and not for the general maintenance of the Department, I am of the opinion that the only items in the request that should be considered are those relating to transfers to the appropriations for General Supplies in Manhattan and The Bronx, and Brooklyn and Queens.

The appropriation for No. 745, General Supplies, Manhattan and The Bronx, was $925,000. The liability incurred to June 10, 1911, as shown by a statement submitted by the Department, was $515,269.01, as follows:

Contracts	$456,503 31
Open Market Orders	38,732 29
Informal awards	20,033 41
	$515,269 01

The unencumbered balance on June 10 was $409,730.99. The requirements, from June 10 to December 31, 1911, as estimated by the General Storekeeper, will require an expenditure of $458,000, as follows:

Food supplies	$363,066 22
Dry goods	26,097 98
State's prison goods (clothing, shoes, etc.)	39,819 10
Drugs	8,000 00
Laundry supplies	9,660 06
Miscellaneous	11,356 64
	$458,000 00

To provide for this expenditure, the balance to the credit of the account will have to be replenished in the sum of $48,269.01.

The appropriation for No. 777, General Supplies, Brooklyn and Queens, was $300,000. The liability incurred to June 10, 1911, was $159,715.73, as follows:

Contracts	$140,800 76
Open Market Orders	17,909 33
Informal awards	1,005 64
	$159,715 73

The unencumbered balance on June 10 was $140,284.27. The Deputy Commissioner in charge of the Boroughs of Brooklyn and Queens estimates that $20,000 additional will be required to meet the cost of the necessary food supplies, clothing, etc., from June 10 to December 31, 1911.

I recommend that transfers to the amount of $68,269 be approved by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Department of Public Charities for the year 1911, as follows:

Department of Public Charities.

From

Miscellaneous—	
808b. Additional Allowance for General Supplies, subject to the approval of the Board of Estimate and Apportionment as to the purposes to which it is to be applied	$68,269 00

To

Administration, Manhattan and The Bronx—	
745. General Supplies	$48,269 00
Administration, Brooklyn and Queens—	
777. General Supplies	20,000 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented communications as follows:

From the Commissioner of Correction, requesting the Board to reconsider his application for an appropriation of $800,000 for the erection of a reformatory on Blackwells Island.

From the Secretary, Commissioners of the Sinking Fund, transmitting certified copy of resolution adopted by said Commissioners on July 12, 1911, recommending an issue of $7,102,901.29 for the uses and purposes of the Department of Docks and Ferries.

From the Secretary of the Board of Education, transmitting certified copy of resolution adopted by said Board requesting an issue of $450,000 corporate stock for fire protection work in the several boroughs.

Which were referred to the Corporate Stock Budget Committee, consisting of the Comptroller, the President of the Board of Aldermen and the President of the Borough of Manhattan.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller recommending, the modification of salary schedule No. 584, supporting the appropriation made in the Budget for the year 1911, for said Department, providing for the elimination of a Clerk, at $1,350 per annum and the substitution of two Clerks, one at $1,050 and one at $300 per annum, effective as of July 1, 1911:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, July 7, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller:*

Dear Sir—I wish to fill a vacancy at $1,350 in the Borough of Queens by the appointment of one Clerk at $1,050, and one at $300. To do so a modification of the present schedule is necessary.

I enclose a copy of the schedule so amended, and request that you recommend its approval by the Board of Estimate and Apportionment. Yours truly,

H. S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a request of the Commissioner of Water Supply, Gas and Electricity, on July 7, 1911, for a modification of the 1911 schedules, Distribution, Water Registration, Permits and Revenue Collection, No. 584, Salaries, Regular Employees, I report as follows:

It is proposed to drop a Clerk at $1,350 per annum, and substitute a Clerk at $1,050 and one at $300 per annum.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
584.	Clerks, 2 at $1,350............	$1,350 00	....	$675 00	....
	Clerk at $1,050...............	....	$1,050 00	....	$525 00
	Clerk at $300................	....	300 00	....	150 00
		$1,350 00	$1,350 00	$675 00	$675 00

I recommend the adoption of the attached resolution, granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Department of Water Supply, Gas and Electricity for the year 1911, to be effective as of July 1, 1911, as follows:

Department of Water Supply, Gas and Electricity.

Water Supply, Borough of Queens, Distribution, Water Registration, Permits and Revenue Collection—

584. Salaries, Regular Employees:

Cashier	$1,500 00
Financial Clerk	1,500 00
Clerk	1,650 00
Clerk	1,500 00
Clerk	1,350 00
Clerk	1,050 00
Clerks, 4 at $900	3,600 00
Clerk	300 00
Stenographer and Typewriter	900 00
Inspectors, 12 at $1,100	13,200 00
Foreman	900 00
	$27,450 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller recommending, approval of the revised schedules of employees of said Department, Corporate Stock and Water Revenue Force, Brooklyn, providing for a change in title of Engineman to Supervising Engineman, without change in compensation:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, June 30, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—I wish to promote, without change of salary, an Engineman to the position of Supervising Engineman, for which position he received at a promotion examination a percentage of 93, and to do so it will be necessary to modify the salary schedule supporting the account entitled, "Maintenance and Distribution of Water Supply in the Borough of Brooklyn, 1911, Operation of Pumping Stations, Salaries, Regular Employees," a copy of which, so modified, is enclosed.

Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 30, 1911, the Commissioner of Water Supply, Gas and Electricity requested modification of the 1911 corporate stock schedule for the maintenance and distribution of water supply in the Borough of Brooklyn, operation of pumping stations, salaries, regular employees. It is proposed to change the title of Engineman to Supervising Engineman, without change in compensation. The new title has been approved by the Municipal Civil Service Commission.

The following schedule shows the changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
	Operation Pumping Stations—				
	Enginemen, two at $2,500	$2,500 00	......	......	......
	Supervising Engineman, at $2,500.	......	$2,500 00	......	......
		$2,500 00	$2,500 00	......	......

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for employees of the Department of Water Supply, Gas and Electricity, paid from other than scheduled budgetary accounts for the year 1911, to be effective as of July 1, 1911, as follows:

Department of Water Supply, Gas and Electricity.

Operation, Pumping Stations—

Salaries, Regular Employees, Corporate Stock and Water Revenue Force:

Mechanical Engineer, one at	$4,500 00
Mechanical Engineer, one at	1,800 00
General Inspector, one at	3,000 00
Draftsmen, three at	1,200 00
Clerks, two at	1,500 00
Clerk, one at	900 00
Clerks, two at	600 00
Clerk, one at	540 00
Stenographer and Typewriter, one at	1,200 00
Stenographer and Typewriter, one at	1,050 00
Inspectors, two at	1,200 00
Telephone Operators, four at	900 00
Supervising Engineman, one at	2,500 00
Engineman, one at	2,500 00
Enginemen, six at	1,800 00
Enginemen, twenty-seven at	1,750 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Comptroller recommending, the issue of $3,800 special revenue bonds (subdivision 8, section 188 of the Charter), for the employment of additional help in the Children's Bureau, Department of Public Charities, Brooklyn, from July 1 to December 31, 1911; also recommending approval of a schedule for said fund:

(On June 29, 1911, the resolution of the Board of Aldermen requesting the above appropriation was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of three thousand eight hundred dollars ($3,800), the proceeds whereof to be used by the Department of Public Charities for the purpose of employing additional help in the Children's Bureau, Borough of Brooklyn, during 1911.

Adopted by the Board of Aldermen June 13, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor June 27, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 13, 1911, the Board of Aldermen adopted a resolution requesting special revenue bonds in the sum of $3,800, the proceeds to be used by the Department of Public Charities for the purpose of employing additional help in the Children's Bureau, Brooklyn, from July 1 to December 31, 1911. In connection therewith I report, as follows:

At the request of the Commissioner of Charities an examination was made bv the Commissioner of Accounts of the conditions existing in the Children's Bureau, Brooklyn. In a report dated April 7, 1911, the Commissioner of Accounts stated that "one of the chief causes of the chaotic conditions found to exist is the lack of an adequate clerical force to keep the work up to date." To carry into effect the recommendations of the Commissioner of Accounts and establish a system similar to that in the Children's Bureau, Manhattan, it is proposed to expend the $3,800 from July 1 to December 31, 1911, as follows:

Superintendent, at $2,400 per annum, to replace the position of Clerk, at $1,800, now vacant	$300 00
Stenographer and Typewriter, at $600 per annum	300 00
Clerk, at $600 per annum	300 00
Cashier, at $1,000 per annum	500 00
Examiners of Charitable Institutions, four at $1,200 per annum	2,400 00
	$3,800 00

The Commissioner states that the appropriation will increase the efficiency of the Bureau by providing for a proper supervision and control of reinvestigation work, resulting in a material decrease in the number of children who are public charges. In addition, there will be a systematized "follow-up" of delinquent payers, with an increase in the amount received in partial support of committed children.

On May 31, 1911, the number of children maintained as public charges in the Boroughs of Brooklyn and Queens was 8,468. The number of children proposed for commitment during the first quarter of 1911 was 1,328. As a result of the investigations made by the ten Examiners connected with the Children's Bureau, 612 of the applications were denied. In addition to the investigations made at the time of application, 414 investigations were made of applications by parents and guardians for the discharge of children. The rules of the State Board of Charities require that reinvestigations should be made at least once a year into the ability of parents to maintain children who are public charges. From January 1 to March 31, 1911, the number of reinvestigations made was 600, or at the rate of 2,400 a year. This is a small percentage when compared with the total number of committed children, and is due to an inadequate force of Examiners. Their investigations resulted in fifty-five children being disapproved for further retention as public charges, representing an annual saving to the City of more than $6,000. It is estimated that with a sufficient force of Examiners the Bureau would be self-supporting.

The State Board of Charities, in a communication to this Board, dated April 17, 1911, called attention to the increase in the number of committed children, and stated that one of the causes of the increase was the failure to reinvestigate commitments. The State Board further stated this condition seems to have been largely due to an inadequate examining force in the Department of Public Charities.

The Stenographer and Clerk are for the efficient carrying on of the office work, The Cashier is to have charge of the moneys paid by parents towards the support of committed children. Based upon the receipts up to June 30, the amount for the year will approximate $15,000. The Bureau has been in charge of a Clerk at $1,800 per annum. The position is now vacant, through death, and it is proposed to place a Superintendent in charge, at $2,400 per annum. A similar position in Manhattan is at the rate of $2,700.

I recommend the adoption of the attached resolutions granting the request, approving a schedule for the special revenue bond fund, and the necessary modification of the budget schedule for the Bureau. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 13, 1911, requesting an issue of special revenue bonds in the sum of three thousand eight hundred dollars ($3,800), the proceeds whereof to be used by the Department of Public Charities for the purpose of employing additional help in the Children's Bureau, Borough of Brooklyn, from July 1 to December 31, 1911, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding three thousand eight hundred dollars ($3,800), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

—

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules of salaries to be paid from other than budgetary funds for the Department of Public Charities for the year 1911, as follows:

Department of Public Charities.

Administration, Brooklyn and Queens, Children's Bureau—

Salaries, Regular Employees, Special Revenue Bond Force:

Stenographer and Typewriter, 1 at $600 per annum.

Clerk, 1 at $600 per annum.

Cashier, 1 at $1,000 per annum.

Examiners of Charitable Institutions, 4 at $1,200 per annum.

Salary increase, to be paid from Special Revenue Bonds:

Superintendent, from $1,800 to $2,400 per annum, $600.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Department of Public Charities for the year 1911, to take effect July 1, as follows:

Department of Public Charities.

Administration, Brooklyn and Queens, Children's Bureau—

761. Salaries:

Superintendent	$1,800 00
Clerk	1,200 00
10 Examiners of Charitable Institutions, at $1,200	12,000 00
2 Pupil Examiners, at $480	960 00
	$15,960 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting an issue of $1,000 special revenue bonds (subdivision 8, section 188 of the Charter), for expenses of the Richmond County Society for the Prevention of Cruelty to Children in caring for children arrested in Richmond County and held for arraignment in the Children's Court, together with a report of the Comptroller, to whom, on April 6, 1911, this application was referred, recommending an issue of $650 for the purpose:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of one thousand dollars ($1,000), the proceeds whereof to be used by the Richmond County Society for the Prevention of Cruelty to Children for the purpose of caring for children arrested in Richmond County and being held for arraignment in the Children's Court.

Adopted by the Board of Aldermen March 14, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor March 28, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On March 14, 1911, the Board of Aldermen adopted a resolution requesting $1,000 in special revenue bonds, the proceeds to be used by the "Richmond County Society for the Prevention of Cruelty to Children" for the care of children arrested in Richmond County and held for arraignment in the Children's Court. In connection therewith I report as follows:

The $1,000 is for a deficit of $109.38 up to May 31, 1911, and for the expenses of the Society for the rest of the year.

The receipts and expenditures of the Society for the five months ending May 31, 1911, were as follows:

Expenditures.

Agent's salary and expenses	$432 25
Coal and wood	64 50
Sundries	104 21
Matron's salary	110 00
Telephone	23 18
Provisions	174 12
Repairs, etc	72 31
	$980 57

Receipts.

Balance from 1910	$193 23
Subscriptions	147 00
City of New York	333 32
Donations	197 64
	$871 19

Deficit, $109.38.

The average monthly expenditures for the five months was $196.11. This would give a total for the year of $2,353.31.

The Society during 1910 received $682.15 from donations, entertainments and membership fees. The same amount for 1911 would give total receipts of $1,682.15, or a deficit of approximately $650 for the year.

The Society states the following:

"The Richmond County Society for the Prevention of Cruelty to Children was organized in 1880, and was conducted for many years as a private charitable enterprise. During the past few years, The City of New York has appropriated $1,000 per annum to the Society.

"The expenses of the Society for the year ending December 31, 1909, were $1,762.67 of which $1,000 was received from The City of New York; $16 from relatives of children boarded with the Society, and the balance from private subscriptions and donations. The Society has now found it necessary to employ the entire time of an agent, thereby increasing its expenses $700 per annum; and with increasing expenses in other directions, it was already facing a serious deficit for the current year.

Under the provisions of chapter 659, Laws of 1910, the number of children brought to the Society's house is greatly increased, and moreover, instead of being taken before the City Magistrates on the following day, they now are obliged to await the session of the Children's Court, which sits but once a week, which at least trebles the average number of days spent by the children in the Society's house.

"The Society has no resources from which to meet these increased expenses, and it does not seem proper that this additional burden should be met by private subscriptions, even if it were possible to raise the money in that way.

"When the Society asked for a continuance of the $1,000 appropriation, it was quite ignorant of the added burden and expense which would be imposed upon it by the new law. The resources and accommodations of the Society are entirely insufficient for this additional work, and if this service is to be performed for the City, some means must be found to care for the additional expense involved.

The Society's managers are desirous of co-operating with the City and with the Children's Court as far as possible; but unless some relief can be found from the present situation, they apparently will have no alternative but to decline to receive such children in the future."

I recommend the adoption of the attached resolution granting the request to the extent of $650. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on March 14, 1911, requesting an issue of special revenue bonds in the sum of one thousand dollars ($1,000), the proceeds whereof to be used by the Richmond County Society for the Prevention of Cruelty to Children, for the purpose of caring for children arrested in Richmond County and being held for arraignment in the Children's Court, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment to the extent of six hundred and fifty dollars ($650), and for the purpose of providing means therefor the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding six hundred and fifty dollars ($650), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Parks, Boroughs of Manhattan and Richmond requesting, and report of the Comptroller recommending, approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($34,000), for improving the playground located under the Queensboro Bridge, in block west of Sutton place, between 59th and 60th streets, Manhattan, under the jurisdiction of said Department:

The City of New York, Department of Parks, Arsenal, Central Park, June 27, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller,* City of New York:

Sir—Herewith I beg to forward for the approval of the Board of Estimate and Apportionment, as required by resolution of said Board of January 5, last, plans and specifications for improving the playground located under Queensboro Bridge, in the block west of Sutton Place, between 59th and 60th streets, in the Borough of Manhattan.

This improvement is estimated to cost approximately $34,000, and will be chargeable against the fund provided by corporate stock issue designated as C-DP-58A.

Respectfully,

CHAS. B. STOVER, Commissioner of Parks, Boroughs of Manhattan and Richmond.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Commissioner of Parks, Boroughs of Manhattan and Richmond, requested approval of plans, specifications and estimated cost in the sum of $34,000, for improving the playground located under Queensboro Bridge in the block west of Sutton place, between 59th and 60th streets, Borough of Manhattan.

This playground is designed principally for an atheletic field where baseball and other games may be played. The plot, covering an area of approximately 52,856 square feet, is vacant and unimproved.

It is proposed to level the ground and inclose the property with rubble masonry and concrete walls, surmounted by a seven-foot wrought iron fence.

The construction of the playground proper will consist of excavating and filling to a subgrade elevation of eight inches below finished grade, rolling and ramming as required. Complete water and drainage systems are to be installed and surfacing material, composed of a mixture of gravel and steam cinders, spread in a sufficient quantity to bring the surface to a finished grade.

Seats of concrete in tiers are to be constructed along the southerly boundary and along portions of the easterly and westerly boundaries.

The estimate of cost, based on the quantities of labor and materials necessary to complete the work at fair estimated contract prices, is considered reasonable. The plans and specifications are satisfactory.

The cost of the work is to be charged to the corporate stock fund of $250,000, approved on June 3, 1911, and entitled C-DP-58A, Improvement of Playgrounds throughout the City.

I recommend the adoption of the attached resolution approving the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the plans, specifications and estimate of cost, thirty-four thousand dollars ($34,000), for improving the playground located under the Queensboro Bridge, in the block west of Sutton place, between 59th and 60th streets, Borough of Manhattan, under the jurisdiction of the Department of Parks, Boroughs of Manhattan and Richmond.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the County Clerk of Queens County relative to, and report of the Comptroller recommending that, the Board approve of the expenditure of the sum of $9,180 for recopying and transcribing books of public records in the office of the County Clerk of Queens County during the year 1911, and that the Comptroller be authorized to meet said sum from the proceeds of special revenue bonds issued pursuant to subdivision 7, section 188 of the Charter:

(On June 22, 1911, the request of the County Clerk of Queens County for an appropriation of $20,000 for the above purpose was referred to the Comptroller.)

Queens County Clerk's Office, Jamaica, N. Y., June 16, 1911.

To the Honorable the Board of Estimate and Apportionment, 277 Broadway, New York City;

Gentlemen—On April 15, 1911, I applied to your Board for an appropriation of $9,000 with which to complete the work of recopying and transcribing old libers in this office. This amount was in addition to an appropriation made for this year of $9,000.

Your Board, on the report of the Comptroller, took no action in the matter, as he reported that application should be made to the Board of Aldermen for an issue of special revenue bonds.

Since that meeting of the Board the Supreme Court has appointed two Commissioners to condemn the torn and mutilated books of record in this office and form a tentative report made of these books; it will require at least $15.000 and possibly $20,000 with which to complete the work and carry out the directions of the Supreme Court.

This work is a county charge and as such moneys can be provided, pursuant to subdivision 7 of section 188 of the Greater New York Charter, I will ask you to take this matter up and approve of the expenditure of the sum of $20,000 with which to carry on this work.

The statute provides that the work should be done, the Supreme Court has directed it; and as it is a mandatory and a county charge, I think it should not require action by the Board of Aldermen.

Can I ask your early and favorable consideration and action in this matter?

Respectfully yours, MARTIN MAGER, County Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 16, 1911, the County Clerk of Queens County, requested an appropriation of $20,000, pursuant to the provisions of subdivision 7, section 188 of the Greater New York Charter, for the work of recopying and transcribing old libers, in his office. In connection therewith I report as follows:

On April 15, 1911, the County Clerk of Queens County requested an appropriation of $9,000 for the same purpose. The request was denied and the County Clerk was advised to apply to the Board of Aldermen for an issue of special revenue bonds, as provided by subdivision 8, of section 188, of the Charter. The recopying was done by order of Justice Stapleton, of the Supreme Court, acting on a report of William F. Wyckoff and Louis Hess, Commissioners appointed to condemn torn and mutilated records. The Commissioners on June 22, 1910, condemned certain torn and mutilated records, and under the Court order it was mandatory on the County Clerk to perform the work. The budget appropriation for recopying and transcribing was $9,000. The expenditure from the appropriation to June 1, 1911, was $8,980, leaving an available balance of $20. The liabilities, consisting of unpaid claims, amounting to $9,200, leaving the sum of $9,180 to be provided.

I recommend adoption of the attached resolution approving of the request to the extent of $9,180. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the expenditure of a sum not to exceed nine thousand one hundred and eighty dollars ($9,180) to provide for a deficiency in the appropriation for Recopying and Transcribing Books of Public Record in the office of the County Clerk of Queens County, and recommends that payment of the same be made by the Comptroller out of the

sale of special revenue bonds of The City of New York, issued pursuant to the provisions of subdivision 7, of section 188, of the Greater New York Charter.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Board of Trustees of the Bellevue and Allied Hospitals requesting, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($1,157) for furnishing and installing a complete fire alarm system in Harlem Hospital, under the jurisdiction of said Board of Trustees.

Bellevue and Allied Hospitals, Office of the Board of Trustees, First avenue and Twenty-sixth street, New York, July 5, 1911.

Hon. William A. Prendergast, *Comptroller, Department of Finance*, New York City:

Sir:—My attention has been drawn to the fact that a contract has been awarded to the Phillips Manufacturing Company for the installation of a fire alarm system in Harlem Hospital, the plans and specifications for which have not been approved by the Board of Estimate and Apportionment, although the contract is chargeable against corporate stock. This is an oversight which we very much regret. At the time the advertisement was authorized, it was understood that the contract was payable from the current appropriations, the same as the contract on the fire sprinkler system now being installed in Bellevue Hospital, for which provision was made in the appropriations for 1911. As a matter of fact, however, a special appropriation of corporate stock amounting to $7,000 was authorized on June 25, 1909, and was released by the Board of Estimate and Apportionment on May 23, 1910. When the appropriation was first authorized on June 25, 1909, the plans and specifications were approved by the Board of Estimate and Apportionment.

These were subsequently somewhat modified to meet the ideas of Professor Sevier, Consulting Engineer of the Department of Water Supply, Gas and Electricity, who has kindly given the trustees much advice in regard to the protection of the hospitals against fire. Specifications were formally approved by his department, and before the contract was awarded, the bids were referred to that department for examination. Attached is a copy of the reply received, recommending the acceptance of the lowest bid, together with a copy of our letter of transmittal. Under the circumstances, we trust that you will authorize approval of the contract at once, as the danger from fire is too great to warrant any delay.

Respectfully, JOHN W. BRANNAN, President, Board of Trustees.

June 1, 1911.

Hon. Henry S. Thompson, *Commissioner, Department of Water Supply, Gas and Electricity*, 13 Park Row, New York City:

Sir—Enclosed please fine a list of bids received on May 26th for the installation of a fire alarm system at Harlem Hospital. Will you kindly let us know if in your opinion the lowest bid is fair and reasonable and should be accepted?

Respectfully, JAMES K. PAULDING, Secretary, Board of Trustees.

List of bids opened on May 26, 1911, for the installation of a fire alarm system at Harlem Hospital:

Phillips Manufacturing Company	$1,157 00
T. Frederick Jackson, Incorporated	1,492 00
Gamewell Fire Alarm Telegraph Company	1,758 25
Frederick Pearce Company	1,900 00

Department of Water Supply, Gas and Electricity, 13-21 Park Row, City of New York, June 12, 1911.

Mr. J. K. Paulding, *Secretary, Board of Trustees, Bellevue and Allied Hospitals*, 1st avenue and 26th street, Manhattan:

Dear Sir—In answer to your letter of June 1, transmitting the list of bids received on May 26th for the installation of a fire alarm system at Harlem Hospital and asking if, in my opinion, the lowest bid is fair and reasonable and should be accepted, I beg to advise you that this matter was referred to Mr. Lacombe and Professor Sever, and the latter reports that in his opinion the bid of the Phillips Manufacturing Company is fair and reasonable and can be accepted. The specifications under which these bids were called are very clear and definite, and if accurately complied with, will provide a perfectly satisfactory fire alarm system at the Harlem Hospital.

Very truly,

HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics. July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 5, 1911, the President of the Board of the Trustees of Bellevue and Allied Hospitals requested the approval of the plans, specifications and estimate of cost, in the sum of $1,157, for furnishing and installing a complete Fire Alarm System in Harlem Hospital, Borough of The Bronx.

The plans and specifications have been formally approved by the Department of Water Supply, Gas and Electricity. The following bids were received and opened for the work by the Board of Trustees of Bellevue and Allied Hospitals on May 26, 1911:

Phillips Manufacturing Co.	$1,157 00
T. Frederick Jackson	1,492 00
The Gamewell Fire Alarm Tel. Co.	1,758 25
Frederick Pierce	1,900 00

The cost of this work is to be charged against the Corporate Stock Fund, entitled "C-BH-9a, Installation of Fire Alarm System in Bellevue and Harlem Hospitals." There is sufficient balance in the fund to pay for the proposed work.

The plans and specifications appear to be complete and satisfactory, and the estimate of cost is the lowest bid received for the work.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves the plans, specifications and estimated cost, in the sum of one thousand one hundred and fifty-seven dollars ($1,157), for furnishing and installing a complete Fire Alarm System in Harlem Hospital, under the jurisdiction of the Department of Bellevue and Allied Hospitals.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a report of the Comptroller relative to increase in salaries of employees paid out of non-budgetary accounts, and recommending the adoption of the following resolutions:

1. That the rates of salaries and wages of employees to be paid out of other than tax budget accounts or budgetary part account, shall be fixed annually at the time of the adoption of the corporate stock budget, and that any salary or wage increase, except those required by the prevailing rate of wages law, shall be limited within the succeeding twelve months to the annual rate then fixed, on the same principle which is now operative with regard to salary increases of employees paid out of the annual tax budget.

2. That, in the instances where schedules of employees are required for corporate stock or other work authorized in the intervals between corporate stock budgets, the rates fixed by such schedules must not be exceeded until action thereon at the next succeeding corporate stock budget period.

Which was laid over until the meeting of July 27, 1911.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller, relative to, the modification of salary Schedule No. 479, supporting the appropriation made in the Budget for the year 1911, for said Department, providing for an increase in the salary of an Engineer from $2,400 to $2,700 per annum, the reduction of a Stenographer from $1,200 to $1,050 per annum, and the elimination of a Keeper at $1,000 per annum, to be effective as of July 1, 1911:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York. June 29, 1911.

Mr. JOSEPH HAAG, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—I wish to promote, by an increase in salary from $2,400 to $2,700, an Assistant Engineer in this Department who has been for twenty-six years employed on the Croton Watershed, having charge of the maintenance and operation of all aqueducts and reservoirs supplying water to the Boroughs of Manhattan and The Bronx, as well as the force employed on the entire watershed.

The appropriation out of which he is paid has ample funds owing to the reduction in one item from $1,200 to $1,050, and to the reduction of $1,000 in the item for Keepers, reducing the number from three to two.

I respectfully request that the Board of Estimate and Apportionment approve the modified schedule herewith enclosed, supporting account No. 479, entitled "Collection and Storage, Croton and Bronx System, Care of Watersheds, Aqueducts, Ponds and Reservoirs, Croton Water System, Salaries,"

Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics. July 13, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 29, 1911, the Commissioner of Water Supply, Gas and Electricity requested modification of the 1911 schedule entitled Collection and Storage, Croton and Bronx System, Care of Watersheds, Aqueducts, Ponds and Reservoirs, Croton Water System, No. 479, Salaries. In connection therewith I report as follows:

It is proposed to increase an Assistant Engineer from $2,400 to $2,700 per annum; to reduce a Stenographer from $1,200 to $1,050 per annum, and to drop a Keeper at $1,000 per annum, the balance of $850 to be scheduled as unassigned.

The Commissioner states that the Assistant Engineer has been employed for twenty-six years on the Croton Watershed, having charge of the maintenance and operation of all aqueducts and reservoirs supplying water to the Boroughs of Manhattan and The Bronx, as well as the force employed on the entire watershed.

The following table shows the changes in detail:

Code No.	Schedule Line.	Schedule Transfer. Decrease.	Schedule Transfer. Increase.	Cash Transfer. Decrease.	Cash Transfer. Increase.
479.	Assistant Engineer	$2,400 00	....	$1,200 00	....
	Assistant Engineer	....	$2,700 00	....	$1,350 00
	Stenographer	1,200 00	....	600 00	....
	Stenographer	....	1,050 00	....	525 00
	Keepers, 3 at $1,000......	1,000 00	....	500 00	....
	Unassigned	....	850 00	....	425 00
		$4,600 00	$4,600 00	$2,300 00	$2,300 00

The attached resolution, if adopted, will grant the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Department of Water Supply, Gas and Electricity for the year 1911, to be effective as of July 1, 1911, as follows:

Department of Water Supply, Gas and Electricity.

Collection and Storage, Croton and Bronx Systems, Care of Watersheds, Aqueducts, Ponds and Reservoirs—

479. Salaries, Croton Water System:

Assistant Engineer, 1 at $2,700	$2,700 00
Assistant Engineer, 1 at $2,100	2,100 00
Leveler, 1 at $1,400	1,400 00
Stenographer, 1 at $1,050	1,050 00
Superintendent, Ponds, etc., 1 at $2,500	2,500 00
Keepers, 2 at $1,400	2,800 00
Keeper, 1 at $1,200	1,200 00
Keepers, 2 at $1,000	2,000 00
Foreman, 1 at $1,000	1,000 00
Unassigned	850 00
	$17,600 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller recommending, the modification of Salary Schedule No. 576, supporting the appropriation made in the Budget for the year 1911, for said Department, providing for a readjustment of the number of days for mechanics and laborers:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, June 29, 1911.

Hon. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—The schedule supporting Account No. 576, Water Supply, Borough of Queens, Distribution, Maintenance, Wages Temporary Employees, provides inadequately for the extra time of Laborers. For other employees in the same schedule there is more than sufficient, and I respectfully request that the Board of Estimate and Apportionment approve a modification of this schedule in accordance with the enclosed proposed schedule. Yours truly,

HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 13, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 29, 1911, the Commissioner of Water Supply, Gas and Electricity requested modification of the 1911 schedule entitled Water Supply, Borough of Queens, Distribution, Maintenance, No. 576, Wages, Temporary Employees. In connection therewith I report as follows:

The proposed modification is for a readjustment of the number of days for mechanics and laborers. The following table shows the change in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
576.	Caulkers, at $4 a day (285 days)	$708 00	....	$708 00	....
	Tappers, at $4 a day (30 days)	52 00	....	52 00	....
	Assistant Foremen, at $3 a day (72 days)	102 00	....	102 00	....
	Toolmen, at $2.50 a day (10 days)	....	$30 00	....	$30 00
	Pipefitters, at $5 a day (10 days)	....	85 00	....	85 00
	Pipefitters' Helpers, at $2.50 a day (10 days)	....	90 00	....	90 00
	Machinists' Helpers, at $3 a day (10 days)	....	12 00	....	12 00
	Laborers, at $2.50 a day (200 days)	....	645 00	....	645 00
		$862 00	$862 00	$862 00	$862 00

No increased compensation is involved.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule as revised for the Department of Water Supply, Gas and Electricity for the year 1911, as follows:

Department of Water Supply, Gas and Electricity.

Water Supply, Borough of Queens, Distribution, Maintenance—

576. Wages, Temporary Employees:

Caulkers, at $4 per day (108 days)	$432 00
Tappers, at $4 per day (17 days)	68 00
Assistant Foreman, at $3 per day (38 days)	114 00
Toolmen, at $2.50 per day. (22 days)	55 00
Pipefitters, at $5 per day (27 days)	135 00
Pipefitters' Helpers, at $2.50 per day (46 days)	115 00
Bricklayers, at $5.60 per day (10 days)	56 00
Carpenters, at $4.50 per day (10 days)	45 00
Machinists' Helpers, at $3 per day (14 days)	42 00
Laborers, at $2.50 per day (458 days)	1,145 00
	$2,207 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller recommending, the revisions of the non-budgetary schedule of wages for the operation of pumping stations for said Department, for the year 1911, to be effective as of April 13, 1911, providing for 42 oilers instead of 41, as in the original schedule approved by the Board:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York. June 29, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—In the schedule of "Wages, Regular Employees, Water Revenue Force, Operation of Pumping Stations," provision was made for only 41 Oilers. There were, however, at the time the schedule was adopted, 42 Oilers and that number is still employed.

I respectfully request that the Board of Estimate and Apportionment modify the foregoing mentioned schedule, providing that it take effect April 13, and enclose a modified schedule for their approval.

Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a request of the Commissioner of Water Supply, Gas and Electricity, under date of June 29, 1911, for a revision of the non-budgetary schedule of wages for the operation of Pumping stations, I report as follows:

The schedule provides for 41 Oilers. The Commissioner states that this was an error, for the reason that at the time the schedule was adopted 42 incumbents were employed. The incumbents still are on the payroll.

I recommend the adoption of the attached resolution approving the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for employees of the Department of Water Supply, Gas and Electricity, paid from other than scheduled budgetary funds for the year 1911, to be effective as of April 13, 1911, as follows:

Department of Water Supply, Gas and Electricity.

Operation, Pumping Stations, Water Revenue Force—

Wages, Regular Employees:

Cleaner, 1 at	$360 00
Enginemen, 101 (365 days) at per day	4 50
Oilers, 42 (365 days) at per day	3 00
Stokers, 182 (365 days) at per day	3 00
Coal Passers, 13 (365 days) at per day	2 50
Laborers, 44 (365 days) at per day	2 50

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communications from the Board of Education requesting, and report of the Comptroller relative to, the modification of Budget Schedule No. 1217, Budgetary part allowance and Corporate Stock Force, Bureau of Buildings, Department of Education, for the year 1911, providing for certain increases in salaries and an increase in the staff:

Department of Education, City of New York, Park Avenue and 59th Street, New York, May 31, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—In accordance with a resolution adopted by the Board of Education on November 23, 1910, the undersigned respectfully request modifications in salary schedules for the year 1911, as follows:

1217. Bureau of Buildings, Division of Repairs—

Salaries:

Strike out—

Architectural Draftsmen, 5 at	$35 00 per week
Mechanical Draftsmen, 2 at	37 50 per week

—and insert

Architectural Draftsmen, 4 at	$35 00 per week
Mechanical Draftsman, 1 at	37 50 per week
Mechanical Draftsman, 1 at	42 50 per week
Mechanical Draftsman, 1 at	30 00 per week

Bureau of Buildings, Corporate Stock Force—

Strike out (in the schedule forwarded on May 15, 1911):

Architectural Draftsmen, 5 at, per week	$45 00
Architectural Draftsmen, 7 at, per week	40 00
Architectural Draftsmen, 5 at, per week	35 00

—and insert

Architectural Draftsmen, 6 at, per week	$45 00
Architectural Draftsmen, 6 at, per week	40 00
Architectural Draftsmen, 4 at, per week	35 00
Mechanical Draftsman, 1 at, per week	27 50

The modifications of the schedule for the Bureau of Buildings, Corporate Stock Force, are in addition to the modifications requested in our communication of May 15, 1911.

Copies of the schedules, as modified, are enclosed. Respectfully yours,

A. E. PALMER, Secretary, Board of Education; HENRY R. M. COOK, Auditor, Board of Education.

Department of Education, City of New York, Park Avenue and 59th Street, New York, June 27, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—In accordance with a resolution adopted by the Board of Education on November 23, 1910, the undersigned respectfully request that the schedule for the Bureau of Buildings, Corporate Stock Force, be modified by adding thereto the following:

Inspector of Masonry and Carpentry, 1 at, per week	$30 00

The above modification is in addition to the modifications requested in our communications of May 31, 1911, and June 20, 1911, and is requested by the Superintendent of School Buildings, who states that the same is necessary because the immediate services of an Inspector are required on a new school building.

Respectfully yours,

A. E. PALMER, Secretary, Board of Education; HENRY R. M. COOK, Auditor, Board of Education.

Department of Education, City of New York, Park Avenue and 59th Street, New York, July 7, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—In accordance with a resolution adopted by the Board of Education on November 23, 1910, the undersigned respectfully request modifications of salary schedules for the year 1911, as follows:

Bureau of Buildings, Corporate Stock Force—
Strike out (in the schedule forwarded on June 27, 1911):
Inspectors of Masonry and Carpentry, 7 at, per week.................. $33 00
Inspector of Masonry and Carpentry, 1 at, per week.................. 30 00
—and insert
Inspectors of Masonry and Carpentry, 9 at, per week.................. $33 00
Inspectors of Masonry and Carpentry, 3 at, per week.................. 30 00
1217. Bureau of Buildings, Division of Repairs—
Salaries:
Strike out (in the schedule forwarded on June 20, 1911):
Inspectors of Masonry and Carpentry, 14 at, per week.................. $36 00
Inspector of Masonry and Carpentry, 1 at, per week.................. 33 00
—and insert
Inspectors of Masonry and Carpentry, 12 at, per week.................. $36 00
Inspectors of Masonry and Carpentry, 3 at, per week.................. 33 00

The modifications of the schedule for the Corporate Stock Force are in addition to the modifications requested in our communications of May 31, June 20 and 27, 1911, and are requested by the Superintendent of School Buildings, who states that the same are necessary because the immediate services of Inspectors are required on fire-protection work. The modifications of Schedule 1217 are in addition to the modifications requested in our communications of May 31 and June 20, 1911.

Respectfully yours,

A. E. PALMER, Secretary, Board of Education; HENRY R. M. COOK, Auditor, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 31, June 27 and July 7, 1911, the Board of Education requested the modification of Schedule No. 1217, Bureau of Buildings, Salaries, Budgetary Part Allowance, and the schedule for the Corporate Stock Force, Bureau of Buildings. In connection therewith I report as follows:

Report on the request of May 31 was withheld pending the establishment of necessary grades. The proposed changes are as follows:

Schedule Line.	Present.	Proposed.
	Bureau of Buildings, Division of Repairs—	
1217.	Architectural Draftsmen, 5 at $35 per week	4 at $35 00
	Mechanical Draftsmen, 2 at $37.50 per week	1 at 37 50
	Mechanical Draftsman	1 at 42 50
	Mechanical Draftsman	1 at 30 00
	Inspectors of Masonry and Carpentry, 14 at $36 per week	12 at 36 00
	Inspector of Masonry and Carpentry, 1 at $33 per week	3 at 33 00
	Bureau of Buildings, Corporate Stock Force—	
	Architectural Draftsmen, 5 at $45 per week	6 at $45 00
	Architectural Draftsmen, 6 at $40 per week	5 at 40 00
	Mechanical Draftsman, 1 at $22.50 per week	1 at 27 50
	Inspectors of Masonry and Carpentry	3 at 30 00
	Inspectors of Masonry and Carpentry, 7 at $33 per week	9 at 33 00

In No. 1217 there is a vacant position of Architectural Draftsman at $35 per week. It is proposed to promote Frederick C. Purdy, Mechanical Draftsman, from $27.50 to $30 per week and George D. Farnham, Mechanical Draftsman, from $37.50 to $42.50 per week. There are also two vacant positions of Inspector of Masonry and Carpentry at $36 per week, which it is proposed to fill by transferring two Inspectors of Masonry and Carpentry at $33 per week to this schedule from the corporate stock force.

In the schedule for the corporate stock force it is proposed to increase Louis M. Thorn, Architectural Draftsman, from $40 to $45 per week, and George Krug, Jr., Mechanical Draftsman, from $22.50 to $27.50 per week. It is further proposed to increase the force by appointing three Inspectors of Masonry at $30 per week and two at $33 per week, besides filling two vacancies at the latter rate.

The promotion of Purdy is impracticable, because the necessary grade does not exist for an additional incumbent. With this exception the proposed changes in detail are as follows:

Account No.	Schedule Line.	Schedule Transfer.	
		Decrease.	Increase.
	Bureau of Buildings, Division of Repairs, Budgetary Part Allowance—		
1217.	Architectural Draftsman, 1 at $35 per week	$35 00	......
	Mechanical Draftsman, 1 at $37.50 per week	37 50	......
	Mechanical Draftsman, 1 at $42.50 per week	......	$42 50
	Inspectors of Masonry and Carpentry, 2 at $36 per week	72 00	......
	Inspectors of Masonry and Carpentry, 2 at $33 per week	......	66 00
		$144 50	$108 50
	Bureau of Buildings, Corporate Stock Force—		
	Architectural Draftsman, 1 at $45 per week	......	$45 00
	Architectural Draftsman, 1 at $40 per week	$40 00	......
	Mechanical Draftsman, 1 at $22.50 per week	22 50	......
	Mechanical Draftsman, 1 at $27.50 per week	......	27 50
	Inspectors of Masonry and Carpentry, 3 at $30 per week	......	90 00
	Inspectors of Masonry and Carpentery, 2 at $33 per week	......	66 00
		$62 50	$228 50

The net result of the proposed changes is to increase the staff by four employees. This would appear to be justified by the larger appropriations of corporate stock already made and pending for the year 1911.

The attached resolutions, if adopted, will grant the requests, with the one exception hereinbefore mentioned. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Department of Education for the year 1911, as follows:

Department of Education.

Bureau of Buildings, Division of Repairs, Special School Fund, Maintenance—

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Bridges requesting, and report of the Comptroller recommending, the modification of

Salary Schedule No. 125, supporting the appropriation made in the Budget for the year 1911, for said Department providing for the substitution of a Stenographer and Typewriter at $900 per annum, and for one at $1,200 per annum, said modification to be effective as of July 1, 1911:

Department of Bridges, City of New York, 13-21 Park Row, Manhattan, N. Y., July 10, 1911.

Hon. William A. Prendergast, *Comptroller,* 280 Broadway, Manhattan:

Sir—I have to request a modification of schedule supporting the Budget Appropriation for the Department of Bridges for the year 1911, effective as of July 1, 1911, as follows:

Queensboro Bridge—
125. Salaries:

Drop line item reading		
Stenographer and Typewriter		$1,200 00
Add line items reading		
Stenographer and Typewriter	$900 00	
Unassigned	300 00	
		1,200 00

This request is made that the vacancy now existing in this schedule may be filled at a lower grade.

Copy of Revised Schedule herewith. Respectfully,

ARTHUR J. O'KEEFFE, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 10, 1911, the Commissioner of Bridges requested modification of the 1911 salary schedule for the Queensboro Bridge, No. 125, Salaries. It is proposed to drop a Stenographer and Typewriter, at $1,200 per annum, and add one at $900. the balance of $300 to be scheduled as unassigned.

The following table shows the changes in detail:

Code No.	Title.	Schedule Transfer. Decrease.	Schedule Transfer. Increase.	Cash Transfer. Decrease.	Cash Transfer. Increase.
125.	Stenographer and Typewriter	$1,200 00	......	$600 00	......
	Stenographer and Typewriter	......	$900 00	......	$450 00
	Unassigned	......	300 00	......	150 00
		$1,200 00	$1,200 00	$600 00	$600 00

The Commissioner states that the request is made so that a vacancy at the $1,200 rate may be filled at the lower grade.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Department of Bridges, for the year 1911, to be effective as of July 1, 1911, as follows:

Department of Bridges.

Queensboro Bridge—
125. Salaries:

Assistant Engineer	$5,000 00
Assistant Engineer	3,500 00
Transitman	1,800 00
Storekeeper	1,200 00
Structural Steel Draftsman	1,800 00
Steel Inspectors, 2 at $1,650	3,300 00
Clerk	1,500 00
Stenographer and Typewriter	900 00
Messenger	1,200 00

Bridge Keepers, 6 at $900	5,400 00
Bridge Keepers, 9 at $1,095	9,855 00
Telephone Operator	750 00
Unassigned	300 00
	$36,505 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Department of Street Cleaning requesting, and report of the Comptroller recommending, the modification of wage schedules for regular employees for said Department of Street Cleaning for the year 1911, to provide for the proper administration of the forces during the summer months, involving the transfer of $56,000:

Department of Street Cleaning of The City of New York, 13-21 Park Row, New York, July 6, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—I have to request that a further revision of schedules and transfer amounting to the sum of fifty-six thousand dollars ($56,000), be made within the appropriation allowed the Department of Street Cleaning for the year 1911, as follows:

From

Administration, Borough of Manhattan—	
Division of Sweeping:	
889. Wages, Regular Employees	$19,000 00
898. Repairs and Replacements by Contract or Open Order	8,000 00
Administration, Borough of Brooklyn—	
Division of Sweeping:	
915. Wages, Regular Employees	29,000 00
	$56,000 00

To

Administration, Borough of Manhattan—	
Division of Carting and Stable:	
891. Wages, Regular Employees	$19,000 00
897. Materials for Repairs and Replacements by Departmental Labor	8,000 00
Administration, Borough of Brooklyn—	
Division of Carting and Stable:	
917. Wages, Regular Employees	29,000 00
	$56,000 00

As it is impossible to conduct the business of the Department under the subdivision of the different codes, as represented by the supporting schedules, it has and will become necessary at different periods to revise the various codes to meet the requirements of the Department.

These transfers are necessary for the proper administration of the forces during the summer months, and are only temporary, as it is my intention to apply to your honorable Board for sufficient revenue bonds to meet the expected deficit on account of the appropriation allowed for 1911 being under the amount allowed for 1910.

Respectfully, WM. H. EDWARDS, Commissioner of Street Cleaning.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 13, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 6, 1911, the Commissioner of Street Cleaning requested modification of wage schedule for regular employees involving a transfer of $56,000 within appropriations for his Department for the year 1911. In connection therewith I report as follows:

It is proposed to transfer $19,000 from No. 889, Division of Sweeping, to No. 891, Division of Carting and Stable; $29,000 from No. 915, Division of Sweeping, to No. 917, Division of Carting and Stable, and $8,000 from No. 898, Repairs and Replacements by Contract or Open Order, to No. 897, Materials for Repairs and Replacements by Departmental Labor.

The Commissioner states that the transfer from the Division of Sweeping to the Division of Carting and Stable are necessary for the reason that it is impossible to properly operate the force under the present schedules.

The transfer of $8,000 from No. 898 to No. 897 is necessary, the Commissioner states, to enable him to liquidate outstanding liabilities chargeable against this account for Materials for Repairs and Replacements by Departmental Labor, and to give him a sufficient balance for the remainder of the year.

He further states that a saving has been made in No. 898, Repairs and Replacements by Contract or Open Order, but that the allowance of $60,000 made for No. 897, Repairs and Replacements by Departmental Labor, is insufficient to enable him to purchase material and make the repairs necessary during the year. An amount of $67,000 was requested by him in his estimate for 1911; this was reduced by the Budget Committee to $60,000.

The change made in the schedule for wages of regular employees entails no additional cost to the City, as shown in the following statement:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
889.	Sweepers, at $780............	$17,000 00	....	$17,000 00	....
	Sweepers, at $2 per day (19,500 days)	2,000 00	....	2,000 00	....
891.	Drivers, at $800..............	....	$17,000 00	....	$17,000 00
	Stablemen, at $760............	....	2,000 00	....	2,000 00
915.	Sweepers, at $2 per day (19,500 days)	29,000 00	....	29,000 00	....
917.	Drivers, at $2 per day (41,799 days)	....	29,000 00	....	29,000 00
920.	Boardmen, at $800...........	....	800 00	....	800 00
	Boardmen, at $2 per day (400 days)	800 00	....	800 00	....
		$48,800 00	$48,800 00	$48,800 00	$48,800 00

I recommend the adoption of the attached resolution granting the transfers and modifications. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Department of Street Cleaning for the year 1911, as follows:

Administration, Borough of Brooklyn, Division of Carting and Stable—

917. Wages, Regular Employees.................................... $29,000 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves transfer of funds appropriated to the Department of Street Cleaning for the year 1911, as follows:

Department of Street Cleaning.

From

Administration, Borough of Manhattan—

898. Repairs and Replacements by Contract or Open Order............ $8,000 00

To

897. Materials for Repairs and Replacements by Departmental Labor.... $8,000 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen, requesting the issue of $1,177.25 special revenue bonds (subdivision 8, section 188, of the Charter), to provide for increases in wages of Plumbers and Tinsmiths in the Department of Street Cleaning for the year 1911, together with a report of the Comptroller, to whom on July 6, 1911, this application was referred, recommending an issue of $881.50 for this purpose, and also recommending approval of a schedule for said fund:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of one thousand one hundred and seventy-seven dollars and twenty-five cents ($1,177.25), the proceeds whereof to be used by the Commissioner of Street Cleaning for the purpose of meeting increases in wages of Plumbers and Tinsmiths in Department of Street Cleaning.

Adopted by the Board of Aldermen June 20, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor July 3, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to the resolution adopted by the Board of Aldermen on June 20, 1911, requesting special revenue bonds to the amount of $1,177.25, to be used by the Commissioner of Street Cleaning for the purpose of meeting increases in wages of Plumbers and Tinsmiths in his Department, I report as follows:

The request is to comply with resolutions passed by your Board on February 9 and March 23, 1911, and adopted by the Board of Aldermen on February 28 and April 4, 1911, respectively, establishing the grade of positions of Tinsmith, at $4.75 per diem, and Plumber, at $5.50 per diem, as the prevailing rates.

The $4.75 grade for Tinsmith became effective on March 14, 1911, and the $5.50 grade for Plumber on April 18, 1911. The increases therefor are computed from these dates.

There are seven Tinsmiths, at $4.50 per diem, and five Plumbers, at $5 per diem, in the Department. It will require special revenue bonds to the amount of $881.50 to pay the increases, as follows:

Plumbers, 5 at 60 cents per diem, 196½ days	$491 25
Tinsmiths, 7 at 25 cents per diem, 223 days	390 25
Total	$881 50

I recommend the adoption of the attached resolutions, concurring in the resolutions of the Board of Aldermen to the extent of $881.50, and providing a schedule for the fund. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 20, 1911, requesting an issue of special revenue bonds in the sum of one thousand one hundred and seventy-seven dollars and twenty-five cents ($1,177.25), the proceeds whereof to be used by the Commissioner of Street Cleaning for the purpose of meeting increases in wages of Plumbers and Tinsmiths in the Department of Street Cleaning for the year 1911, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment to the extent of eight hundred and eighty-one dollars and fifty cents ($881.50), and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding eight hundred and eighty-one dollars and fifty cents ($881.50), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for wage increases paid from other than Budget funds in the Department of Street Cleaning, for the year 1911, as follows:

Department of Street Cleaning.

Division of Mechanical Work, Boroughs of Manhattan, Brooklyn and The Bronx—

Wage increases, Regular Employees, to be Paid from Special Revenue Bonds:

Plumbers from $5 to $5.50 per diem (277 days), from April 18.

Tinsmiths from $4.50 to $4.75 per diem (277 days), from March 14.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting an issue of $700 special revenue bonds (subdivision 8, section 188 of the Charter), for the salary of a Stenographer and Typewriter in the Bureau of Licenses, Mayor's Office, from June 1 to December 31, 1911, together with a report of the Comptroller, to whom this application was referred June 29, 1911, recommending an issue of $600 for this purpose, and also recommending approval of a schedule for the fund:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of seven hundred dollars ($700), the proceeds whereof to be used by the Bureau of Licenses, Mayor's Office, for the purpose of paying salary of a Stenographer and Typewriter from June 1 to December 31, 1911.

Adopted by the Board of Aldermen June 13, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor June 26, 1911.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 13, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 13, 1911, the Board of Aldermen adopted a resolution requesting $700 in special revenue bonds, the proceeds to be used by the Bureau of Licenses,, Mayor's office, for the salary of a Stenographer and Typewriter, from June 1 to December 31, 1911. In connection therewith, I report as follows:

The Chief of the Bureau of Licenses states that Edward G. Ostrander has been employed in the Bureau since March, 1910, as Temporary Stenographer and Typewriter, and that his compensation at the rate of $1,200 per annum has been paid from the appropriation for contingencies.

The grade of position of Stenographer and Typewriter, at the $1,200 rate, was established for the Bureau on April 18, 1911, and it is proposed to appoint Mr. Ostrander to the position when an appropriation is available.

The incumbent has received compensation for his temporary services up to July 1. The sum of $600, therefore, will be required for the remainder of the year.

I recommend the adoption of the attached resolutions granting the request to the extent of $600 and approving a schedule for the fund. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 13, 1911, and approved by the Mayor June 26, 1911, requesting an issue of special revenue bonds to the amount of seven hundred dollars ($700), the proceeds whereof to be used by the Bureau of Licenses, Mayor's Office, for the purpose of paying the salary of a Stenographer and Typewriter, from June 1 to December 31, 1911, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment to the extent of six hundred dollars ($600), and for the purpose of providing means therefor the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding six hundred dollars ($600), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for the Mayoralty, Bureau of Licenses, for the year 1911, to take effect July 1, as follows:

The Mayoralty.

Bureau of Licenses—

Salaries, Revenue Bond Force:

Stenographer and Typewriter, 1 at....................................	$1,200 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Comptroller recommending, an issue of $3,200 special revenue bonds (subdivision 8, section 188 of the Charter) for the purpose of paying the salaries of ten additional Trained Nurses at the New York City Training School for Nurses, and for six Nurses at the Metropolitan Hospital Training School, for four months, beginning July 1, 1911, at the rate of $600 each per annum, Department of Public Charities; also recommending approval of a schedule for said fund:

(On July 6, 1911, the resolution of the Board of Aldermen requesting the above appropriation was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of three thousand two hundred dollars ($3,200), the proceeds whereof to be used by the Department of Public Charities for the purpose of paying salaries of sixteen extra Nurses during four months of 1911, beginning July 1, 1911.

Adopted by the Board of Aldermen June 20, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor July 3, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of The Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 13, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Board of Aldermen adopted a resolution requesting $3,200 in special revenue bonds to pay the salaries of ten Trained Nurses at the City Hospital and six at the Metropolitan Hospital, Department of Charities, for four months, beginning July 1, 1911. In connection therewith I report as follows:

The Nurses are to fill vacation periods. The Commissioner states that the Department is unable to obtain a sufficient number of Pupil Nurses to enter the training schools to grant the regular Nurses their vacations. A similar condition in Bellevue Hospital has been provided for by the issue of special revenue bonds to the amount of $8,500.

I recommend the adoption of the attached resolution granting the request and approving schedule for the fund. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 20, 1911, requesting an issue of special revenue bonds in the sum of three thousand two hundred dollars ($3,200), the proceeds whereof to be used by the Department of Public Charities for the purpose of paying salaries of ten additional Trained Nurses at the New York City Training School for Nurses, and six at the Metropolitan Hospital Training School, for four months beginning July 1, 1911, at the rate of $600 per annum each, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New

York to an amount not exceeding three thousand two hundred dollars ($3,200), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for the Department of Public Charities for the year 1911, as follows:

Department of Public Charities.

Institutions, Manhattan and The Bronx, New York City Training School for Nurses—

Wages, Temporary Employees, Revenue Bond Force:	
Trained Nurses, at $600 per annum (40 months)	$2,000 00
Metropolitan Hospital Training School—	
Wages, Temporary Employees, Revenue Bond Force:	
Trained Nurses, at $600 per annum (24 months)	1,200 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Comptroller recommending, an issue of $5,274 special revenue bonds (subdivision 8, section 188 of the Charter), the proceeds to be used by the Comptroller for the payment of rent upon property under lease to The City of New York for the use of the various departments of the County government:

(On July 6, 1911, the resolution of the Board of Aldermen requesting the above appropriation was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That, in pursuance of subdivision 8, section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of $5,274, the proceeds whereof to be used by the Comptroller for the payment of rent upon property under lease to The City of New York for use of the various Departments of the County governments.

Adopted by the Board of Aldermen June 27, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor July 5, 1911.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a resolution of the Board of Aldermen, under date of June 27, 1911, requesting $5,274 in special revenue bonds for the payment of rent of property leased for the use of various departments of the County Governments, I report as follows:

On November 16, 1910, the Commissioners of the Sinking Fund authorized a lease of space in the building located at the northwest corner of Livingston and Court streets, known as 66-74 Court street, Borough of Brooklyn, for use of the District Attorney of Kings County, for a term of five years from January 15, 1911, at an annual rental of $7,536. This lease was duly executed and the District Attorney entered into possession of the premises on May 1, 1911. The rent is to start from that date.

This rent is a county charge, and, as no provision has been made for it in the Rent Budget it will be necessary to provide money for payment of the same from May 1, 1911, to December 31, 1911 (a period of eight months), at the rate of $7,536 a year, or $5,024.

On June 20, 1910, the Commissioners of the Sinking Fund authorized the Comptroller to pay to the Fidelity Storage Warehouse Company rental for storage of ambulances and army wagons (ten in all), at 107 West 96th street, Borough of Manhattan, for use of the Armory Board, at the rate of $5 a month for each vehicle, for a period not exceeding one year from June 1, 1910. The rent for the storage of these ambulances and wagons from June 1, 1910, to December 31, 1910, was paid from an unexpended balance in the Rent Budget for the year 1910. This is also a county charge, and no provision has been made for the payment of the same for the year 1911.

It will therefore be necessary to provide money for the payment of the storage of these ambulances and wagons for the five months in 1911, from January 1 to June 1, at $50 a month, or a total of $250.

The sum required, covering both items, is $5,274.

I recommend the adoption of the attached resolution approving the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 27, 1911, and approved by the Mayor July 5, 1911, requesting an issue of special revenue bonds in the sum of five thousand two hundred and seventy-four dollars ($5,274), the proceeds whereof to be used by the Comptroller for the payment of rent upon property under lease to The City of New York for use of the various departments of the County Governments, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding five thousand two hundred and seventy-four dollars ($5,274), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Comptroller, recommending an issue of $700 special revenue bonds (subdivision 8, section 188 of the Charter), the proceeds to be used by the City Clerk and Clerk of the Board of Aldermen for the purpose of equalizing the salaries of the Assistant Sergeant-at-Arms of the Board of Aldermen, and for the meeting of the increase in salary of the Auctioneer's Process Server in the office of the President of the Board of Aldermen, from July 1, 1911; also recommending approval of a schedule for the fund:

(On June 15, 1911, the resolution of the Board of Aldermen requesting the above appropriation was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of seven hundred dollars ($700), the proceeds whereof to be used by the City Clerk and Clerk of the Board of Aldermen for the purpose of equalizing the salaries of the Assistant Sergeant-at-Arms of the Board of Aldermen, commencing July 1, 1911—$600—and for meeting increase in salary of Auctioneer's Process Server in office of President, Board of Aldermen, commencing July 1, 1911—$100.

Adopted by the Board of Aldermen June 6, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor June 12, 1911. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 6, 1911, the Board of Aldermen adopted a resolution requesting $700 in special revenue bonds, to be used by the City Clerk and Clerk of the Board of Aldermen to equalize the salaries of Assistant Sergeants-at-Arms of the Board and to increase the salary of the Auctioneer's Process Server in the office of the President of the Board. In connection therewith I report as follows:

The request involves increased compensation for six Assistant Sergeants-at-Arms and the Auctioneer's Process Server, from $1,000 to $1,200 per annum each, from

July 1, 1911, to December 31, 1911. A resolution fixing the grades of positions for the increases was adopted by the Board of Aldermen on June 27, 1911.

I recommend the adoption of the attached resolutions granting the request and approving a schedule for the fund. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 6, 1911, and approved by the Mayor June 12, 1911, requesting an issue of special revenue bonds in the sum of seven hundred dollars ($700), the proceeds whereof to be used by the City Clerk and Clerk of the Board of Aldermen for the purpose of equalizing the salaries of the Assistant Sergeant-at-Arms of the Board of Aldermen, commencing July 1, 1911, $600, and for meeting increase in salary of Auctioneer's Process Server in Office of President, Board of Aldermen, commencing July 1, 1911, $100, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding seven hundred dollars ($700), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, The Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for the Board of Aldermen and City Clerk, for the year 1911, as follows:

Board of Aldermen and City Clerk.

General Administration—Salary Increases, Regular Employees, to be paid from special revenue bonds—

Assistant Sergeant-at-Arms, 6, from $1,000 to $1,200	$1,200 00

Office, President, Board of Aldermen.

Salary Increases, Regular Employees, to be paid from special revenue bonds—

Auctioneer's Process Server, 1, from $1,000 to $1,200	$200 00

Which was adopted by the following vote:

Affirmative—The Mayor, The Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following report of the Comptroller recommending that the Board approve of the expenditure of $5,000 for the salaries of two additional Assistant District Attorneys in the office of the District Attorney of Kings County from July 1 to December 31, 1911, and that payment of the same be made by the Comptroller from the proceeds of special revenue bonds issued pursuant to subdivision 7, section 188 of the Charter; also recommending approval of a schedule for the fund:

(On July 6, 1911, a resolution of the Board of Aldermen requesting an issue of $5,000 special revenue bonds (pursuant to subdivision 8, section 188 of the Charter) for the above purpose was referred to the Comptroller.)

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 27, 1911, the Board of Aldermen adopted a resolution requesting special revenue bonds to the amount of $5,000, to be used by the District Attorney of Kings County for the salaries of two additional Assistant District Attorneys, as provided by chapter 309 of the Laws of 1911. In connection therewith, I report as follows:

Chapter 309 of the Laws of 1911 provides in part as follows:

"There shall not be more than twelve Assistant District Attorneys for the County of Kings. The power to appoint and to remove and to adjust, regulate and determine the salaries of Assistant District Attorneys for said county is hereby vested in the District Attorney of said county."

There are ten Assistant District Attorneys in the office. On July 1, 1911, the District Attorney, pursuant to the provisions of the new law, appointed two additional Assistant District Attorneys at $5,000 per annum each. It will be necessary, therefore, to provide $5,000 for the salaries of the two incumbents from July 1 to December 31, 1911.

I recommend the adoption of the attached resolutions approving of the issue of special revenue bonds in the necessary amount, pursuant to the provision of subdivision 7 of section 188 of the Greater New York Charter, and of a schedule for the fund.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the expenditure of a sum not to exceed five thousand dollars ($5,000) for the payment of the compensation of two additional Assistant District Attorneys at the rate of five thousand dollars ($5,000) per annum each, from July 1 to December 31, 1911, in the office of the District Attorney of Kings County, and recommends that payment of the same be made by the Comptroller out of the sale of special revenue bonds of the City of New York, issued pursuant to the provisions of subdivision 7 of section 188 of the Greater New York Charter.

Which was adopted by the following vote:

Affirmative—The Mayor, The Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for employees paid from other than budgetary funds in the office of the District Attorney, Kings County, for the year 1911, to take effect as of July 1, 1911, as follows:

District Attorney, Kings County, Salaries, Revenue Bond Force, Assistant District Attorneys, 2 at $5,000.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Comptroller recommending, an issue of $215,000 special revenue bonds (subdivision 8, section 188 of the Charter), the proceeds to be used by the President of the Borough of Manhattan for the purpose of repairing street pavements, other than stone block, upon which the period of maintenance by the original contractors has expired:

(On June 29, 1911, the resolution of the Board of Aldermen requesting the above appropriation was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of two hundred and fifteen thousand dollars ($215,000), the proceeds whereof to be used by the President of the Borough of Manhattan for the purpose of repairing street pavements, other than stone block, upon which the period of maintenance by the original contractor has expired, in the Borough of Manhattan.

Adopted by the Board of Aldermen June 20, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor June 28, 1911.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Board of Aldermen adopted a resolution requesting $215,000 in special revenue bonds to be used by the President of the Borough of Manhattan for the purpose of repairing street pavements, other than stone block, upon which the period of maintenance by the original contract has expired. In connection therewith I report as follows:

The Budget appropriation for Repairs and Replacements by Contract or Open Order for 1910 was $175,000. The amount actually expended for repairs and replacements that year was $314,000. The deficiency was made up by the transfer of funds saved in other appropriation accounts. The Budget appropriation for Repairs and Replacements for 1911 was $317,000. In support of his request for the $215,000 to replenish the account, the President states the following:

The past winter was unusually harmful to the asphalt pavements, and particularly so to the many miles of sheet asphalt laid upon the old stone block foundation. It will therefore be necessary to lay during the year a much larger yardage of repairs than was originally estimated. This fact, coupled with an unexpected increase in the price of the sheet asphalt repair work, from 77 cents to 97 cents a yard, is responsible for the insufficiency of the present appropriation.

The amount of the existing contract for sheet asphalt repair is 270,000 square yards, of which there had been laid up to the first of June 235,000 yards. It is estimated that the balance of 35,000 yards will be exhausted by the middle of July, and that there will be needed for the balance of the year 175,000 yards.

The amount of the existing contract for asphalt block repair is 20,000 square yards, of which there had been laid up to the first of June 17,500 yards. It is estimated that the balance of 2,500 yards will be exhausted in July, and that there will be needed for the balance of the year 20,000 yards.

The total estimated cost of the above items is $222,280. There is, however, an unused balance in the present appropriation of $6,540, and it is accordingly believed that the amount asked for will be sufficient provision until the end of the present year.

The President states that the account cannot be replenished by transfers, for the reason that no unencumbered balances are available.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 20, 1911, and approved by the Mayor June 28, 1911, requesting an issue of special revenue bonds in the sum of two hundred and fifteen thousand dollars ($215,000), the proceeds whereof to be used by the President of the Borough of Manhattan for the purpose of repairing street pavements, other than stone block, upon which the period of maintenance by the original contractors has expired, in the Borough of Manhattan, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding two hundred and fifteen thousand dollars ($215,000), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen, requesting an issue of $2,500 special revenue bonds (subdivision 8, section 188 of the Charter), the proceeds to be used by the Court of Special Sessions for the purpose of furnishing, equipping and making alterations in the new office of the Probation Department, New York County, in the Ashland Building, 24th street and 4th avenue, together with a report of the Comptroller, to whom on July 6, 1911, this resolution was referred, stating that on June 1, 1911, the Board of Estimate and Apportionment adopted a resolution concurring in the resolution of the Board of Aldermen, adopted April 18, 1911, which authorized the issue of bonds in the above amount and for the same purpose, except that the amount was to be expended by the President of the Borough of Manhattan instead of the Court of Special Sessions, and recommending that the present request be disapproved, but that the resolution adopted June 1, 1911, be amended by substituting the Court of Special Sessions for the President of the Borough of Manhattan:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of two thousand five hundred dollars ($2,500), the proceeds whereof to be used by the Court of Special Sessions for the purpose of furnishing, equipping and making alterations in the new offices of the Probation Department, New York County, in the Ashland Building, 24th street and 4th avenue.

Adopted by the Board of Aldermen June 20, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor, July 3, 1911. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Board of Aldermen adopted a resolution requesting $2,500 in special revenue bonds, "the proceeds whereof to be used by the Court of Special Sessions for the purpose of furnishing, equipping and making alterations in the new offices of the Probation Department, New York County, in the Ashland building, 24th street and 4th avenue." In connection therewith, I report as follows:

On April 18, 1911, the Board of Aldermen adopted a resolution requesting special revenue bonds for the same amount and purposes, but the appropriation was "to be used by the President of the Borough of Manhattan." On June 1, 1911, the Board of Estimate and Apportionment approved of the request, and $2,500 in special revenue bonds was authorized.

An appropriation having already been made for equipping and furnishing the new offices for Probation Officers, there is no necessity for a new authorization. The resolution adopted by the Board of Aldermen on June 20, 1911, can be complied with by amending the resolution adopted by the Board of Estimate and Apportionment on June 1, 1911, by substituting the words "to be used by the Court of Special Sessions" for the words "to be used by the President of the Borough of Manhattan."

It seems that the rooms in the Ashland Building were altered, equipped and furnished for Probation Officers and contracts for the work and fittings awarded to the lowest bidders by the Chief Justice of the Court of Special Sessions. It also appears that the new offices were established, fitted up and in use when the appropriation to meet the cost was made.

Although there may have been a pressing necessity for the establishment of offices for the Probation Officers of the court, it seems that no liabilities should have been incurred before funds were provided.

The Chief Clerk of the Court of Special Sessions states that, as the alterations, equipment and furnishings were for leased premises, and not for a building owned by the City, the work and expenditures did not strictly come under the jurisdiction of the President of the Borough of Manhattan. He also states that through error the resolution adopted by the Board of Aldermen on April 18 provided that the proceeds of the special revenue bonds should be used by the President of the Borough of Manhattan instead of by the Court of Special Sessions.

I recommend that the present request be disapproved, and the adoption of the attached resolution allowing the proceeds of the authorization of June 1, 1911, to be used by the Court of Special Sessions instead of by the President of the Borough of Manhattan.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the request of the Board of Aldermen, as contained in resolution adopted June 20, 1911, as follows:

> "Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of two thousand five hundred dollars ($2,500), the proceeds whereof to be used by the Court of Special Sessions for the purpose of furnishing, equipping and making alterations in the new offices of the Probation Department, New York County, in the Ashland Building, 24th street and 4th avenue."

—be and the same is hereby disapproved.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Estimate and Apportionment on June 1, 1911, as follows:

"Resolved, That the resolution adopted by the Board of Aldermen on April 18, 1911, requesting an issue of special revenue bonds in the sum of two thousand five hundred dollars ($2,500), the proceeds whereof to be used by the President of the Borough of Manhattan for the purpose of furnishing, equipping and making alterations in the new offices of the Probation Department of the Court of Special Sessions, New York County, in the Ashland Building, 24th street and 4th avenue, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of the City of New York to an amount not exceeding two thousand five hundred dollars ($2,500), redeemable from the tax levy of the year succeeding the year of their issue."

—be and the same is hereby amended by striking out the words "the proceeds whereof to be used by the President of the Borough of Manhattan" and inserting in place thereof the words "the proceeds whereof to be used by the Court of Special Sessions."

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Comptroller recommending, the issue of $50,000 special revenue bonds (subdivision 8, section 188 of the Charter), to provide means for regenerating the lawns in Central Park, under the jurisdiction of the Commissioner of Parks, Boroughs of Manhattan and Richmond:

(On July 6, 1911, the resolution of the Board of Aldermen requesting the above appropriation was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of fifty thousand dollars ($50,000), the proceeds whereof to be used by the Commissioner of Parks, Manhattan and Richmond, for the purpose of regenerating the lawns in Central Park.

Adopted by the Board of Aldermen June 20, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor July 3, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of The Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to the resolution adopted by the Board of Aldermen on June 20, 1911, requesting an issue of special revenue bonds to the amount of $50,000, to be used by the Commissioner of Parks, Boroughs of Manhattan and Richmond, for the regeneration of the lawn in Central Park, I report as follows:

The Commissioner, in his estimate for the Corporate Stock Budget, included the proposed restoration of the lawns. The item was not approved by the Corporate Stock Budget Committee for the reason that it was not a proper corporate stock charge, and the Commissioner was advised to make application for special revenue bonds for the purpose.

The Commissioner proposes to have the lawns that are in the worst condition plowed, fertilized and seeded this summer, so that they may be turned over and seeded again in the early spring of 1912.

I recommend the adoption of the attached resolution approving the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 20, 1911, requesting an issue of special revenue bonds in the sum of fifty thousand dollars ($50,000), the proceeds whereof to be used by the Commissioner of Parks, Boroughs of Manhattan and Richmond, for the purpose of regenerating the lawns in Central Park, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding fifty thousand dollars ($50,000), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of Board of Aldermen requesting, and report of the Comptroller recommending, an issue of $1,600 special revenue bonds (subdivision 8, section 188 of the Charter), to provide for the salaries of four additional Keepers at the Penitentiary, Blackwells Island, from July 1 to December 31, 1911, under the jurisdiction of the Department of Correction; also recommending approval of a schedule for the fund:

(On July 6, 1911, the resolution of the Board of Aldermen requesting the above appropriation was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of one thousand six hundred dollars ($1,600), the proceeds whereof to be used by the Department of Correction for the purpose of paying salaries of four additional Keepers at the Penitentiary, Blackwells Island, from July 1, 1911, to and including December 31, 1911, at $800 per annum each.

Adopted by the Board of Aldermen June 27, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor July 5, 1911.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a resolution adopted by the Board of Aldermen on June 27, 1911, requesting special revenue bonds to the amount of $1,600, to be used by the Department of Correction for the salaries of four additional Keepers at the Penitentiary, Blackwells Island, from July 1, 1911, to December 31, 1911, at $800 per annum each, I report as follows:

The Commissioner states he proposes to detail prisoners to make necessary repairs to the sea walls and roads, on both Blackwells and Randalls Islands, and that his present force of Keepers is not large enough to permit him to do this extra outside work. He also states that the need for more Keepers for the work was recognized by the Mayor on a recent visit to the Penitentiary.

I recommend, therefore, the adoption of the attached resolutions concurring in the resolution of the Board of Aldermen, and approving of a schedule for the fund.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 27, 1911, and approved by the Mayor July 5, 1911, requesting an issue of special revenue bonds in the sum of one thousand six hundred dollars ($1,600), the proceeds whereof to be used by the Department of Correction for the purpose of paying salaries of four additional Keepers at the Penitentiary, Blackwells Island, from July 1, 1911, to and including December 31, 1911, at $800 per annum each, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York, to an amount not exceeding one thousand six hundred dollars ($1,600), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for salaries paid from other than Budget funds in the Department of Correction for the year 1911, to be effective as of July 1, as follows:

Department of Correction.

Administration of Institutions, Penitentiary—

Salaries, Regular Employees, Revenue Bond Force:

Keepers, 4 at $800 per annum.. $3,200 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting issue of $1,575 special revenue bonds (subdivision 8, section 188 of the Charter), the proceeds to be used by the President of the Borough of Queens to pay the salaries of three Automobile Enginemen for the last six months of 1911, together with a report of the Comptroller, to whom on July 6, 1911, this application was referred, recommending an issue of $1,312.50 for this purpose for the last five months of 1911, and also recommending approval of a schedule for the fund:

In the Board of Aldermen.

Resolved, That, pursuant to subdivision 8, section 188 of the Charter of The City of New York, the Comptroller be and is hereby authorized to issue special revenue bonds to an amount not exceeding one thousand five hundred and seventy-five dollars ($1,575), proceeds whereof to be expended by the President of the Borough of Queens to pay the salary of three (3) Automobile Enginemen for the last six (6) months of the year 1911 at the rate of $1,050 per annum each.

Adopted by the Board of Aldermen June 27, 1911, three fourths of all the members voting in favor thereof.

Approved by the Mayor July 5, 1911.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 27, 1911, the Board of Aldermen adopted a resolution requesting $1,575 in special revenue bonds to be expended by the President of the Borough of Queens to pay the salary of three Automobile Enginemen for the last six months of the year 1911 at the rate of $1,050 per annum. In connection therewith I report as follows:

On October 7, 1910, the Board of Estimate and Apportionment approved a resolution of the Board of Aldermen for special revenue bonds to the amount of $6,000 for the purchase of three automobiles, one for the use of the President of the Borough, one for use in the Bureau of Highways and one for use in the Bureau of Street Cleaning and the Topographical Bureau.

The President states that the automobiles have been ordered, and that the request is to provide for automobile enginemen to drive them. The proposed rate of $1,050 is the customary compensation in other city departments. It is proposed to appoint the incumbents on August 1, 1911. The sum of $1,312.50, therefore, is necessary.

I recommend the adoption of the attached resolution, granting the request to the extent of $1,312.50, and approving a schedule for the fund.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 27, 1911, and approved by the Mayor July 5, 1911, requesting an issue of special revenue bonds in the sum of one thousand five hundred and seventy-five dollars ($1,575), the proceeds whereof to be expended by the President of the Borough of Queens to pay the salary of three Automobile Enginemen for the last six (6) months of the year 1911, at the rate of $1,050 per annum each, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment to the extent of one thousand three hundred and twelve dollars and fifty cents ($1,312.50), to provide for the salaries of three Automobile Enginemen for the last five (5) months of 1911, and for the purpose of providing means therefor the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding one thousand three hundred and twelve dollars and fifty cents ($1,312.50), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules of salaries paid from other than budget funds in the office of the President of the Borough of Queens for the year 1911, to take effect August 1, as follows:

President, Borough of Queens, Salaries, Special Revenue Bond Force. Automobile Enginemen, 3 at $1,050 per annum.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented a report of the Comptroller, recommending the issue of $6,065.51 special revenue bonds (subdivision 8, section 188 of the Charter), to provide for the salaries of two Pathologists from July 1 to December 31, 1911, at $1,500 each per annum, and for increases in wages of Deckhands from $500 to $720 per annum, from May 17 to December 31, 1911, and for Steamfitters from $5 to $5.50 a day, from March 15 to December 31, 1911, Department of Public Charities; also recommending approval of a schedule for the fund.

Which was laid over until the meeting of July 27, 1911.

(On July 6, 1911, the resolution of the Board of Aldermen requesting the above appropriation was referred to the Comptroller.)

The Secretary presented the following communication from the Board of Education requesting, and report of the Comptroller recommending, approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimates of cost for alterations and additions to the gas and electric lighting work in connection with the fireproof stairways, etc., in Public Schools 24, 41, 52 and 70, Borough of Manhattan, Department of Education, at $250, $200, $200 and $200, respectively:

Board of Education, Park Avenue and 59th street, New York, July 7, 1911.

Hon. W. A. PRENDERGAST, *Comptroller:*

Dear Sir—I beg to advise you of the receipt of a communication from Mr. C. B. J. Snyder, Superintendent of School Buildings, under date of July 7, reading as follows:

"I am forwarding herewith plans and specifications for alterations and additions to the gas and electric lighting work in connection with the fireproof stairways, etc., in Public Schools 24, 41, 52 and 70, Borough of Brooklyn, for transmission to the Comptroller, to be presented to the Board of Estimate and Apportionment in compliance with the resolution adopted by that Board on January 5, 1911.

"The plans and specifications have been returned by the Department of Water Supply, Gas and Electricity, approved, as noted on same."

The plans and specifications referred to in the above quoted communication are transmitted herewith. Respectfully yours,

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 7, 1911, the Board of Education requested approval of plans, specifications and estimates of cost for alterations and additions to the gas and electric lighting work in connection with the fireproof stairways, etc., in the public schools in the Borough of Brooklyn, as follows:

	Approximate Cost.
Public School 24	$250 00
Public School 41	200 00
Public School 52	200 00
Public School 70	200 00

Their plans and specifications cover the alterations and additions to the gas and electric lighting, made necessary by the replacement of wooden stairways with fireproof stairways. The plans and specifications for the construction of the new stairways were approved by the Board of Estimate and Apportionment on June 11, 1911. The Department of Water Supply, Gas and Electricity has approved the plans and specifications for the gas and electric lighting work, and an examination of them shows that they are satisfactory and the estimates of cost reasonable.

The cost of the work is chargeable to the fund C-DE-80, Providing Fire Protection, Borough of Brooklyn. There is a sufficient balance in the account for the cost of the work.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted on June 3, 1910, hereby approves the plans, specifications and estimates of cost for alterations and additions to the gas and electric lighting work in connection with the fireproof stairways, etc., in public schools in the Borough of Brooklyn, under the jurisdiction of the Department of Education, as follows:

Public School 24, estimated cost, two hundred and fifty dollars ($250).
Public School 41, estimated cost, two hundred dollars ($200).
Public School 52, estimated cost, two hundred dollars ($200).
Public School 70, estimated cost, two hundred dollars ($200).

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Board of Education requesting, and report of the Comptroller recommending, approval, pursuant to resolution adopted June 3, 1910, of the specifications and estimates of cost by items, and not in the total, for furniture for new Public School 167, Brooklyn:

Board of Education, Park Avenue and 59th Street, New York, June 27, 1911.

Hon. Wm. A. Prendergast, *Comptroller:*

Dear Sir—I beg to advise you of the receipt of a communication from Mr. C. B. J. Snyder, Superintendent of School Buildings, under date of June 27, 1911, reading as follows:

"I am forwarding herewith specifications for furniture for new Public School 167, Borough of Brooklyn, for transmission to the Comptroller to be presented to the Board of Estimate and Apportionment, in accordance with the resolution adopted by that Board on January 5, 1911:

	Approximate Cost.
Item 1	$1,780 00
Item 2	1,830 00
Item 3	1,750 00
Item 4	1,115 00
Item 5	1,200 00
Item 6	11,390 00
	$19,175 00

"I beg to call your attention to the approximate costs, which are somewhat over the appropriation. We will advertise and award up to the limit of the appropriation."

The specifications referred to in the foregoing communication are transmitted herewith. Respectfully yours,

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 10, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 27, 1911, the Board of Education requested approval of specifications and estimates of cost for furniture for new Public School 167, Borough of Brooklyn, as follows:

	Approximate Cost.
Item 1	$1,780 00
Item 2	1,830 00
Item 3	1,750 00
Item 4	1,225 00
Item 5	1,200 00
Item 6	11,390 00
	$19,175 00

Item 1 includes umbrella stands, kindergarten tables and chairs, sand tray, reading stand, specimen cases, bookcases, stools, folding screens, mirrors, couches, rugs, carpets, filing cabinets, key cabinet, shop closet, lumber rack, apparatus cabinet, refrigerator, fire extinguishing apparatus and work benches.

Item 2 is for slate blackboards.

Item 3 is for opera chairs.

Item 4 is for gymnasium apparatus.

Item 5 is for window shades.

Item 6 includes pupils' desks and seats, teachers' desks and chairs, tables, etc.

All the furniture specified under item 6 is to be furnished by the State Commission on Prisons. The Commission has given a release for other furniture specified, which it cannot furnish.

The specifications are satisfactory and the estimates of cost reasonable.

The cost of the work is to be charged to the corporate stock fund, C-DE-97B, for Furniture Work, Public School 167, Brooklyn, approved by the Board of Estimate and Apportionment on January 26, 1911.

The total estimated cost of the furniture is $19,175, which is $1,550 in excess of the appropriation. It is proposed to advertise and award this contract by items to the extent of the available appropriation. Should additional funds be necessary, the exact amount, as shown by the bids, will be asked for.

I recommend the adoption of the attaached resolution granting the request .

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted June 3, 1910, hereby approves the specifications and estimates of cost by items, and not in total, for furniture for new Public School 167, Borough of Brooklyn, under the jurisdiction of the Department of Education, as follows:

Item 1, estimated cost, one thousand seven hundred and eighty dollars ($1,780).
Item 2, estimated cost, one thousand eight hundred and thirty dollars ($1,830).
Item 3, estimated cost, one thousand seven hundred and fifty dollars ($1,750).
Item 4, estimated cost, one thousand two hundred and twenty-five dollars ($1,225).

Item 5, estimated cost, one thousand two hundred dollars ($1,200).

Item 6, estimated cost, eleven thousand three hundred and ninety dollars ($11,390).

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting an issue of $845 special revenue bonds (subdivision 8, section 188 of the Charter), the proceeds to be used by the Department of Education for the purpose of furnishing certain supplies and equipment for classes of anemic children, together with a report of the Comptroller, to whom on July 6, 1911, this resolution was referred, recommending that said request be disapprovel, as this appropriation is not urgent and may be held in abeyance for consideration with the 1912 Budget:

(On July 6, 1911, the resolution of the Board of Aldermen, as above, was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of eight hundred and forty-five dollars ($845), the proceeds whereof to be used by the Department of Education for the purpose of furnishing certain supplies and equipment for classes of anaemic children.

Adopted by the Board of Aldermen June 27, 1911, three fourths of all the members voting in favor thereof.

Approved by the Mayor July 5, 1911. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 27, 1911, the Board of Aldermen requested special revenue bonds in the sum of $845, the proceeds to be used by the Department of Education for the purpose of furnishing certain supplies and equipment for classes of anaemic children. In connection therewith I report as follows:

In the 1910 Budget, the sum of $6,500 was appropriated for fitting up classrooms for anaemic or tubercular children. In this account, No. 1037, there was a balance on July 12, 1911, as shown by the books in the Department of Finance, of $2,141.30. It is stated that the Board of Superintendents delayed making up their specifications for the supplies and equipment until it was too late to award a contract in 1910. For this reason special revenue bonds have been requested for items for which funds were provided in the 1910 Budget.

It would appear, therefore, that the need for equipping rooms for anaemic children is not very urgent, and may be held in abeyance for consideration in the 1912 Budget.

I recommend that the request for special revenue bonds be not approved.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the request of the Board of Aldermen as contained in resolution adopted June 27, 1911, and approved by the Mayor July 5, 1911, as follows:

> "Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of eight hundred and forty-five dollars ($845), the proceeds whereof to be used by the Department of Education for the purpose of furnishing certain supplies and equipment for classes of anaemic children."

—be and the same is hereby disapproved.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary was directed to transmit copies of the report of the Comptroller to the Board of Aldermen and to the Board of Education.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Comptroller recommending, an issue of $319.50 special revenue bonds (subdivision 8, section 188 of the Charter), to provide for the increase in the wages of one Foreman of Plumbers, from $4 to $5.50 a day, from April 18 to December 31, 1911, in the Bureau of Public Buildings and Offices, Office of the President of the Borough of Queens, also recommending approval of a schedule for the fund:

(On July 6, 1911, the resolution of the Board of Aldermen requesting the above appropriation was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That, pursuant to subdivision 8, section 188 of the Charter of The City of New York, the Comptroller be and is hereby authorized to issue special revenue bonds to an amount not exceeding three hundred and nineteen dollars and fifty cents ($319.50), the proceeds whereof to be used by the President of the Borough of Queens to increase the salary of William L. Ryan, Foreman of Plumbers, Bureau of Public Buildings and Offices, Borough of Queens, for two hundred and thirteen (213) days at one dollar and fifty cents ($1.50) per day, effective April 18, 1911, pursuant to resolution of the Board of Estimate and Apportionment of March 23, 1911, approved and agreed in by resolution of the Board of Aldermen of April 4, 1911, becoming a law, without the approval or disapproval of his Honor the Mayor, April 18, 1911, establishing in all City Departments the grade of position of Plumber at a salary of $5.50 per diem.

Adopted by the Board of Aldermen June 20, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor July 3, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 13, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Board of Aldermen adopted a resolution requesting $319.50 in special revenue bonds, to be expended by the President of the Borough of Queens to increase the wages of one Foreman of Plumbers, from $4 to $5.50 a day. In connection therewith I report as follows:

On March 23, 1911, the Board of Estimate and Apportionment adopted a resolution approving of the establishment in all City Departments of the grade of position of Plumber, at $5.50 a day. The rate was fixed by the Board of Aldermen on April 4, 1911, and become effective on April 18, 1911.

The request is to provide funds to pay William L. Ryan, Foreman of Plumbers, in the Bureau of Public Buildings and Offices, at the increased rate from April 18 to the end of the year.

I recommend the adoption of the attached resolution granting the request and approving a schedule for the fund. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 20, 1911, requesting an issue of special revenue bonds in the sum of three hundred and nineteen dollars and fifty cents ($319.50), the proceeds whereof to be used by the President of the Borough of Queens to increase the wages of William L. Ryan, Foreman of Plumbers, Bureau of Public Buildings and Offices, Borough of Queens, for two hundred and thirteen (213) days, at one dollar and fifty cents ($1.50) per day, effective April 18, 1911, pursuant to resolution of the Board of Estimate and Apportionment of March 23, 1911, approved of and concurred in by resolution of the Board of Aldermen of April 4, 1911, becoming a law April 18, 1911, establishing in all City departments the grade of position of Plumber, at a rate of $5.50 per diem, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding three hundred and nineteen dollars and fifty cents ($319.50), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Alder-

men and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule of wages paid from other than Budget funds in the office of the President of the Borough of Queens for the year 1911, to take effect April 18, as follows:

Bureau of Public Buildings and Offices.

Maintenance—

Wage Increase, Regular Employees:

Foreman of Plumbers, 1 from $4 to $5.50 per diem (302 days.)

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting, and report of the Comptroller recommending, an issue of $473.77 special revenue bonds (subdivision 8, section 188 of the Charter), the proceeds to be used by the President of the Borough of The Bronx for the purpose of liquidating a bill for services rendered by the Department of Docks and Ferries for boring work:

(On July 6, 1911, the resolution of the Board of Aldermen requesting the above appropriation was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of four hundred and seventy-three dollars and seventy-seven cents ($473.77), the proceeds whereof to be used by the Borough President of The Bronx for the purpose of paying bill of Department of Docks and Ferries for boring work.

Adopted by the Board of Aldermen June 20, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor July 3, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 20, 1911, the Board of Aldermen adopted a resolution requesting special revenue bonds to the amount of $473.77, the proceeds to be used by the President of the Borough of The Bronx to liquidate a bill for services rendered by the Department of Docks and Ferries. In connection therewith I report as follows:

The funds are to reimburse the Department of Docks and Ferries for expenditures incurred in connection with borings made for the President from March 6 to March 25, 1911. The necessity for the work of a bore and the force to operate it arose from an effort to ascertain the approximate cost for extending a sewer at White Plains avenue and the East River, from a point about 100 feet north of the bulkhead line to a considerable distance beyond the pier line, for a sewer extension to be paid for by assessment.

As the President had no equipment for making borings, the Department of Docks and Ferries loaned an apparatus and force. The itemized bill is as follows:

For use of borer, "Woodcock," from March 6 to 25, 1911:

18⅞ days, Engineer, at $4.50	$84 94
36 2-8 days, Dock Builders, at $3.50	126 88
94⅛ days, Laborers, at $2.50	235 33
Carfares	8 85
160 feet pipe, at .0945	15 12
1 Stillson wrench	69
23 couplings	1 96
	$473 77

I recommend the approval of the request by the adoption of the attached resolution.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 20, 1911, requesting an issue of special revenue bonds in the sum of four hundred and seventy-three dollars and seventy-seven cents ($473.77), the proceeds whereof to be used by the President of the Borough of The Bronx, for the purpose of paying bill of the Department of Docks and Ferries for boring work, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding four hundred and seventy-three dollars and seventy-seven cents ($473.77), redeemable from the tax levy of the year succeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting, communication from the Board of Education relative to, and report of the Comptroller recommending, an issue of $6,300 special revenue bonds (subdivision 8, section 188 of the Charter), to replenish the appropriation made to the Department of Education for the year 1911, entitled "Special School Fund—Repairs and Replacements by Contract or Open Order—General Repairs—1239—Borough of Queens":

(On July 6, 1911, the resolution of the Board of Aldermen requesting the above appropriation was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of six thousand three hundred dollars ($6,300), the proceeds whereof to be used by the Department of Education for the purpose of replenishing fund for general repairs.

Adopted by the Board of Aldermen June 27, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor July 5, 1911. P. J. SCULLY, Clerk.

To the Board of Education:

The Committee on Finance respectfully reports that it is in receipt of the following communication:

"June 6, 1911.

"Hon. John Greene, *Chairman, Committee on Finance:*

"Dear Sir—I have the honor to advise you that at a meeting of the Committee on Buildings held on May 29, 1911, it was ordered that the Committee on Finance be requested to take the necessary steps to procure an immediate issue of special revenue bonds, in the sum of $6,300, in order to replenish the fund for general repairs, which will be utilized, in part, for the carrying out of the contracts for heating and ventilating apparatus and temperature regulation in Public School 7, Queens.

"The facts in relation to the matter are as follows:

"In the year 1910, through action by the Board of Estimate and Apportionment and the Board of Aldermen, $43,900, corporate stock, was made available for the equipment, including heating and ventilating and electric work of Public School 7, addition, Queens.

"On April 13, 1911, a resolution was adopted by the Board of Estimate and Apportionment approving the plans, specifications and estimates of cost for heating and ventilating work in said above-mentioned school building, and stating that $26,000 of the cost of the heating and ventilating apparatus is chargeable to corporate stock, and $5,000 to the Budget account for repairs and replacements, and that $3,000 of the cost of temperature regulation is chargeable to corporate stock, and $1,300 to the Budget account for repairs and replacements.

"There will, therefore, be a deficit of $6,300 in the general repair account, and the replenishment of that account by the immediate issue of special revenue bonds becomes absolutely essential. Respectfully yours,

"A. EMERSON PALMER, Secretary, Board of Education."

The following resolution is submitted for adoption:

Resolved, That the Board of Aldermen be and it is hereby respectfully requested to adopt a resolution requesting the Board of Estimate and Apportionment to authorize the issue of special revenue bonds to the amount of six thousand three hundred dollars ($6,300), pursuant to the provisions of subdivision 8 of section 188 of the revised Charter, for the purpose of replenishing the fund for general repairs, which will be utilized, in part, for the carrying out of the contracts for heating and ventilating apparatus and temperature regulation in Public School 7, Borough of Queens, and that the Board of Estimate and Apportionment be and it is hereby respectfully requested to authorize such issue upon the request of the Board of Aldermen.

A true copy of report and resolution adopted by the Board of Education on June 14, 1911. A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 27, 1911, the Board of Aldermen requested special revenue bonds in the sum of $6,300, the proceeds to be used by the Department of Education to replenish the fund for general repairs. In connection therewith I report as follows:

In the Corporate Stock Budget for 1910, $43,900 was appropriated for the equipment, including heating, ventilating and electric work, for Public School 7, addition, Queens. On April 13, 1911, the Board of Estimate and Apportionment approved the plans, specifications and estimate of cost for heating and ventilating Public School 7, but decided that the estimated cost, in the sum of $6,300, was properly chargeable to the Budget allowance for repairs and replacements. The expenditure will cause a deficit in the amount in the general repairs allowance for the Borough of Queens, for 1911, and the replenishment therefore is proposed by the issue of special revenue bonds.

I recommend that the request be granted by the adoption of the attached resolution.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 27, 1911, and approved by the Mayor July 5, 1911, requesting an issue of special revenue bonds in the sum of six thousand three hundred dollars ($6,300), to replenish the appropriation made to the Department of Education for the year 1911, entitled and as follows:

Special School Fund.

Maintenance, Repairs and Replacements by Contract or Open Order, General Repairs—

1239. Borough of Queens.

—be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding six thousand three hundred dollars ($6,300), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the Justice of the Supreme Court, Richmond County, requesting, and report of the Comptroller recommending, that the Board approve of the expenditure of $292 to provide for the increased compensation of two Court Attendants in the Supreme Court, Richmond County, from June 1 to December 31, 1911, and that the payment of the same be made by the Comptroller from the proceeds of special revenue bonds issued pursuant to subdivision 7, section 188 of the Charter; also recommending approval of a schedule for the fund:

New Brighton, Richmond County, N. Y., July 7, 1911.

Hon. William A. Prendergast, *Comptroller,* City of New York:

Dear Sir—There being no fund available from which to pay the increased salaries of the Court Attendants in the Supreme Court in Richmond County, and to conform to resolution adopted by the Board of Estimate and Apportionment June

15, 1911, which resolution provides: The said resolution provides for an increase of the salaries of two Court Attendants in the Supreme Court in and for the County of Richmond—one from $1,500 to $1,800 per annum, and one from $1,000 to $1,200 per annum, beginning June 1, 1911.

I respectfully request that the following resolution be adopted:

"Resolved, That, pursuant to subdivision 7, chapter 188 of the Greater New York Charter, the Comptroller be and is hereby authorized to issue special revenue bonds in the sum of two hundred and ninety-two dollars ($292), the proceeds of the same to be for the payment of the increased salaries of two Court Attendants in the Supreme Court in Richmond County, beginning June 1, 1911."

Respectfully yours,

LESTER W. CLARK, Justice, Supreme Court, Richmond County, New York.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 7, 1911, the Justice of Supreme Court, Richmond County, requested an issue of special revenue bonds in the sum of $292, for the payment of increased compensation for two Court Attendants from June 1 to December 31, 1911. In connection therewith I report, as follows:

On June 15, 1911, the Board of Estimate and Apportionment, pursuant to the provisions of section 354 of the Judiciary Law, approved of the action of the Justice in fixing the compensation of two Attendants in his court at $1,200 and $1,800 per annum, respectively. The approval was to be effective as of June 1, 1911. The present compensation of the Attendants is $1,000 and $1,500, respectively. It will be necessary, therefore, to provide $292 for the increases from June 1 to the end of the year.

I recommend the adoption of the attached resolution approving of the issue of special revenue bonds in the necessary amount, pursuant to the provisions of subdivision 7 of section 188 of the Greater New York Charter, and of a schedule for the fund. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the expenditure of a sum not to exceed two hundred and ninety-two dollars ($292) for the increased compensation of one Court Attendant at eighteen hundred dollars ($1,800) per annum, and one Court Attendant at one thousand two hundred dollars ($1,200) per annum, from June 1 to December 31, 1911, in the office of the Supreme Court, Richmond County, and recommends that payment of the same be made by the Comptroller out of the sale of special revenue bonds of The City of New York, issued pursuant to the provisions of subdivision 7 of section 188 of the Greater New York Charter.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for employees paid from other than budgetary funds in the office of the Supreme Court of Richmond County for the year 1911, to take effect June 1, as follows:

Supreme Court, Richmond County.

Salaries, Revenue Bond Force—

Court Attendant, 1 at	$1,800 00
Court Attendant, 1 at	1,200 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

The Secretary presented the following communication from the District Attorney, New York County, relative to, and report of the Comptroller recommending, the approval of the expenditure of $10,842 for the compensation of four additional Assistant District Attorneys, from September 1 to December 31, 1911, and for the purchase of desks and other necessary supplies in the office of said District Attorney, and that payment of same be made from the proceeds of special revenue bonds issued, pursuant to subdivision 7, section 188 of the Charter; also recommending approval of a schedule for the fund:

(On July 6, 1911, the request of the District Attorney of New York County for an appropriation of $12,212 to carry out the provisions of chapters 115 and 516 of the Laws of 1911, providing for additions to the professional and administrative force of his office, was referred to the Comptroller.)

District Attorney's Office, County of New York, June 29, 1911.

To the Honorable, the Board of Estimate and Apportionment, City of New York:

Gentlemen—I have the honor to respectfully request that, pursuant to the provisions of subdivision 7, section 188 of the Greater New York Charter, your honorable Board authorize the Comptroller to issue special revenue bonds to the amount of twelve thousand two hundred and twelve dollars, to be used in making additions to the professional and administrative force of this office and for the purchase of desks and other office supplies, which are actually necessary in order to carry out the provisions of chapters 115 and 516 of the Laws of 1911. The enactment of these laws provides for two additional Stenographers to the Grand Jury, and four Assistant District Attorneys, making a total of three Stenographers to the Grand Jury and increasing the number of statutory Assistant District Attorneys from ten to fourteen.

Owing to the large increase in public business and to obtain means of expediting the work of this office, it was at my request that the above bills were introduced, as it required an act of the Legislature to amend the laws in question in order to secure the desired relief.

The Criminal Courts of New York County, unlike those of adjoining counties, which close during some of the summer months, sit continuously during the entire year, and during the coming months of July, August and September, it will be necessary to have at least three Courts in continuous session. As an illustration of this increase in criminal business, I desire to state that formerly one Grand Jury in continuous session and occasionally a special Grand Jury, was sufficient to dispose of the criminal business of this County, but it now necessitates two Grand Juries in continuous session, and even with their aid, it is impossible at times to cope with the situation. For instance, there have been months when it was essential to have three or four Grand Juries and on one occasion five Grand Juries in session during the past year.

It is quite evident from the foregoing conditions that it is a physical impossibility for one Stenographer to the Grand Jury to be present and take the proceedings of three or more Grand Juries on the same day, and, therefore, in order to relieve this situation and avoid legal complications, it became necessary to increase the number of Grand Jury Stenographers from one to three.

In relation to the qualification of the Stenographer to the Grand Jury, I would state that, in order to fill this position acceptably he must not only be thoroughly trustworthy, but also an expert, with extensive experience, competent to take testimony rapidly and transcribe same with extreme accuracy, and to obtain a Stenographer with these qualifications the compensation to be paid him is $10 per diem while actually engaged in taking testimony before the Grand Jury and fees for copies of testimony furnished to the District Attorney (chapter 348, Laws of 1884.)

It has been customary for your Board to set aside annually an appropriation to provide for the payment of such Stenographer's compensation and fees, which appropriation is merely an estimate, for it is hardly possible for any one to state accurately in advance the number of days the Grand Jury will convene during the year, or the number of Grand Juries that will be required to dispose of the public business during said period.

The following itemized statement shows how it is proposed to expend this appropriation:

Increase of Force.

Salaries.		Amount Required for Four Months, September 1 to December 31, 1911.
Four additional Assistant District Attorneys, at $7,500 each per annum (chapter 516, Laws of 1911)		$10,000 00
Two additional Grand Jury Stenographers (chapter 115, Laws of 1911.) Estimated amount of compensation and fees as follows:		
Stenographer to second Grand Jury (77days), at $10 per diem	$770 00	

Stenographer to third Grand Jury (30 days), at $10 per diem.	300 00	
Estimated amount of fees for both additional Grand Jury Stenographers	300 00	
Total estimated amount of compensation and fees for two additional Grand Jury Stenographers		1,370 00
Total Estimated amount for salaries and fees		$11,370 00

Office Supplies.

4 roll top desks, at $41.50 each	$166 00	
4 revolving office chairs, at $8.50 each	34 00	
4 steel safes, at $100 each	400 00	
2 roll top typewriting desks, at $40 each	80 00	
2 typewriting machines, at $81 each	162 00	
		842 00
Total amount requested for salaries and office supplies		$12,212 00

In view of the facts mentioned, I would respectfully request that your honorable Board grant the appropriation asked for, the same to take effect September 1, 1911.

Very truly yours, CHARLES S. WHITMAN, District Attorney.

Assembly, No. 1740; Chapter 516.

AN ACT to amend chapter four hundred and ten of the laws of eighteen hundred and eighty-two, entitled "An act to consolidate into one act and to declare the special and local laws affecting public interests in The City of New York," relative to assistant District Attorneys in the County of New York.

Became a law June 28, 1911, with the approval of the Governor; passed, three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Section fifteen hundred and three of chapter four hundred and ten of the laws of eighteen hundred and eighty-two, entitled "An act to consolidate into one act and to declare the special and local laws affecting public interests in The City of New York," as amended by chapter two hundred and ninety-five of the laws of nineteen hundred and ten, is hereby amended to read as follows:

Section 1503. The District Attorney of the County of New York shall receive for his services as such District Attorney a yearly salary of fifteen thousand dollars and shall be paid in equal monthly payments. There shall be fourteen assistant District Attorneys for said county, who shall each receive a yearly salary of seven thousand five hundred dollars. The office is so far local as to require the residence of the District Attorney and his assistants within the County.

Section 2. This act shall take effect immediately.

State of New York, Office of the Secretary of State, ss.:

I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom, and the whole of said original law.

Given under my hand and the seal of office of the Secretary of State, at the City of Albany, this thirtieth day of June in the year one thousand nine hundred and eleven. JOSE PIDGEON, Second Deputy Secretary of State.

[SEAL]

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 29, 1911, the District Attorney of New York County, requested an issue of special revenue bonds in the amount of $12,212 for the compensation of additional employees and the purchase of desks and other office furniture, pursuant to the provisions of chapter 115 and 516 of the Laws of 1911. In connection therewith I report as follows:

The following itemized statement shows how it is proposed to expend the appropriation:

Increase of Force.

Salaries.		Amount Required for Four Months, September 1 to December 31, 1911.
4 additional assistant District Attorneys, at $7,500 each per annum (chapter 516, Laws of 1911)		$10,000 00
2 additional Grand Jury Stenographers (chapter 115, Laws of 1911.) Estimated amount of compensation and fees as follows:		
Stenographer to second Grand Jury, 77 days, at $10 per diem	$770 00	
Stenographer to third Grand Jury, 30 days, at $10 per diem..	300 00	
Estimated amount of fees for both additional Grand Jury Stenographers	300 00	
Total estimated amount of compensation and fees for two additional Grand Jury Stenographers..	1,370 00	
Total estimated amount for salaries and fees		$11,370 00
Office Supplies.		
4 roll top desks, at $41.50 each	$166 00	
4 revolving office chairs, at $8.50 each	34 00	
4 steel safes, at $100 each	400 00	
2 roll top typewriting desks, at $40 each	80 00	
2 typewriting machines, at $81 each	162 00	
		842 00
Total amount requested for salaries and office supplies		$12,212.00

The District Attorney states the following:

"The appropriation is necessary to carry out the provisions of chapter 115 and 516 of the Laws of 1911. The enactment of these laws provides for two additional Stenographers to the Grand Jury, and four Assistant District Attorneys, making a total of three Stenographers to the Grand Jury and increasing the number of statutory Assistant District Attorneys from ten to fourteen.

"Owing to the large increase in public business and to obtain means of expediting the work of this office, it was at my request that the above bills were introduced, as it required an act of the Legislature to amend the laws in question in order to secure the desired relief.
